It would perhaps entail too much of a man's time to make a regular personal canvass of the factories. Some firms do it and find that the results amply repay them. It would, however, keep a man out of the store a considerable part of the time, and, on that score, is not generally adopted.

There are ways, however, of reaching the manufacturer and keeping in touch with him. Pow & Wilcox, of Tillsonburg, have found one way. Here is an illustration of the methods adopted by this enterprising firm. Some few weeks ago a large consignment of files was received. Mr. Pow at once telephoned the manager of a large local factory.

"We have just got in a new line of files," he said. "I believe they would suit you. I am sending a boy up with three or four as samples."

The boy at once took the files to the factory. They were used during the next few days, and found to be quite satisfactory. An order for forty-five more was sent to the store.

The same plan is used in pushing the sale of all similar goods. Results count with the manufacturer and, if it is demonstrated to him that a certain article is all that is claimed for it, he will readily buy and pay the price asked.

Pow & Wilcox do a little canvassing as well for glass sales, and have secured a number of good orders which would not otherwise have come their way; for that matter, would not have been placed at all. That is the main advantage of outside canavssing. It does not take business from competitors, but rather makes business on its own account.

Glass for Factories.

Glass is always more or less in demand around factories. Windows get broken regularly, and the constant alterations and additions being made in large plants necessitate changes in the lighting arrangements as well. In a great many cases, however, the matter is not given very much attention. When a window is smashed, one of the workmen remedies matters by stuffing in a bundle of rags or nailing a board over the aperture. It may be left that way for months or years.

The opportunity thus presented for a good sale of glass occurred to a hardwareman one day when passing a local factory. Being a believer in prompt action, he went to the office and saw the manager.

"Coming past the works just now," he said, "I noticed quite a number of panes of glass which had been broken and not replaced. Let me go through the factory and I will find out what is needed to replace all broken panes and give you a figure on it."

"Very well," said the manager. "It's a matter that should have been attended to long ago."

The hardwareman carried out his inspection, and got a big order out of it. In addition, he made an arrangement with the manager to supply the factory with all glass in future.

Paint is Needed.

There is considerable painting to be done around most factories at this season of the year. This gives an opportunity for the hardwareman to add to his paint customers. The factory trade in this department is well worth going after.

Makes New Business.

Factory business has the double advantage of bringing the name of the hardware firm continually before the employes in the shop. They know where the tools they handle come from. It frequently happens that the ordering of supplies is left with certain men in each department. They, therefore, get to know the one firm well, and are likely to deal there themselves, particularly if the goods supplied to the factory give full satisfaction. This is one respect in which factory trade must be carefully watched. Never by any chance should poor quality goods be sent out. Too much caution cannot be exercised on this score. A poor tool will give the to John McClary, referring to him as "London's greatest captain of industry." He then read the following address:

John McClary, Esquire, President The McClary Manufacturing Company.

Dear Sir,—We, the members of the London Board of Trade, consider it a privilege to have you as our guest today to give us an opportunity to place on record an expression of our sincere regard for you, and our sense of the great benefits that have accrued to London through your energy, enterprise, and foresight.

Your name, which is known throughout the length and breadth of this Dominion and far beyond its boundaries, is synonymous with business ability, success, and integrity.

It was fortunate indeed for London that you chose it as the birthplace and seat of your great undertaking.

You have never wavered in your loyalty to this city and it has had the full advantage of the marvelous development of your industry.

Beginning in 1848 in a humble way, you laid the foundation broad and deep, and have reared a gigantic industrial fabric, the most extensive of its kind under the British flag. Your establishment, which now covers over 15 acres and employs over 1,300 people, has been the greatest single factor in making London the important industrial centre that it is.

There is no public honor which your fellow citizens would not have bestowed upon you had you not preferred to confirm a bad name with every man in that establishment. It will get around that "Brown's tools don't amount to much," and a statement of this kind circulating among scores of men can do even the best established business an incalculable amount of harm.

On the other hand, the supplying of satisfactory goods is the very best advertisement possible. Men like to work with good tools. When they are suited they express their satisfaction to shopmates. The impression spreads, and Brown & Co. reap the benefit in the shape of increased business.

The article on tinshop management which appeared in last week's issue demonstrates what could be done in the way of working up business among the factories in that line. There is just as good an opportunity in general hardware, in glass, paint and leather belting. It would be well worth the time of the hardwareman who is located in a manufacturing centre to cater directly to the factory trade.

A COMPLIMENTARY BANQUET.

London, May 6.—John McClary, president and founder of the McClary Manufacturing Company was honored by the members of the London Board of Trade at a complimentary banquet on Friday. The function was held at the Tecumseh House and was largely attended. President H. T. Reason presided and in his opening address paid a glowing tribute

centrate your great abilities on your business. Nevertheless you have always taken a deep interest in the public affairs of this city and it has had the benefit of your wise counsel in many emergencies.

We rejoice that you have lived to see the wonderful results of your own handiwork, and we sincerely hope you will long be spared to enjoy the fruits of your labor.

A copy of this address will be entered on the records of the board, as a testimony of the esteem and warmest good wishes of all your brother members.

Signed on behalf of the London Board of Trade.

HARRY T. REASON, President.
JOHN I. A. HUNT, Vice-President.
JOHN A. NELLES, Secretary.

Eulogistic speeches were made by Sir George Gibbon and Mayor Beathe and Mr. McClary then responded. In his address, he traced the development of Canada and of London in particular, dwelling on the problems of protection in its relation to industry.

Merger Negotiations Reaching Definite Point

It is Said That Arrangements Will be Completed by End of the Week—Despatches From Montreal Speak Confidently of the Outcome.

Montreal, May 11.—The latest in the merger line here is a $5,000,000 hardware combination, of which Mr. George Caverhill, of Caverhill & Learmont, is the head. The merger will take in the seven leading Montreal hardware firms, and when completed, which, it is expected, will be by the end of the week, will include London, Hamilton, Toronto, Winnipeg and Montreal wholesale houses. Economy in buying and selling is given as the reason for the move.

Toronto, May 12.—The above despatch was received this morning from Montreal, as Hardware and Metal was on the point of going to press. It has been known for some time that the negotiations were approaching a point where something definite might be expected. Meetings have been held for the last few days, and there has been every evidence that the interested parties have been getting closer together.

Mr. Jas. Hardy, of Jenkins & Hardy, Toronto, who has been largely instrumental in promoting the amalgamation, stated to a representative of Hardware and Metal at Montreal yesterday that a final agreement had not been arrived at, but practically admitted that the merger was nearing completion. There is, of course, some danger still of a hitch occurring to break off the negotiations, but this is not deemed to be probable at this stage.

The Montreal Star last night devoted considerable space to the subject. The Star made the following announcement:

"Another merger, involving in the neighborhood of $5,000,000, is on the verge of consummation.

"Representatives of seven wholesale houses engaged in the hardware trade met this morning to discuss the closing details of one of the most important amalgamations pulled off in the city for some time

"Messrs. Jenkins & Hardy, accountants and financial agents, of Toronto, associated with Mr. E. W. McCarthy of New York, are the principal movers in the project to merge all the wholesale hardware establishments of this city and have the deal all but completed."

The Star further announced that Geo. Caverhill, of Caverhill, Learmont & Co.,

GEO. CAVERHILL,
Likely to be President of the New Merger.

would likely be induced to accept the presidency of the new organization. The arrangement, it is said, would have little or no effect upon the present administration of the several companies, and there will be no radical changes in the staffs.

Merger Confined to Montreal.

It was stated this morning by one in a position to know that only the seven Montreal firms were included, with the possibility of one outside firm being in it also. "There is no truth," he declared, "in the statement that Toronto London, Hamilton and Winnipeg firms are included—absolutely not a word of truth"

This statement is borne out by information secured from another source.

JAMES HARDY,
The Man Who Put the Deal Through.

This is to the effect that the merger is to be composed of the seven Montreal firms only at the present time, and that later on other houses will be taken in. The seven houses would be divided into three groups, viz., Lewis Bros. and Caverhill, Learmont & Co.; Frothingham & Workman and Starke, Seybold; L. H. Hebert & Co., A. Prudhomme & Fils, and Letang Hardware Co. One warehouse would be used by each of the three groups and the ground would be covered by three traveling staffs instead of one.

Scope of Proposed Merger.

It was later learned from an authoritative source that Thos. Birkett & Son, of Ottawa, and one or more Quebec firms might be included but that, for the present at least, no houses west of Ottawa would be in the merger. This can be accepted as outlining definitely the scope of the proposed merger.

F. O. Lewis, president of Lewis Bros., Montreal, sailed for Europe, Monday night.

PAINTERS' AND PAPERHANGERS' TOOLS.

The Winnipeg Paint and Glass Co. have issued a forty-eight page booklet to illustrate and describe their line of painters' and paperhangers' tools. The use of the various tools is carefully described, and the illustrations are plentifully scattered through the book. List prices on all the goods mentioned are included in the catalogue.

A PROSPEROUS OTTAWA STORE.

One of the leading retail hardware establishments at Ottawa is that of McKinley & Northwood, Rideau street. An interior view of their store is given on this page, and it will be noticed that their equipment is thoroughly modern in every particular.

Immediately in front of the entrance is a silent salesmen devoted to the display of fine cutlery. Some idea of the width of the store may be gained from the fact that there is ample passage space between the ends of this silent salesman and the counters on each side.

McKinley & Northwood carry a large stock of general hardware, and specialize on sporting goods, particularly fishing tackle and boat fittings, for which there is a lively demand along the Rideau lakes.

An extensive plumbing, heating and tinsmithing department is maintained by the firm, and they have been successful in securing some of the most important contracts in the city. About forty men are employed in this department. Just now the contracts they have on hand include the Rosenthal Building, Hope Building, and Hon. Sidney Fisher's residence.

Interior of McKinley & Northwood's Ha rdware Store, Ottawa, Ont.

CHAMPIONS OF CAPITAL HOCKEY LEAGUE.

The championship of the Capital Hockey League, of Ottawa, was this year won by the team representing Thos. Birkett & Son Co., the wholesale hardware merchants.

At the conclusion of the season, the team were treated to a complimentary banquet by the firm, when the boys proved that they were speech-makers as hockey players. The accompanying illustration shows the team and officers.

OTTAWA FIRM WILL MAKE NEW STYLE FIREPROOF DOORS.

McFarlane & Douglas, of Ottawa, have completed arrangements whereby they will establish a large factory for the manufacture of interlocking furniture finish, fireproof steel doors, windows, office desks and cabinets. The Ottawa firm have secured the sole manufacturing rights in Canada, for this line, which is being introduced by a new industry in the United States.

McFarlane & Douglas have purchased a property on Laurier Ave., 116 x 140 feet. This lot extends through to another property on Slater Street, which they have owned for some time. The new factory will be constructed on the combined properties, and will be 135 by 180 feet in size. For its operation, 50 horse power will be required, and it is expected that employment will be given to 300 hands.

AMALGAMATION OF BRASS FIRMS

In last week's Hardware and Metal, there appeared a notice of the incorporation of the United Brass and Lead Co., capitalized at $500,000, with head office in Toronto.

This new company represents the amalgamation of two firms, the General Brass Co., and Somerville, Limited, both of whom have operated brass foundries in Toronto for some years past.

It is understood that certain financial interests which were involved in both concerns, are responsible for the deal. Both plants were turning out a similar product, and operating the same class of machines, so that they were in constant competition with each other. To prevent this duplication and competition, the interests referred to succeeded in effecting a consolidation of the two plants under the name of United Brass & Lead Co.

The new amalgamation will operate the plant of Somerville, Limited, and the works of the General Brass Co. will be abandoned. Fred Somerville has been chosen general manager of the company and Lorne Somerville, secretary-treasurer. Murray Woodbridge, formerly manager of the General Brass Co., is superintendent of the consolidated plants.

POST HOLE AUGER BUSINESS PURCHASED.

The Hall Manuafcturing Co., of Monticello, Iowa, announce that they have purchased the entire post hole auger and digger business of the Western Steel and Iron Works of De Pere, Wis., including a line of garden trowels and spades. This transaction will give the Hall Manufacturing Co. greatly increased facilities.

Hockey Team of Thos. Birkett & Son, Ottawa, Champions Capital Hockey League.

Our Page for Hardware Clerks

That Guarantee of Yours

Does it Mean Anything?—Is it Only a Catch-Phrase, or Do You Stand Behind It?

She carried a portentous bundle, wrapped in old newspapers. These she commenced deliberately to unfold, the while she fixed the smiling clerk with an eye whose glare was ominous.

"See here, young fellow," she cried, as she tossed the papers aside.

The clerk's smile aviated. He saw a porcelain-ware stewpan. At least it had once pretended to be a porcelain-ware stewpan. Just now, it looked as though it had recently emerged from a combined earthquake, tidal wave, tornado and race riot. The young man gazed at it dubiously, not venturing to meet the threatening eye.

"Now, I wonder what made it go like that," he murmured.

"Wear," snapped the lady. "One day's wear. I bought it this morning—used it to cook dinner—and the porcelain peeled off like a moulting hen."

"It is too bad," murmured the clerk, dreamily. "I really can't imagine what made it go that way."

He turned to another customer. The old lady grabbed his arm. "You guaranteed that," she remarked pointedly. "I want my money back."

She longed intensely for that money. The young fellow hummed and hawed, and under his breath called down imprecations upon the proprietor's mania for shoddy bargains in kitchen-ware. Finally he called the proprietor himself. He, too, was regretful.

"What a pity you used it," he remarked, diplomatically. "If you hadn't used it that once, we'd have been glad to replace it or refund the money, just as ——"

"But how could I find out it wasn't any good without using it?" the woman demanded. "And that's what guarantee means, isn't it? Didn't you have the word pasted on every bit of that porcelain, in letters an inch high?"

"Certainly! Certainly! But of course that applies only to defects in the pan itself. If you apply too much heat, or let the water boil away ——"

The woman didn't leave her pan. She did leave her vigorously expressed opinion of that particular sort of guarantee.

After all, what is a guarantee—or, to be specific, what is your guarantee? Is it an empty word or a living letter? Is it a catch-phrase to draw business, or an undertaking to be lived up to? Do you say "Guaranteed" because some other fellow has said it, and you think it sounds good; or do you say "Guaranteed" because you stand behind the article you're selling and will make it good if it takes the last cent you have?

Maybe you imagine that "guarantee" has become common, that it is just a bit of business magic, helping you to sell goods, but involving no responsibilities on your part. Everybody, you say, guarantees everything. The real estate man guarantees his lots to soar—and they drop. The dope fakir guarantees his pills to cure—and they kill. The fellow who sells you mining stock guarantees you 100 per cent. dividends—and you draw them in experience. Guarantee, you say, doesn't mean anything.

But you can give a new, fresh, revivifying meaning to that old word "Guaranteed"—just by living up to it. You can spell it out in such a fashion that if anyone asks your customer, "Is that a good article?" Mr. Customer will hand him a poser by just saying, "Jones guaranteed it."

Lots of people scatter guarantees broadcast. Be sparing of yours. A guarantee, remember, is a serious thing. Ponder long and carefully before you give it. Know what you are doing — know the goods from which you fly your flag. And, if they aren't strong enough to bear a guarantee, boost the goods that are.

HOW HARDWARE SALESMANSHIP AFFECTS THE TRADE.

The next time you drop into a barber shop just take the trouble to notice how many of the customers are getting shaves. If you will compare the result with what you would have seen a few years ago in the same shop, you will have a good idea of the power of advertising plus hardware salesmanship. For, undoubtedly, you will remark that, while the barbers are kept pretty busy with hair cuts, shampoos and scalp treatments, they are not called upon to use their razors to the same extent as in former years.

Not that men are growing whiskers nowadays. It is probable that never in the world's history was the proportion of clean shaven men so large. But men have been taught by clever and convincing razor advertising, to shave themselves, and avoid the waste of time and danger of infection, attendant upon being shaved by barbers.

The other day, a barber in an American city, declared that, owing to so many of his former customers shaving themselves he was no longer able to pay alimony to his divorced wife. Others, however, have developed selling ability, and the man who drops in for a hair cut, is lured into a mysterious combination of shampoos, electric massages and scalp rubs, so that the income added in that way, offsets the loss in the shaving department.

This bit of moralizing is intended to show what powerful forces in business are advertising and salesmanship. It is razor advertising coupled with the salesmanship of hardware clerks, which robbed the barbers of a large part of their trade; and it is salesmanship on the part of barbers, which is building up for them a new line of business to retrieve what they have lost through the tremendously increased sale of razors, safety and otherwise.

WHAT HARDWARE CLERKS ARE DOING.

Robert Coynes has resumed his position in the hardware store of H. W. Davidson, Brookdale, Man.

Andy Lavery has joined the staff of T. K. Hopper's hardware store at Harris, Sask., for the summer months.

Sidney Thomas, who has been in the employ of W. Black, Durham, Ont., since Christmas, has gone to the west to look after his land interests.

Gordon Whaley, of the office staff of the Cochrane Hardware Limited, Sudbury, Ont., left on Saturday for Montreal, where he has secured an excellent position.

J. F. Parr, for some months bookkeeper with M. McKenzie & Son, Dundurn, Sask., has gone to Prince Albert, where he has secured a position in Kernighan's hardware store.

R. S. Nelson resigned his position as clerk in Wallace's hardware store, Wetaskiwin, Sask., the first of the month. On Monday he and M. E. Snider, formerly of Angus Ridge, left for Innisfail, where they have purchased a hardware and furniture business.

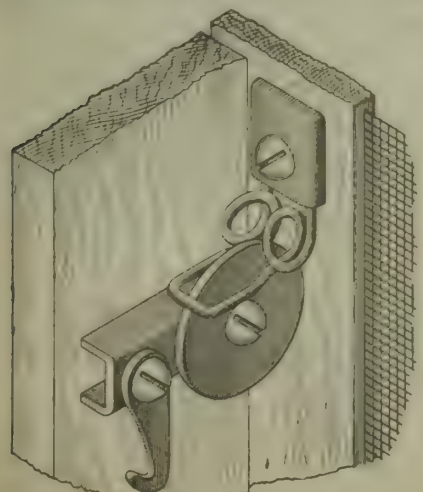
M. McClure, who was at one time on the staff of the Manitoba Hardware Co., at Hamiota, Man., has returned as manager to succeed G. A. Langtry. Mr. Langtry has been transferred to the store of the company at Rivers. Mr. McClure has been heartily welcomed back by old friends.

John Branton, who has been with the Cobalt store of John Bailes & Son for the past year, is returning to Oshawa, the firm having sold their Cobalt branch. For the past year Jack has been choir leader in the Cobalt Presbyterian church, was on the eve of his departure presented with an address and a set of ebony brushes by the members of the choir, who had learned to think very highly of him.

New Goods for Hardware Stores

NEW LINE OF GALVANIZED PAILS.

A very high-class grade of galvanized pails and buckets, and tubs, is now being offered to the hardware and tinware trade by E. T. Wright & Co., of Hamilton, who have recently more than doubled their galvanizing plant to meet the increased demands upon its capacity.



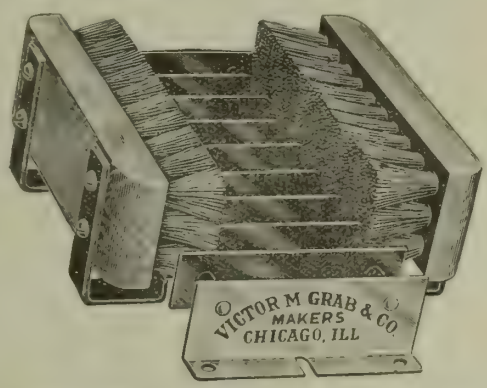
A stronger and heavier grade of galvanized pail or bucket than those usually sold for household use, is a pressing requirement with contractors, works departments, railway and steamship lines, factories, etc., and the fact that there is a good market for this line is evinced by the large sale of "Hamilton" Straight Galvanized Buckets, (two sizes), and "Niobe" Galvanized Pails, (one size), which has kept the factory at Hamilton busily employed on these lines since the first samples were made—over a month ago.

The "Niobe" and "Hamilton" pails are made in two pieces from 24 gauge black iron, and have very strong pressed bottoms, deep rims, half-round bails, heavy steel ears electrically welded to the body, heavy wire in top, and after being dipped in a bath of zinc spelter which covers the pail completely with a coating of rust-proof zinc, each pail, to further enhance its appearance, is given two broad blue stripes, and labelled with a guarantee label.

The galvanized tubs, upon the production of which Messrs. E. T. Wright & Co. have just entered, are of the standard pattern, and the three standard sizes. Two distinctive features will recommend them to buyers, the large wooden handles with which they are fitted, and the perfectly smooth finish given in the galvanizing—every part of the surface being covered with a smooth brilliant lustre.

NO-SLAM DOOR OUTFIT.

The presence of the screen door season calls to mind the nerve-racking slams that announce each entrance or departure through the doors which are provided with springs.



The King Manufacturing Co., of Chicago, are offering the trade what is called the "No-Slam Door Outfit," which can be suitably and easily applied to any door.

The catch, shown in the illustration, is a part of the outfit. It holds the door tightly closed, prevents it from warping and sagging, and can be used as a lock, when desired. The balance of the outfit consists of three small cushions with tacks for attaching them to the jamb. These cushions prevent the annoying slam, and prolong the life of the door.

FOOT SCRAPER.

A foot scraper which cleans the sole and brushes the side of the shoe in one operation is manufactured by Victor M. Grab & Co., of Chicago. This scraper has ten parallel plates, as shown in the illustration, all made of sheet metal, rigidly kept in place. Mud drops in between the plates, and will not stick or clog. The scraper may be easily rotated so as to clean or sweep under it. The brushes are made of stiff bristle, and, though firmly clamped in position they may be quickly replaced, if worn out.

RED MILL A NEW POST OFFICE.

The Postmaster General announces that a post office has been established at the extensive Oxide mines and works of the Canada Paint Company, near Three Rivers, Province of Quebec. The name for the new office is "Red Mill"—a fitting name for a place where Venetian Red, Indian Red, and a large range of Oxides are made.

The Auto-Strop Safety Razor Company, 345 Fifth Avenue, New York, has just paid an accumulated dividend of 21 per cent. on its preferred stock. This disbursement covers a period of three and one half years at the rate of 6 per cent.

FLEXIBLE HACKSAW BLADE.

This is not an illustration of a dog collar and chain, but rather it shows the work of a Culley Flexible Hack Saw Blade, manufactured by the Simonds

Manufacturing Co., Fitchburg, Mass., whose Canadian branch is known as the Simonds Canada Saw Co. There were 47 separate rings made from a 1 inch pipe, each ring slit and the chain formed. After making this number of cuts, the condition of the blade was so good that the teeth are clearly defined, even in this greatly reduced illustration. The remarkable flexible property of this blade is shown by its being bent in a complete circle.

CALGARY MAY GET STOVE FOUNDRY.

The Calgary Stove and Furnace Co., who are said to control some important patents, recently made application to the industrial committee of the city council for a manufacturing site. It is their intention to erect a $35,000 plant and employ from 50 to 60 hands. In the event of the company commencing operations in Calgary, they will have the privilege of securing water, light and power from the city at actual cost.

NEW COMPANY INCORPORATED.

Charles Fawcett, Ltd., head office Sackville, N. B., capital stock $500,000, have been incorporated to take over the business of the Charles Fawcett Manufacturing Co., and to manufacture furnaces, stoves, ranges, boilers, lavatories, baths, basins and all plumbing supplies, etc.

News and Methods of Canadian Hardwaremen

Southampton Dealer Has Nov el Store Truck—Bicycle Department Coming to the Fore—Millinery Display Made From Hardware Articles.

WILL SPECIALIZE ON BICYCLE BUSINESS.

Chatham, N.B.—Skidd Bros., of this town, are removing from their present store, to the Neale's building, two doors above. Their new premises are larger than those they formerly occupied, and they are accordingly laying in a larger stock than ever.

This firm are making a speciality of the bicycle business, this season, and they state that, from present indications, a large business will result.

ENLARGING OFFICE.

Tillsonburg, Ont.—Pow & Wilcox are planning a number of changes in the interior of their store. The office is to be enlarged considerably. This will cut off some of the space in the store room at the rear but, as a gallery has been installed there, the change will not cause any inconvenience. The gallery runs along one side and the back of the storeroom and holds a large quantity of goods.

C. W. Conn, who runs a plumbing department in connection with his hardware store, reports that business in that line has been very brisk. He has secured quite a number of contracts.

ISSUED TELEPHONE DIRECTORY.

Belmont, Man.—Box Bros., hardware and furniture dealers, of this town, have just had printed a telephone guide which they are circulating among all the telephone subscribers of the place. The guide contains the names of all subscribers to date, so that it is much appreciated by all telephone users, as many subscribers have been added since the last official directory was issued. Of course, Box Bros. have taken advantage of this telephone guide to gain some publicity for their store. Interesting information is given about all the different lines which the firm handle.

HARDWARE MILLINERY.

Edmonton, Alta.—W. A. Connell has gone into hats, although it seems a very unlikely line for a hardware man to handle. He has manufactured an exclusive line of millinery by using hardware goods. One very handsome creation was made out of a coal scuttle, bound with rope and with tea strainers forming a silver ornament at the side. Another very fetching hat was made out of a brass spitoon and two dish washers. These hardwaric hats were severally named the aviator, the trotting hat, the pink tea hat, etc.

BICYCLING BOOMS IN KINGSTON.

Kingston, May 9.—Is bicycling dying out? This is a question that is heard nearly every season. It may be dying out in some places, but it is certainly not being given the "go-by" in Kingston. The record in regard to sales, will verify this statement.

Since the middle of April, one local dealer, Harvey Milne, has sold twenty-one wheels, and of course it is early yet. Mr. Milne is delighted and looks for a record season. Other dealers spoken to by your correspondent also spoke encouragingly of the trade. A large number of sales are pending, and are expected to be put through within the course of a week or so.

It is expected that there will be a still bigger boom in the bicycle trade after this season, as Kingston is to put down paved streets, and this will be a great inducement for the people to use a wheel. A man who rides a wheel on some of the city streets as they are at present, is certainly a hero.

NOVEL TRUCK FOR HANDLING STOVES.

Southampton, Ont.—R. M. Vittie, who has a large hardware store in Southampton, uses a device more often seen in a flour and feed store. He has a steel track running from the rear of the whole store right to the edge of the step at the front door. At times when a stove display is being made, or other heavy goods being moved, the little car used comes in very handy. It is about the size of an ordinary scale platform, and is mounted on six trucks. There are times, of course, when such a quantity of garden tools, housecleaning equipment and the like is on display in the front shop that there is hardly room for the car. Mr. Vittie's store is an example of an unusual business combination, in that it holds the Bell Telephone exchange. The Hardware and Metal correspondent found the current issue of both Hardware and Metal and Plumb-

OFFERING A BUGGY.

Castor, Alta.—Mathias & McBrine, dealers in hardware and implements, have started a scheme to advertise their store, which is attracting much attention. They are offering a $135 buggy, and to every person who purchases $25 worth of goods, a ticket is given them which entitles them to one chance for the buggy.

These tickets will be offered until the end of June, and on July 1, the buggy will be drawn for.

KINGSTON HARDWAREMAN HONORED.

One of Kingston's hardware men was this week honored by being elected secretary of the local Retail Merchants' Association, Mr. Howard Marshall being selected for that position. Mr. Marshall is one of the youngest of the hardware dealers in the city, is very progressive and is making good. W. A. Mitchell, hardware merchant, resigned from the position of secretary, after acting in that capacity in a very able manner for several years.

The retail merchants' association is endeavoring to have more attention paid by the authorities to the men who are going about the city and county peddling without a license. The police have been able to catch a few who have been selling the goods without first paying for the necessary permit, but the merchants are anxious that a more active campaign be inaugurated.

HARDWAREMAN JOINS BRIDGE CO.

Chatham, Ont.—Wm. P. Drew has relinquished his position with the hardware firm of Geo. Stephens and D. H. Douglas to become secretary-treasurer of the Chatham Bridge Co., formerly the Western Bridge & Equipment Co., in which he and his brothers are the chief stockholders. A new factory is being erected, and the concern has received several large bridge contracts already this year. Mr. Drew, who had been associated with the Stephens-Douglas store for some three years, has been engaged in the hardware business in Chatham for 22 years past, having been a member of the old firm of King, Cunningham & Drew, and later head of the firm of Drew & McCallum.

Though full particulars have not yet been handed out, it is pretty definitely assured that the Wm. Gray & Sons Co., Ltd., and the Manson Campbell Co., Ltd., are uniting their interests in one company. For a couple of years their output has been handled in the West by a joint concern, the Gray-Campbell Co., Limited. The Gray Co. manufactures buggies, and parts for buggies and automobiles; while the Campbell output includes fanning mills, kitchen cabinets, scales, and a number of other lines. Additional land is being acquired contiguous to the present Campbell factory, and a large addition will probably be erected this summer.

ENGLISH TRAVELER RECOGNIZED FROM PHOTO.

C. R. Bloxam, who is making a tour of Canada, in the interests of the English firm, Hobbies Limited, was an interesting visitor at the Toronto office of Hardware and Metal, this week. Mr. Bloxam told about entering a hardware store in Ottawa, early in the week. He was cordially welcomed by the proprietor, who extended his hand and said:

"How do you do, Mr. Bloxam!"

"I am very well indeed, thank you," replied Mr. Bloxam, "but I cannot understand how it is that you seem to know me."

"Oh," said the retailer, "I saw your photograph in Hobbies' ad. in the Hardware and Metal Spring Special, and I recognized you at once."

Mr. Bloxam does not know which is the more remarkable, the Ottawa man's memory for faces, or Hardware and Metal's great reputation and influence, in the trade.

Messrs. L. Moedinger & Son, hardware merchants, Sparta, Ont., write to Hardware and Metal as follows:

"We are highly pleased with Hardware and Metal, and could not do business without it."

HARDWARE TRADE GOSSIP

Ontario.

The Hocking Hardware Co. have started business at Fort William.

A. W. Humphries & Son, have sold their hardware business in Parkhill, to Mr. Lindsay, of Waterloo, who took possession on May 1.

Coy Bros., A. W. Moore, and Watts & Bate, St. Catharines, have agreed to close at 1 p.m. every Wednesday during June, July and August.

Miller, Limited, secured the contract for the year's supply of brass plumbing goods for the water commissioners, St. Thomas, at $846.29.

Fire at the plant of the Page-Hersey Co., at Guelph, did damage to the extent of $5,000. Work was suspended as a result for a couple of days.

Wm. Murphy, who has been in the builders' hardware department of Rice Lewis & Co., has resigned and is entering business on his own behalf.

J. Gingras, of Hespeler, has accepted a position with the Metal Shingle & Siding Co., of Preston, and after a short stay in the shipping room, to become familiar with the goods, will go on the road for the firm in Quebec.

J. Simon & Co. have secured the store formerly occupied by T. W. Harding, St. Catharines, and will shortly open with a line of hardware, tin and enamelware, glassware, china, and jewelery, etc. All goods handled will run from 5c to $1 in price.

J. E. Hussey, formerly of Melbourne, Ont., has taken possession of the hardware business at Alvinston, which he recently bought from Johns & Miners. Mr. Hussey will move his family at the end of the school term.

The Jones Hardware Company, Uxbridge, purchased the Reid & Thirsk planing factory on Friday last, after it was bid in at the sale on Thursday. It is understood that the company intend running the factory at its full capacity. Richard Patterson will be in charge of the lumber yard.

M. Archibald, formerly with the Sherwin-Williams Co., was in Toronto this week, on his way to Saskatoon, where he is taking a position with the Enterprise Hardware Co., dealers in hardware and plumbers' supplies. Stanley Emerson is leaving the Enterprise Co. and will go back with the Emerson, Fisher Co., St. John, N.B.

Following the dissolution of partnership and closing of the business of Hamilton & Hocking, of Gore Street, Westfort, a new hardware store under the name of The Hocking Hardware Co. has been established on Frederica Street, under the management of Mr. Hocking. Mr. Hamilton, his erstwhile partner, has established a hardware store at Graham, the first G.T.P. divisional point west of this city.

Quebec.

F. Orr Lewis, of Lewis Bros., Montreal, left on Thursday on a business trip to the Old Country.

Edwin Dowsley, manager of A. Ramsay & Son, paint manufacturers, Montreal, is confined to his home with illness.

A. A. Hall & Son, Coaticooke, are making extensive improvements upon their store property on Child St. They have raised the building about two feet, moved it six feet to the south, put in a basement, and are improving the tenament. When completed they will have one of the best business places in town.

Western Provinces.

A new hardware store is being opened in Webster, Sask.

The Imperial Oil Co. will build a warehouse at Herbert, Sask.

W. M. Bunting & Co. have started a hardware business at Edmonton.

Mengering & Kinzel have started a hardware business at Rheim, Sask.

The business formerly conducted by G. B. Griffith, at Lelisle, Sask., is being sold.

David Whiting has installed new gasoline lights in his hardware store at Lang, Sask.

W. J. Ross, of Clive, has disposed of his hardware business to Fulthorpe Bros., late of Winnipeg.

The name of the Warnken Hardware Co., of Winnipeg, has been changed to the Quinn, Cobben Hardware Co.

C. W. Fisher, Cochrane, Alta., announces that he intends selling his hardware, harness and saddlery business.

It is understood that a company to be known as the Saskatoon Cordage and Flax Fibre Company will locate at Saskatoon.

D. Small, of Imperial, Sask., has received a car of hardware and is now doing business. He is assisted by Fred. Steele, of Davidson.

A. S. Baker, hardware dealer, Yellow Grass, Sask., has taken his brother, J. A. Baker, into partnership. The new firm name is now Baker Bros.

Ripley & Brake have opened a hardware store at Herschil, Sask. Besides the regular hardware lines, they will carry harness, pipe and steam fitting.

J. M. Hughes has discontinued his hardware and harness at Napinka, Man.

The Vulcan Iron Works, Ltd., of Winnipeg, have increased their capital stock to $500,000.

Johnston & Everest, who purchased the Telegram building at Manville, Alta., some time ago, are now receiving their stock of hardware and have opened their store for business.

R. J. Fenwick, of Halbrite, Sask., has made a good improvement in the appearance of his hardware store, having given the building a fresh coat of paint, and erected a sign over the front entrance.

Hamilton Bros. who were formerly associated with Hamilton & Hocking, Fort William, have established a hardware store at Graham, on the Grand Trunk Pacific.

The retail merchants of Neepawa, Man., have agreed to close their places of business Wednesday afternoons at 12.30, commencing June 2nd, and ending August 2nd. Exceptions are made on days preceding holidays, and the stores will not close on Saturdays, nor on July 1st and 12th.

Contracts for 1,000 mile of wire fencing in Saskatchewan and Alberta have been let to two Winnipeg firms by the Canadian Pacific Railway. The contracts call for maintenance fencing of the main line and branches in the two prairie provinces. This means the repairing and in many instances the replacing of the fences already existing.

On Thursday, May 4, R. Swift Hodson, of Lethbridge, who represents the Wood Vallance Co., Winnipeg, in Southern Alberta, was united in marriage to Miss Hortop. The bride up to a recent date was superintendent of the General Hospital, at Brandon. Mr. and Mrs. Hodson have gone on a three months' trip to the Mediterranean and Great Britain.

Maritime Provinces.

The contract for the masonry in connection with the enlargement of the building of T. McAvity & Sons, St. John, N.B., has been awarded to A. R. C. Clark and the carpentry to Edward Bates.

J. A. Brace, of Brace, McKay & Co., Summerside, P.E.I., has returned home from a four weeks' trip to Calgary, Wetaskiwin, Edmonton, and other Western Canadian cities. He was much impressed with the optimism which prevails throughout the West.

NEW FACTORY TO BE ERECTED.

W. D. Beath & Son, Toronto, who manufacture stanchions, steel kegs, and overhead carrier systems, have purchased land in the north-west part of the city where they will commence, immediately, the erection of a fireproof factory building. Plans are already drawn up, and operations will be rushed through as rapidly as possible, so that the firm may be able to occupy the new building before the expiration of their present lease.

PRODUCTION BEING RESTRICTED IN THE U. S.

Cleveland, O., May 11.—The Iron Trade Review to-day says: General market conditions continue unsatisfactory and production is being restricted in practically every branch of the trade. As far as finished materials are concerned, the market apparently has not suffered to any great extent in the way of price reductions during the week. New demand has been very light and buyers have found no occasion to test the market with attractive orders. Buying on the part of the railroads has been reduced to a minimum and shipments against contracts previously made are being held up. Notwithstanding the fact that the trade is dull and the outlook for the immediate future is not very bright, there is a strong undertone of optimism regarding the business outlook for the second half of the year.

The principal development in some centres during the week has been the increased activity in the pig iron market. Consumers are showing more interest in the situation on account of the low quotations which have developed on some grades. Production of iron by merchant and non-merchant furnace interests is being reduced rapidly.

FELDSPAR MINES ARE ACTIVE.

Kingston, May 9.—This season promises to be one of the busiest in years at Richardson's feldspar mines, near here, owing to the great demand for the feldspar from the States. Already twenty cars of it have arrived to the city over the Kingston and Pembroke railway, and it is being loaded into vessels and shipped to Charlotte as speedily as possible. There is a big staff working in the mines.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 50.

MARKETS IN BRIEF.

Montreal.

Turpentine—Down 5c.
Linseed Oil (Boiled)—Down 2c.

MONTREAL.

Montreal May 12.—A slight improvement in the metal market is reported here although the difference, if any, is not much more than nominal. Business is running along without any features and conditions from a Canadian standpoint, are reported quite satisfactory. Apparently, there is not the lethargy that is so generally spoken of now in reference to the American metal markets. While locally there is no pronounced aggressiveness in metals, still there is a satisfactory trade reported, a fact not at all discreditable to Canadian trade and activities. Business in pig iron is steady in contrast to the apathetic spirit noted in the iron market across the border. One of the reasons given for this condition is the unsettled tariff considerations.

Pig Iron.—There is not much new in this market. Business is steady and the conditions reported last week continue practically unchanged. Prices on dock Montreal are: No. 1 Summerlee, $20; select Summerlee, $19.50; soft Summerlee, $19; No. 3 Cleveland and Clarence, $16.50 to $17.

Copper.—An uneventful market is about all that may be said of copper. It is quite steady locally and uninteresting. The United States market is dull, suffering from the common ailment of American metals.

Tin.—The situation has changed, but little during the past week. The American market has been quiet and apparently but little business is being done. The synidicate seems to be cautious in their operations and it is just a question what the outcome of the present conditions will be. Consumption in the United States has been shrinking and the general outlook is not on a satisfactory basis. One report states that there is an entire absence of speculation and virtually no trading between dealers. That is a New York report. Another report says: "If the London bulls chose to do so, they could easily put prices much higher, but we think they realize that they have seen the largest American consumption and the smallest Straits shipments for some months, and this is what is creating caution on their part." Higher prices are not expected, according to this market reviewer unless the syndicate manipulate the market to that extent.

Other Metals.—The lead market is showing signs of weakness and is generally quiet. According to United States reports receipts and shipments at St. Louis are both under the figures for the same period last year. Buying is of a hand-to-mouth character. From St. Louis it is stated that business is so light some of the smaller companies are cutting under Trust prices, in order to make sales. Spelter is almost equally dull. Business is light and of a hand-to-mouth character. Antimony is also quiet. Regarding the syndicate spoken of previously the following report by C. S. French & Co., New York, may be interesting to some readers:

"Respecting the antimony syndicate, it appears there exists a combination of dealers in crude antimony, which seems to have been controlled by Messrs. Cookson, of Newcastle, and under threat of ceasing to supply refiners, the European makers were induced to join a syndicate to control the refined material. The existing syndicate may be considered to consist of all the European producers, excepting those who could afford to be independent, namely Messrs. Hallett & Fry, one or two Chinese refineries and the Italian refineries represented by H. R. Merton & Co., London, and their affiliated houses. Some Chinese interests are not in the syndicate."

Scrap Materials.—Offerings of scrap materials have been somewhat more liberal, but the market is still quite normal. Local quotations are: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $12.50; malleable, No. 1, $9; miscellaneous steel, $5; stove plates, $12.50.

TORONTO.

Toronto, May 12, 1911. — Buyers throughout the metal trade seem to be standing pat, and it is hard to influence them in any proposition affecting future requirements. A good steady trade is moving, just as it has for some weeks past, but it is evident that large consumers do not, as yet, possess enough confidence in the immediate future, to induce their coming into the market.

The situation in the United States metal markets continues to influence sentiment on this side of the line. In spite of restricted production on the part of almost all the iron and steel industries in the States buying is so light that surplus stocks are being accumulated. These must be sold some place, and it is the expectation of lower prices being offered from these sources, which is creating a disquieting effect on the Canadian trade and influencing consumers to withold any extensive purchases.

Prices on all metals are conceded to be low, considering present costs of production, and, as a result, there has been little or no fluctuation. Producers and holders feel that, even if they were to reduce prices to an actual losing basis, it would not invite any buying movement at this juncture.

In comparing to-day's cables from primary markets with those of a week ago, it is seen that, in every line, quotations are either the same, or the change has been so infinitesimally small, that local jobbers would not feel justified in altering their figures either up or down.

Tin.—The price at London is to-day five cents per hundred pounds higher than a week ago, but that is not sufficient to influence quotations on ordinary lots at this point. We still quote 44 to 45 cents, depending upon quantity.

Antimony.—There is little or no buying here, and English cables indicate that the market there, is dead. Meanwhile the syndicate who control this commodity are holding prices firm, and Toronto jobbers are quoting unchanged figures.

Copper.—Some copper operators profess to be somewhat more optimistic regarding copper, as a result of somewhat improved sales this week. We still quote 13 cents, as the Toronto price.

Aluminum.—A good healthy business is being done at an unchanged price of 20 cents.

Plates and Sheets.—Buyers are holding off and awaiting developments before contracting for their requirements during the last six months of the year.

Pig Iron.—Inquiries are light although quite a nice lot of business is moving, in small quantities, for immediate needs. Prices are unchanged, and, as one jobber said, it is some satisfaction to say that there has been no decline, at any rate. Quotations remain as follows: Canadian Foundry No. 1 is $19.00 and No. 2, 50 cents a ton less. Old country iron is quoted at $19.50 for Middlesboro' No. 3; and $20.25 for Clarence No. 3; Summerlee No. 2 is $22.00, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20.00 and $22.00 respectively.

Lead.—Sales are inactive, but, as stocks held locally are not heavy, no particular dissatisfaction is expressed with the condition. Prices remain the same as before quoted.

Spelter.—A somewhat improved movement is reported.

Old Materials.—There is very little business doing, just now, but the market is quite firm at the prices previously quoted: Heavy copper and wire, 10½ to 11c.; heavy red brass, 7½; heavy lead, $2.90; light copper and bottoms, 9¾c.; tea lead, $2.40; machinery cast iron, No. 1, $14.00; No. 1 wrought, $10; malleable No. 1, $8 to $10; miscellaneous steel, $6 to $7; stove plate, $12.50.

H & news and metods

APPRECIATION OF A CONTEMPORARY.

The American Artisan and Hardware Record, published in Chicago, in its last issue, made this flattering reference to Hardware and Metal's annual spring number:

The annual spring number of Hardware and Metal, Toronto; Canada, issued March 25th, is a very fine example of printing art and the publishers are to be congratulated on their efforts. Many of the advertising pages are run in colors, a number of them using special stock. The text is as well taken care of as the advertising section, the topics being those of interest to the hardware and metal trade at this season of the year. Hardware and Metal certainly deserves the support it is receiving at the hands of the Canadian trade.

HARDWARE MARKETS

MONTREAL.

Montreal, May 12. — Jobbers report continued satisfactory conditions, and yet the bulk of trade is hardly up to the average. Not that anyone is taking a pessimistic view of things, but the weather until recently has prevented business from assuming those proportions which would probably have been realized had conditions been more favorable. Spring lines have come back to their own during the past week, and business in this department is again in full swing. Orders for builders' hardware are coming from all parts of the country, and from the West particularly the volume of business is encouraging. Harvest tools is another department that is rapidly growing, and here again the Western provinces are contributing largely to the growing demand. The various jobbing houses are busy with orders, and business is flourishing, but it is a question whether the total volume thus far has been sufficient to place the present year above the average. The increasing population and the many industrial activities are certainly being felt by the trade, but it is generally held that, had seasonable weather been continuous, better results would have been experinced. Hardware prices are generally unchanged, and there is no special feature to report.

Contractors' and Builders' Supplies.—A good business is reported in all lines of tools and equipment necessary to the builder and contractor. Pulleys, blocks, rope, heavy hammers, picks and shovels, locks, escutcheons, etc., are all included in the many orders that are being received by the local wholesale houses. Operations throughout the country are moving on to a high tide, and those centres where building work has been a little delayed in getting under way are apparently falling into line with the activity and prosperity that is now quite general throughout this country.

For the best quality of shovels and spades, the discount off is 60 and 2½ per cent.; for second quality the same discount is allowed, and for third quality the discount is 50 and 2½ per cent.; picks are quoted at from $3.85 to $5 a doz.; crowbars are listed at $3.25 a cwt.; wheelbarrows, navvy common, $21 and up; navvy full-bolted, $22.50; drag scrapers, $5.75 and upwards.

Lawn and Garden Tools.—Trade in these lines is extensive just now and judging by the many window displays in retail stores, a large quantity of supplies must be going into use. Jobbers report a good demand from all points. Lawn mowers, sprinklers, hose reels, shears and all kinds of garden tools are prominent in the orders that are coming in.

Spring Lines.—The trade report a resumption of business in this department after a temporary setback, the result of unfavorable weather. Demand is quite general, covering a wide range of goods. Hammocks and other kindred articles are in favor.

Discounts in garden hose range from 50 per cent. off to 70 and 10 and 10, according to quality. We quote hose clamp, ½ to ¾-in., 25c a dozen; hose couplings, ½ to ¾-in., $1 a dozen; hose sprinklers, ring patterns, $5.75 a doz.; revolving pattern, 12-in., $13 a doz.; 24-in., $34 a doz.: and 36-in., at $39 a doz.; hose nozzles, Gem, $3.50 a doz.; reels, 75c each and upwards; garden wheelbarrows, $27 a doz. The discount offered is 50 and 50 p.c.

Household Utensils.—There is a steady enquiry for household goods. Ice cream freezers are especially asked for, and kitchen utensils are in demand. Washing machines are by no means behind in the present trade.

Some of the prices quoted are:—Food choppers, from $9 to $15 a doz.; ice cream freezers, 1-qt. $1.50, 2-qt. $1.65; 3-qt., $2.05; 4-qt., $2.50; 6-qt., $3.15; 8-qt., $4; coffee percolators, $1.75 to $3.50; washing machines from $3 50 up; wringers, Royal Canadian, $47.75 per doz.; Universal, $37.75 per doz.; Safety, $56.25 less 20 per cent. per doz.; Mrs. Potts' irons, plain, 82½c per set; nickel-plated, 87½c per set; common sad irons, 4 to 7 lbs., $5 per cwt.

Harvest Tools.—Business in this department is brightening, and retailers are preparing now for the demand that will come later. The West is a big factor in this trade.

Wire.—There is a good steady demand for wire. Prices are unchanged. Some prices are: Barbed wire, $2.35; plain twist, $2.55; galvanized wire base, $2.27½; coil fencing (9) $2.30; (12) $2.45; staples, bright, $2.60; galvanized, $2.85.

Heavy Hardware.—The general trade in heavy goods is well maintained. The construction camps and other operations combine to create a good demand.

Some discounts are: on carriage bolts, ⅜ and less, 70 per cent.; coach screws, 75 per cent.; stove bolts, 80 and 7½ per cent.

Sporting Goods.—All lines of sporting goods are going into use. The demand is steady and heavy, and should continue at the swell tide for some time yet.

TORONTO.

Toronto, May 11.—Business is now at its best. The uninterrupted good weather of the past week has had a splendid effect on trade and orders have been pouring into the wholesalers steadily. The past week has been perhaps the busiest since the year opened. Orders have been pretty well distributed over all lines. Builders' hardware has been particularly brisk.

No price changes have been noted. There is a general all around firm tone to the market.

Seasonable Goods. A big demand has been seen for summer goods. Screen doors are selling briskly and the same applies to garden hose, clamps, couplings, sprinklers, nozzles, rakes, watering cans, lawn mowers, shears, spades, axes, picks, wheelbarrows and the many other articles now needed for garden work. Refrigerators are in big demand, a number of rush orders having been received this week. Ice cream freezers are selling briskly.

Household Goods.—There is a good demand for all household articles from the cheap egg-beater to the costly vacuum cleaner. There is not as big a demand for house-cleaning supplies but some sorting orders are being received, showing that a good many people had postponed housecleaning until the warmer weather. The sales of tinware and granite goods continues exceptionally good and electric specialties are in better demand than ever.

Builders' Hardware.—There is a distinct boom to the sales in this department. Building operations are now well under way in all sections of the country and there is a steady call for lock sets, brass knobs, window ropes, etc. Reports received from retail dealers is to the effect that they are experiencing an early demand and have already sold good-sized stocks. All indications point to a record business this year in builders' hardware and contractors' supplies. One dealer in an Ontario city, which recently secured several new industries, reports that his trade in tools has been more than double that for the same period last year.

Heavy Hardware.—There is a good all around demand for heavy hardware. Construction work has now reached the stage where chains, pulleys and tackle, bolts, rivets, screws, etc., are very much in demand and large orders are being received. No price changes are noted. Present quotations are: Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Stoves and Heating Goods.—Sales have been seasonably light in all coal stoves but gas ranges are still selling briskly. Large orders are being received daily by local houses and it is expected that the demand will continue brisk for some time yet. It is quite apparent that there has been a heavy retail trade this spring in gas and combination ranges. Oil stoves are also selling well. The demand comes largely from people who desire a small quick heater for use in summer houses.

Sporting Goods.—The new "Offensive Weapons Act" has put temporarily a stop to the sale of revolvers but in all other respects the volume of business done is quite satisfactory. Supplies for baseball, lacrosse, tennis, aquatic sports, football and cricket are selling well. There is a seasonable demand for rifles and ammunition. Anglers' supplies are also selling well.

Plans and specifications are being prepared by Charles T. Main, mill engineer and architect of Boston, Mass., for the new seven storey brass foundry of the Yale & Towne Mfg. Co., Stamford, Conn.

The Western Hardware Market Situation

Prices Generally are Firm—New Quotations on Turpentine — Slight Drop in Sisal and Manila Rope — Weather Conditions Favorable and Large Business Indicated.

Winnipeg, May 12.—The western hardware trade still continues very good. All spring lines are moving briskly. On the whole prices are firm. There is, however, a decided change in turpentine which is now quoted at $1.05 in barrels and $1.10 for small lots. Sisal and British manila rope have dropped ¼c, also galvanized and black iron pipe have fluctuated in price, as will be noted in the market quotations. Weather conditions have been most favorable during the past week and everything seems to indicate a boom in hardware circles.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.00; 2, $1.60; p.g. oak, $2.75.

Auger Bits—"Irwin" bits, 47½; other lines 75 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3; small lots, 2½; stove bolts 77½.

Bar Iron—Bar Iron, $2.50; Swedish iron, $4.75; sleight shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs. $8.50; Jessop, $15

Blocks—Steel, 45; wood 60 per cent.

Cut Nails.—$3.15 per keg base.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron.—Apollo, 16 gauge, $3.70; 18, $3.75; 20, $3.80; 22 and 24, $4; 26, $4.10; 28, $4.50; 30 gauge or 10¾ oz., $4.75; Queens Head, 20, $3.85; 24, $4.05; 26, $4.45; 28, $4.65.

Galvanized Iron Pipe.—⅜ in., $3.50; ½ in., $4; ¾ in., $5.20; 1 in., $7.50; 1¼ in., $10.25; 1½ in., $12.45; 2 in., $16.25.

Galvanized Ware—Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2, and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel, No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $2.75; 6 $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $7.75; grass, $1.70.

Iron Washers — Full box, 40 p.c.; smaller lots, 35 p.c.

Iron Pipe, Black—⅛ in., $3; ¼ in., $2.45; ⅜ in., $2.50; ½ in., $3.25; ¾ in., $4; 1 in., $5.65; 1¼ in., $7.75; 1½ in., $9.25; 2 in., $12; 2½ in., $19.60; 3 in., $25.75; 3½ in., $33.50; 4 in., $38.35; 4½ in., $44.10; 5 in., $50.40; 6 in., $65.10; 7 in., $95.50; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.75.

Poultry netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.55.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8c; pure manila, 10¾c; British manila, 8¼c; lath yarn, 9¼c.

Sheet Zinc — Casks, $8.75; broken lots, $9.50.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $25 per cwt.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 65 per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate—I. C., $9.75; I. X., $11.75.

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25; ½ box, $5.50; I. X., full box, $12.25; ½ box, $6.50; I. X. X., full box, $14.25; ½ box, $7.50; 20 x 39, I. C., full box, $15.50; ½ box, $8.25; I. X., full box, $17.50; ½ box, $9.25.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 35.

Wire.—Barbed wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3; annealed wire, base, $3; oiled, 10c extra; bright iron $3.20 base; brass spring wire, base 29c; plain galvanized wire, Nos. 6, 7 and 8, $3.40; No. 9, $2.90; 10, $3.50; No. 11, $3.55; No. 12, $3.10; No. 13, $3.25; No. 14, $3.95.

Wire Nails—$2.90 Winnipeg, and $2.45 Fort William.

Wringers — Royal Canadian, $39.25; New Easy, $42.50.

Paints and Oils.

Paints and oils are moving very fast and a splendid trade is being done in these commodities. There are no changes in the market prices, but the tendency is higher.

Petroleum and Gasolene.—Silver Star, in bbls., per gal., 15c; Sunlight, 18c; Family Safety, 22½c.; Searchlight, 20½c; Red Rose, 23½c; Keystone Special, 18c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c.; White Rock, in bulk, 22½c; National Light, in bulk, 21c.; Engine Gasolene, 24c.; White Lily, 26c.; Royal, 24c.

Turpentine—In barrels, $1.05; small lots, $1.10.

A VETERAN WESTERN TRAVELER.

To have been twenty-five years on the sales force of a wholesale hardware house, is no mean distinction even in Eastern Canada, but, when applied to the West, there are few indeed, who can claim it.

Yet that is the record of Geo. J. McGiffin, who represents Merrick-Anderson Co., of Winnipeg, on the road. Twenty-five years ago, he commenced covering territory for this firm, using a Red River cart to get over the ground.

GEO. J. McGIFFIN,

A Veteran Western Hardware Traveler.

That was pioneer work with a vengeance, but transportation facilities have improved so rapidly, that he is now covering the country in an automobile, which was presented to him by the firm, last year, as a memento of long service.

Mr. McGiffin is a veteran in more ways than one, having served with the "Fighting 90th" Regiment of Winnipeg, in 1885. He has always been a careful reader of Hardware and Metal, and recommends it strongly to his customers. He is a brother of the late Capt. John McGiffin, Toronto, who was, for years, commodore of the Niagara Navigation Co.'s fleet

PAINTS AND VARNISHES.

"Dealers' Descriptive Catalogue" is the name given by the Martin-Senour Co. of Chicago and Montreal to a handsome book of sixty-two pages, which they are sending out to the trade. That phrase describes the catalogue to a nicety, as it is devoted to brief and instructive talks on all the various products of the company. Each line is illustrated by a cut of the distinctive tin in which it is marketed, and besides every page is adorned with an illustration showing some stage in the manufacture, shipping, retailing and use of ready mixed paints.

Methods of Retailing Paints and Varnishes

The Use of Oil and Turpentine Substitutes

A Large Amount Has Been Used as a Result of the High Price of the Pure Material, But Not as Much as Had Been Supposed—Dealers Who Sell Substitutes Should Impress on Customers What They are Buying.

Since the time that linseed oil first started on the upward path and turpentine began its spectacular flight in price, there has been more or less consumption of substitutes. The demand was at its highest point six weeks ago when turpentine had reached the record price of $1.40. Quite an amount of substitute material is still being used, but, fortunately, the amount is growing less continually.

Reports have considerably exaggerated the amount of substitutes sold since the first of the year. Doutbless many dealers were frightened into handling substitutes by the high price of the geunine article, but the number was relatively small. Enquiry at the various local supply houses elicits the information that while there was some demand it did not at any time attain to formidable proportions. Quite a number of houses did not handle substitutes at all.

"We are steering clear of that trade," said the manager of one concern. "It is unsatisfactory at best. If the results obtained by the use of substitutes for oil and turpentine are not satisfactory we are bound to get the blame for it in the end."

"Yes, we have sold some," declared another man. "The demand has been almost entirely from the city, however. We have only received one order outside of Toronto."

"A good deal has been used," said one local paint jobber, "but it has been mostly made up to order, and not bought through the jobbing houses. We find that the demand for substitutes is never sustained. A man who has once ordered is not likely to order again. They find it better to pay the price and get the real thing."

This point was emphasized by every man spoken to on the subject. They declared that one experience was generally enough for any dealer or painter. Repeat orders were seldom, if ever, received.

The Reason Why.

And this is the reason why. The presence of a substitute for turpentine or linseed oil in paint, or the use of adulterated goods, only too frequently leads to poor results. The paint does not wear well. If the job had been handled by a painter, he is then made the recipient of strong protests from the man who paid for the work. If, on the other hand, the paint was bought from a hardware store and applied by the owner himself, the dealer comes in for the blame Both painter and dealer, in turn, blame the jobber from whom they secured the substitutes; and there is dissatisfaction all around

Here is an instance that occurred recently A traveler for a large paint firm was given an order for a linseed oil substitute As his house did not handle anything but pure oil, the traveler turned down the order, but told the dealer where he could get what he wanted. The substitute oil was secured and used in carrying out a large painting contract. The use of the poor grade oil resulted in the job being absolutely spoiled. The owner threatened proceedings. Believing that the firm whose traveler had given the information had supplied the goods, he wrote in, demanding the payment of substantial damages. The company was put to considerable trouble in proving to the satisfaction of the owner that they had not supplied the goods, and doubtless suffered in prestige very considerably in that section.

The Best Method.

It is not intended here to argue whether or not a dealer should handle substitutes. That is a point each dealer must settle for himself. Dealers who do handle them, however, should bear this in mind. In selling a substitute, make sure that the customer understands fully what he is getting. Warn him that the results may not be as satisfactory as if pure oil or turpentine were used. Then, if he persists in buying the cheaper variety the risk is all his own. If the work does not prove satisfactory, he has only himself to blame.

The dealer who sells adulterated turpentine as the pure article, is taking a sure way of getting himself into trouble. If, perchance, his customer meets with failure when he attemps to use the concoction, the dealer will probably have to given him pure turpentine to do the work over again.

Talk Pure Quality.

It is in the dealer's own interest that pure linseed oil and turpentine should be sold. A higher price is commanded and no risk is run. It is advisable then

Paint Display in Chas. C. Lee's Fine Big Window at Goderich, Ont.

for the dealer to endeavor to dissuade customers from using anything but the pure stuff. Presentation of the facts would serve to convince any reasonable man that he would do well to run no risks. If, however, the customer is not to be persuaded, then the substitute should not be handed over until the dealer has succeeded in impressing on the man that he is buying at his own risk. All this applies, of course, to the dealer who feels that he must handle substitutes. Many do not carry them at all, and they report that they do not lose anything by adhering to this policy.

No man can make a mistake in talking quality, first, last and always. This is perhaps more particularly the cause with reference to oil and "turps." Paint should be made of the best ingredients, and the mixing in of adulterants cannot be upheld from any standpoint. It is not true economy, for the paint will not last as long. It is better to pay the price for pure material in the first place than to save a little by buying inferior at the risk of having to do the work all over again later on. The wise dealer will realize that his customer will be better satisfied in the long run, if he sells him goods which will bear the test of time.

LARGE WINDOW DEVOTED TO PAINTS.

A paint display which brought splendid results in sales was one which was dressed by R. W. Craigie, in the large window of Chas. C. Lee, at Goderich, Ont.

The back and sides of the window were draped with cheese cloth, on which were attached advertising signs of the paint manufacturers whose products are handled by Chas. C. Lee.

Across the back of the window, four pillars were built up of paint cans, and planks were laid across the top of these pillars, thus forming three arches. In the centre of each of these arches is hung a large paint poster. Over the centre arch was built a large pyramid of paint cans, while smaller pyramids suromunted the two side arches. At each side of the window was a pyramid of paint cans, on top of which was placed a "cover the earth" poster. Several color cards were interspersed in the display, so as to give an idea of the line carried in stock.

SUCCESSFUL DEMONSTRATION OF VARNISH.

Caledonia, Ont.—Hundreds of citizens visited the free demonstration of "Lacqueret," at McGregor's hardware store, on Thursday last, and it proved a fine advertisement for the store. The visitors were shown all the different uses to which "Lacqueret" could be put, such as refinishing old furniture, linoleums, oil cloths, and new and old floors. Each lady was presented with a carnation and sample showing the appearance of this varnish, when properly applied.

Joseph Kunkel is opening a hardware store in Mildmay.

Fine Paint and Brush Window at Bracebridge

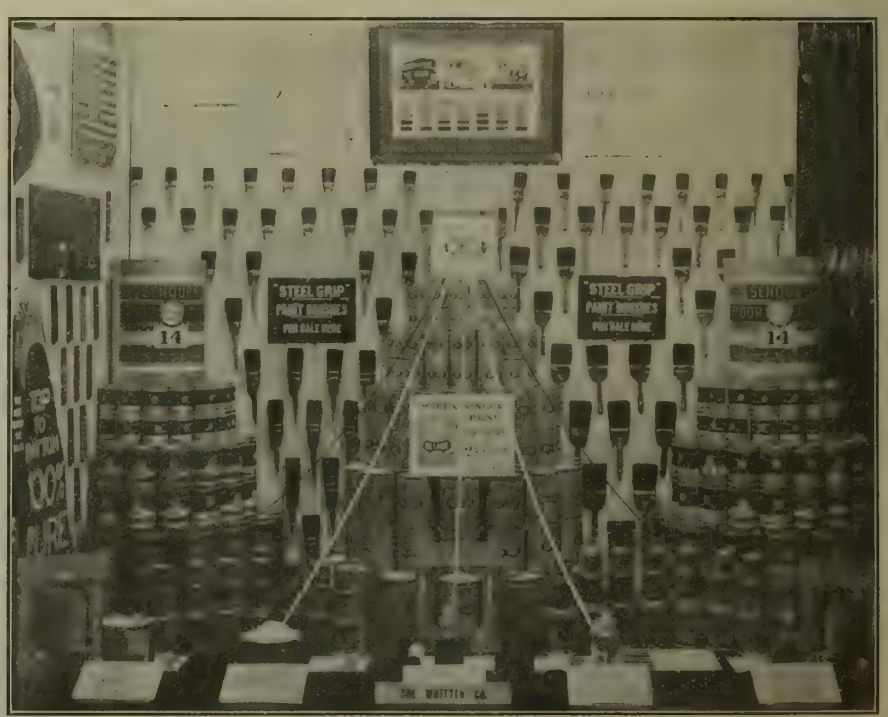
The Whitten Co. Have Attractive Display—Showing Ingredients of Their Paints, The Main Idea—Flash Light in Centre Draws Attention at Night.

As an example of how ideas may be picked up at hardware conventions, and used to good advantage later, attention is directed to the illustration on this page, of the paint and brush window recently dressed by E. A. Whitten, for the Whitten Co., of Bracebridge, Ont.

Mr. Whitten, who was, himself, the winner of prizes for window dressing, at the Peterboro convention, saw the value of the idea which was the mainstay of the first prize paint display dressed by H. J. Hanwell, of the Kingan Hardware Co. This idea was the emphasis, in a novel form, of the ingredients which go to make up prepared paints.

The idea as adapted by Mr. Whitten, was carried out in this way: The centre of attraction in the window, was a flash light in the form of a large paint can bearing the label of a prominent manufacturer. From this flash-light, ribbons went out in five different directions, terminating in vessels which had been placed along the front of the window, and which held the paint materials.

Tickets were placed in front of these receptacles, telling what each contained. From left to right, across the window, they read: "Pure White Lead," "Pure Oxide of Zinc," "Pure Linseed Oil," "Pure Spirits of Turpentine," "Pure Japan Dryers," This method of display gives to the passer-by a vivid idea of the class of materials which go to make up prepared paints, and it is does away with the objection which was formerly brought up so frequently against the use of prepared paints—"I always mix my own paints because then I know just what is in them."



The flash light previously referred to surmounted a pyramid of paint cans, built up in the back of the window. On either side, was a semi-circle of floor paint, at the front of which carriage and wagon paints were displayed. A large card, telling the price per gallon of the paint displayed, was placed half way up, on the pyramid.

The window was rounded out by a good showing of paint brushes, on the back wall, oval brushes being placed on one side, and flat on the other. Color cards and other advertising matter, were used to complete the window, which was a good business bringer.

DECISION IN CALIFORNIA PAINT LITIGATION.

A long drawn out legal battle in the California courts between the Muralo Co. and the Munus Products Co. The Muralo Co. claimed $25,000 from the latter firm for goods sold and delivered, while the defendants upon their part contended that the Muralo Co. had broken their contract by shipping goods into the Pacific Coast.

Judge Seawell, of the Superior Court of California decided that under the contract the Muralo Co. was free to sell its goods in the West Coast Territory.

TRADE MARK MINERVA

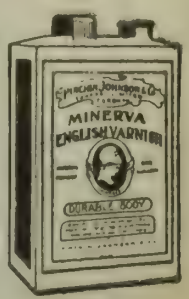
Handle the Paints and Varnishes of a Reputable Manufacturer.

MR. DEALER: Your immediate profit is not the most important item in the selection of various lines for your business.

An ordinary paint or varnish that offers you a large margin might eventually prove to be your loss. It's a good honest brand with a reputation behind it and a liberal profit that means your success.

MINERVA

PAINTS AND VARNISHES



have always been made for exacting people. A brand that looks well and is durable.

MINERVA lines have been manufactured for 76 years and have stood the very hardest tests of wear and climatic conditions.

Large Railroad and Steamship Companies, prominent painters and decorators insist on MINERVA brands. Users like these know paint value---paint service.

The Manufacturers co-operate with you in selling MINERVA Paints and Varnishes. Besides a very attractive proposition, consistent consumer advertising is used in the press throughout the country.

IT WILL PAY YOU TO ENQUIRE FOR PARTICULARS.

PINCHIN, JOHNSON & CO. (CANADA) LIMITED

PAINT AND OIL MARKETS

MONTREAL.

Montreal, May 12—Business continues on a steady basis just at present, thanks to the heavy demand that is felt in all parts of the country and the fact that the manufacturer is being called upon to meet it. Business has settled down to a steady basis and there are few changes to note, excepting a still further reduction in the price of turpentine, and something to the same effect in the linseed oil market. The latter has shown but little change during the week, and while it is difficult and practically impossible to tell what the future movement in this article will be, there is a feeling that further reductions will not likely be quoted. This is, of course, but an opinion, but it is rather generally entertained.

Linseed Oil—Prices for boiled linseed oil are now down to $1.10 and $1.11, being slightly below those that were quoted last week. Otherwise there is but little change in the market. The primary market is rather firm and while the market may go lower, there are not a few who will be disappointed if it follows that course. The general feeling seems to be somewhat confident that this market should hold its own at its present figures or even seek a higher level. There is a steady demand.

Turpentine—The local price of this article is down to a dollar, after a pleasant soar during the past month, during which a high price was touched. Supplies are coming forward liberally and as soon as the demand becomes less than the supply prices begin to lose their strength. Enquiry is now for immediate demand, receding prices having the effect to avoid purchasing in large quantities before the normal level is reached.

Paris Green—Prices are being well maintained. Heavy shipments have been made, and small orders are now going out in a somewhat desultory manner. Prices are unchanged as follows: In barrels, about 600 lbs., 17c per lb.; arsenic kegs, 250 lbs., 17¼c; 50-lb. and 100-lb. drums, 18¼c; 25-lb. and 100-lb. drums, 18⅜c; 1-lb. packets, 100 lbs. in case, 20¼c per lb.; 1-lb. packets, 50 lbs. in case, 20¾c per lb.; ½-lb. packets, 100 lbs. in case, 22¼c per lb.; 1-lb. tins, 100 lbs, in case, 21¼c per lb.

Arsenate of lead—Small orders are being received from the hardware trade for this article. Prices are: In bbls., about 800 lbs., 9c; in half-bbls., about 400 lbs., 9½c; in 25-lb. wooden kegs, 10c; 5-lb. bottles, 12c; in 2-lb. bottles, 13c; in 1-lb. bottles, 14c.

White Lead—This article is still prominent in the spring demand, and orders are fairly liberal. Quotations are as follows: Lots of one ton, $5.85; contracts of five tons and over, $5.70; shipments less than one ton, $6 f.o.b. Montreal.

Putty—Trade in putty is steady, but otherwise is featureless. Prices f.o.b Montreal are: Bulk, bbls., $2.20; bulk, cwts., $2.45; bladder, bbls., $2.70; bladder, cwts., $2.80; 25's, loose, $2.55; 25's, cased, $2.70; 12½'s, cased, $2.90.

Varnishes and Japans—Quite a feature of the present paint and oil trade is the steady enquiry for varnishes and japans.

TORONTO.

Toronto, May 11.—The trade this week has been exceptionally heavy. Not only have prepared paints and oils been moving but the demand for all specialties has been large and well sustained.

The market has seen no price changes of any particular interest. Turpentine and linseed oil, the "stormy petrels" of the past four months, are stationary and it is not deemed likely that there will be any marked change in either commodity for some time to come. Dry lead has seen another advance but it is not large enough to affect the price of white lead.

Linseed Oil.—The market at present is very active. There is a steady movement from the jobber to the retailer. The price has shown a tendency toward weakness but most local houses are quoting $1.12 for raw and $1.15 for boiled the same as last week. Some quotations of $1.10 and $1.13 respectively are heard. Although the present condition of the market might be best described as weak, there is not much likelihood of further declines in the immediate future.

Turpentine.—The price quoted here is $1.05 still, although some give $1.00 as the selling price. The market has been very erratic for a week past. Doubt is therefore felt with reference to the future. On the primary markets a decline was caused by the arrival at the shipping points of a considerable supply of new turpentine. Correspondents at Jacksonville and Savannah do not strike a very certain note in discussing the future. "A large amount of turpentine has been contracted for, however," said one man, "to be delivered during the months May, June, July and August. Consequently, it is believed that the present price is about the bottom that will be reached for this season."

The demand locally is very heavy at present, and not a great deal of interest is being shown in the question of price. The relief caused by the rapid recession from the high price mark has brought about a large volume of business.

Rosin.—In sympathy with turpentine, rosin has declined about $1.00 per barrel within the last two weeks. The demand is not particularly heavy just at this season.

Putty.—There is a fair amount of business being done. Prices are standing at the same figures: Standard putty is quoted at: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same; bulk in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

White Lead. — Some interest was created by the advance made in dry lead. It has had no effect on the price of ground lead, however, as the easier tendency in linseed oil has served to counterbalance the stiffening in the price of the dry material. A further advance in dry lead would make a corresponding increase in white lead extremely probable, however. The demand at present is large. Outside painting being now well under way, the painters are all busy, and are consequently ordering supplies heavily.

Prepared Paints.—There is a heavy demand for all paints and the manufacturers and jobbers express themselves as satisfied with the volume of business being done. The retail dealers are equally well satisfied, and reports from different sections are unvarying in their expressions of confidence in the continuation of active conditions.

Varnishes and Japans.—The same condition applies with reference to varnishes and japans, as with prepared paints. There is a good healthy tone to the business. "The spring trade has been exceptionally good," said one jobber to-day. "We handled this year more assorted orders than ever before. People seem to be gaining in appreciation of the fact that special varnishes for certain uses are worth buying."

Specialties.—Good steady trade has been done in painters' specialties and supplies. Plaster of Paris, boat pitch, kalsomine, pine tar in tins, axle grease, alkali, sand paper, pumice stone, sponges, tar, shellac, fruniture polishes, colors ground in varnish and the almost countless other goods of the same nature have been moving out well. Not a single line has been slack, evidencing a good, all around demand.

Petroleum.—There is a seasonable demand for coal oil. The prices remain at: Canadian prime white, 12c; United States water white, 13½c; Pratt's Astral, 15½c. There is a fairly good demand for this season of the year.

Glass.—The demand is growing with the increased activity in building. There is now every evidence that a record year's business will be done. Prices are firm.

DEVELOPMENT IN WESTERN PAINT INDUSTRY.

The contract has been let in Winnipeg for the erection of a new factory in the St. Boniface section of the city for the Martin-Senour Paint Co. In securing property for the new building consideration was taken for extension, should the business in the future necessitate it. The plant, however, will be very extensive and complete and will cost in the neighborhood of $50,000.

The Winnipeg Paint & Glass Co. will continue to act as western distributors for the Martin-Senour Co., and it is reported that they have secured a half interest in the Canadian business of the Martin-Senour Co.

Dependon——Light Hard Oil Finish.

Everlastic——Quick-drying Floor Varnish.

Gold Medal——Inside and Outside Varnish.

—These three varnishes meet all the regular demands of your trade--simplify your varnish stock—increase your varnish profit.

If any part of your house or your customer's house, is in need of varnishing, the requirement is met by one of these three B-H Varnish Specialties—Gold Medal, Everlastic, Dependon.

GOLD MEDAL—If the front door, porch, ceiling or bathroom wants brightening, Gold Medal, Inside and Outside Varnish, gives pleasing results with its easy flowing action, and will protect the exposed surface with a durable coating, which will fight the effects of moisture and changing temperature.

DEPENDON—If the furniture, wall, inside door, or any interior work, of either hard or soft wood, is in need of finishing or renovating, Dependon dries free from tack in a few hours, and can be polished, if desired, in twelve, stands hard wear and dries with a brilliant lustre.

EVERLASTIC Quick Drying Floor Varnish has these special qualities. It dries hard and makes a very durable coating. It is elastic and tough. It does not show heel marks nor scratches easily. It dries quickly. Has a fine lustre, and can be walked on the next day after application.

These varnishes are sold in beautiful, lithographed gallon, half-gallon, quart, pint, and half-pint cans, imperial measure. The packages make a most attractive store display. Handsome lithographed illustrated signs will accompany your order.

Write for favorable quotations. Address our nearest office.

Amatite ROOFING

Why the Buyer of Amatite Never Complains

WHEN a man buys ordinary ready roofing he usually neglects to paint it and after three or four years he comes back to the dealer with a protest. It is human nature to neglect painting roofs.

When a man buys Amatite Roofing he lays it on his building and in three or four years it is still as good as new and does not need any paint. He forgets he has such a roof, but no harm is done by that.

There is nothing to neglect in the case of Amatite. Amatite has a peculiar surface—a sort of plastic concrete made of pitch and mineral matter. This surface is plastic enough so that the material can be rolled up into handy rolls in the usual manner and handled just like any other ready roofing. When unrolled on the roof and nailed down it presents to the weather a continuous surface of mineral matter and pitch. On this surface wind, rain, storm, heat and cold have little effect. Year after year it looks up to the sky undisturbed and unaffected. It costs nothing to maintain and relieves the owner from all responsibility.

Dealers can improve their business by selling Amatite and buyers make a good bargain when they buy it. The price of Amatite is less than that of most painted roofings of less weight and durability. **Sample free on request.** **Address our nearest office.**

Everjet Elastic Paint A lustrous carbon black paint, very cheap, very durable—for protecting all kinds of metal and wood work.

Creonoid **Lice Destroyer and Cow Spray.** A powerful disinfectant for farm use to make the hen house and cattle barn sanitary. Suppresses odors, kills germs.

The Paterson Manufacturing Co., Limited

Business Is On

All along the line you see the painters going to business. Householders are cleaning, and people are beginning to ask for Ramsay's Paints. Our ads. are out on the fences, in the papers, through the mails, and everywhere is

RAMSAY'S PAINTS

Agents! We again ask you not to let any of this trade go past you. Every day we are securing orders through our helps. Every day people are writing us asking for cards. Hundreds of our agents are now displaying the goods, getting us to write one of our persuasive letters to somebody who ought to paint, and are thus getting orders and making money. Are you?

Stephens' PURE PAINT

MADE WITH MANITOBA LINSEED OIL

The Western Paint Dealer

For over twenty-nine years we have been manufacturing Paints, Stains, Varnishes, etc., in Winnipeg, and have, during that time, met with and overcome the many difficulties due to the particularly severe climate conditions found throughout Western Canada. Our Paints are to-day the recognized standard for this country, and enjoy the thorough confidence of the Western consumer.

Our whole attention is concentrated on the West, and in consequence the Agents for Stephens' Pure Ready Mixed Paints are better looked after than would otherwise be possible, both in the matter of advertising and general service.

Satisfaction is guaranteed the user of Stephens' Paints---The name of **"Stephens"** on any package is a guarantee of quality.

EVERY USER A SATISFIED ONE

THE CANADA PAINT Co'S PURE ORANGE SHELLAC VARNISH

This Shellac is made from fine East India Lac. For covering knots and where a rapidly drying Varnish is required, the C. P. Co.'s Pure Orange Shellac will be found to be extremely satisfactory. It is of a rich light brown color and an excellent article to be used on floors or furniture, upon the natural wood or over stain. Floors covered with our Pure Shellac, in addition to presenting a handsome appearance, are healthful and hygienic.

Sherwin Williams

Individual Decorative Service

Are there people in your community who still regard paint and varnish as necessary evils; people who put off painting till the last minute and then buy as little and as cheaply as they can? If so, you have a rich field to work in. Such people don't buy paint often simply because they have never been shown what surprising results can be secured through the intelligent use of paint and varnish. The secret of successful and profitable paint selling is to show its wonderful decorative possibilities which so few people are familiar with.

The Sherwin-Williams' Agent has back of him a large and efficient Decorative Department for the sole purpose of aiding him to advertise and offer expert advice to every householder in his community. This service is individual and exclusive. Our trained experts will work up special color elevations for exterior and interior decoration on request and without cost, for one room or an entire house, office, store, school, hall, church, theatre, etc., including, where desired, suggestions and samples for carpets, upholstery, curtains and everything complete. The Agent is thus enabled to go after all the desirable jobs in his locality because he can offer this service without extra cost and his sales possibilities are limited only by his own aggressiveness. Let us explain this proposition in detail. It's an opportunity you cannot afford to neglect.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS

CANADIAN HEAD OFFICES AND FACTORIES: MONTREAL
BRANCH OFFICES AND WAREHOUSES: TORONTO, WINNIPEG AND VANCOUVER

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer.

RATES—2c per word first insertion.
1c per word subsequent insertion.
5c additional each insertion when Box Number is required.

AGENCIES

CANADIAN AGENT WANTED to represent United States firm manufacturing the best Nail Puller on the market and other hardware specialties. State lines already carried and territory covered. Box 1071, HARDWARE AND METAL, Toronto. (tf)

ARTICLES FOR SALE

GUN BUYERS would do well to send for catalogue; large stock always on hand of double breech-loaders, both hammer and hammerless, at reasonable prices. F. BAXTER, 13 Brougham St., Handsworth, Birmingham, England. (20)

BUSINESS CHANCES

FOR SALE—Hardware business for sale in good town in Southern Alberta. For particulars apply Box 502, HARDWARE AND METAL, Toronto. (20)

Satisfactory reasons for selling. Recent inventory shows: Stock of Hardware and Farm Implements, $12,000; Fixtures, $1,500; Turnover, $41,000; Gross Profits, $11,000. Will sell or lease premises. Address P.O. Box 549, Edmonton, Alberta. (25)

WANTED—Tinsmith with about $1,000 to invest in good hardware and tinsmith business in Western town. Splendid prospects. Apply McCLARY MFG. CO., Winnipeg, Man. (19)

PATTERN DRAWING

SHEET METAL WORKERS — Our Home-Study Course on Pattern Drawing teaches you the method of drawing patterns for anything required in sheet metal, whether in a small tinsmith shop or a large cornice and skylight factory. This course is adapted especially for home study, and is clearly worded and illustrated. It takes you behind the scenes and shows you that what has appeared mysterious is simplicity itself. The complete course, comprising 40 blue prints, 60 sheets of instructions and necessary drawing instruments, sent to any address in Canada on receipt of $20.00. Club rates, 3 to 5 members, $17.50 each; 5 members and over, $15 00 each. After May 15th above prices will not include drawing instruments. Address, THE SHEET METAL SCHOOL, Box 419, Galt, Ontario. (13tf)

When writing advertisers kindly mention having seen the advertisement in this paper.

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY if you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto.

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

NEU-TONE

A PAYING PROPOSITION

It pays, brother, when you can make a friend of everybody that comes into your store. And it is not so hard to do, either.

Take for instance, the paint proposition. If a man comes into your store, and you make a lot of promises that the paint doesn't fulfill — that man will not re main your friend many days.

When you lose him — well — you will lose many more. But on the contrary, if the paint "*makes good*" you make a fast friend and gain a lot of more customers.

NEU-TONE COLORS

(Washable — Sanitary)

Please Everybody — Dealer, Decorator and House-Owner

It pleases the dealer because it is a paying proposition — carrying with each sale the twang of a come-back order. It pleases the decorator because it enables him to give his work a "*style*" that triumphantly asserts itself.

It pleases the house-owner because with it, the house can be finished in the soft, restful, "flat" tints and rich colors of kalsomine. Dust, grease and smoke stains easily removed with a damp cloth. Think of it. It pays to sell this kind of paint, Mr. Dealer. Drop us a postal and we will tell you a few more things you will be glad to hear about this *paying proposition.*

THE MARTIN-SENOUR CO., Limited

Montreal Chicago Halifax Toronto Winnipeg

Dougall Varnishes have the Quality that gives Economy

¶ They are made of genuine, expensive (not cheap substitute) ingredients. ¶ They are made by Varnish Experts (not by experimenters). ¶ They are thoroughly aged and ripened (not hurried out green). ¶ They are perfectly tested, and not offered to customers until their quality is proven.

ALL OF THAT IS WHY

They cover an extra amount of surface;
Are put on with peculiar ease and speed;
Retain their life and elasticity so long;
And endure so much hard wear.

QUALITY AND ECONOMY IN VARNISH AND VARNISHING

Our free book explains Quality, gives facts on Economy, concerning Varnishes for all purposes—207 kinds.

The Dougall Varnish Company, Limited

305 Manufacturers St. **J. S. N. Dougall, Pres.** **Montreal, Canada**

Associated with Murphy Varnish Co., U.S.A.

How To Buy Varnish

YOU Dealers ought never to buy goods on promises and predictions of immediate re-sale to customers. Look to the manufacturers, examine their past. What you want is **facts**—and **past performances,** not promises. Don't let any big-one-time-and-gone-advertising, influence you to place an order. You want thorough and complete co-operation, which includes big, broad and consistent advertising straight through the year, this year, next year and for all time.

This is your backing when you sell Pratt & Lambert Varnishes—the most thorough and complete varnish selling assistance in the trade. It's yours for the asking. I advise you to write now for prices and terms.

Satinette

(White Enamel)

should be on every dealer's shelves if for no other reason than that it is one of the famous International Varnish Products.

But—it has plenty of intrinsically superior qualities to recommend it besides that.

Satinette is suited for decorative work of every description—Gloss Interior and Flat Interior for interior work and Gloss Exterior for exterior work.

Satinette is known all over the world as the white Enamel that stays white—it cannot become yellow.

Architects, painters and decorators always think of Satinette now when they think of enamel.

Satinette is the most perfect and durable white enamel ever made.

It has great covering capacity and **CANNOT TURN YELLOW.**

Like all International Products, Satinette is sold only in full Imperial Measure Cans.

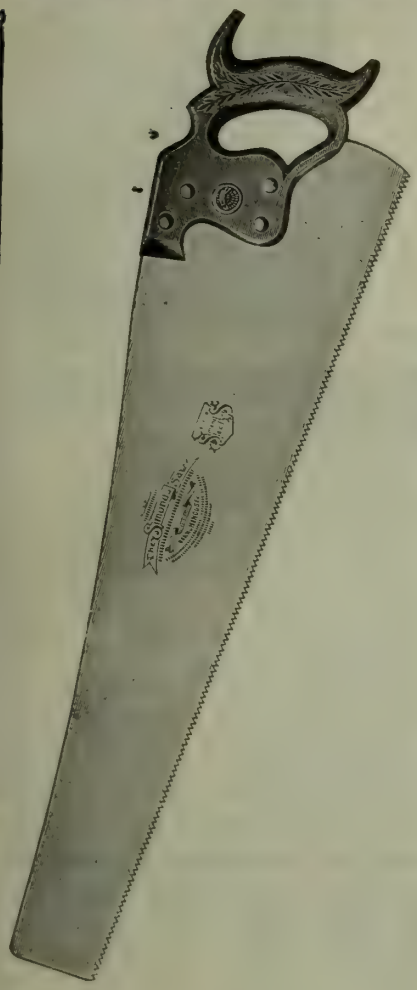
Paint and Varnish Removers

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	Name of Brand.
The Sherwin-Williams Co., Montreal, Canada.	"Taxite"
International Varnish Co., Ltd., Toronto, Canada	"Klensa"
Pratt & Lambert, Inc., Bridgebury, Ontario, Canada	"Expedite"
British American Paint Co., Victoria, B.C.	"Bapoo"
Mount Royal Color and Varnish Co., Montreal, Canada	"Scrape-off"
James Robertson Co., Ltd., Toronto, Canada	"Robertson's Paint and Varnish Remover"
Sanderson Pearcy Co., Ltd., Toronto, Canada	"Devolite"
Stewart & Wood, Toronto, Canada.	"Solvo"
Martin-Senour Company, Ltd., Montreal, Canada.	"Martin-Senour Paint and Varnish Remover"



The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

IT IS PERHAPS NOT GENERALLY KNOWN

That we have an Information Department, consisting of trained and practical men, whose time is employed solely in answering enquiries from people interested in cement.

NOW IT WILL BE READILY UNDERSTOOD

that out of the mass of enquiries that come to us, there are a number that include questions as to what might be termed Allied Industries. These we now answer to the best of our ability, but we could answer them still more satisfactorily if manufacturers of materials used in conjunction with cement would co-operate to the extent of sending copies of their catalogues and other literature, to be placed on file in our office for reference.

WE SHOULD LIKE TO OBTAIN

the names and addresses, together with catalogues, and any other obtainable information, of manufacturers of and dealers in:—

(1) CONCRETE MACHINERY. (2) BUILDING BLOCKS. (3) CEMENT BRICKS. (4) TILE MOLDS. (5) FENCE POSTS. (6) REINFORCING MATERIAL. (7) WATER-PROOFING COMPOUNDS.

It is not alone for our own convenience that we make this suggestion—firms who manufacture or deal in such articles will find it to their own advantage to have this information in the hands of our Information Department, thereby enabling us to hand on to them, from time to time, enquiries for such materials as they severally make.

In sending catalogues, literature or information, please address same to "Sales Department."

FENN'S
Adjustable Post Hole Auger

holds undisputed pride of place as the fastest digging tool on the market, and for this reason alone is a splendid line to handle and recommend.

Moreover, it is simple in construction, stands abuse well, and has no castings to break or rivets to work loose. Blades are of highest grade steel bolted directly to standards, and the "Fenn" can be adjusted to dig different sized holes. Digs a full size hole clean to the bottom, and works equally well in any soil. Better send along for prices and fuller description of this splendid tool.

It is a line that sells readily and profitably. Write us to-day. Descriptive booklet forwarded free to enquirers.

THE CONNOR BALL-BEARING WASHER

With the hinged cover now used on this Washer it is no longer necessary for the operator to place the cover and rubbing board dripping wet onto the kitchen floor. With this hinged rubber and cover the water drips back into the machine. It is easily handled. And other features of this machine are a detachable tub; no iron running through the bottom of the tub; Cypress Tubs: nicely finished Ball - Bearings and Motor Springs do most of the work.

Have you the agency for this washer? If not, write at once for sample, prices, terms, etc. You will find it the most satisfactory machine you ever handled.

Merrick-Anderson Co., Winnipeg, Agents for Manitoba, Saskatchewan and Alberta. Geo. D. Horsman, 838 Granville St., Vancouver, Agent for British Columbia.

A Common Sense Talk

AIR IS CHEAP. You do not pay rates for air like you do for water, yet a big fuss is made over the impurity of water and very often no thought is taken of the impurity of the air breathed from day to day and night to night.

Crowded rooms, whether in public places, schools, opera houses or factories, require ventilation as well as the private dwellings.

HOUSE BUILDING IS A SCIENCE NOWADAYS AND NO BUILDING IS COMPLETE WITHOUT ONE OF OUR J. W. HARRIS VENTILATORS.

THE VENTILATOR ITSELF IS AN ORNAMENT, and can be made to suit the character of the building, either as to size or as to quality of material.

MONTREAL, Dec 4th, 1905

MESSRS. J. W. HARRIS MFG. CO., Ltd
City

DEAR SIRS,—
In answer to your letter of the 25th ult., I must say that I am very much satisfied with the results of the "ZEPHYR" Ventilators.

Yours truly,
W. CHAMPAGNE,
191 St. Paul St.

Dealers everywhere will find a double profit in handling this ventilator. Write direct for catalogue and booklet to-day.

Learn about our system of ventilating. A pleasure to send books.

When you think of Metal Ceiling, think of "Galt."

Dealer, House-owner and Architect all favor "Galt" Art Metal Ceiling

Ernest R. Beckwith, C.E., architect on this job, says of the goods supplied:—

"Besides being one of the prettiest ceilings I have ever seen, it was exceedingly easy to erect. In fact, most of the work was done by unskilled labor owing to the regular tinsmiths being busy.

The special material made for the stage-front was accurate in detail and satisfactory in every way."

If you want to please your customer and his architect; if you want to build up a business in Metal Ceiling and if you want to make the most money from your metal ceiling work, send your orders and enquiries to

The IRONCLAD *Alarm*

"It Rings to Beat the Band."

IF we placed our IRONCLAD movement in an ordinary alarm case, the chances are it would *turn turtle* within a year. And if it lived to tell the tale, it would be to *tell a tale*—for it would get so *clogged* with dust, it could not tell the *truth.*

But it's CLAD in heavy IRON armor and it can't *keel over.*—It's stocky, sturdy, steady.—If it's *cleaned* every other year, there's *no telling* how long it'll last.

Packed 12 in a box with advertising matter. Dealers' names printed free on dials in lots of 24. Height 5 inches. Dial 2¾ inches. Weight 2½ lbs. Rings 35 seconds; can be shut off at will.

Stocked by 28 Canadian Wholesalers.

Sportsmen Will Soon Be Getting Their Outfits

They will find many a use for the Carborundum sportsmen's stone—it will quickly sharpen an axe, hatchet, or hunting knife, or point hooks and gaffs—Put up in neat leather belt case—Sportsmen will also want a Carborundum razor strop or razor hone—The big popular magazines and sportsmen's papers will tell them to get them from you—Be sure that you carry them in stock—

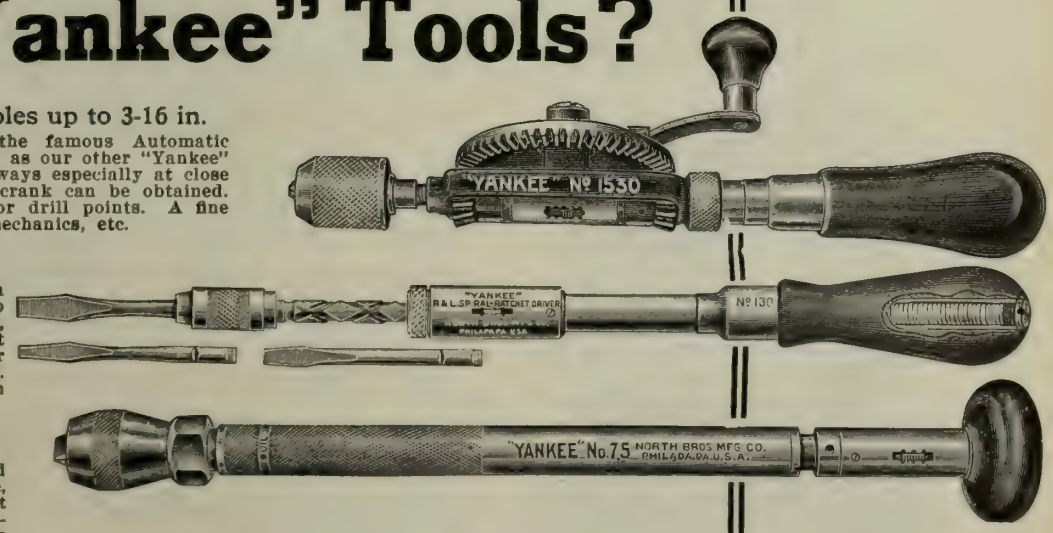
WRITE TO-DAY for information regarding the Complete Carborundum Line, the trade helps, free display case offers, etc.

The Carborundum Co., Niagara Falls, N.Y.

Have You Seen These

New "Yankee" Tools?

No. 1530 Hand Drill for holes up to 3-16 in.

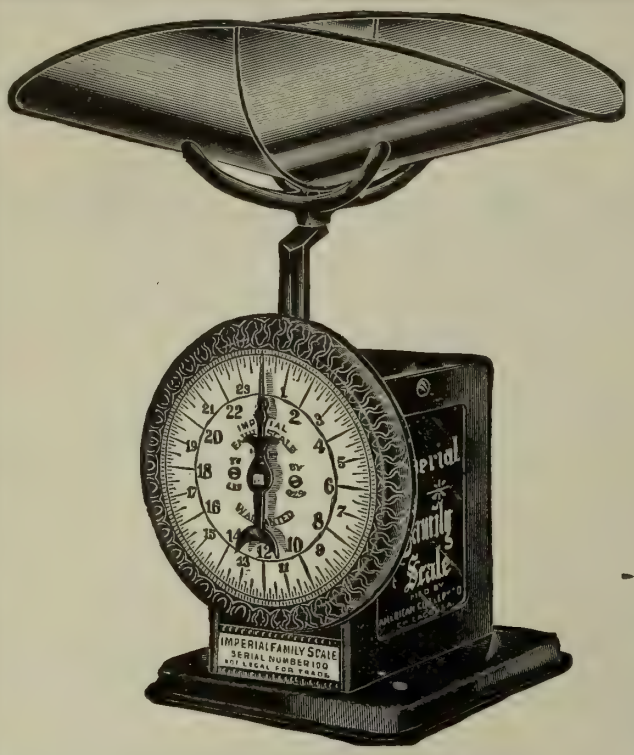


Takes round shank drills. Has the famous Automatic Double Ratchet movement the same as our other "Yankee" geared Drills, so helpful in many ways especially at close quarters where only part turn of crank can be obtained. The wood Handle has magazine for drill points. A fine tool for metal workers, amateur mechanics, etc.

No. 130 Quick Return

Same tool as the No. 30 but with a Spring inserted in the Handle to drive the spindle back quickly, ready for the next push. A great advantage for overhead work or where only one hand can be used. Takes all the Attachments used in the No. 30.

No. 75 Push Brace



Bores holes up to ⅝ inches in hard woods and ⅝ inches in white pine, quicker and easier than a Bit Brace. Drives and draws screws—takes all the small tools and works in close quarters where a Bit Brace cannot be used. Bearing down on the Handle drives it with that quick and easy motion of the "Yankee" Spiral Driver.

They are catching the Mechanics.
Better let your Jobber quote at once.

HOW ABOUT YOU

Are You going to be In or Out?

Now is the time to decide

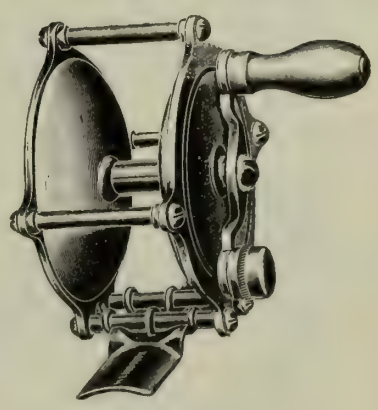
The Sportsman or Fisherman who comes to your store for Fishing Tackle expects you to be **"In"** the goods he wants and needs. He expects to find **an assortment** from which to make his selection. He has no time to wait for a shipment of a "Special Order."

If You are "Out" he will see if Your Competitor is "In"

and **you** will very likely lose a sale and in all probability lose a customer as well.

Can You Afford to be "Out" of a Complete Line of

Fishing Tackle



at this season of the year?

We think you will say No. You cannot.

You have no time to lose in getting your line in shape.

"He Who Hesitates Is Lost"

It is not necessary to carry a **Heavy Stock** of many of the items in the line—We carry the Heavy Stock—But it is very Essential to have **Your Assortment Very Complete.**

Our Catalogue No. 45

Illustrating and Describing the Most Extensive Line of Fishing Tackle ever carried by a Jobber in the Dominion of Canada

DISSTON

INSULATE SCREW DRIVER

This tool is designed expressly for Electricians' use. The blade of crucible steel, hardened and tempered, is embedded in a handle of hard rubber of a texture that eliminates brittleness. It WILL NOT work loose. The rubber handle is milled grip, with projecting rings which prevent the hands from slipping down on to the blade. The hard rubber handle acts as insulation.

The Disston Insulate Screw Driver is something new. Most practical Electricians' screw driver ever made.

TRANSPAROL

Transparol is the finish that makes every surface a mirror, and is the leading finish for railroad cars, automobiles, and all other vehicles, also for leather.

Transparol is a particularly choice finish, and one that is positively indifferent to all effects of

Atmosphere
Acids
Oils
Gasoline
Salt Water, etc.

Transparol is the best preservative of wood known, and is equally as good a preventative of rust and corrosion of metals.

The gloss finish given a surface by an application of Transparol is so great that Transparol is the wonder of the paint and varnish experts.

Transparol comprises the following universal qualities:—

Flexibility
Elasticity and
Durability

History records that in Egypt they had a fluid which resisted the atmosphere for ages, and which modern civilization up to date has never been able to produce. THE OLD EGYPTIAN PRESERVATIVE HAS BEEN RE-DISCOVERED.

Transparol stands alone among the multitude of paints, varnishes and shellac products like the pyramid amidst the ruins of Old Egypt.

Transparol is indestructible; and when all other products have worn away, Transparol will still be there.

Transparol is sold on a guarantee to be satisfactory.

For Exterior and Interior Use

June Brides

JUNE ROSES and JUNE BRIDES

WEDDING GIFT SEASON

Make a display of

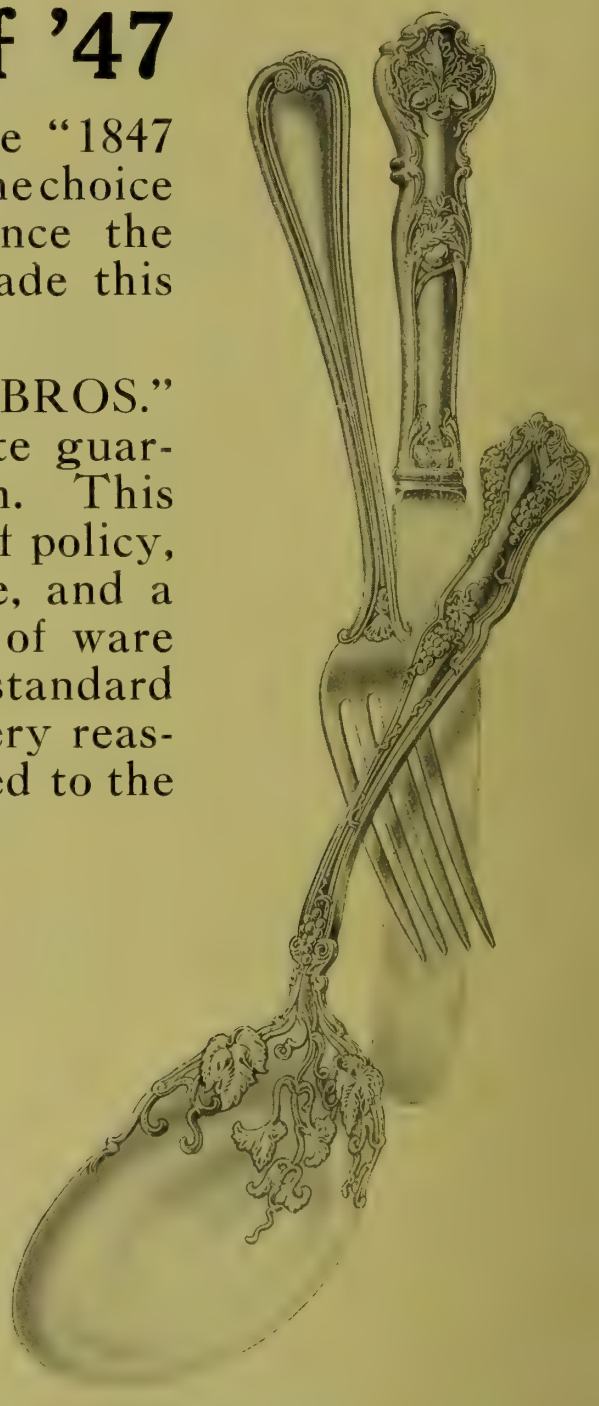
1847 ROGERS BROS. X S TRIPLE

Next month is June, and with June comes the Wedding Gift Season, and Silverware above all is the most popular for wedding presents.

In

1847 ROGERS BROS. X S TRIPLE

you have the heaviest grade of Triple Plate, backed by the guarantee of the largest makers of Silverware in the world, viz.,



"SILVER PLATE THAT WEARS"

unexcelled in beauty of design.

Your customers read our advertisements in five hundred papers, journals and magazines. Why not make them realize that you handle the Ware with which they are familiar?

MERIDEN BRITANNIA CO., Hamilton, Canada

Since the Days of '47

Quality and beauty have made "1847 ROGERS BROS." Silver-plate the choice of discriminating purchasers since the original "Rogers Bros." first made this famous ware in the year 1847.

Every piece of "1847 ROGERS BROS." Ware has back of it the absolute guarantee to give entire satisfaction. This guarantee is not only a matter of policy, but all confidence in our ware, and a sincere desire that every piece of ware purchased shall be as near our standard as it is possible to make it. Every reasonable complaint shall be adjusted to the satisfaction of all concerned.

The dealer handling

"1847 Rogers Bros. XS Triple Ware"

should talk "quality." The kind of silver that looks well on the show case, but will not stand daily service, is not a good kind to buy, nor a good kind to sell. Silverware must do more than appeal to the eye.

"1847 Rogers Bros. XS TRIPLE"

has for sixty-one years been known as **"Silver-Plate that Wears,"** and it is the highest class of silver-plate made.

We are extensive and persistent general advertisers and the individual dealer who handles our ware reaps the benefit.

Remember a satisfied purchaser is a customer gained.

Let us send you our "Advertising Helps."

MERIDEN BRITANNIA, CO., Hamilton, Canada.

The Buyer for the Home

She believes in the merchant who does business on the Quality basis—in goods whose trade mark is backed and pushed by energetic advertising.

The "Wear Ever" trade mark means quality in cooking utensils.

Its prestige means to you not only pleased and profitable buyers of cooking utensils, but more trade on your other lines.

It helps to make your name synonymous with quality.

You should have "Wear Ever" advertising—magazine and dealer aid—working for **You.**

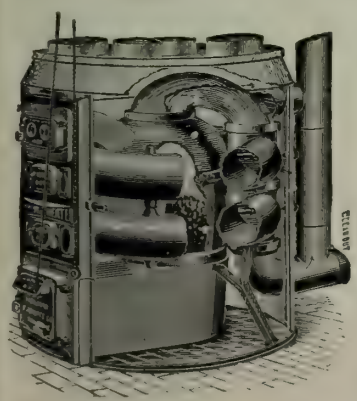
The "CANADIAN HOWARD"



DURABLE - ECONOMICAL - SIMPLE

The selection of a furnace to properly heat your home is a very important matter. Comfort and expense are not the only things to be considered, but the welfare of the family which will largely depend on the proper installation of a system that will constantly supply pure, fresh, warm air.

The down-draft principle, as perfected and applied to this furnace, will retain the combustion and ——— longer than any other furnace.

The Canadian Howard stands very low, a particular advantage when cellars are shallow.

Our Standard Flat Shaking and Dumping Grate supplied with the "Canadian Howard" is simple in construction, made very heavy and durable, easily operated, and proves very satisfactory. Write for proposition to-day.

The "Crown" Shingle
Patented 1909.

Fine Driving Snow Cannot Penetrate "Crown" Patent Steel Shingles

TINNERS!

Stop and think what this means to YOU.

This one argument that driving snow cannot penetrate "CROWN" PATENT STEEL SHINGLES is strong enough to win for you the business which now goes to the slater or wood shingle roofers.

You with "CROWN" PATENT STEEL SHINGLES could offer house owners such strong advantages as to get this pitched roof business easily in addition to your present plain tin work.

Besides, "CROWN" SHINGLES are more easily and quickly laid at a greater profit.

Send your name and address for the proofs of all this.

Write us before you forget and let us send you Catalogue and Price List.

McFARLANE & DOUGLAS, Ltd., Manufacturers - 250-260 Slater St., Ottawa

"JEWEL" FURNACE New Pattern. Two Sizes, Nos. 21 and 23

A Special Low Furnace

Different in shape and proportion from our other Furnaces, being specially constructed to surmount the difficulty of obtaining a sufficient pitch to the Warm Air Pipes in buildings with **LOW CELLARS.**

When flat top is used the No. 21 Furnace, cased, will not exceed 4 feet in height.

Diameter of Fire Pot—No. 21, 19 in.; No. 23, 22 in. Feed Door Opening, 13 x 13 in.

All our Furnaces are constructed on Correct Scientific Principles, and are mounted and fitted with the greatest care, under the direction of skilled and experienced men.

OUR FURNACES GIVE SATISFACTION AND STAND THE TEST.

This cut shows the construction of the Furnace.
The part of Furnace above Fire Pot is tilted on its side in order to show Combustion Chamber and Radiator.

The Fire Chamber is of ample dimensions and the **Feed Door** measures 13 x 13 inches.
The Radiator is made of heavy steel plate and surrounds the Fire Chamber, except at Feed Door.
The Fire Pot is made of heavy Cast Iron in two sections, upper and lower. This construction prevents the cracking of Fire Pot by unequal expansion and contraction of the iron. The Fire Pot of No. 21 is plain. The Fire Pot of No. 23 is flanged and has therefore a much greater radiating surface. The two sections of Fire Pot are attached by deep **Cup Joint** packed with asbestos cement. All other joints in Furnace are similarly constructed and a **Jewel** Furnace properly set is **ABSOLUTELY GAS TIGHT.**
The Water Pan is inserted through the outer casing near the base of the Fire Pot. When the pan is kept full the evaporation of water ensures ample humidity at all times.
Notice the **Dust Flue** in front of the Fire Pot, Connecting Ash Pit with Fire Chamber. Through this flue all dust is carried off when cleaning out ashes or using poker or shaker.
No. 21 Furnace has a heating capacity of 15,000 feet. **No. 23 Furnace** has a heating capacity of 25,000 feet.
This is the latest addition to a very large line of **WARM AIR FURNACES.** **Manufactured by**

The Joy Malleable Range

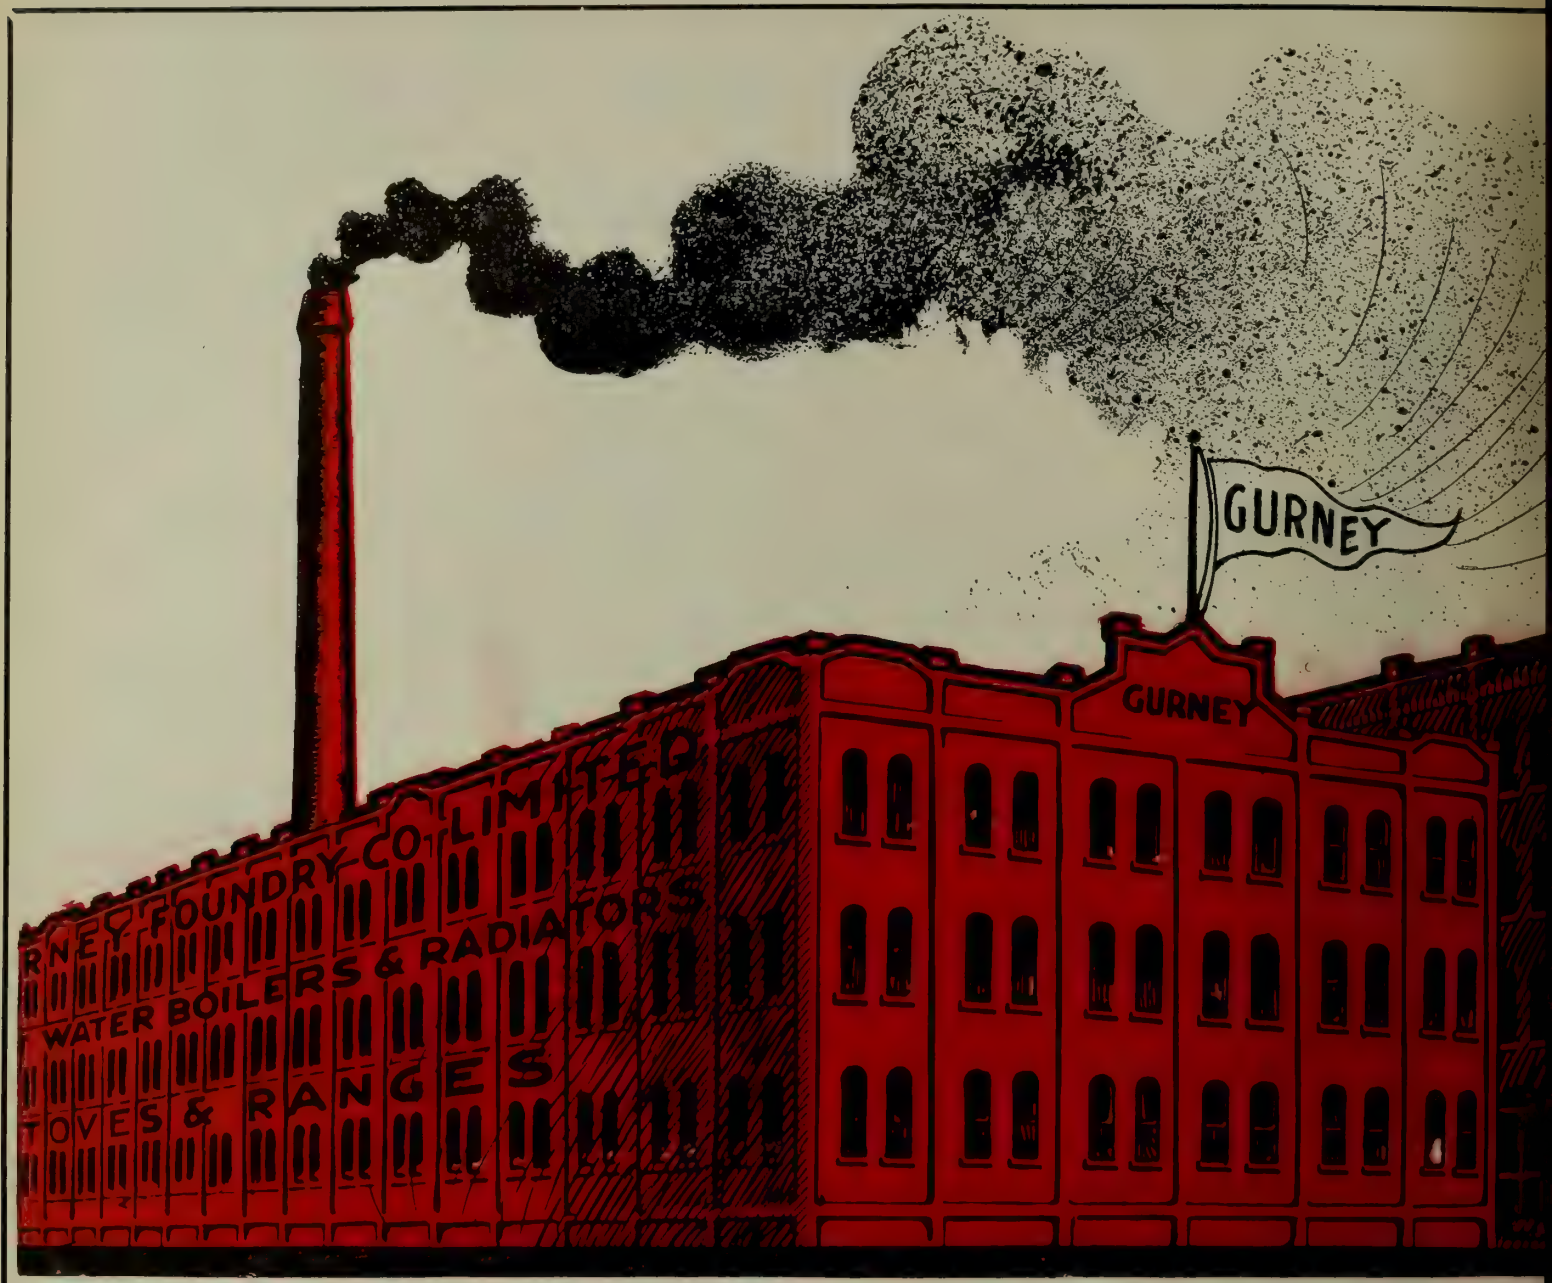
Our Ranges are made of the finest material and the best workmanship.

The Range bodies are constructed of No. 16 Wellsville polished, double stretched steel plates, lined with heavy asbestos millboard, covered with Bessemer steel, absolutely protecting it from destruction.

All tops, doors, door frames, dampers, handles, hinges and supports are made of malleable iron, all joints being thoroughly riveted and airtight.

The frames, angles and ovens are finished in aluminum, which preserves the surface from rust, will not burn off and can be cleaned with soap and water.

The doors, panels, brackets, drafts, tea shelves and towel-bar are nickel-plated.



Our Joy Malleable Ranges are superior to all others for perfect and rapid heating—for baking they never fail to satisfy.

"Safe-Lock" Wire Fence

is the easiest fence to sell, because it is by far the strongest fence made.

The strand wires of the "Safe-lock" Fence are not kinked—thus each wire retains its full strength.

And just note how the stay wires interlock where they wrap the strand wires. This lock absolutely prevents the slipping of the stay wires along the strands or in any other direction from any cause whatsoever.

A local agency for the "Safe-lock" Fence will bring you the bulk of the fencing business in your locality.

Be wise—write us to-day for Catalogue and particulars.

The COCHRAN PIPE WRENCH

And here is one of the secrets of its success, that users can see without your telling them—the rocker bearing that takes the strain which in ordinary wrenches is thrust upon the helpless frame pin. Any wonder it wins out? You can give a side twist or a sudden jerk and you make no impression on this rocker feature.

and it speaks for itself—good, strong selling points, too. Look at the bend in the hook jaw—see how strongly it is re-inforced? Powerful grip, with a quick get-away. It never locks nor crushes a pipe—guarantees not to.

FRAME AND HANDLE ONE SOLID PIECE

No small parts to keep together. Nut longer than on other pipe wrenches, reduces strain on threads. Cannot bind and gravity alone brings instant release.

Now don't calculate or guess what this wrench will do—you are enough of a mechanic to recognize the logical facts we set before you—the Cochran Wrench will do what we claim for it. Send us a trial order—our guarantee protects you—the progressive workman wants up-to-date tools—you can't afford to let your competitors get them before you do

Quality Did It

Back in 1864 the Nicholson File Co. started making files with an outp it of 100 dozen a day to supply a local market. At the present time the files made by the Nicholson File Company sell at the rate of 16,000 dozen a day, and the market is the whole civilized world.

These are the well-known brands made by the Nicholson File Co. in Canada:

"American"
"Arcade"
"Great Western"
"Globe"
"Eagle"
"McLellan"
Kearney & Foot
"J. B. Smith"

All steel used in Nicholson Files is made strictly according to our own specifications which have been adopted after many years of experiment. And we use different grades of steel for different kinds of files. As a result, Nicholson-Made Files are the fastest cutting tools of their kind in the world.

Your Jobber can Supply you.

The Rapid Growth of a Western Retail Store

W. E. Brown, Strathmore, Alta., Has Now Moved into New Building After Building up large trade in the course of a few years—A Description of His Store —Conditions in West Are Now Generally Prosperous.

In a new and growing country there are splendid opportunities for the rapid upbuilding of a successful retail business. In Canada the roll of those who have sought and found immediate success in the hardware field is large and is being added to almost daily. In any western town it is possible to find hardwaremen who have in the course of a few short years built up a splendid trade and secured a connection seemingly impossible in so brief a space. Such a one is W. E. Brown, of Strathmore, Alta., a typical western hardwareman and one of the most aggressive in the trade.

Mr. Brown began his business career as a traveling salesman in the hardware line. He thus came to know the business pretty thoroughly from all sides and, in addition to the experience which his work supplied, he had an opportunity to study the methods of aggressive merchants in all parts of the country. Finally deciding that the retail field offered better opportunities, Mr. Brown studied the district thoroughly and started in business at Strathmore, then a hustling little town in the C.P.R. irrigation block, about thirty-five miles east of Calgary. His choice proved a fortunate one. He had been there but a year and a half when the C.P.R. started to boom the district thereabouts. Settlers literally poured into the country and little settlements around about Strathmore seemed to grow up over night. Strathmore itself grew by leaps and bounds and the business of W. E. Brown kept pace. He found that, in addition to general hardware, stoves were a splendid line to handle. Practically every family, which moved in, needed something in the way of a stove immediately.

The Stove Section in the store of W. E. Brown, Strathmore.

A View of the Store of W. E. Brown, Strathmore.

Finally, the business grew to such proportions that the store quarters, in which he had started up, became entirely too small. In the spring of the year 1910, Mr. Brown built a new store on the adjoining lot and moved in before fall.

Large New Store.

His new store is large and commodious, having a frontage of thirty feet and a depth of sixty-five feet. It is two storeys in height and is fitted with a cement basement the full size of the store. The ground floor is devoted to hardware and stoves and the floor above to furniture. The basement is used as a storeroom.

From the accompanying illustrations it will be seen that, in planning his new store, Mr. Brown followed practical and progressive precepts. The one side is devoted to general hardware, and the stock is arranged with an eye to appearance as well as utility. The fixtures are of a new pattern. On the other side of the store the stove stock is displayed. Stoves of all kinds and sizes are shown in a row along the wall, one being connected up for demonstration purposes. They are always kept in what might be termed the "pink of condition," bright with polish, unencumbered and ready for inspection.

The metallic ceiling is quite free of goods and, as a result, the light in the store is not obstructed.

Moved Under Difficulties.

Moving was carried out under difficulties. The new store was completed during the busy season—and any hardwareman who has served through the fall in

a thriving western town will understand that, to move at such a time, would border on the impossible. Nevertheless, Mr. Brown and Fred A. Menzies, who was with him at the time, accomplished this truly remarkable feat. They attended to trade in the day time and did the moving in the evenings. Fred Menzies put the galvanized roof on the store and did the metallic ceiling work in the same way, working after six o'clock each night.

Mr. Brown is now finding that his trade has developed so that he needs all the space that he can find even in his new store.

Conditions Are Good.

Mr. Menzies has since taken a position in the hardware store of C. A. Farquharson, High River, Alta. Writing to Hardware and Metal from that point, he states that conditions throughout the West are exceptionally good at the present time. "During the past week," he writes, "we have got a few nice showers of rain and you can see as the farmers come into the store that they are feeling much better. To-day I was talking to one of the largest farmers in the district and he said there had never been a better outlook for a good crop than there is this year. Mr. Farquharson is preparing for a very busy year. Up to the present, hardware has been moving fast."

With prospects so good and prosperity so generally prevalent, the development of the hardware trade in the West will be even more rapid and sure in the future than it has been in the past.

Hardware Merger Not Yet Consummated

Though Preliminary Steps Have Been Taken, Merger is Not Actually Accomplished—Plans of Operation Not Definitely Decided—Final Arrangements May Not be Made Until July.

Montreal, May 19th.—The most widely discussed topic among the trade, and in the business men's clubs this week, is the approaching merger of the seven Montreal hardware jobbing houses. Rumors of every description are being passed around, but in the absence of any definite statements on the part of those principally concerned, there is little but hearsay to report.

It is certain, newspaper reports to the contrary, that the merger has, so far, not been actually consummated. It is equally certain that the preliminaries, which have been under discussion for probably three years, have now reached such a stage that announcements of a very definite character may before long be expected.

For months past this merger has been under discussion, and, one by one, the various jobbing firms of this city have become convinced that a consolidation would be in the best interests of the trade. It would materially reduce the cost of selling, which, in these days of increased hotel rates, has become a serious item of expense; it would probably effect economies in buying, especially on lines which could be bought in carloads, in place of the smaller quantities previously purchased by the individual firms; and, by concentrating stocks, the handling and distribution costs would also be lessened.

On the other hand, the merger would mean the sinking of each firm's individuality and reputation into that of a corporation, and this fact alone prevented some of the firms from joining the movement until within the past week or so.

At the time of writing, all the firms have signified the terms upon which they would consent to enter the merger, and it is said that options have been taken on all the properties until July 1st. The financing of the merger will be a huge proposition, as $5,000,000 is involved, and from present appearances this is all that is wanting to make the amalgamation a fact. Some of Montreal's leading financial institutions are known to have been approached in the matter, and two prominent capitalists have been frequently mentioned in talk on the street as being prepared to back the deal. It is, therefore, almost assured that the necessary arrangements will be made before the expiration of the option, and it is not unlikely that they will be concluded very soon.

James Hardy, of Toronto, who is promoting the merger, visited Montreal on Wednesday of this week, and it was thought in some quarters that his trip had some special significance as regards the hardware merger. This, however, is incorrect, as it is stated on good authority that he was on other business entirely.

In the meantime, a casual visitor at any of the Montreal jobbing houses would have no idea that any important changes were pending. Outwardly, business is going on just the same as usual, though in some houses buying is being restricted, evidently in anticipation of an early settlement of the affair.

Much conjecture is being indulged in as to the manner in which the proposed merger will be organized. Of course, no definite plans have yet been laid, and this will be impossible until the merger is actually formed, and its officers chosen. However, the plan outlined in last week's Hardware and Metal, of forming three groups of houses, each with its own warehouse and selling force, has been very widely discussed, and appears to meet with general favor.

AN ELUSIVE SUBSCRIPTION CROOK

In several recent issues, Hardware and Metal took occasion to warn its readers against the operations of one W. Keppel White, who was taking subscriptions and collecting accounts for the MacLean publications, without authority.

The efforts which have been made to locate and punish this man would form a good plot for a detective story. As far back as last December, complaints were reaching this office of fraudulent collections made by White. He traveled from town to town in the Maritime Provinces, representing himself as a subscription agent of the MacLean Publishing Co., whose papers have a very large circulation there, and therefore afforded a great scope for the game he was playing. He was accompanied by his wife and a child of about four years. He is described as being of light complexion, five feet six inches in height, and weighing about one hundred and fifty pounds. He was clean shaven, and wore a light rain coat and stiff hat.

The first definite clue as to White's whereabouts, came from St. Stephen, N. B., where he is said to have spent from April 6th to 22nd, leaving on that date, without settling his hotel bill.

White's method was to go into a store and ask the proprietor if he subscribed to Hardware and Metal. Receiving an affirmative reply, he would ask to see the last copy. Learning from the label, the expiring date of the subscription, he would take out an ordinary receipt book, and give a receipt for whatever amount was due.

W. A. Mills of St. Stephen, gave the accredited MacLean representative considerable assistance in tracing White, and it was learned that he had gone from St. Stephen to Eastport, Me.

Meanwhile, investigations conducted by the MacLean Publishing Co., revealed the fact that White had been arrested in Sydney, last October, and, for a similar subscription fraud, sentenced to two years' imprisonment, but allowed to go on suspended sentence.

A little over a week ago, W. L. Baker, of the Bank of New Brunswick, on the Island of Grand Manan, N.B., wired the company that White was in that town collecting subscriptions for MacLean papers, and asking if he were authorized. A telegram was immediately sent to Mr. Baker asking that he request the police to detain White.

Jos. E. Gaskill, from whom White had collected $4.75, then swore out a warrant and arrest followed. The prisoner, however, put up a great talk, and nearly succeeded in securing his discharge. White acknowledged his sentence at Sydney last October, he told a plausible story of a miscarriage of justice. The magistrate kept him all night, allowed him his liberty in the morning and, then, upon Mr. Gaskill's persuasion, had him re-arrested, and remanded until Monday morning the 8th inst.

By this time Hon. George J. Clarke, K.C., of St. Stephen, N.B., had been retained by the MacLean Publishing Co., to act for them in prosecuting White. A good case had been prepared when, on Tuesday of this week, Mr. Clarke wired that White had broken jail, and effected his escape into the United States. There appears to be somthing queer about his escape which is being investigated by the attorney-general of New Brunswick.

Capturing the Trade in June Wedding Presents

An Effort Should be Made to Sell Cut Glass, Brass Goods, Cutlery, Etc.—How One Store Sold Stock of Art Brass Goods—The "Kitchen Shower" Custom as a Trade-Maker.

June is the month when Cupid sees the consummation of his artful efforts. It is likewise, and accordingly, the month when relatives and friends have to buy wedding presents for the young couples. Thirdly, it is the month when hardwaremen can take advantage of the second condition and create a large business in the line of goods commonly chosen for wedding presents.

The hardware store has been running the jeweler a close race of late for first place as the distributing point of marriage gifts. The days when something fancy and ornate was considered the only thing to give have passed; to-day the donor looks for a present which will combine utility with appearance. The water cooler, the coffee percolator, the chafing dish and the brass kettle are now very much in vogue and to get such articles people go to the hardware store. Likewise, the hardwareman now carries cut glass, brass and metal goods and all varieties of cutlery. He has, in fact, created for himself the reputation of being headquarters for the wedding present trade.

Brass Goods in Demand.

A feature of the trade is the well sustained demand for brass goods. Although some dealers assert that the public, which inclines to fads but does not accord its favors long to any particular one, is now looking for something new, the fact remains that brass goods are still much in vogue. There are two seasons of the year when brass is in demand—at Christmas and at the present time.

Gardner & Co., Woodstock, Ontario, have carried an assorted brass stock for years and have found it a good paying line. "It is advisable to push articles of this kind during the Christmas and June wedding seasons," declared Mr. Gardner recently, "I have found that that they appeal very strongly to purchasers of presents. Brass goods have a useful as well as ornamental value and are consequently deemed particularly desirable as wedding gifts."

Mr. Gardner begins toward the latter end of May to display his stock with sufficient prominence to catch the eye of the passerby. The goods are placed well to the front of the store and much care is given to the arrangement of the various articles. Plants mounted in brass fern holders add much to the artistic appearance of an assortment of such goods. Mr. Gardner also believes in window displays and, for a couple of weeks before the wedding season begins, he has his windows stocked with the most attractive articles in the store.

Handle Art Metal Goods.

There is another feature of the trade which should be given consideration. Many people endeavor to put into the wedding presents they give, a little of their own work and skill, believing that a gift of that kind is a more sure evidence of the esteem of the donor. What more fitting for this purpose than art brass goods? Pierced brass articles are not difficult to make and the only reason why more people have not taken up this fad—if such it may be called—is that the idea has not been sufficiently exploited.

In May of last year it occurred to M. Canfield, of the J. R. Myers Co., Stratford, that there was a capital opportunity for trade in this line. He got out a printed letter and mailed a copy to all the young ladies in the place who might reasonably be expected to take up an artistic hobby of the kind. In the letter, he pointed out that art brass work made possible the preparation of very pretty articles at very little expense and with not a great deal of work. The comparatively simple nature of the work was also commented upon and the hint was given that no better wedding present than a piece of pierced brass could be secured.

At the same time, he fitted up a window display of piercing sets, brass patterns, shades, candlesticks, etc. Many of the young ladies who had received copies of the letter called in and invested in the necessary tools and supplies. A great many more were attracted by the window display and invested in sets. Altogether, a rushing trade was done and many of the daintiest gifts given at the June weddings were the product of the hands of Stratford's fair daughters.

The Kitchen Shower.

But the hardware store benefits still more extensively from the common sense practice now followed out of "showering" the bride. Girl friends of the bride fix a day a short time previous to the ceremony and repair to her home in a body. Each member of the invading party is loaded with gifts of a practical nature for use in housekeeping. Sometimes it consists of linen but more often it is a "kitchen shower." Each member of the party brings some one thing—a nutmeg grater, an egg-beater, a pie pan or something of that nature, the result being that the bride-to-be is "showered" with every article that is necessary for use in the kitchen.

Plan Kitchen Shower Window.

It is found a wise plan to feature kitchen utensils during the latter part of May and right through the month of June, as the kitchen shower idea is becoming a very popular one. A window should be designed for the display of this class of goods. The writer recalls a very effective window shown last year, in which a large picture, showing a young lady in bridal costume, formed the background. The picture was draped with a wreath of flowers. The space in the window was taken up with a complete showing of kitchen utensils.

Another window is recalled which necessitated a considerable degree of work and ingenuity and probably a little expense. In one of the front corners of the window was a framed picture of a bride and, converging to that point from all sections of the window, were strings attached to which were kitchen articles of all descriptions. Standing back from the window a short distance, the strings could not be seen and the display, as a result, illustrated most aptly the sign, which appeared at the back of the window; "Showering the bride with household goods." Another sign in the window stated that every article required for this purpose was on sale in the store. Price tags were attached to each article in the window.

Get Up "Showers."

A plan is followed by some merchants which is worth taking up. They make up "showers," putting in every article that a young housewife will need. This set they offer at a certain sum and it has been found in all cases that the friends who are going together to supply the shower, are only too glad to make up the amount between them and purchase the set complete. In this way, they get what they require at probably less cost than if they had bought each article separately. In addition, all danger of duplication is done away with and less trouble is experienced in making the arrangements.

It would pay any hardwareman to adopt this idea. He could make up a number of sets without trouble, set a price and then advertise them. Results would follow without fail.

A "NOBBY" EVENT.

In a recent edition of "Taylor's News" in the New Liskeard Herald, is found the following account of a very interesting event in the hardware store of the Taylor Co.

"On Friday last Mrs. Dinner Bell gave an elaborate Kitchen shower tea to her friend, Miss Rim Lox, whose engagement to Mr. Knobbs was announced recently. Mrs. Dinner Bell was assisted by Mrs. Pocket Rule and Mrs. Stove Pipe Collar, and among the attractive group of guests invited were Miss Nut Cracker, Miss Dandy Brush, Miss Pinking Iron, Miss Birdie Cage, Miss Tie Clip, Miss Ice Pick, Miss Fly Screen, Miss Granite Mug and Miss Bread Mixer. The Hook family were well represented by Miss Matt Hook, Miss Hat Hook and Miss Fish Hook. The Kettle family were also very much present, including Miss Tea Kettle, Miss Stew Kettle, and Miss Preserving Kettle, while with Miss Stew Pan, Miss Fry Pan, and Miss Pudding Pan present, it will be seen that none but the "smart set" joined in the affair. Invited friends from out of town were Miss Meat Grinder and Miss Picture Nail. Mrs. Dinner Bell made a bright, charming hostess, having just recently taken a course in Putz Cream metal Polish. Mrs. Pandora looked lovliness itself, all shimmering jet and silver, with a bright new coat of O'So-Black and whiting."

LIGHT NEEDED ON NEW ACT.

It is becoming daily more apparent that an authoritative reading of the "Offensive Weapons Act" is required. The new law is not very clear on many points. Several of the clauses are so constructed that room is left for conjectural interpretation and, until they know more clearly where they stand, the wholesalers are practically compelled to desist from business in the lines covered by the enactment. This situation cannot continue long. Prompt steps should be taken to allow business to be resumed without further delay. Until the department makes the ruling, however, the present unfortunate conditions will continue and trade will be seriously hampered.

Strongly worded letters of protest are being sent to the department of the Attorney-General, outlining the position of the manufacturers and wholesalers and voicing the objections felt. One of the strongest objections raised is that the new Act may result in a great deal of illegal mail order buying. Many people, who could obtain the desired permits for revolvers if they cared to, might be inclined to avoid that necessity by ordering from a catalogue house outside the province. This would be highly detrimental to home interests. It may be pointed out that such buying would be illegal and would leave the purchasers open to the penalties provided, but Ontario dealers feel that they should be given some direct measure of protection. If the buying of revolvers is to be restricted, they believe it should be restricted all around.

CAPTURE THE MOTOR TRADE.

The opportunity to create a splendid trade in motor supplies now waits at the door of the hardwareman. In many sections there is not a garage to be found in a radius of many miles and no place where the motorist can get the supplies that he needs. As the number of automobiles in use is increasing enormously, it follows that some remedy will have to be found for the situation. The day is not far off when there will be stores in every place handling motor sundries; the large and constant demand will necessitate this. Why should not the trade centre in the hardware stores?

The hardware store is the logical place for the carrying of supplies. Gasoline, batteries, tools, etc., are legitimate hardware lines. The motorist naturally turns to the nearest hardware store when his stock needs replenishment. Still, if the trade, generally, does not show more activity in taking up this line than is displayed at present, the business will inevitably drift elsewhere. The electrical dealer and the bicycle repair man are reaching out for it now. The hardwareman must step in and claim the trade, which lies well within the scope of his business, before it is too late.

REASONS FOR RAPID GROWTH.

There are better opportunities to-day in the retail business than ever before. Canada is a growing country and new districts are opening up continually. Mere settlements are developing into towns, and towns are growing into cities with a rapidity which would hardly be credited by the people of the staid and steady old world. Mercantile trade grows with the country and, in consequence, the development of the various trades in Canada is indeed remarkable.

In this issue, an account is given of the rapid rise of a typical Western hardware business in a growing prairie town. This is not an isolated case by any means; on the contrary, it is only one in many. The history of the hardware trade in the Western provinces is full of just such examples. When a merchant builds up a large and lucrative business in the course of a few years, it is a sure sign that he lives in a land of exceptional opportunity. At the same time, all the credit is not due to that source. The rapid growth, which features the brief history of so many hardware stores, is due very largely to the energy of the proprietor and the fact that he has conducted his business on an up-to-date basis. The new dealer is generally found following progressive precepts; and he prospers accordingly.

PAINT "FUNDAMENTALS."

There are several points which should never be lost sight of by the paint salesman. First of all is the necessity, not only of handling quality goods, but of impressing upon customers the wisdom of using nothing but the very best. It pays in the long run. An occasional order may be lost but what does that matter if the "repeat" orders are coming in regularly? In connection with this point, it is necessary for the salesman to know his goods thoroughly. It is not possible to convince a customer that he should buy the best grade, if you cannot explain why.

The second point is to keep the paint stock well sorted up and neatly arranged. If a customer wants a certain thing, he does not like to be told that you are "just out." He will not put the fullest confidence in a store where he cannot always get what he wants. The same effect is produced by a poorly arranged display. Paint, of all goods found in the hardware store, demands neatness in arrangement. A fresh-looking stock helps to make sales but a haphazard collection of battered paint tins with damaged labels will prove a serious handicap. It is no exaggeration to say that many dealers keep their paint stock quite as badly as the latter description would imply.

The third point to bear in mind is the necessity for adequate advertising. By advertising it is not meant the mere use of space in the newspapers, for that is but one phase of advertising. Rather, it is meant to imply that the dealer must keep his stock continually to the front, with window displays, distribution of cards and circulars and by personal "boosting." To chat with a customer about paint is one of the most effective forms of advertising known. This personal work will be found highly effective in working up and holding trade.

Last, but not least, it is necessary to feel enthusiasm and to communicate it to all with whom you come in contact.

GET AFTER THE BORROWERS.

The following remarks in the Ironmonger have much truth in them:—"The ownership of a lawn-mower is said to constitute the hallmark of suburban respectability; but nevertheless, thousands of householders keep their lawns in order by the aid of their next-door neighbor's machine. Borrowing has been brought to a fine art in lawn-mowers and garden-rollers. Yet a fair proportion of these borrowers could probably be induced to become owners if the ironmonger would make a special effort to make such ownership easy."

Our contemporary goes on to suggest that hardwaremen hire out lawn-mowers at so much a week. Would it not be better for hardware dealers to apply themselves energetically to the sale of lawn-mowers? By the exercise of a little energy it would be possible to find out what householders lack a mower and a circular sent out to all on this list would doubtless bring them to see the error of their ways and to a point where a sale could be made.

THE TURPENTINE SITUATION.

The turpentine situation during the past few months has been of extreme interest. After reaching, by a series of senational flights, a height quite unparalleled, turpentine has receded by steps almost as rapid until to-day it is selling at nearly the normal figure for this season of the year. To reach the almost unheard of price of $1.40 and to then return to 95 cents in the course of two months, is a record that has seldom, if ever, been equalled. Those who are in a position to know assert that turpentine has not yet concluded its gymnastics and that those who expect it to settle down now to a humdrum steadiness in price, are due to experience a few surprises.

At this time last year, turpentine was selling at 85 and 86 cents. At the end of June it rose to 95 cents, the figure at which it sells to-day. It will, therefore, be seen that the present price is practically normal, in view of the events which have gone between.

Some little disquietude is felt on the score of the year's supply. Not even the most sanguine will predict much of an advance over last year and it is patent to all that the supply during 1910 was wholly inadequate and led to the soaring tactics during the winter months.

CULTIVATE TELEPHONE MANNERS.

Did you ever think of the possibilities of the telephone as a maker of customers? Or the reverse? Many a customer is won, or lost, by the replies given over the little instrument, which has provided the short cut to the transaction of business in so many ways. A short, grumpy reply over the phone antagonizes. A pleasant, courteous response makes instant friends.

People will frequently have occasion to call up a store to place an order or solicit information. If the man at the other end of the line seems abrupt in his replies, the customer feels agrieved. Next time another store may get the order. The greatest harm in this way can be done, however, by neglecting to give intelligent replies to people who ask for information. It should not be regarded as too much trouble to look up a price for some person, perhaps, unknown, waiting on the phone. A good order may result; in any case, it pays to be courteous and sufficiently painstaking to hunt up the desired information.

If a dealer finds that the "phone manners" of his staff are not what they might be, it will pay him to give them a lesson or two. It should be remembered that business can be most effectually driven away by answering 'phone enquiries in a manner lacking courtesy and intelligent interest.

POINTED EDITORIALS.

Turpentine has "come back."

* * *

Industrial events pass rapidly nowadays.

* * *

Start **now** to handle auto supplies. Your delay may start some one else catering to the trade of the motorist.

* * *

The average struck so far this year has been about two new hardware stores each day in some part of the West.

* * *

The holding of a "Paint Week" would result in a more general application of paint in the spring than is now seen.

* * *

The resale price is said to be invading Canada. There are many points to be urged in its favor when applied in some lines.

* * *

Talk paint, think paint, plan and work paint and you are bound to sell paint in a degree corresponding to the energy displayed.

* * *

A "squeeze" in tin is said to be on the books for the not far distant future. The bears must be rather used to squeezes in tin by this time.

* * *

A butcher knife or a carver has a longer blade than a stiletto or bowie-knife. Does the new Act, then prohibit the sale of butcher knives?

* * *

A great deal of confusion would be saved if an authoritative reading of the new "Offensive Weapons Act," covering all obscure points, were given.

* * *

Hardwareman runs a hotel as a side line. This is a "new line" which few in the trade have taken up so far.

* * *

Hardware millinery is not a new idea but the George Taylor Hardware Co., New Liskeard, have evolved some distinctly novel models. A few of their "creations," as shown on another page, are quite "stunning."

* * *

After taking a first place among the high-price commodities such as the lordly beefsteak, it is rather a come down, literally speaking, for turpentine to get back to the point from which it started.

* * *

Some men's voices sound, over the 'phone, like the rasping of a file. A voice of this kind is an infirmity which cannot be entirely cured but an attempt at modulation will work wonders.

* * *

June is the month of the year when people more or less unwillingly exchange good coin of the realm for wedding presents. The aggressive hardwareman will see to it that a good percentage of this comes his way. The hardware store is essentially the place for wedding present purchases.

Will Act Create Stimulus to Buying by Catalogue

It is Claimed by Ontario Wholesalers and Retailers That Offensive Weapons Act Will Assist in Building Outside Mail Order Trade at Expense of Home Dealers—Wholesale Firm Send Emphatic Protest to Attorney-General's Department.

The situation with reference to the sale of offensive weapons in Ontario has not undergone any change, except that there is an awakening sense of alarm felt on the score of the possible importation of firearms from other provinces and the United States. The new act does not specifically deal with the purchase of arms outside the province and it is felt by hardwaremen generally that there is a chance here for a certain class of purchasers to evade the law. It is accordingly feared that mail order houses outside the province may build up a large trade in Ontario at the expense of the Ontario dealers.

This is the point most widely discussed now and it is felt that the possibility contributes a menace both to the wholesale and retail trade.

"It is certain that many people, who desire revolvers for perfectly legitimate purposes, but who do not care to apply for a permit, will be tempted to buy by catalogue," said a Toronto wholesaler. "They would lay themselves open to penalties by doing so but will the fear of that prevent all sales from being made in that way? In consequence there is the grave danger that catalogue dealing with outside firms will crop up at the expense of the Ontario trade. If this law is absolutely necessary, it should be enlarged to cover mail ordering and prevent same if possible."

Remove the Conditions.

In response to a query from Hardware and Metal, the Hobbs Hardware Co., London, have expressed the following opinion on the three important phases of the act:

1. What do you think of the new act?

We do not think it will accomplish the end in view.

2. What will its effect be on trade?

It will throw trade away from Ontario jobbers to other points.

3. How best could the act be amended to remove objectionable features now noted.

Remove the conditions as far as the jobbers and manufacturers are concerned.

The Hobbs Hardware Co. consider that, under the new enactment, the Ontario jobber will be practically debarred from doing business in these lines and think that the matter should be brought to the attention of the government.

Objections are Voiced.

The wholesalers have not yet taken any concerted action, but letters of protest are still being addressed to the department of the Attorney-General. The following letter has been sent by Wood, Vallance & Co., Hamilton, to Edward Bayley, solicitor to the Attorney-General's department:

"In expressing an opinion of the New Ontario Offensive Weapons Act, as dealers in fire arms and other articles affected, we consider that whilst it has been framed with the best intentions it has been placed on the Statute books without its provisions being thoroughly discussed or understood by the originators.

"The Act is very indefinite in many points, particularly in Section 2, regarding bowie knives, dirks and daggers. We would like to be informed as to the kind of knives which are placed under this classification, and although there are many knives in daily use for domestic purposes which are equally dangerous for offensive use as the knives mentioned in this section, we do not think it is intended to place any restriction on the sale of these articles. However, apart from butcher, cooks' knives, etc., there are many styles of large folding pocket knives used by fishermen, hunters, etc., which may be effectively used for offensive purposes, and we would like to have an exact ruling regarding the sale of knives of this class.

"We are at a loss to understand the reason the ordinary air rifle was included in this act. With very few exceptions the air rifles sold in this province are used by boys for target practice, and as a rule are purchased by their parents as gifts. We have never heard of any crime committed with a rifle of this class, and accidents with them are of rare accurrence. Under these conditions we consider it unnecessary to place any restriction on the sale of these articles.

"Up to the present time we are unable to learn whether the Act covers transactions between the jobber and the retail dealer, so we are unable to express any opinion on this point. If the provisions of the Act are to be enforced, we consider that the dealers in fire arms in this province are justly entitled to demand that some restriction be placed on the importation of revolvers, pistols, etc., from the other provinces of the Dominion and from the United States. Otherwise the mail order houses outside the Province of Ontario will secure the larger part of this business, and the Act will cause a loss to the Ontario merchant without the improvement in conditions which the Act evidently intends to bring about.

"Apart from the above criticism of the Act, we consider that conditions prevailing before it was introduced were satisfactory, and that the most practical method of dealing with the question is to increase the sentences passed on criminals who are found carrying weapons when arrested. Revolver makers estimate that 90 p.c. of the revolvers made are not carried by the purchasers, and under present conditions in this Province we believe they are mostly sold to law abiding citizens who keep them for use in case of emergency for home defence, or for target and hunting purposes. In the exceptional instance where a thug or burglar is determined to obtain a weapon for unlawful purposes he will not be deterred from doing so by the restrictions of this Act, as it will be an easy matter to obtain it from sources outside the province. As the ownership of a weapon of this class by a law abiding citizen is not a crime, we do not consider it necessary that a police permit should be obtained before the weapon can be purchased. The new regulations will also result in the criminal having the knowledge that in the majority of cases he has the advantage of possessing a weapon for offense, whilst the law abiding citizen does not possess one, for defensive purposes, if necessary. Our opinion is that more stern treatment of criminals found carrying weapons and the enforcement of the right to search suspected persons for weapons, would have more satisfactory results.

"The Hardware trade generally is very much in the dark as to the purport of the new Act and we are daily receiving enquiries regarding it."

Situation in Montreal.

Montreal, May 18.—Wholesale hardware men of Montreal look with disfavor upon the new "Offensive Weapons Act," which has been enacted in Ontario.

As might be naturally expected, orders for revolvers, etc., have been reduced almost to a minimum. In fact, in some cases retailers in Ontario began sending back shipments they had received until the wholesale trade had to decline further offers of this kind. And it is held that the retailer is so bound down by the new law that he will not be inclined towards offensive arms while the enactment is in force.

Jas. G. Lewis, vice-president of Lewis Bros., characterized the new bill as "hasty legislation." He felt that the legislators who had framed it had not seen things in their proper light. Mr. Lewis did not think the law would prove successful in what it was apparently intended for. That might be arrived at only by the complete restriction of importation. The general trade had not been treated fairly by the new act, Mr. Lewis thought.

George Davis, of Frothingham & Workman, Limited, considered the new act too broad. He concurred in the idea that the use of offensive weapons among foreigners should be curtailed as much as possible, but the method adopted for this purpose was altogether too sweeping, and certainly proved that but little consideration had been given the trade. In a general sense he thought the act was rather a protection to criminals, for the average citizen would not now be inclined to purchase arms of the kind referred to.

Caverhill, Learmont & Co. have experienced a dropping off in their revolver business and allied lines, and in several cases Ontario customers have expressed a desire that orders they gave be cancelled.

On the whole, opinion here is to the point that the retailer has not been given just consideration by the formulators of the "Offensive Weapons Act."

A Talk on the Virtues of Advertising

There are Still Many Dealers Not Taking Advantage of Printers' Ink as a Selling Force—Comment of a Galt Paper— The Opposite View Taken by Trenton Dealer — "We Think We Cannot Get Too Much Advertising."

In spite of the great advances which have been made by so many hardware merchants in their advertising methods, there are still surprisingly large numbers of dealers who altogether neglect this means of boosting their business.

The writer was recently looking over the file of a daily newspaper published in St. Catharines, Ont., a city of 14,000 inhabitants, surrounded by a magnificent country. In trying to locate the advertisements of the local hardware dealers, he learned that only one firm in the city did any advertising at all. Why? Well, they were doing a pretty good business and possibly didn't think it necessary to advertise. Or perhaps they were firmly of the opinion that advertising would be of no benefit to them.

Neither of these arguments proves anything against advertising. In the first place, there is scarcely a hardware retailer anywhere who could not do more business with his present facilities without making any expensive additions to plant or equipment. In this respect, the retailer is much more fortunate than the manufacturer or jobber, for whom an increased business means a largely increased investment in machinery or additions to buildings.

Increased Business Follows Increased Efforts.

With a retailer, the doing of a larger business means exerting himself to further efforts, the thinking out schemes to bring customers into his store, and, especially, effective advertising in his local newspapers.

One of the best known Ontario hardware dealers stated that, at the end of June last year, his business amounted to somewhat less than it had during the same period the previous year. However, instead of bemoaning the fact, this dealer got really busy, and put forward all his energy to make a good showing in the second half of the year. It inspired his whole staff with his own enthusiasm, and aroused a determination in each man to accomplish greater sales during the balance of the year. Closer attention was also paid to the newspaper advertising, and the public were kept well informed as to many good reasons there were for dealing in that store. The result was an increase of 12½ per cent. in the sales for the last half of the year.

This instance shows what well-directed energy and intelligent advertising can accomplish for a retail hardware store, and many other examples of the same thing might be quoted.

Advertising Aims to Increase Business.

In a recent issue of the Galt Reporter occurs this item:

> "Five hardware stores in Galt, and only two advertisers! Do they want us to take Eaton's advertising?"

If such is the attitude taken by this paper in soliciting advertising contracts, there is probably some excuse for the non-advertisers. The only legitimate basis upon which to appeal for advertising is that of a real business proposition. The business manager of a paper who solicits contracts on the plea that his paper should be supported by the town merchants, is not doing justice either to the merchant or to the paper. Still worse would it be to say: "If you do not advertise with us, we'll publish Eaton's advertisements." A business man is not likely to invest his money in advertising as a charity proposition, nor will he submit to a hold-up.

The Galt paper would therefore do better to stir up the non-advertisers of that town by telling them how good advertising can increase their business. If they claim that they do not believe in advertising, hundreds of instances may be pointed out to show how small concerns have been raised to national prominence and to prosperity through the medium of progressive advertising.

Trenton Dealer Believes in Advertising.

S. B. McClung & Co., successful hardware dealers of Trenton, Ont., have the very opposite idea from that shown in St. Catharines and Galt. They say: "We think we cannot do too much advertising."

It was mentioned in a previous issue of Hardware and Metal, that S. B. McClung & Co. had issued a booklet calling attention to some of the lines they are carrying. This booklet was prepared by Mr. McClung's daughter, who takes a keen interest in advertising, and has great faith in its business-bringing possibilities. She oversees the firm's expenditures for advertising and does good work not only in preparing copy for newspapers and catalogues, but also in distributing the circulars which are issued by the different manufacturers from whom Mr. McClung purchases.

The booklet in question is 6 by 9 inches in size, and contains 14 pages and cover. It is devoted chiefly to such goods as are sold in the spring, and is copiously illustrated. The text matter is brief and to the point, and is simply designed to help the illustrations tell their story.

The cover is of yellow stock, the front showing a hardware clerk demonstrating a well-known carpet sweeper to a lady customer. The back cover shows a butt hinge, and from cover to cover the booklet contains interesting facts regarding building materials, paints, stoves, roofing and many other lines, which appeal to the householder at this time of the year.

Prices are quoted on several of the articles which are described, and it is probable that the booklet would have been even more effective had this plan been followed throughout.

Advertising Sporting Goods.

A good sample of sporting goods advertising is that of Jas. Simmonds & Co., Dartmouth, N. S. This firm took a whole column in the local paper, and divided it into two parts, the upper part being devoted to fishing tackle, and the lower part to baseball goods. Each half of the column looks like a separate advertisement, as the firm's signature is added to both top and bottom part.

No less than seven cuts are used in the advertisement, and the idea throughout is to convey to the reader's mind some notion of the extensive variety carried in stock by Jas. Simmonds & Co. Prices are quoted under each illustration. Speaking of fishing tackle, the ad. says: "We have over fifty varieties of fly. We doubt if there is anything you want in this line that we can't sell you. If there is, let us know and we will get it."

All Dealers Should Advertise.

Every hardwareman in Canada should advertise, and if proper attention is given to the kind of copy used, the results are bound to be satisfactory. There is no use in saying that there is only a certain amount of business to be done and it will be done anyway whether the firm advertises or not. That idea is by no means correct.

A hardware stock contains hosts of articles which could scarcely be called absolute necessities. People do not buy them because they must have them, but because their desire has been aroused. There is no better way of arousing a desire to buy than through intelligent advertising. Any merchant who tries it, and backs up his advertising with fair prices and courteous attention in his store, will soon find sales increasing.

UNIFORM FOR INSPECTORS.

There is a possibility that before many months pass all inspectors in the service of the District of Columbia Government will be required to don a uniform indicative of their respective positions. This matter has been taken under consideration by the authorities through a committee comprising the head of each department having under them men in the field, it having been brought about by the many impositions on the public by men claiming to be inspectors of plumbing, and others, and gaining admission to a premises with the sole purpose in view of robbing or performing other acts in violation of the laws.

As a matter of fact the force in the office of the plumbing inspectors in many of the larger cities are at present uniformed, and it has been found of material advantage in the carrying on of their work.

Important Industrial Deals are Pending

It is Rumored That Negotiations are Taking Place With a View to Brass Merger—Has Nail Factory Been Sold?—New Companies Locate in Toronto—A New Paint Company Formed —Wholesalers Extend.

The past few weeks have seen a marked augmentation of activity in industrial and wholesale circles. During that time a number of important deals have been completed and at the present, several equally important matters are pending. The past week has been particularly active in this respect. Rumors of merger negotiations have been heard and other interesting developments have been reported.

Among the events of the week is the report emanating from St. John, N.B., that the Maritime Nail Works of that city have been disposed of by R. L. Johnston to Toronto interests for about $200,000. The report goes on to say that the transfer is to be made on June 1, and predicts an enlargement of the present plant.

It has been found impossible to secure either a confirmation or denial of the statement. Neither has it been possible to secure definite information as to the Toronto interests concerned in the negotiations. Two companies were mentioned in this connection but, when approached by Hardware and Metal, they denied any interest, either direct or indirect, in the matter.

A Brass Merger?

The rumor, that negotiations for the formation of a merger of the various Canadian brass industries are pending, is again heard.

Lloyd James, manager of the Corporation Agencies, Ltd., Montreal, has been in London, Ont., and according to reports from that place, his object has been the furthering of arrangements toward that end. It is intimated that the Empire Brass Co., of that city would form a part of the proposed amalgamation.

Over a year ago the project was first broached. At that time negotiations were carried to such a stage that a charter was secured but the arrangement was never finally closed. Since that time, the rumor has been revived at intervals.

It is only a fortnight since the announcement was made of the merging of Somerville, Ltd. and the General Brass Co., into the United Brass and Lead Co.

Just what firms would probably be included in any negotiations for a brass merger, it is impossible at present to say.

Located in Toronto.

The Auto Strop Safety Razor Co. have decided to move their office and factory from Montreal to Toronto. They have taken up quarters in the new building of the Consolidated Optical Co., 400 Richmond Street West, where the razor will be both manufactured and distributed. Bevan Lawson will continue as manager and will make his permanent residence in Toronto.

Ready to Manufacture.

The Gilbert Manufacturing Co. are building a new factory at the corner of Duchess and Britain Streets, Toronto. The plant is nearing completion and work will be commenced within the next month. The company will make stamped copper, brass and metal specialties for the home, hotel and restaurant trade. The president is A. H. Gilbert, of Toronto, associated with whom will be his brother, who for over fourteen years has conducted a factory at Buffalo. The other directors are W. H. Carrick, general manager, Hamilton Stove and Heater Co., Geo. Gouinlock, Toronto, D. McLeod, Buffalo, and W. H. Banfield, Toronto.

New Paint Company.

The Canadian Oil and Paint Company, Montreal, have been incorporated by S. Fournier, of Providence, R.I., O. N. Piche, J. N. Piche, O. Turgeon, and J. A. Faucher, Quebec, with a capital stock of $100,000 to manufacture paint.

Establishing in West.

Arrangements are reported to be practically completed for the establishment at Medicine Hat of a plant by the Gordon Wire and Nail Works of St. John's, N.B. By the terms of the agreement, the Gordon Wire and Nail Works will build a plant there to cost at least $40,000 and employ at least fifty men at the start. This, it is promised will be increased to a $90,000 plant with a proportionate increase in the number of men employed.

The city will provide 300,000 cubic feet of gas every 24 hours free of charge and will donate a site of two acres of ground. Electricity and water will be furnished the concern at manufacturers' rates and no municipal taxes, except school, will be collected for ten years.

A Large Plant.

Work has been commenced on the new plant of steel and radiation at St. Catharines, Ont. The plans call for a structure of exceptional size.

New Wholesale Warehouses.

Vancouver, May 17.—A deal has been closed whereby property on the west side of Carrall Street South of Pender, has been bought by Wood, Vallance & Leggatt. The property has a frontage of ninety feet and a depth of 230 feet westward to Shanghai Alley on the west side of Shanghai Alley a frontage of 100 feet with a depth of 120 feet.

Plans are now being prepared for the buildings, which will be four storeys in height with cement basements. The buildings will be of steel with mill construction. Work will be started almost immediately and it is thought that they will be ready for occupancy by December 1.

The buildings to be erected on this land will be devoted entirely to the wholesale business of the firm whose present quarters on Hastings Street between Carrall and Abbott Streets have been outgrown. The sites secured are looked on as being ideal for wholesale warehouse purposes, being within four blocks of Burrard Inlet waterfront, and being flanked on the west by C.P.R. trackage and on the south by the freight tracks of the British Columbia Electric Railway Company. Almost directly opposite the Carrall Street property are the freight yards of the Great Northern Railway, and when False Creek is developed as a shipping point its waterfront will be readily accessible.

STOVE MEN IN CONVENTION.

A convention of the eastern division of the sales force of the Gurney Foundry Co. was held this week in Toronto, at the head offices of the company. It was attended by all the representatives of the company in that division, who had found it possible to get away.

During the conferences held, the sales plan for the coming year was outlined, and the extensive system of "Helps for Dealers," carried out by the Gurney Foundry Co. was fully explained to the representatives. The men will return to their districts with a full understanding of the work now undertaken to help the dealers improve their output.

The social side of the convention was on an elaborate scale. A banquet was held at the National Club, at which a good after-dinner programme was carried out, speeches being made by a large number of those present on timely topics. A theatre party was another feature of the social side.

Among those who attended the session of the convention were the following:

L. Tuck, J. Ward, J. Willis, R. Oaten, C. Roberts, A. J. Ross, A. A. Wilson, A. W. Lamontagne, W. L. Helliwell, C. Gurney, E. H. Gurney, F. F. Skinner, T. B. Alcock, E. T. Wingate, E. C. Hancock, H. W. Martin, R. W. Williams, A. E. Sweeting, W. A. Derry, F. H. Smith, D. W. Rose, W. S. Jury, G. G. Johnson, A. W. Fairbairn, H. H. D. Burk, F. W. Spry.

STOCKHOLDERS' MEETING.

At a meeting of the stockholders of Henry Disston & Sons, Inc., Philadelphia, Pa., the following officers were chosen: President, Wm. Disston; first vice-president, Jacob S. Disston; second vice-president, Henry Disston; secretary, Wm. Miller; treasurer, E. B. Roberts; assistant treasurer, Hamilton Disston.

TIN PLATE PLANT CLOSES.

Connellsville, Pa., May 16.—Six hundred employes of the Humbert Mills of the American Sheet & Tin Plate Company have been notified that their services will be no longer required after May 20. The plant will remain closed.

The village council of Tavistock have adopted the plans of F. W. Farncombe for the installation of waterworks at an outlay of about $23,000.

Impress the Wearing Power of the Goods

A Point to be Borne in Mind by the Retail Salesman—It is Worth Following Out, Even in the Smallest Transactions.

By Victor Lauriston.

He asks for a tin cup, this customer —something cheap, he says—and you show him a handsome, pressed tin affair retailing at ten cents. He shifts one foot nervously.

"I can buy a tin cup that's good enough for me"—and of course right there he smiles wisely—"for five cents."

Though you have been offering him a first-class tin cup for ten cents, you know quite well that you have in stock the variety of cup that sells for five cents. What do you do?

In nine cases out of ten you reason thus: "This man says the five cent cup is good enough for him. He pays the piper—he means to order the tune. The money for that five cent cup might as well come to me as to some other fellow."

So, without more ado, you rejoin: "We have a very good cup here at five cents"—and the sale is made, and there's nothing more to be said.

Have you chosen the wisest course? Really, I have my doubts. Might it not have been far better for you to answer that man's question with another:

"Are you sure a five cent cup is good enough for you?"

Then point out to him some things.

First, there is the difference in quality between the cup you offer at ten cents and the cup you know he was offered elsewhere for five cents. Show the buyer that the 10c cup is all double pressed tin, and that the handle is tight riveted and substantial. Point out in the five cent article the added danger of rust where dints and abrasions occur, and the far shorter life of the cheap cup. Show him that for ten cents he is securing a larger proportionate amount of wear than for five. Then, for good measure, add a word as to the difference in appearance.

And, finally, unmask your rapid fire batteries—thusly: "Just compare the two cups for yourself. Here is the ten cent cup, and here"—you dig for it a moment—"is the kind you have been buying for five cents. This five cent cup is a very good one for the price, otherwise we wouldn't handle it; but we recommend the ten cent cup as the better value."

Your customer won't buy the five cent cup elsewhere. That much is sure. And I fancy it's pretty safe betting that, after logical explanation, he won't buy the five cent cup at all.

For a purchaser—particularly a male purchaser—buys value. Values—relative values—you should closely study. In this respect knowledge is power.

When a man buys a cup, he buys something from which to drink to-day, to-morrow, the next day, and for an indefinite period. The value he receives for his money is, not the tin in the cup, but the wear in the cup. If a cup at ten cents will last three or four times as long as a cup at five cents, the ten cent cup will be cheaper in the long run, even though at the outset it costs twice the money.

There is but one gospel of selling—the gospel of quality, of durability, of strength, of endurance, not in tin cups alone, but in all hardware from tacks to threshing machines. Sell cheap if you must, but talk quality even while you sell cheap. Sell cheap and talk cheap, and when your cheap goods play out, the buyer will think you cheated him and take his business elsewhere. Sell cheap and talk good goods, and when the goods play out he'll come back to you because you were honest enough to warn him beforehand, and the experience has given him faith in your judgment. He'll buy from you because he knows that you, yourself, know.

A very complete new catalogue of enamelled, tinned, galvanized, Japanned and burnished wrought steel hollowware, has just been issued by Ernest Stevens, Limited, Stove Works, Cradley Heath, Eng. James A. Henderson, Montreal, is the Canadian agent. Many fine lines are shown with the new goods especially noticeable.

CHAMPIONS OF LEAGUE.

During the past winter the mercantile houses of Port Arthur formed a hockey organization, which they named the Big Four Hockey League. The team entered by Wells & Emmerson won the series with a comfortable margin, losing only one game, the first they played. The showing of the team was exceptionally good and they were highly deserving of the honors won.

At the opening of the season no provision was made for a trophy to be held by the champion team. Accordingly, the manufacturing department of Wells & Emmerson made up and presented the cup shown in the fiicture.

AN IRONING WINDOW.

Chatham, Ont.—Willard Hardware Co. make a rather catchy ironing display in one of their corner windows. In the background is a large ironing board, standing on which is spread a piece of cheesecloth, while a gas iron, with rubber tubing properly attached, is represented in full action. To one side stands a clotheshorse, with several more pieces of cheesecloth hanging from it. On the floor, in the foreground, are shown sad irons, and gas and charcoal irons, neatly arranged. A border of liquid veneer cartons around the window is a reminder for housecleaning season.

Mitchell Bros., plumbers, have secured the contract for the plumbing, heating and lighting for the new Pain Court church and rectory, now being built.

Bruce Wallen, of R. Aikin's staff, Dresden, is making a trip to the Pacific Coast in the interests of the Canada Damper Works of that town.

An interesting event in hardware circles took place on May 9 at St. Joseph's church, when Miss Margaret Kelly, formerly of the office staff of P. Cunningham & Co., hardware, was united in marriage to Joseph Bedard, of the J. C. Wanless hardware staff. The wedding was a double event, Miss Kelly's sister, Miss Sarah, at the same time becoming the bride of Joseph Meloche of Charing Cross.

A new government building will be erected at Aylmer, Ont.

A new school is to be erected at Chatham, Ont., at a cost of $20,000.

The Poles of Hamilton, Ont., are to build a church to cost $40,000.

A country club is to be built at Regina, Sask. The land has been purchased for that purpose.

Wells-Emmerson Hockey Team, Winners of the Big Four League, Port Arthur.

Progressive Dealers Establish a "Paint Week"

In Many Towns the Retailers Unite to Push sales in Paint During One Week—Individual Dealers Can Carry Out Same Plan—Liberal Publicity Necessary.

The latest progressive move made by paint retailers is the establishment of a "paint week." By mutual arrangement all dealers in paint in a certain city or town make an effort to boom sales in that department during the one week. The time is, in a sense, set aside for the purpose of concentrating on paint. The assistance of the press is enlisted and articles are given in the papers calling on the householders to respond. Each store is decorated suitably and the paint stock is shoved to the front. Paint week banners are draped outside the stores. In every direction, there is something to remind the householder that the time has come when everything about his home needs freshing up.

The idea soon takes hold and people get to look on "paint week" as a fixed annual event and take it quite seriously. They do their best to brighten things up during that period and show a real interest in the matter.

Even Pittsburg, which is rapidly pushing itself into the front rank of America's large cities, holds a paint week. Despite the size of the place, which would seem almost to make the carrying out of the idea absolutely impossible, the denizens of smoky city have taken it up warmly, even enthusiastically, and it has been a splendid success there. If this can be done in Pittsburg, how much more successful it could be made in the average Canadian city or town, where there are, perhaps, four hardware stores at most.

How to go About it.

The first step would be to secure the co-operation of each paint dealer in town. Concerted action in a matter of this kind is important. When dates satisfactory to all have been decided upon, the next step is to arrange an advertising campaign. The success of the movement will depend almost entirely on the steps taken to arouse public interest. The insertion of articles of an educative nature in the daily newspapers would prove effective in getting people to talk about the forthcoming paint week. The winter recalls instances where "cleaning up weeks" were instituted in small towns and made a big success purely by the force of printer's ink. The papers would start some time before the opening date and talk persistently on the necessity of clearing up yards in spring. The constant reiteration would have the desired effect and when the week arrived, cleaning up bees would be found in nearly every yard. The same success could be achieved with paint; particularly as the united efforts of the retail dealers in town would be behind it.

Individual effort would help along the cause very appreciably. A word here and there to customers stirs up interest.

"Heard about paint week?" the dealer asks. "I have seen something about it in the papers," the customer replies. "Everybody will paint up their houses and fences that week," continues the dealer. "You see, not only is paint a sanitary measure, but it is highly economical. It saves, etc., etc.," and the dealer proceeds to give a few minutes' lecture on the wisdom of using paint liberally. It is continuous effort along this line which brings results in good measure.

Individual Effort.

If a dealer prefers to handle his own paint campaign separately, he can inaugurate a little paint week of his own, devote the energies of his staff very largely to paint during the week and advertise liberally. If this plan were pursued energetically each year, the results would improve with each repetition and "paint week" would be one of the most profitable periods of the whole year in that store.

The plans to be pursued in carrying out a campaign of this description would include window displays of a more than casual interest. It would not suffice to put in a display in one window, perhaps, modeled on conventional lines. It would be advisable to devote both windows to paint and the arrangement should in some way bear out the idea of the week. Interior arrangements would have to be in keeping. Some dealers drape banners from side to side of the store, containing suitable and striking mottoes. Paint should be, in fact, the dominant note throughout the store.

A big effort along these lines would not only bring immediate results; it would promote business for the future.

A GOOD PAINT WINDOW.

The accompanying illustration shows a window display of paints in the store of John Bishop & Sons, Brantford. In this display, neatness and attractive arrangement were both noticeable qualities and much favorable comment was heard. There was, in addition, a degree of originality which attracted attention and made the display a good sales help.

A Display of Paints and Brushes in the Store of J. Bishop & Son, Brantford.

SELLING POWER.

Number five of "Selling Power," the Pratt and Lambert Dealer's Magazine has been issued and is a very interesting number. The particular theme of the issue is newspaper advertising and some valuable advice is given to dealers along that line. Among other topics taken up are "Doing Business by Phone," "The Value of a Distinctive Signature," "Have your Clerks Posted," and "Check up Before Receipting."

MINERAL PRODUCTION.

A contemporary gives the following figures on mineral production in Canada: Arsenic, white, 1,502 tons, $75,328; lead, 32,987,508 lbs., $1,237,032,—$455,-107; asbestos and asbestic, 100,385 tons, $2,476,558,—$274,783; petroleum, 315,-895 barrels, $388,550,—$171,054; graphite, 1,243 tons, $59,087; ochres, 4,813 tons, $33,185; talc, 7,112 tons, $22,308; tripolite, 22 tons, $134.

The total production in 1910 of pigs and manufactured lead was 32,987,508 lbs., valued at the average price of refined lead in Toronto at $1,237,032.

AN ADVANCE DECLARED.

Stove manufacturers in the Western States have made an advance in prices. For some time dissatisfaction has been expressed among manufacturers over the price situation, manufacturers declaring that the increased cost warranted better prices for their goods. The advance consists in reducing the cash discount from 5 per cent., 30 days, to 2 per cent., 30 days. It is stated that all of the stove manufacturers in the Western States, with two exceptions, have made the advance, which applies to heating and cook stoves. No change is made in the price of gas goods.

The ratepayers of North Bay will vote on May 29 to provide for raising $100,-000 for extension of waterworks system and for purchase of electric pump and completing reservoir.

News and Methods of Canadian Hardwaremen

St. John Firm Buy a Motor Car for Delivery Purposes — Seaforth Firm Have Stove Demonstration — Unique Display of Hardware Millinery.

St. John, N. B.—The hardware firm of T. McAvity & Sons, who have recently inaugurated a new system of lighting in front of their premises in King street by placing there an ornamental electric lamp-post with five globes, are again taking the lead in an up-to-date system of delivery among hardware merchants of the city. The firm have purchased a Reo delivery car, the first of its kind to be brought to St. John.

Messrs. McAvity are of the opinion that their delivery facilities will be considerably increased under the new system, as the use of the automobile will assure speedy delivery, as well as permit them to transport heavy loads, as their new car is capable of carrying 1,500 pounds. It is a decided innovation for this city, and will be employed in the firm's retail business.

Some of the smaller hardware stores about the city will be affected under an early closing by-law which is to be proclaimed early in June. While the majority of the hardware stores in the city have been closing at 6 p.m. every day except on Saturdays, or evenings before holidays, some of the smaller ones have remained open for an hour or so later. Under the new ordinance, all the stores in the city will be compelled to close at 7 o'clock every evening excepting Saturdays or nights before holidays, when the time of closing is extended. The law calls for a fine of $40 if not complied with.

NEW HARDWARE FIRM.

Windsor, Ont. — R. H. Rorison and Charles H. Williams have embarked in the hardware business at 41 Pitt St. east, with a full line of hardware. Both are experienced men, Mr. Rorison having been with W. J. Douglas & Co. of Windsor and also on the road for the Standard Paint & Varnish Co., as well as with a hardware firm in Winnipeg, while Mr. Williams was with the Douglas firm for eleven years.

BOUGHT OUT STOCK.

Saskatoon.—Burnett Bros., Galt, have purchased the hardware stock of W. W. Hopkins. For some time past they have been busily engaged in stocktaking and in arranging the interior of the store. Everything is now in readiness for the commencement of business and the store will be opened to the public on Friday.

Both the proprietors are young and aggressive men, with a good knowledge of the hardware business.

SPRING MILLINERY.

New Liskeard.—An elaborate display of spring millinery was shown in the window of the store of the Geo. Taylor Hardware Co. recently.

The "chapeaux" were constructed entirely out of hardware articles, boilers, saucepans, ropes, twine, feather dusters, etc., having been called into requisition to make up the various "creations." The accompanying illustration shows some of the best "spring models" displayed.

A HARDWARE LOCOMOTIVE.

Gleichen, Alta.—Roy Dawson, in charge of the hardware department of the Gleichen Trading Co., has put in a unique window display. The other day he rigged up a locomotor for an attraction, using a round tin flour bin for the boiler, a tin bread box for the tender, tin plates for wheels, folding foot-rule for driving rods, dust pan for cowcatcher, half-gallon measure for smoke stack, funnel for spark-arrester, tin tea cup for headlight, a cowbell and metal cup for boiler dome.

GOOD ADVERTISING TALK.

Elmire.—In the last issue of "Weichel's Weekly Store News," some good live advertising matter is contained. In opening, Weichel & Son say:

"Isn't it quite natural—doesn't it seem reasonable, that we should endeavor by every fair means to increase our business? Read our ads. regularly every week — they are always full of Helps to you. We are bound to make our store the centre of attraction for you.

"We've got to please you or go out of business.

"We intend to stay—for our mutual benefit."

Among the lines advertised are screens, hammocks, gasoline stoves, razors, tree sprayers, nests, tools, paint and safes.

Brandon, Man., will erect a town hall and fire hall combined.

A Millinery Display in the Store of the Geo. Taylor Hardware Co., New Liskeard.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 50

MARKETS IN BRIEF.

Montreal.

Linseed Oil—Down 2c.
Copper—Down to 13½c.
Tin—Up to 46c.

Toronto.

Turpentine—Reduced 10c.
Tin—Increase of 1c.

MONTREAL.

Montreal, May 19th. — The markets have been quite interesting during the past week. Tin has had another merry whirl that naturally attracted attention; copper is sadly in need of some such treatment, and at the time of writing is regarded by the trade as being in a sickly condition. Antimony is unchanged. In pig iron there is a good trade, but the weakness of the American market is having an ill effect upon Canadian furnaces, and especially upon importers of English and Scottish pig iron. Expressions of opinion, however, regarding the condition of the iron and steel trade in Canada are very favorable. It has been said that they are now on as sound a basis as ever in the history of the country, with, at the present time, low prices to the consumer.

Pig Iron.—There is not much to report in this market. But little change is noted from last week. Prices on the English market are practically unchanged, and in the United States the weakness already referred still prevails. One effect of the low prices is that importers of iron from Old Country furnaces cannot compete with the prices offered by American furnaces in the Buffalo district. Where in other years this iron was brought in from across the ocean and was easily distributed in the Western district. But with a dullness reigning on the United States market and with prices lower these importations cannot be made to competr for the business in the Toronto and general western district. As it is Canadian melters have to cut their prices to put them on a level with the quotations from across the line. Of course the buyers are getting the advantage of the lower prices. A representative of one Canadian furnace interest stated jokingly that a higher tariff was needed and even if the present condition is not sufficient of a protection to the Canadian industry, the iron and steel trade in Canada to-day is in a pretty safe condition. Demand is good and even though a reduction of prices has to be made to meet competition there is a heavy call for iron. It is estimated that within the past four or five months some 60,000 tons of pig iron from the United States has found its way in to the Canadian market in the vicinity of Buffalo. The monthly average of this incoming business is about 10,000 tons. Prices on dock Montreal are: No. 1 Summerlee, $20; select Summerlee, $19.50; soft Summerlee, $19; No. 3 Cleveland and Clarence, $16.50 to $17.

Tin.—The market began "sky-rocketting" again this week and on Wednesday had practically touched the £200 mark. It has been extremely irregular in the primary market but from an American standpoint the changes have been regarded rather indifferently. Interest of course was naturally revived when the quotations came within reaching distance of the high water mark. Locally tin is quoted a cent higher this week following the action in the primary market. The price is advanced to 46 cents after remaining at 25 for some time.

Copper.—The local price of this metal is marked down this week from 13¾ to 13½ cents a pound following a weakness in the primary markets. With the manipulation of tin before him, a local metal authority remarked that a little manipulation wouldn't do copper any harm. The market is dull and while enquiry is fair purchases are reported of the hand to mouth variety.

Lead.—The market is rather listless and shows a downward tendency. Buying is not very heavy and those who are on the inside report that there is no new feature of late.

Spelter.—Spelter is practically in the same boat. Prices have been sationary until recently a little flutter was noticeable. Trading is limited.

Scrap Materials.—There is a fair demand for some old materials. The market is steady, prices being unchanged. Local quotations are: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $12.50; malleable, No. 1, $9; miscellaneous steel, $5; stove plates, $12.50

TORONTO.

Toronto, May 19.—The metal situation is, in one sense, rather puzzling. Although a very satisfactory volume of business is being done in this country, the tone of the market does not appear healthy. There is an undertone of apprehension, which can be traced directly to the dull conditions prevailing in the United States. With the situation far from satisfactory across the line, buyers here seem to feel that fullest confidence cannot safely be placed. At the same time, the business being done here at the present time is satisfactory in point of volume.

Chief interest centres in tin at the present moment. A further advance has been recorded during the past week and further developments of a more or less startling nature are anticipated between now and the end of the month.

Tin.—The syndicate at London have succeeded in advancing the price of tin some £4 to £5 during the past week, and accordingly the local price has gone up a cent a pound. Quotations made here now run from 45 cents to 46 cents, according to quantity. It is anticipated that the London market will see a "squeeze" worked before the end of the month, as the time is judged to be ripe for the syndicate to force the price to the highest possible notch. Developments of an interesting nature are, therefore, expected in some quarters.

Antimony.—To say that antimony is dull on the local market would be expressing the situation mildly. Little or no buying is being done and the same condition is reported to prevail on the primary markets. The price here remains unchanged.

Copper.—Fullest satisfaction is expressed with the volume of business being transacted here. This condition of affairs is in marked contrast to the copper situation in the United States, where business is dull in the extreme. The demand here is consistent and there is every prospect of it holding out.

Aluminum.—The demand, although not overly large, is quite satisfactory and it is believed that renewed activity will be shown in the near future. The price remains unchanged at 20 cents.

Plates and Sheets.—There is a better demand for plates and sheets. At no time dull, this branch of the metal industry is now reaching a point where orders for future requirement are being placed. The stock of Canada plates is not yet as large as it might be, but the demand has not yet reached the point where a shortage could occur.

Pig Iron.—Inquiries are reported to be better and the amount of business being done is, quite satisfactory. The industrial activity now shown is creating a heavy demand for pig iron. In the face of the slightly improved conditions, prices still remain at the same figure, the quotations given being as follows: Canadian Foundry No. 1 is $19 and No. 2, 50 cents a ton less. Old country iron is quoted at $19.50 for Middlesboro' No. 3; and $20.25 for Clarence No. 3; Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20, and $22 respectively.

Lead.—The price is working higher on the primary markets, but so far no change has been made locally. The demand is growing and the situation is taking on a much more satisfactory tone.

Spelter.—This metal is reported to be active. There has been a tendency toward improvement for some time and it is believed that this will become more marked as time goes on. Spelter has been up to but recently one of the most active of metals. The price remains firm.

Old Materials.—There is not yet a very large amount of business done but, with the advent of warmer weather, things are "looking up." No price changes have been recorded and present quotations are: Heavy copper and wire, 10½ to 11c.; heavy red brass, 7½; heavy lead, $2.90; light copper and bottoms, 9¾c.; tea lead, $2.40; machinery cast iron, No. 1, $14.00; No. 1 wrought, $10; malleable No. 1, $8 to $10; miscellaneous steel, $6 to $7; stove plate, $12.50.

HARDWARE MARKETS

MONTREAL.

Montreal, May 19.—There is quite an evident feeling among the trade that the spring demand is not what it ought to be. In some lines the activity is all or even more than might be expected, but in what are called spring lines there is undoubtedly less business than at this time last year. The delayed breaking of the season had the effect of holding back orders. After that, the weather was not as seasonable as it might have been and thus there has been a general holding back.

One result of this is that collections are not as satisfactory as they should be. The relation between cause and effect in this case is not difficult to trace. Of course, it is expected that the rest of the year will make up the deficiency, but there is already quite a wide gap opened. While the country as a whole is prosperous, it should follow that everyone is going to share in this prosperity.

Contractors' and Builders' Supplies—Activity is general in this department and is holding up well its end of the trade. The west is asking for large supplies and the east also is doing a vast amount of building work if the the demand on the wholesale trade is an accurate barometer. The demand is for the general lines and covers them all equally well. For the best quality of shovels and spades, the discount off is 60 and 2½ per cent.; for second quality the same discount is allowed, and for third quality the discount is 50 and 2½ per cent.; picks are quoted at from $3.85 to $5 a doz.; crowbars are listed at $3.25 a cwt.; wheelbarrows, navvy common, $21 and up; navvy full-bolted, $22.50; drag scrapers, $5.75 and upward.

Spring Lines—The trade in these lines is not as bright as it might be. One salesman stated that in looking over his stock of hose, for instance, he had found that the lower grades had sold well, but those of better quality had been very slow to move. Other lines might be mentioned in the same way. There has been fair trade, but it is only natural to expect that this year's figures should exceed those of last year, but in this one department such hopes are beginning to vanish. Discounts in garden hose range from 50 per cent. off to 70 and 10 and 10, according to quality. We quote hose clamp, ½ to ¾-in., 25c a dozen; hose couplings, ½ to ¾-in., $1 a dozen; hose sprinklers, ring patterns, $5.75 a doz.; revolving pattern, 12-in., $13 a doz.; 24-in., $34 a doz., and 36-in., at $39 a doz.; hose nozzles, Gem, $3.50 a doz.; reels, 75c each and upwards; garden wheelbarrows, $27 a doz. The discount offered is 50 and 50 p.c.

Lawn and Garden Tools—These lines are moving out very favorably and there is still time to look for good returns. Many show windows reported devoted to this end of the business bespeak a good trade and the demand upon the jobbers is quite satisfactory. Some prices quoted are: Lawn rakes, $3.75 to $5 a doz.; garden sets, 25c to $1.50 per set; border knives, $4.80 doz., net; garden trowels, 60c to $1.50 a doz.; garden shears, plain 8-in., 55c; with notch, 8-in., 60c; long-handle border shears, $1.15 each; long-handle surface shears, $1.05 each.

Household Utensils—There is still quite a demand for household goods. Ice cream freezers are popular, granite and enamelware goods are also moving well, and the same is true of other lines, including washing machines and wringers. Prices are the same as those quoted last week.

Harvest Tools—Enquiry for harvest tools is increasing, and orders are coming in quite freely. Some prices and discounts are as follows: Hay forks, manure forks, straw forks, barley forks, spading forks, potato forks, field, garden hoes, Dutch weeding hoes, garden rakes, 50 and 5 p.c.; hay rakes, $1.15 to $2.75 a doz.; scythes, $6 to $8 a doz.; sickles, $1.85 to $2.25 a doz.; grass hooks, $1.65 to $2.10 a doz.; scythe snaths, 40 p.c. discount.

Sporting goods are moving out well, in some cases repeats beginning to show themselves. All lines are in full blast, with fishing fast approaching its best season.

TORONTO.

Toronto, May 18.—Business is reported to be brisk at the present time, so brisk in fact that much of the lost ground is being regained. April was a backward month, largely owing to the very unfavorable weather conditions. The volume of trade, as a result, fell behind the record set in 1910 during April. Since the beginning of May, however, things have seen a welcome change, and the trade being done is well in excess of that done last year. It is expected that, by the end of the month, all the lost ground will have been regained and, perhaps, a new record set up.

No price changes have been made during the past week. The general tone of the market is firm.

Seasonable Goods.—There is a heavy demand for summer goods. The refrigerator is proving one of the liveliest sellers of the day. One house reports that sales on refrigerators this year so far have been double the record set last year. It is also noteworthy that good quality refrigerators are in demand. Screen door trade is at its busiest and a like condition prevails with reference to garden hose, clamps, couplings, sprinklers, nozzles, rakes, watering cans, lawn mowers, shears, spades, axes, picks, wheelbarrows and the many other articles now needed for garden work. A number of large orders have been placed for ice cream freezers. Awnings, window shades and verandah screens are selling well. Hammocks are now moving briskly and the jobbing houses report that the orders received this week so far have been at least double of those last week.

Household Goods.—It is quite apparent that the retailers are finding a ready market still for the articles used in moving and house cleaning. There is a fairly heavy demand for carpet stretchers, ladders, small hammers and saws, vacuum cleaners, etc. The ordinary household goods in tinware and graniteware are selling briskly.

Builders' Hardware.—Orders are growing larger for builders' supplies and it is quite apparent that the call from the builder is already heavy, despite the earliness of the season. All varieties are in demand. There is also a good trade being done in mechanics' tools.

Heavy Hardware.—Construction work is now so far advanced that the call for heavy hardware is well sustained. Chains, pulleys, tackle, bolts, nuts, screws, etc., are all moving briskly. No price changes are noted. Present quotations are: Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Stoves and Heating Goods.—Quite satisfactory in every respect is the sale of stoves, particularly gas stoves. One local firm reports that, despite the handicap of bad weather last month, the record of sales to date this year tallies identically with last year's record. With conditions as at present, it is expected that the returns for May will show a neat increase. The gas stove is still moving well and there is a sustained demand for all heating accessories. Kettles, pots, pans, lifters, cookers, etc., are in splendid demand.

Sporting Goods.—The demand on this department during the past week has been such that some difficulty has been found in filling orders. The trade centers largely in baseball, lacrosse and cricket supplies, though other sports are pretty well represented also. Fishing tackle and all varieties of supplies are moving briskly now.

Hardware Letter Box

Bicycle Tires and Accessories.

Clements & Co., Milton, Ont.—"Kindly advise us through Hardware and Metal where we can purchase in Toronto, bicycle tires and accessories."

Canada Cycle & Motor Co., John Millen & Son, Planet Bicycle Co.—Editor.

Cream Whippers.

C. C. Falconer & Co., Winnipeg, Man.—"Kindly let us know where we could procure Frie's cream whippers."

Can any subscriber give us this information?—Editor.

Razors and Cook Stoves.

Chester C. Crawford, Dutton, Ont.—"Would you please tell me who are the makers of the Enders Safety Razors, and also the Patron Cook Stove."

Can any reader supply this information?—Editor.

Bakery Ovens.

Wm. Dunsmore & Son, Oxford, N.S.—"Can you tell us the name of the makers of bakery ovens?"

Warren Mfg. Co., Toronto, and the Fletcher Mfg. Co., Toronto.—Editor.

The Western Hardware Market Situation

Rains Create Optimistic Feeling With Reference to Crops and Buoyant Trade Conditions Result — Farmers' Hardware Moving Briskly—White Lead Advances 25 Cents.

Winnipeg, May 19.—The rainfall last week has created an optimistic feeling everywhere. It is now felt that the crop outlook is highly promising and the the resultant confidence is displayed in the buoyant state of the staple hardware market. There is a particularly strong movement to farmers' hardware—cordage, rope, harvest tools, harvest repairs, etc. The same holds with reference to builders' hardware. The West is assured of one of the heaviest building years on record and there is already a heavy demand for supplies and contractors' tools.

Travelers report that there is a good all around tone to trade and that no line is suffering. The money market is much freer and collections are reported to be quite good.

The market generally is firm. Galvanized lines are reported to be advancing. Sales in wire have been heavy and supplies are now getting low, which may or may not presage a change in price.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.00; 2, $1.60; p.g. oak, $2.75.

Auger Bits—"Irwin" bits, 47½; other lines 75 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3; small lots, 2½; stove bolts 77½.

Bar Iron—Bar Iron, $2.50; Swedish iron, $4.75; sleight shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs. $8.50; Jessop, $15

Blocks—Steel, 45; wood 60 per cent.

Cut Nails.—$3.15 per keg base.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.50; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron.—Apollo, 16 gauge, $3.70; 18, $3.75; 20, $3.80; 22 and 24, $4; 26, $4.10; 28, $4.50; 30 gauge or 10¾ oz., $4.65; Queens Head, 20, $3.85; 24, $4.05; 26, $4.45; 28, $4.65.

Galvanized Iron Pipe.—⅜ in., $3.50; ½ in., $4; ¾ in., $5.20; 1 in., $7.00; 1¼ in., $10.25; 1½ in., $12.45; 2 in., $16.25.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2, and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel, No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process—No. 3, $4.30; 4, $3.80; 5, $2.75; 6 $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $7.75; grass, $1.70.

Iron Washers — Full box, 40 p.c.; smaller lots, 35 p.c.

Iron Pipe, Black—⅛ in., $3; ¼ in., $2.45; ⅜ in., $2.50; ½ in., $3.25; ¾ in., $4; 1 in., $5.65; 1¼ in., $7.75; 1½ in., $9.25; 2 in., $12; 2½ in., $19.60; 3 in., $25.75; 3½ in., $33.50; 4 in., $38.35; 4½ in., $44.10; 5 in., $50.40; 6 in., $65.10; 7 in., $95.50; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.75.

Poultry netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.55.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8c; pure manila, 10¾c; British manila, 8¼c; lath yarn, 9¼c.

Sheet Zinc — Casks, $8.75; broken lots, $9.50.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $25 per cwt.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 65 per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate—1. C., $9.75; I. X., $11.75.

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25; ½ box, $5.50; I. X., full box, $12.25; ½ box, $6.50; I. X. X., full box, $14.25; ½ box, $7.50; 20 x 39, I. C., full box, $15.50; ½ box, $8.25; I. X., full box, $17.50; ½ box, $9.25.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 35.

Wire.—Barbed wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3; annealed wire, base, $3; oiled, 10c extra; bright iron $3.20 base; brass spring wire, base 29c; plain galvanized wire, Nos. 6, 7 and 8, $3.40; No. 9, $2.90; 10, $3.50; No. 11, $3.55; No. 12, $3.10; No. 13, $3.25; No. 14, $3.95.

Wire Nails—$2.90 Winnipeg, and $2.45 Fort William.

Wringers — Royal Canadian, $39.25; New Easy, $42.50.

Paints and Oils.

The paint and oil trade is brisk. An advance of twenty-five cents in white lead has been made. Otherwise prices remain the same.

Petroleum and Gasolene.—Silver Star, in bbls., per gal., 15c; Sunlight, 18c; Family Safety, 22½c.; Searchlight, 20½c; Red Rose, 23½c; Keystone Special, 18c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c.; White Rock, in bulk, 22½c; National Light, in bulk, 21c.; Engine Gasolene, 24c.; White Lily, 26c.; Royal, 24c.

Turpentine—In barrels, $1.05; small lots, $1.10.

A CONTRAST IN METHODS.

Montreal, May 17.—I was rather disappointed in several retail hardware stores in Montreal's down-town section the other day, and not only disappointed, but very much surprised. I wanted to buy a few things for my boat, and canoe paint was one of them. Would you believe it, I went into three stores before I got what I wanted, and I would hate to mention the names of those two stores. You wouldn't believe it of them.

In the first one, the clerk who offered to wait on me tried to sell me carriage paint. Possibly he knew more about paints than I gave him credit for, but I had my doubts. Anyway, it sounded bad. Offering carriage paint to put on a canoe!

In the second store I called at, the clerk, whom I am well acquainted with, tried to tell me that floor enamel was just what I required. He told me very nicely that they had no boat paints in stock, but the clerk recommended floor enamel to me. He said he thought it would give good satisfaction, and assured me that he felt safe in recommending it. I was beginning to think that I would have to either go without or take a chance with barn paint, bannister varnish, or any of the other kinds, all of which were about equally good for what I wanted. You know, when you want a particular article, you want it and it only. You become dubious about any and every substitute offered you. There might have been something better than that I asked for, but I did not care to take a chance. I found in the next store I called at the goods I wanted. On giving the clerk my order he brought it to me directly. There were several other items I wanted and I found that this store had them all. They included a preparation for stopping leaks in boats, or preventing leaks, and a metallic wool for removing old varnish, etc.

I mention this experience to point out the necessity of keeping paint stocks up to the minute if they are to be of any service to the house.

AN AMALGAMATION.

The Allith Mfg. Co., Chicago, have amalgamated with the T. C. Prouty Co., Albion, Mich., manufacturers of hangers, door hinges, etc. The headquarters of the new firm will be at Albion, Mich.

HARDWARE TRADE GOSSIP

Ontario.

J. Irwin, assistant Montreal manager of Brandram-Henderson, was in Toronto this week.

Fenn & Co., sporting goods dealers, King street, Toronto, are selling out and are holding a big sale of stock.

The merchants of Haliburton, have decided to close Wednesday afternoons during the months of June, July and August.

Albert Taylor, of the Geo. Taylor Hardware Co., New Liskeard, is on a trip through the northern sections of Ontario.

The brick store occupied by Mr. Hartman, hardware merchant, Thornbury, was seriously injured by fire. The loss will be heavy.

A despatch from Guelph hints at the passibility of the Page-Hersey Co., concentrating their manufacturing operations entirely at Welland.

A. D. Kennelly, manager of the Toronto office of the McClary Manufacturing Co., has returned after an absence of several weeks at Clifton Springs

The Russill Hardware Co., Toronto, have a window display of cement walk tools, all manner of articles used in the laying of cement work being shown.

W. F. Macpherson, Prescott, has been running a large and effective paint advertisement in the local papers. It is well illustrated and includes special mention of liquid aluminum paint, coach colors and varnish stains.

The firm of Harland Bros., Clinton, has been dissolved by mutual consent. W. S. Harland is retiring from the business, and J. T. Harland will continue it at the old stand under the same name as formerly, Harland Bros.

On Tuesday night last the hardware store of S. D. Ross, Brighton, was forcibly entered and a large quantity of goods stolen, including four dozen razors, a large quantity af pocket knives, barbers' clippers, silver knives and forks and two 32-calibre revolvers. Two strangers had been seen in town, and it is thought that they were responsible for the theft.

A new industry known as the Gullberg-Ekberg Company, has started operations for the manufacture and sale of tar, creosote, turpentine, charcoal, etc., at the Winnipeg river crossing of the Grand Trunk Pacific at Kenora. The plant is in close proximity to the Winnipeg river, on the new townsite, and the location warrants a splendid supply of raw material very easily assembled by the river.

McIntyre & Edge, Seaforth, held a two-day spring opening recently. Special men had been secured for the occasion to demonstrate the use and advantages of the stoves and household goods handled. Lunch was served on both days to all who attended and an orchestra dispensed music. The attendance was exceptionally large on both days. The opening was well advertised in the local papers.

Quebec.

G. N. Bourgue, hardware retailer, East Sherbrooke, has purchased the land adjoining his present premises, and intends to double the size of his present building.

Frank R. Newman and Harry Newman of Caverhill, Learmont & Co., Montreal, sailed for the Old Country this week on the S.S. Royal Edward. Frank Newman's desk is being occupied during his absence by J. R. Terrill.

A. G. Gunther, representing the German firms of Stahlschmidt Tool Co., Colsman & Co., and Boentgen & Sabin, has been visiting Canada during the past few weeks, making his headquarters with Dingman & McCombe, Montreal. He left Wednesday on a trip to Winnipeg, and on his return to Montreal he will take ship for Europe.

W. L. Leslie, of A. C. Leslie & Co., Montreal, is enjoying a vacation at Woodstock, Vt.

Western Provinces.

B. G. Kelly is opening a hardware store at Preeceville, Sask.

T. Tessier, tinsmith, has started in business at Starbuck, Man.

The Blackie Hardware Co., have started in business at Blackie, Alta.

The Taber Hardware Co., have commenced business at Taber, Alta.

R. F. Cornell is starting in the hardware business at Stoughton, Sask.

L. J. Laxdal, of Saltcoats, is adding very extensively to his hardware store.

A demonstration of refrigerators was held in the store of Arthur Hayn, Lethbridge.

T. Bradford is building an addition to his present hardware store at Saltcoats, Sask.

The Rainton Hardware Co., Rainton, Sask., Steinman Bros., proprietors, have opened for business.

The retail clerks of Cranbrook, B.C., are asking for a half holiday on Wednesdays during June, July and August.

Duxbury and Ridington, Battleford, Sask., are the inventors of a new liquid veneer, which they style "Rinolene."

R. S. Nelson, who has been taken into partnership with N. E. Snider, Innisfail, is moving there from Wetaskiwin, Alta.

R. S. Nelson, of Wetaskiwin, and M. E. Snider, of Angus Ridge, will start a hardware and furniture business at Innisfail, Alta.

The Calgary Stove and Furnace Company is negotiating with the Calgary City Council in connection with the establishing of a plant in that city.

A. McBride & Co., Calgary, have secured the contract for hardware in the several new buildings to be erected this year by the Calgary Exhibition Association.

In the May 6 issue it was stated that R. J. McNaughton had succeeded E. H. Insull, Craik, Sask. This is incorrect. Mr. Insull has rented his tinshop to to Mr. McNaughton, but is still carrying on the hardware business.

Ellison & Bradley, Strome, Alta., are about to erect a building 25 by 60 feet for a new hardware store, adjoining the new addition of W. T. Phipps. The ground is levelled and building operations will be commenced immediately.

While repairing the roof over the Stockton hardware store, Carlyle, Sask. on Tuesday afternoon, W. Nevill had a nasty tumble. The ladder on which he was standing slipped from under him, and he fell to the roof of the lean-to below.

The Hanley, Sask., Herald says: "I want a pair of leather hinges," said a lady in one of our hardware stores the other day. "What!" exclaimed the astonished clerk, "leather hinges, why we don't keep them." "Well," replied the lady, "that's what I was told to ask for." The puzzled clerk scratched his head for a moment. "Oh," he said, "you mean strap hinges."

W. R. and A. C. Burnet are the purchasers of the hardware and tinsmithing business of Wm. Hopkins, 20th street west, Saskatoon. They are planning material alterations in the arrangement of the premises. Among these will be the use of the entire front store as a salesroom this being accomplished by the increase in storeroom space provided by the addition now building at the back, which will also permit more prominence being given to the tinsmithing department.

Maritime Provinces.

The Maritime Merchant, Halifax, says: "A. M. Bell & Co., are pushing summer lines, such as screen doors, black wire cloth, hammocks, ice chests and freezers, canoes and paddles and athletic goods."

IMPROVEMENT NOTED.

Cleveland, O., May 18. — The Iron Trade Review to-day says:—

The supreme court decision in the Standard Oil case and the disposition of the transportation companies to give more attention to their track and rolling stock requirements over the last half of the year have resulted in a decided improvement in sentiment in the iron and steel trade. So far there has been no important buying on the part of the railroads and no large inquiries have been put out, but this is thought to be due chiefly to the fact that inventories for the fiscal year ending June 30 have not been completed. While the trade does not look for a boom period, a steady improvement in buying is expected as a result of the encouraging developments during the past week or 10 days. In a few branches of the trade, there is slightly more activity, but the improvement has not been uniform, and the market as a whole is quiet, purchases in most cases being limited to cover urgent needs. Consumers apparently are not satisfied that prices on finished steel have reached bottom.

NEED ELEVEN ACRES.

Vancouver, May 15.—Forced by the growth of their business, McLennan, McFeely & Co., wholesale hardware, are looking for a site large enough to enable them to secure approximately eleven acres of floor space and yard room. The firm at present occupy a five-storey and basement warehouse at the northwest corner of Columbia avenue and Cordova street east, where they built some years ago. They have now outgrown this building and the surplus material is be-being housed in three or four warehouses situated in different parts of the downtown district.

Methods Employed in Brisk Paint Campaigns

How Some Dealers go About Creating an Interest in Paint—Effective Distribution of Circulars and Color Cards—Knowing Stock is a Prime Essential.

There are several salient points to be remembered in handling a paint department. The first, and most important, is to carry a good line and to always push the sale of quality paint. The second is to keep the stock neat and well assorted. The third is to advertise the department, not only through the medium of the newspapers, but in the many ways which can be counted as advertising—in methods of display, in conversation with customers and in good service.

These may be said to briefly sum up the fundamentals of paint salesmanship. If a dealer observes these rules he is bound to reap the reward in the shape of a splendid trade. There are, however, a great number of little methods adopted by dealers here and there which served as helps in the conduct of a paint campaign and which prove particularly effective when united with general methods as outlined above.

For instance, dealers frequently adopt the plan of having neatly-printed paint circulars, which they send out in every parcel, wrapped up in the store. This, they claim, is even more effective than sending out circulars through the mails. In the first place, there is no danger of them being lost on doorsteps or thrown away before opened. The parcel is opened and the person who unties it will, if merely out of curiosity, glance over the circular. In the second place, when sent out in this way, the circulars reach the customers of the store only —people who are dealing there and are more likely to be interested in anything that the dealer has to say. When sent out on the other plan, a certain percentage reach people who would never under any circumstances buy paint, and are, consequently, as good as thrown away.

Handing Out Samples.

A very effective method is handing out small samples to people who come into the store for other goods. An offering of this kind is certain to be opened and used, partly as a result of the keen desire shown by most people to get the most out of anything that they get for nothing and partly because the average man likes to tinker around with a paint brush anyway, and is glad of an opportunity to try his skill. If the paint, or varnish, or whatever it is, turns out to the liking, it is morally certain that an order will be placed for another supply.

If your stock is made up of good quality brands, your most effective method of building up a business is to get people to use your paint once. The repeat orders will follow. The sample tin can, therefore, be made your most telling argument.

Used Magazine Ads.

The writer had the pleasure once of meeting a dealer who made a novel use of paint ads. in magazines. He kept right in touch with the current magazine literature and every time that he ran across a real fetching paint advertisement, he would take the book to the store and leave it, open at the proper place, in some convenient spot. There are always times when people have to wait, even in the best regulated of stores, and at such times they glance around the store for anything that may hold their attention until they are waited upon. In Blank's store the magazine, artfully placed, served to attract waiting customers, and they became interested in the question of paint unconsciously. When their turn came, the salesman would introduce the subject casually, while wrapping up the parcel.

"Are you needing any paint this spring?"

If the customer show signs of giving a flat denial to the suggestion, the salesman would not wait for a reply, but would hurry right along. "It's surprising how much paint people use nowadays. You see, it is possible to do so much with it now in the way of home decorating, and at such a low price. Everybody seems to be buying," and so on until the customer was drawn into a discussion.

Color Card Distribution.

The proper distribution of color cards is found to be eminently successful in creating sales. They are attractive and are certain to be looked over more or less carefully. In many cases the question of repainting the house has perhaps been discussed previously, and some doubt has been felt on the score of the proper shade to employ. When the color card arrives, the members of the household look it over and discover just what they want. In such cases, an order will be placed for that particular shade without a doubt.

How a Customer Was Won.

The retail paint salesman requires a thorough knowledge of the goods he sells. He must be in a position to explain just how each variety of paint should be used, how far it is likely to go, how it should be applied, etc. It is safe to assume that half the customers he waits upon will be more or less ignorant on the score of the use of paint specialties and they will depend on the salesman to explain everything to them. If he cannot do this to their satisfaction, they will probably take their custom elsewhere the next time.

Very frequently a salesman who knows his stock right through is able to make sales which would otherwise have gone elsewhere. The writer was in a Western Ontario store a few weeks ago when a customer entered and asked the proprietor if he had a certain well known varnish on sale. He had seen it advertised and had come to the conclusion that it must be "pretty fine stuff."

"No," said the proprietor, "but I have something much better." Mark you, he did not say "something just as good;" he claimed a higher degree of excellence for his stock and seemed to believe every word of it himself.

The customer looked incredulous and very unreceptive to any argument but the merchant started right in and explained why his make was so much better. "This varnish will go a long way," he declared. "It spreads very easily. What is more it spreads smoothly and evenly, leaving a surface like glass. Now some kinds finish so hard that they crack easily and, therefore, do not last. But this varnish is guaranteed to last for an almost indefinite period.

"You are not a practical painter and you might find some difficulty in applying certain kinds of varnish. The marks of the brush might show. But nothing shows when you use this variety."

He talked that particular brand for a good fifteen minutes, impressed the lasting quality, made use of the argument of economy and dwelt lengthily on the beautiful results obtainable. The customer gradually felt his doubts slip away and he became convinced that this brand must be the very last word in varnishes and he made a good sized purchase. As the make in question is undoubtedly a good one, it is quite certain that the man would find satisfaction and become a regular purchaser.

To convince a customer of the value of any line when the mind has been set on something else, a salesman must have a pretty thorough knowledge and must himself be honestly convinced that he is selling the very best thing on the market. Practical knowledge and enthusiasm are assets well worth acquiring.

A RECEPTION HELD.

A grand reception was held at the new premises of the Winnipeg Ceiling & Roofing Co.'s plant Saturday afternoon, May 13, in which over two hundred citizens participated. The buildings are located in the St. Boniface section of the city, and the car ride of about three miles afforded a splendid outing on that sultry afternoon. Mr. McMartin, president and general manager, greeted the guests at the door, and introduced them to waiting attendants, who conducted the visitors throughout the entire plant.

The main building is 100x300 feet in dimensions, and includes shipping and warehouse room, cutting and stamping department, and cornice factory. Men were at work on all machines in the cutting and stamping room, and much interest was taken in the manufacture of corrugated siding, eavetroughs and water pipes, metal ceilings and culverts. The cornice factory was not in operation, but a workman demonstrated the making of metal doors and windows.

The other buildings are the paint shop, 50x60 feet, and a box factory for crating goods, which is 40x50 feet in dimensions. There are in all about ninety men employed in the concern.

On returning to the office, guests were served with refreshments and cigars before going home.

Our selling plan will interest you if you want to do a bigger and more profitable paint business.

Wouldn't You Like to Know How We Help Our Dealers Sell

M (MAPLE LEAF) **L** **Pure Paints**

Two coats of M-L equal three coats of the best of other brands. Made in 47 different colors and tints for every use of paint, inside or out.

M (MAPLE LEAF) **L** **Floorglaze**

sells best of all wood-finishes because it has so many points of superiority. Best-advertised and easiest-selling brand in Canada.

M (MAPLE LEAF) **L** **Elastilite Varnish**

No varnish like it. Good for good jobs—not bad for the other kind. Flows free, brushes easily, dries well. Just what you want for people who want varnish in a hurry.

PAINT AND OIL MARKETS

MONTREAL.

Montreal, May 19.—General business in the paint and oil trade shows a new impetus and generous flow of orders is noticeable. While orders are numerous it seems to be generally held that business is apparently lighter than last year. The requests for immediate shipment are being received in an encouraging manner but it is noticeable that they seem to lack the weight and length that is expected at this season of the year with the spring trade now at its height.

Linseed Oil—There is a steady easing off in the price of linseed oil. Prices are now $1.08 per gal. for raw, and $1.11 for boiled. Occasionally advices are received denoting advances in the primary market over present quotations it can scarcely be denied that there is an underlying strength in the market and this with a fairly brisk demand prevents any leaning to lower figures.

Turpentine.—After being extremely bare of turpentine for some time, the market is now receiving liberal shipments. Trade may be said to be very good. The present price remains unchanged at the dollar mark.

Paris Green.—Some slight friction is reported from the United States market and in several instances quotations received from New York brokers when carefully figured out are not lower than present quotations in Canada, especially when it is considered that the quality may not be possibly up to the government standards and that delay may be occasioned through custom formalities just when the Paris Green is wanted. Prices are unchanged. In barrels, about 600 lbs., 17c per lb.; arsenic kegs, 250 lbs., 17¼c; 50-lb. and 100-lb. drums, 18¼c; 25-lb. and 100-lb. drums, 18⅜c; 1-lb. packets, 100 lbs. in case, 20¼c per lb.; 1-lb. packets, 50 lbs. in case, 20¾c per lb.; ½-lb. packets, 100 lbs. in case, 22¼c per lb.; 1-lb. tins, 100 lbs. in case, 21¼c per lb.

Arsenate of Lead.—Order for arsenate of lead are coming in freely and the trade are seemingly giving this insecticide a fair amount of prominence. Prices are unchanged.

Shellac.—Although it was reported that the quotations on gum shellac were somewhat easier, it has not apparently been sufficient to affect the price of the liquid article and it is said shipments are increasing in volume.

Japans and Varnishes.—With lower prices for turpentine, manufacturers have been encouraged to put their varnish making staffs on full time and more efforts are being put forth to make sales.

White Lead.—Demand for white lead continues favorable, and orders from the trade are coming in rather freely. Prices are as follows:—Lots of one ton, $5.85; contracts of five tons and over, $5.70; shipments less than one ton, $6 f.o.b. Montreal.

Putty.—The call for putty is steady, spring work requiring rather heavy supplies. Prices are unchanged as follows: Bulk, bbls., $2.20; bulk, cwts., $2.45; bladder, bbls., $2.70; bladder, cwts., $2.80; 25's, loose, $2.55; 25's, cased, $2.70; 12½'s, cased, $2.90.

TORONTO.

Toronto, May 18.—There has been a brisk tone to the paint and oil market this week, and general satisfaction is expressed. The feature of the week has been the substantial reduction in turpentine which, coming on the top of the gradual decline of the last month, puts turpentine back almost to the normal price for this season of the year.

Mixed paints, varnishes and specialties of all kinds are now moving well. Everything points, in fact, to a heavy paint year.

Linseed Oil.—Linseed oil, for present delivery, remains stationary, although there have been some quotations made on oil to arrive in Canada during the month of July, at about 3 cents less than the present price. To qualify this, however, in its probable effect on the market, no one seems anxious to place orders for July as the bulk of the placing business is done before. The price ol flaxseed remains firm and, as the new crop will not arrive belore August or September, there does not appear to be much likelihood of the crushers getting new seed so as to produce oil at better prices.

Quotations on linseed range at the present time from $1.10 for raw, and $1.13 for boiled to $1.12 and $1.15 respectively.

Turpentine.—At the close of last week, turpentine dropped to 95 cents, a reduction of 10 cents. This was brought about by corresponding decreases on the primary markets. Since that time it is reported that further reductions have been made at Savannah, but the local price has been left unchanged. The market at Savannah and Jacksonville is easier, and there is some accumulation of stock there, but, as the prices is now from 40 to 45 cents less than it was some three months ago, it is believed that it has touched bottom. Users of turpentine ran their stocks down to the lowest point during the months of February, March and April, so it is expected that there will be a strong demand now that the price has become reasonably low.

As far as can be judged at the present time, the supplies this season will not be much greater than last year.

Rosin.—The market has not been affected quite as seriously as it has in turpentine. As rosins can be stored very cheaply with no danger of evaporation, the decline in price has not been in the same ratio as turpentine. As the requirements for rosin, in the manufacture of both soap and varnishes, has been very much on the increase in the past two years, it is believed that the demand will be such as to maintain a high price for most of this year.

Putty.—The demand remains reasonably strong for this season of the year. Prices are standing at the same figures: Standard putty is quoted at: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same; bulk in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

White Lead.—Considerable interest has been aroused here by the announcement that an increase has been made in the price of white lead in the west. So far there has been no change in the local price and there are no indications of an advance in the near future, at least. The demand has attained to heavy proportions.

Prepared Paints.—There is a splendid volume of business being done in all lines of paints, both for exterior and interior purposes. There seems to be a stronger trend than ever on the part of the public to use the ready mixed article, if the amount of business being done can be accepted as any criterion.

Varnishes and Japans.—The activity so noticeable in the sale of prepared paints is also found in the varnish and japan trade. There is a good all around demand. Prices are stationary and, with linseed oil and turpentine back practically to the normal, there is little or no danger of any further changes.

Specialties.—The demand is good and thoroughly assorted, all lines being on the move. The burning of the works at Hillsboro has created a stiff advance in plaster of paris, which now sells at $3.50 barrel and it is difficult to get even at that price. Other supplies such as boat pitch, kalsomine, pine tar in tins, axle grease, alkali, sand paper, pumice stone, sponges, tar, shellac, furniture polishes, colors ground in varnish are in steady demand.

Petroleum.—The demand continues steady and satisfactory for this season of the year. The prices remain at: Canadian prime white, 12c; United States water white, 13½c; Pratt's Astral, 15½c.

Glass.—Import orders are commencing to arrive. There is now a growing demand and conditions are judged to be quite satisfactory.

VAGARIES OF A HARDWARE DELIVERY HORSE.

Kingston, May 2nd.—A horse owned by Simmons Bros., hardware merchants, and used on their delivery wagon, pulled off a queer "stunt" this week, and one which gave the animal a good deal of newspaper notoriety. The horse was left in a yard near a barn, while the driver was looking after some business, when it spied, through a small hole in the door, some nice hay. He could not resist the temptation to get after the hay, and, after a little time, he succeeded in poking his head through the hole and getting a good feed. All went well while he was eating, but when he tried to get his head out of the hole again, there was trouble. The animal tugged and pulled, but no sir, his head would not come out, and at last, getting quite desperate, the animal gave another good yank, and succeeded in pulling down the door, but it still remained hanging on the animal's neck, and he was, indeed, a queer looking sight. When the driver came upon the scene, he found the horse prancing about with the barn door dangling to his neck, and a saw had to be used to free the animal. People who happened to witness the affair, are saying that the hardware horses are just like the men engaged in the hardware business, when they want a thing they certainly go after it, even if it does cause a little work and trouble.

B-H "ENGLISH" PAINT

70% PURE WHITE LEAD – 30% PURE WHITE ZINC

100% PURE PAINT

There is Nothing Secret About it

¶ There is a formula guarantee on every can, and this formula is recognized as the "last word" in paint quality.

¶ Therefore when you stock **B-H "ENGLISH" PAINT**, you have the active support of the practical man---the man who knows---and your store becomes the paint headquarters of your town.

¶ There is a good substanstial profit for the dealer in **B-H "ENGLISH" PAINT** and a strong advertising campaign back of the paint that helps you sell more paint.

¶ **B-H "ENGLISH" PAINT** will be sold in your town. If the agency is still open you have the opportunity of securing it. **Write to-day for 1911 price list and details of selling plans. Address our nearest office.**

CONGO NEVER LEAK ROOFING

Guaranteed Until 1921

Every roll of Congo two and three ply roofing carries with it a genuine Insurance Bond from the National Surety Company guaranteeing that it will last *ten years*.

That guarantee Bond means that every Congo roof laid this year must give absolute protection *until 1921*.

We are the *only* manufacturer who has confidence enough in his goods to back up his guarantee with a *real* Surety Bond.

Write to-day for samples of Congo, copy of the Bond and further information.

We want you to know just what we are offering, and when you once know, you will see it is the best on the market.

SHINGLE STAINS

C. P. Co.

(CEE.-PEE. CO.)

Shingle Stains

are very popular throughout the Dominion. They are especially recommended for Shingles, Sidings and Fences.

The slight astringent properties of our Shingle Stains enable them to readily "grip" the fibrous structure of the wood and assist in making a lasting preservative, as well as giving an artistic finish to Bungalow, Cottage or Mansion. If you know of anyone who contemplates building, write to **THE CANADA PAINT COMPANY** for a full line of our samples of Shingle Stains shown upon wood. They will be sent by post free of charge.

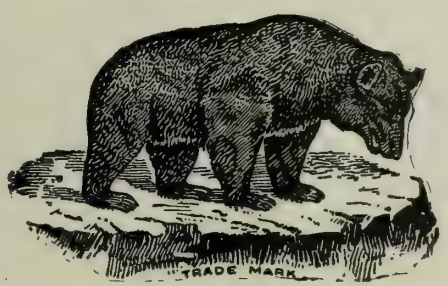
WE LEAD THE WORLD

The ever-increasing demand for



BEAR BRAND LAMP BLACKS

has necessitated this increase in our manufacturing facilities, as shown in the figures below:

	CAPACITY
1902 - - -	3,000,000 pounds
1905 - - -	6,000,000 "
1911 - - -	10,000,000 "

Our growth is entirely due to the consistent high quality and absolute uniformity and purity of our products, together with the courteous treatment always extended to our customers.

If you are not using OUR BLACKS, write us and we will submit samples and prices which will save you money and secure your orders.

WILCKES MARTIN WILCKES CO.

The Largest Makers of Fine Lamp Blacks in the World.

You need not be a Salesman to sell

CANE'S WASHBOARDS

But if you are it will be one of the best combinations possible—a good man talking a good article. Cane's Washboards are made in grades to suit every class of trade, but in every class they have no peer.

Cane's Standard Globe

A well made, zinc face board, standard size, lock corners, thin back, strong.

Send for Catalogue and Price Lists

Your Customers will point them out. They know from experience that they give the best of service for the cost.

Address P.O. Box 549, Edmonton, Alberta. (25)

PATTERN DRAWING

SHEET METAL WORKERS — Our Home-Study Course on Pattern Drawing teaches you the method of drawing patterns for anything required in sheet metal, whether in a small tinsmith shop or a large cornice and skylight factory. This course is adapted especially for home study, and is clearly worded and illustrated. It takes you behind the scenes and shows you that what has appeared mysterious is simplicity itself. The complete course, comprising 40 blue prints, 60 sheets of instructions and necessary drawing instruments, sent to any address in Canada on receipt of $20.00. Club rates, 3 to 5 members, $17.50 each; 5 members and over, $15 00 each. After May 15th above prices will not include drawing instruments. Address, THE SHEET METAL SCHOOL, Box 419, Galt, Ontario. (13tf)

MISCELLANEOUS

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY If you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto.

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

NEU-TONE

A PAYING PROPOSITION

It pays, brother, when you can make a friend of everybody that comes into your store. And it is not so hard to do, either.

Take for instance, the paint proposition. If a man comes into your store, and you make a lot of promises that the paint doesn't fulfill — that man will not remain your friend many days.

When you lose him — well — you will lose many more. But on the contrary, if the paint "*makes good*" you make a fast friend and gain a lot of more customers.

NEU-TONE COLORS

(Washable — Sanitary)

Please Everybody — Dealer, Decorator and House-Owner

It pleases the dealer because it is a paying proposition — carrying with each sale the twang of a come-back order. It pleases the decorator because it enables him to give his work a "*style*" that triumphantly asserts itself.

It pleases the house-owner because with it, the house can be finished in the soft, restful, "flat" tints and rich colors of kalsomine. Dust, grease and smoke stains easily removed with a damp cloth. Think of it. It pays to sell this kind of paint, Mr. Dealer. Drop us a postal and we will tell you a few more things you will be glad to hear about this *paying proposition.*

THE MARTIN-SENOUR CO., Limited

Montreal Chicago Halifax Toronto Winnipeg

The Varnish That Lasts Longest

This is the slogan of the DOUGALL VARNISH COMPANY and it is an excellent description of our goods.

Maximum of quality—that is, quality of materials, quality of workmanship; and quality in ageing and testing.

The results obtained by the use of Dougall Varnishes will show their sterling qualities and it's results that count. A man who uses Dougall Varnishes is not making any experiment, he is not taking any chances. We who make the varnish know this because we know that it is good, and therefore we guarantee every gallon that leaves the factory.

We make over 200 different kinds of Varnish and will gladly send you our booklet describing same; you will find some interesting facts regarding varnishes contained therein. Drop us a card.

The Dougall Varnish Company, Limited

305 Manufacturers St. **J. S. N. Dougall, Pres.** **Montreal, Canada**

Associated with Murphy Varnish Co., U.S.A.

CHANCE'S

Double Rolled Cathedral Glass

is brighter and more translucent than the ordinary rolled Cathedral. It cuts true and easily, and works up handsomely into Leaded Windows. Made in a very large variety of tints.

Chance's Figured Rolled Glass

is famous for its deep, brilliant patterns, easy cutting qualities and attractive tints.

FLEMISH GLASS, made only in the glass works of Chance Bros. & Co., near Birmingham, England, is a new and most attractive ornamental Window Glass, unsurpassed for character and brilliancy.

Write for samples of Chance's Muffled, Figured, Rolled, Flemish and Double Rolled Cathedral Glass.

YOU NEED IT

Does your store look like this or is it littered with dirty, oily, smeary cans, measures and funnels?

The Bowser Storage System

positively eliminates all trouble, dirt and waste. It measures the oil directly into the customer's can without the use of measures or funnels, and computes the money charge for same.

CLEAN, SPACE-SAVING AND FIRE-PROOF.

Ask for bulletin No. 15 and see how much this system will save you.

S. F. BOWSER & CO. Ltd.
66-68 Fraser Ave., Toronto, Ont.

Do You Know the Main Facts About Our Two-Coat Combination Standard Turpentine Shellac and G. P. Hard Oil Finish?

Send for our sample on wood and judge for yourself.

Note particularly the remarkable *surfacing* and *holding up* or supporting properties of *Standard Turpentine Shellac.* It dries semi-flat, does not raise the grain of the wood and requires little or no sandpapering.

A single coat of our *G. P. Hard Oil Finish,* on account of its intrinsic body, produces over *Standard Turpentine Shellac* a really remarkable finish, as demonstrated in our *Two-Coat Combination.*

For first coating open grained woods, also paste filled woods, nothing equals *Standard Turpentine Shellac.*

All Standard Varnish Products are manufactured by International Varnish Co., and sold only in Full Imperial Measure Cans.

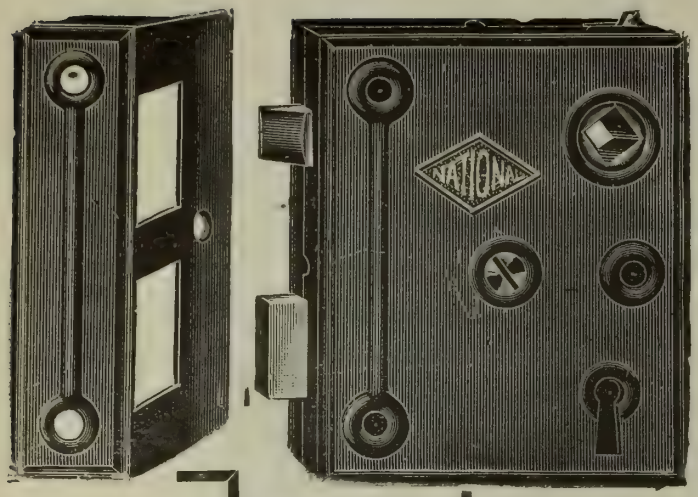
The Impossible is Still Being Attempted Every Day

You can't get a *first-class* white enamel unless you *buy* it, and a *first-class* white costs *real* money. All the *promises* between here and the Himalayas—and all the *claims* that can be *invented*—won't *alter* the *fact* that a *cheapened* enamel will *result* in a *cheapened* job. It's *bound* to *discolor*—it's *sure* to *crack* and *blister*—it won't *stand* the *test* of the *thermometer* or the *barometer.*

Glidden Superior White Enamel

is the *best* that money can *buy,* but doesn't *cost* the *most* money. It hasn't *disappointed* yet. Looks as though a *fine French porcelain* had been *spread* on by a *brush. Glossy* and *lustrous* with a lasting over-glaze.



Glidden Velvet White Enamel

should be used where a rubbed or velvet finish is desired. It dries with a perfect egg shell gloss without the necessity for rubbing.

For hospitals, sanitariums, bath-rooms, vestibules and fine Colonial Homes. Even brushing qualities. It's simply impossible to improve on its quality or its results.

Cleveland, U.S.A. The Glidden Varnish Co. Toronto, Can.

The Gendron Manufacturing Co. Ltd.
TORONTO, CANADA

Nature has solved the problem of distribution. It uses a multitude of agents to effect the distribution of its products.

Nature does not expect every seed to fall upon fallow ground and to take root. But, it achieves a profitable percentage upon its distribution. This is all that an advertiser has to do to reap a profitable harvest on his outlay.

In 30 minutes with the Spramotor shown, you can protect your potato, or row crop, on two acres, 100-gal. tank does it. The horse does all the work. 12 non-clogging nozzles, with 125 lbs. pressure.

Has Automatic Regulator, Nozzle Protector, Pressure Relief, Agitator, 12-gal. Air Pressure Tank, Draining, Air and Controlling Cock. Full control from driver's seat. Fitted for Orchard, Vineyard and Grain Crops, One or two horses, or by hand.

AGENTS WANTED

R. D. HEARD, 1383 King Street, LONDON, Canada

Department of Canals and Railways, Canada

ONTARIO — ST. LAWRENCE CANALS.
MURRAY CANAL.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Dredging Murray Canal," will be received at this office until 16 o'clock on Wednesday, May 31.

The specification and form of contract to be entered into can be seen on and after Friday, May 12, at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the office of the Resident Engineer of the Ontario-St. Lawrence Canals, Cornwall, at which places form of tender may be obtained.

Parties tendering will be required to accept the fair wages Schedule prepared or to be prepared by the Department of Labour, which schedule will form part of the contract.

Contractors are requested to bear in mind that tenders will not be considered, unless made strictly in accordance with the printed forms, and in the case of firms, unless there are attached the actual signature, the nature of the occupation, and place of residence of each member of the firm.

An accepted Bank cheque for the sum of $1,500.00 made payable to the order of the Minister of Railways and Canals must accompany each tender, which sum will be forfeited if the party tendering declines entering into contract for work, at the rates stated in the offer submitted.

The Cheque thus sent in will be returned to the respective contractors whose tenders are not accepted.

The cheque of the successful tenderer will be held as security, or part security, for the due fulfilment of the contract to be entered into.

The lowest or any tender not necessarily accepted.

By order,
L. K. JONES,
Secretary.

Department of Railways and Canals,
Ottawa, May 10, 1911.

Newspapers inserting this advertisement without authority from the Department will not be paid for it. (21)

FORD AUGER BITS are years ahead of competitors

It has always been our aim to manufacture a bit that would be better than other BESTS. We've succeeded. Tests have proved it. Tests made by men who used the same bit for years—thought there was none like it—wouldn't use any other, but heard so much of the FORD and its wonderful Patented Concave Twist that they tried it—working it alongside of their favorite bit. Lo and behold, the FORD did BETTER WORK at almost DOUBLE the SPEED. This meant money to them—money in both time and quality of work. They used the FORD again and were further convinced of its superiority. To-day these men and thousands of other discriminating workmen use the FORD in preference to all others.

Easy and Profitable to Sell.

Our terms allow you a generous profit and our advertising will create a demand and make sales easy for you. Each FORD Bit is backed up with our solid guarantee, and any dissatisfaction will be speedily made right.

Ford users are profitable customers, for once you sell a man a FORD you've secured a steady buyer. We want you—we'll help you. Will you write us? We'll send you a handsome illustrated catalog, descriptive circulars, our terms to you and name of your nearest jobber.

By using FLUXITE.

THE PRACTICAL MAN USES

FLUXITE

The Paste Flux That

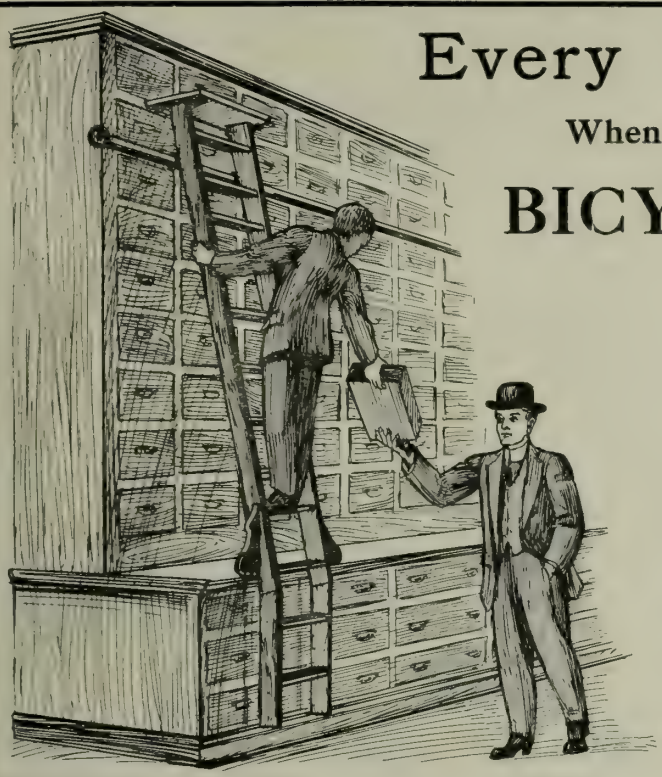
SIMPLIFIES SOLDERING
AND SUPERSEDES LEAD BURNING

It solders even dirty metals without cleaning and without corrosion. It joints lead without solder, merely by the use of a blow-lamp or blow-pipe. **Anyone** can do soldering work with Fluxite. It is a necessity in the tool kit of every motor car, workshop and home. Easy to use, easy to sell.

REMEMBER IT IN YOUR INDENTS.

Packed in small and large tins. Made by

THE AUTO CONTROLLER CO., 212 Vienna Road, Bermondsey LONDON, S.E., ENG.



BUTTERMAKERS DEMAND

THE "FAVORITE" CHURN

because they know it is the best. A glance at its construction—that light, but rigid angle steel frame, the bolted trunnions, the tight and conveniently arranged cover, the combined hand and foot drive, the roller bearings—these very evident advantages convince one of its superiority, which is fully proven by actual churning tests. As a natural result, more "FAVORITES" are sold in Canada than all other churns combined. 8 sizes, to churn from ½ to 30 gallons.

David Maxwell & Sons, St. Mary's, Ont.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Have the Agency in Your Town for the **Simonds** "Crescent Ground" **Cross-Cut Saws**

It will mean a good seller for you. The Saws can be purchased through your jobber or from any of our offices. Good profit and quick sales. You are at liberty to guarantee Simonds "Crescent Ground" Cross-Cut Saws to cut 10 per cent. more timber, same time and labor being used, than any other Cross-Cut Saw in the world.

SIMONDS CANADA SAW CO., Limited, Montreal, P.Q. St. John, N.B. Vancouver, B.C.

To the Manufacturer or Wholesaler——

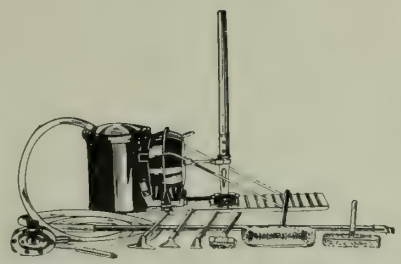
If it were possible to employ a traveller who could call on thousands of the best dealers all through Canada every week, what salary would you figure he'd be worth—even supposing he did nothing more than go in and shake hands with these dealers, under such circumstances they'd be glad to see him.

Would he be worth $200, $300 or $500 per week? Many a house would pretty nearly let him fix his own salary.

Equip an advertisement in this paper with a verbal handshake for every dealer in Canada, and a frank, brief, pointed talk about your goods and you add a traveller to your staff who will make thousands of calls a week for you at a salary of $4 to $8 a week—less than you would pay a first-class stenographer.

Of course this traveller won't displace any of your regular salesmen, but he will help them to sell more goods and open up more new accounts.

"PERFECT" VACUUM CLEANERS



Hand Power

This Cleaner, compact, easily operated, is sold at a price easily within the reach of every householder.

Complete with rubber hose and a full assortment of nozzle heads and brushes, the dealer sells them to the user at

$16.00 each, net

The vacuum method of cleaning apartments is now universally established, and the storekeeper who introduces the "Perfect" will soon reap the benefits of his progressiveness.

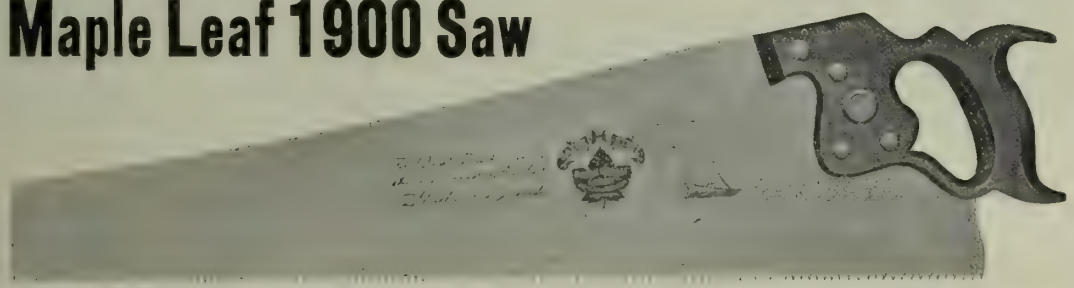
"Perfect" Cleaners are sold to the trade at prices which leave a very large margin for profit.

Electric Power

Where electric power is available, this cleaner may be attached to an ordinary bulb socket, and operated by one person. The power expense is a very small item.

This is the most satisfactory and best value Electric Cleaner on the Canadian market, and retails to the consumer at

$70.00 each, net



"Perfect" Vacuum Cleaners are also well adapted for the grooming of horses and other animals, and a specially constructed Suction Curry Comb is supplied for this purpose.

Maple Leaf 1900 Saw

MADE IN HAND, RIP AND PANEL—HOLLOW OR STRAIGHT BACK.

Are you handling the **"Maple Leaf" HAND SAWS?** the line with quality as the first consideration and that shows you the margin of profit you should get.

If not, we can offer you a proposition second to none—one that will appeal to you as a good business man. We have prepared special advertising features for the spring trade that every hardware man in Canada may have the advantage of. This advertising is done direct to the carpenter on our **1900, 100** and **"Narrow Point" Hand Saws.** We are packing the 1900 and 100 in separate canvas bags and have adopted a retail price which is stencilled on each bag.

We will be glad to supply you with full particulars.

IT IS PERHAPS NOT GENERALLY KNOWN

That we have an Information Department, consisting of trained and practical men, whose time is employed solely in answering enquiries from people interested in cement.

NOW IT WILL BE READILY UNDERSTOOD

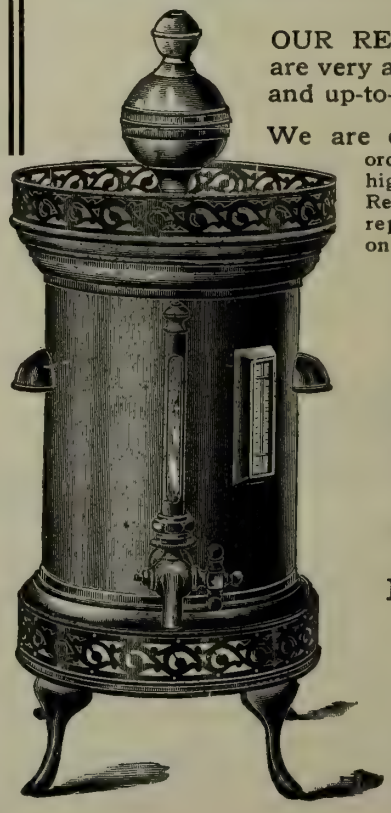
that out of the mass of enquiries that come to us, there are a number that include questions as to what might be termed Allied Industries. These we now answer to the best of our ability, but we could answer them still more satisfactorily if manufacturers of materials used in conjunction with cement would co-operate to the extent of sending copies of their catalogues and other literature, to be placed on file in our office for reference.

WE SHOULD LIKE TO OBTAIN

the names and addresses, together with catalogues, and any other obtainable information, of manufacturers of and dealers in:—

(1) CONCRETE MACHINERY. (2) BUILDING BLOCKS. (3) CEMENT BRICKS. (4) TILE MOLDS. (5) FENCE POSTS. (6) REINFORCING MATERIAL. (7) WATER-PROOFING COMPOUNDS.

It is not alone for our own convenience that we make this suggestion—firms who manufacture or deal in such articles will find it to their own advantage to have this information in the hands of our Information Department, thereby enabling us to hand on to them, from time to time, enquiries for such materials as they severally make.



In sending catalogues, literature or information, please address same to "Sales Department."

COPYRIGHTED, 1909, BY THE STANLEY RULE & LEVEL CO.

STANLEY TOOLS

STANLEY METALLIC PLUMBS AND LEVELS are so designed as to remain true under all ordinary conditions.

The metal cases in which both the Plumb and Level Glasses are set, are machined to fit accurately the machined surface of the supports which are cast in the frame of the Level.

THE CASES are held firmly on the supports by means of the cone centers which engage each end of the case. The center lines of the cases and cones are eccentric. With this arrangement the Levels can be readily adjusted or new glasses inserted.

Only the very best of materials and highest grade of skilled labor obtainable enter into their construction, and they carry with them the guarantee of a Company which has been manufacturing high-grade Carpenters' and Mechanics' Tools for over half a century

THE CONNOR BALL-BEARING WASHER

With the hinged cover now used on this Washer it is no longer necessary for the operator to place the cover and rubbing board dripping wet onto the kitchen floor. With this hinged rubber and cover the water drips back into the machine. It is easily handled. And other features of this machine are a detachable tub; no iron running through the bottom of the tub; Cypress Tubs: nicely finished Ball - Bearings and Motor Springs do most of the work.

Have you the agency for this washer? If not, write at once for sample, prices, terms, etc. You will find it the most satisfactory machine you ever handled.

A Common Sense Talk

AIR IS CHEAP. You do not pay rates for air like you do for water, yet a big fuss is made over the impurity of water and very often no thought is taken of the impurity of the air breathed from day to day and night to night.

Crowded rooms, whether in public places, schools, opera houses or factories, require ventilation as well as the private dwellings.

HOUSE BUILDING IS A SCIENCE NOWADAYS AND NO BUILDING IS COMPLETE WITHOUT ONE OF OUR J. W. HARRIS VENTILATORS.

THE VENTILATOR ITSELF IS AN ORNAMENT and can be made to suit the character of the building, either as to size or as to quality of material.

MONTREAL, Dec. 4th, 1905

MESSRS. J. W. HARRIS MFG. CO., Ltd.
City

DEAR SIRS,—
In answer to your letter of the 25th ult., I must say that I am very much satisfied with the results of the "ZEPHYR" Ventilators.

Yours truly,
W. CHAMPAGNE,
191 St. Paul St.

Dealers everywhere will find a double profit in handling this ventilator. Write direct for catalogue and booklet to-day.

Learn about our system of ventilating. A pleasure to send books.

Show Your Customers the Advantage of Using the GILLETTE With the Correct Angle Stroke

When you sell a man a GILLETTE you can be quite sure he'll get a good shave, no matter how he uses it. The GILLETTE is so simple, so handy and so keen that he cannot fail.

But at the same time there is a *best way* of using the GILLETTE, and that is with the *Angle Stroke,* illustrated above. Drawn across the face in this way, at an angle to the cutting edge, the blade slips sideways across each hair while it cuts, just as a scythe or a bread-knife is drawn across the material it is cutting. Everybody knows the advantage of the angle stroke with other edge tools, but not every one thinks of applying it to a razor. The words of caution are, "Don't scrape!"

With the GILLETTE the angle stroke comes natural, and the result is the cool, clean, quick, comfortable GILLETTE shave, known and appreciated the world over.

If you want every man who buys a GILLETTE from you to enthusiastically help you sell others, be sure you explain to him the ANGLE STROKE.

Our Picture Post Cards, illustrating and explaining this Angle Stroke, are now ready. Mail them to your trade and make them work for you.

Stanley Tools

During the past year we have made a number of valuable improvements in our line of STANLEY Plumbs and Levels.

All "STANLEY" Levels can now be readily identified by an ingenious device of blackening both plumb and level side views, thus concentrating the light directly on the bubble, which, with the patented feature of having two indelible lines at the crowning or central point of the glass, enables the user to very clearly and quickly locate the position of the bubble.

STANLEY brass-bound levels have a heavy square binding, dove-tailed into the wood, running the full length of the stock, and extending through the solid brass tips at both ends.

We also call attention to the extra finish now given all numbers.

STANDARD THE WORLD OVER

Digging Asphalt from Trinidad Lake and transporting it for Genasco Roofing.

Profitable business results from selling goods that give your customers such unbounded satisfaction that they come back for more. This is what happens when you sell

Genasco

the Trinidad-Lake-Asphalt Roofing

Genasco satisfies customers because it lasts; and it lasts because it is made of *natural* asphalt which gives it the life to resist rain, snow, sun, wind, heat, cold, and fire.

Customers know the high quality of Genasco—our persistent all-year-'round advertising tells them all about it, and their own experience proves our statements.

They need to know where they can get it. And that is *your* privilege to tell them.

If you haven't a good stock of Genasco, now is the time to order from your jobber.

The ***Kant-leak Kleet*** is the quality fastening for the quality roofing. Makes seams water-tight without cement, and prevents nail-leaks. Ask your jobber for Genasco with Kant-leak Kleets packed in the roll.

The COCHRAN PIPE WRENCH

Guaranteed to give 50% more service than any other pipe wrench on the market.

Your Attention Called to Some of its Features

- The frame and handle are one solid piece.
- Rocker replaces frame pin and is indestructible.
- Will positively not crush nor lock on pipe.
- No lost motion.
- Perfect grip and release.
- Cannot be injured by side pull, owing to its solid frame construction.
- Jaws drop forged from highest grade of tool steel adapted to the use of wrenches.

Positive Grip and Quick Release, Thoroughly Tested and Guaranteed.

Here is one of the secrets of success that users can see without telling them---the rocker bearing that takes the strain is thrust upon the helpless frame pin. Any wonder it **wins out?** You can give a side twist or a sudden jerk and you make no impression on this rocker feature. The selling points of the **COCHRAN PIPE WRENCH** are especially strong, and a good market means good material. Look at the end of the hook jaw --- see how strongly it is reinforced. It has a **powerful grip** with a **quick get-away.**

Send us a trial order, our guarantee protects you. Get them before your competitors and establish better trade.

McFARLANE & DOUGLAS, Ltd., Manufacturers - 250-260 Slater St., Ottawa

"JEWEL" FURNACE New Pattern. Two Sizes, Nos. 21 and 23

A Special Low Furnace

Different in shape and proportion from our other Furnaces, being specially constructed to surmount the difficulty of obtaining a sufficient pitch to the Warm Air Pipes in buildings with **LOW CELLARS.**

When flat top is used the No. 21 Furnace, cased, will not exceed 4 feet in height.

Diameter of Fire Pot—No. 21, 19 in.; No. 23, 22 in. Feed Door Opening, 13 x 13 in.

All our Furnaces are constructed on Correct Scientific Principles, and are mounted and fitted with the greatest care, under the direction of skilled and experienced men.

OUR FURNACES GIVE SATISFACTION AND STAND THE TEST.

This cut shows the construction of the Furnace.
The part of Furnace above Fire Pot is tilted on its side in order to show Combustion Chamber and Radiator.

The Fire Chamber is of ample dimensions and the **Feed Door** measures 13 x 13 inches.
The Radiator is made of heavy steel plate and surrounds the Fire Chamber, except at Feed Door.
The Fire Pot is made of heavy Cast Iron in two sections, upper and lower. This construction prevents the cracking of Fire Pot by unequal expansion and contraction of the iron. The Fire Pot of No. 21 is plain. The Fire Pot of No. 23 is flanged and has therefore a much greater radiating surface. The two sections of Fire Pot are attached by deep **Cup Joint** packed with asbestos cement. All other joints in Furnace are similarly constructed and a **Jewel** Furnace properly set is **ABSOLUTELY GAS TIGHT.**
The Water Pan is inserted through the outer casing near the base of the Fire Pot. When the pan is kept full the evaporation of water ensures ample humidity at all times.
Notice the **Dust Flue** in front of the Fire Pot, Connecting Ash Pit with Fire Chamber. Through this flue all dust is carried off when cleaning out ashes or using poker or shaker.
No. 21 Furnace has a heating capacity of 15,000 feet. **No. 23 Furnace** has a heating capacity of 25,000 feet.
This is the latest addition to a very large line of **WARM AIR FURNACES. Manufactured by**

OWEN SOUND, ONT.

Get this into your Stove Talk, Mr. Dealer!

It means Business for you.

THE GURNEY-OXFORD ECONOMIZER

The GURNEY-OXFORD "Economizer" will save 20 per cent. of the fuel and will make it possible for the housekeeper to have the fire under perfect control; from a quick baking heat to a slow fire, which will last for thirty-six hours, is accomplished by simply moving the handle of the Economizer on the dial. This is a fact which will sell stoves better than anything else you can talk. Figure, too, how interested the good housekeeper will be when you point out that this same device will ventilate her kitchen, will draw the smells of the cooking up the chimney instead of sending them through the house. If you are interested, Mr. Dealer, ask us more about this. We will show you that these statements are facts and you as a good business man will realize that these facts will turn "lookers" into "buyers." Remember, too, that this Economizer is backed by national advertising. People will come to your store asking about it. Better get our new book covering our whole sales proposition from our nearest office.

GREENFIELD, MASS., U.S.A.

REMOVING THE APPENDIX

Would you have this operation performed by some doctor who offered to do it cheap or by an experienced successful specialist? We know the answer.

The same principle applies in many other directions. There has been a wonderful change in the intellectual broadening of operative Engineers and Mechanics. They are no longer satisfied with merely keeping the machinery in good running order. They start in at the coal pile and study the califoric power of fuels in thermal units, the firemen are put through a school of instructions, and they study economies and scientific problems in many other directions,

BUT How many Engineers and Mechanics figure on the loss from frictional resistance in transferring the power from the boiler to the points where it is needed?

More than half of the power is often absorbed in that way and yet many up-to-date men use or permit to be used the most ordinary grades of babbitts because of the slight initial saving in the cost price.

It Is Plain as an Open Book

that the value of a genuinely good and economical bearing metal is summed up in and expressed by a low co-efficient of friction.

A low co-efficient of friction means less frictional resistance, less wear, less heating, less oil, less fuel, less liability of shut downs, less rebabbitting, less consumption of metal, less squashing, less worry, less work. You can secure all of these economies and other advantages by the use of.

Magnolia Metal

and we recommend its uses on shafting as well as all other bearings. We represent the specialist who does one thing and does it well.

Special Offer

PRACTICAL ENGINEER POCKET BOOK, 680 pages, over 2,000 subjects. We do not aim to make a profit on this book and therefore offer it at the very low price of 40c. postpaid. Many Engineers write to us that they find it invaluable. Address Montreal Office.

"STRATFORD"

HAY SLING CARRIERS

THE Stratford is known commonly as the Short Draft Hay Sling Carrier on account of the line of draft in elevating being at right angles to the track. This is a new method and a successful one.

The advantages of the STRATFORD, with her parallel pulleys working at right angles with the track, are apparent to all.

They not only reduce the friction but save about 20 feet more of draft rope between the carrier and the load than any other on the market.

The Stratford has no stop latch or knocker to get loose or otherwise make trouble. It has no side or guide rail, the track being left free to swing and adjust itself to the line of draft.

Mr. Retailer.—This is a good money maker as you make quick sales and reasonable profits.

MONTREAL OFFICE---327 Craig St. W.

Department of Railways and Canals.

Ontario--St. Lawrence Canals. Rapide Plat Canal.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Improving Lower Extreme to Lock No. 24," will be received at this office until 16 o'clock on Friday, June 9th.

Plans, Specifications, and Form of Contract to be entered into can be seen on and after this date at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the office of the Resident Engineer of the Ontario—St. Lawrence Canals, Cornwall, at which places form of tender may be obtained.

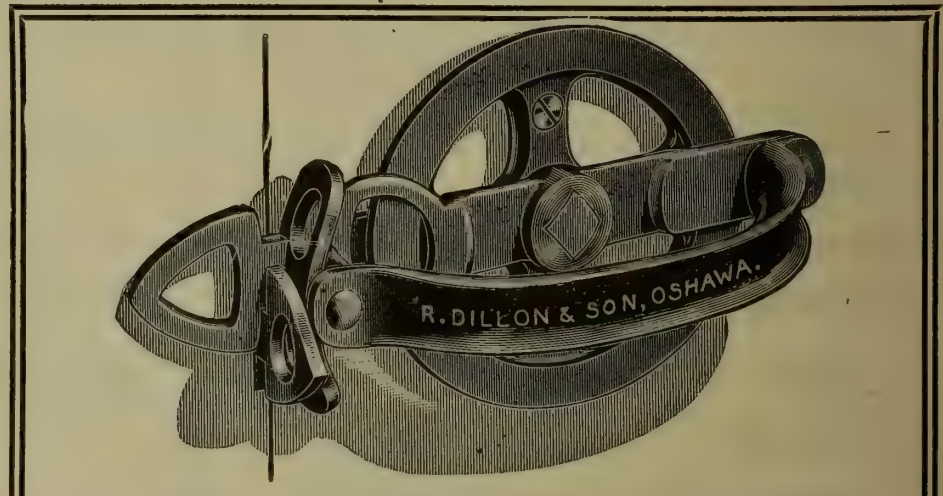
Parties tendering will be required to accept the fair wages schedule prepared or to be prepared by the Department of Labour, which schedule will form part of the contract.

Contractors are requested to bear in mind that tenders will not be considered, unless made strictly in accordance with the printed forms, and in the case of firms, unless there are attached the actual signature, the nature of the occupation, and place of residence of each member of the firm.

An accepted bank cheque for the sum of $9,000.00 made payable to the order of the Minister of Railways and Canals must accompany each tender, which sum will be forfeited if the party tendering declines entering into contract for the work at the rates stated in the offer submitted.

The cheque thus sent in will be returned to the respective contractors whose tenders are not accepted.

The cheque of the successful tenderer will be held as security, or part security, for the due fulfillment of the contract to be entered into.



The lowest or any tender not necessarily accepted.

By order,

L. K. JONES,
Secretary.

Mr. Saywell will shortly be calling on you to fix up Agencies

Department of Canals and Railways, Canada.

ONTARIO — ST. LAWRENCE CANALS. MURRAY CANAL.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Dredging Murray Canal," will be received at this office until 16 o'clock on Wednesday, May 31.

The specification and form of contract to be entered into can be seen on and after Friday, May 12, at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the office of the Resident Engineer of the Ontario-St. Lawrence Canals, Cornwall, at which places form of tender may be obtained.

Parties tendering will be required to accept the fair wages Schedule prepared or to be prepared by the Department of Labour, which schedule will form part of the contract.

Contractors are requested to bear in mind that tenders will not be considered, unless made strictly in accordance with the printed forms, and in the case of firms, unless there are attached the actual signature, the nature of the occupation, and place of residence of each member of the firm.

An accepted Bank cheque for the sum of $1,500.00 made payable to the order of the Minister of Railways and Canals must accompany each tender, which sum will be forfeited if the party tendering declines entering into contract for work, at the rates stated in the offer submitted.

The Cheque thus sent in will be returned to the respective contractors whose tenders are not accepted.

The cheque of the successful tenderer will be held as security, or part security, for the due fulfilment of the contract to be entered into.

The lowest or any tender not necessarily accepted.

By order,
L. K. JONES,
Secretary.

Making Good on the Cash System

Dealers Who Try Cash Selling Rarely Wish to go Back—Jos. J. Henderson, of Niagara Falls Delighted With its Operation—Adopted Cash System Over Two Years Ago.

The first thing to be noticed, upon entering the hardware store of Jos. T. Henderson, Niagara Falls is the sign: "We Sell For Cash Only. Please Do Not Ask for Credit." This is tacked up directly in front of the main entrance, and is repeated above the cash register.

"How does it work?" was the first question put by Hardware and Metal, on a recent visit.

"There's nothing like it," replied Mr. Henderson, taking off his glasses, and consigning them to his vest pocket. "Why I wouldn't go back to a credit business on any consideration."

"Have you given it a good trial?"

"Two years and a half, and it's working better than ever."

How He Made the Decision.

It was really his own clerks who persuaded Mr. Henderson to adopt the cash system. Reading in Hardware and Metal, about the success which had attended the efforts of so many hardware merchants in establishing the cash system, they began to boost the idea for their own store.

"Why cannot we adopt the cash system in this store?" they began to ask.

Mr. Henderson at first raised objections. Niagara Falls was essentially a railroad city, he would say, and it would be impossible to persuade railway employes who received their salary only once a month to pay cash for their purchases. Moreover, he had been doing a credit business for twenty-five years, and all his customers were used to the credit system and wouldn't stand for paying cash on every purchase. It might do in large factory towns, or in places where the residents were well-to-do, but the scheme wouldn't work in his business, especially as all his competitors were doing business on a credit basis, and probably would continue doing so This would put him at a disadvantage.

It was not long, however, before Mr. Henderson commenced to see the drawbacks to the credit system, in a much stronger light than he had ever seen them before. One day, a little boy came into the store for a package of carpet tacks, and asked for it to be charged to his mother's account. The clerk called his attention to this, and it didn't take him long to see that, on that particular sale, at least he would lose money by the time he had figured the cost of handling, putting through the books, sending out statements and collecting.

Come to think of it there is an immense amount of detail work in the bookkeeping department of a retail hardware business which is run on the credit system. Even if all accounts were paid, after one statement had been sent out, the cost of collecting (counting in postage, stationery and bookkeeper's time) would be considerable; but since quite a large proportion of accounts are only settled after repeatedly rendering statements, and finally by personal solicitations, it must be admitted that the credit system contributes very materially to the overhead expenses of a retail store.

Then, there is another point to consider. In a credit business, as it is generally run, the money comes into the business in uncertain quantities, and at uncertain intervals, so that the dealer who is required to make up weekly envelopes for a large staff, sometimes has to do some "high financing" to make ends meet on pay day. In Mr. Henderson's case there was a staff of fourteen to be provided for once a week, and the worry of getting in enough money for this weekly occasion, is what largely influenced him, in the end, to try the cash system.

The First Steps.

At the end if 1909, when Mr. Henderson examined his trial balance for the year, he was surprised to see how large was the total of accounts outstanding The advantages of having that money in the bank instead of on his books, appealed to him more forcibly than ever, and he decided, once for all, to try out the cash system.

Notices were sent out to the regular customers, that, after the first of the year, the business would be conducted on a cash basis. These notices were also posted around the store, and advertisements were inserted in the local newspapers, to the same effect.

An Axious Time.

The few weeks which followed this announcement, were an anxious time for Mr. Henderson and his sales staff. They were all posted with arguments with which to prove to customers that the cash system was to their advantage, as well as to that of the store. The most telling argument was the discount which was allowed off all the marked prices of all the goods in the store.

All goods had been marked at credit prices and, the cost of running a credit business being obviously higher than that of a cash store, the prices were marked higher than would be necessary under the cash system. When customers found that they could actually save money, in buying for cash, they were soon won over to the new system, and the only customers who were lost as a result of the change were undesirables—dead-beats from whom it was next to impossible to collect.

One of the customers in those early days of cash selling, was a man who had been in the habit of having his purchases charged. He watched the clerk make out the counter check, and saw him deduct a discount at the bottom of the check.

"What is that for?" he asked.

"Why," said the clerk, "you know we are doing a cash business now, and we can therefore afford to sell at lower prices."

"Then do you mean to tell me I have been paying higher prices for the accommodation I have been getting?"

"That's about what it amounts to," was the reply. "Of course it costs more to run a credit business, and we have to get the money by charging higher prices."

"Well, I have been a fool!" exclaimed the customer, "for I have had the money in the bank all the time, and I could have paid on the spot, for everything I bought."

Did Business Fall Off?

The first question one would ask a retail merchant who had adopted the cash system, would be: "Did your business fall off as a result?" As a matter of fact, most dealers would be satisfied to do a little less business in order to gain the advantage offered by cash trading, and most of them who try the cash system, go into it firmly convinced that they are going to fall off in their turnover.

That was Mr. Henderson's idea, too, and he watched his sales very closely, after making the change. It was a dull season of the year, and naturally business was slack. Was it because of the cash system? Comparison with the previous year's figures proved that there was no falling off, and competitors reported that, if any business was getting past Mr. Henderson, it wasn't going to them.

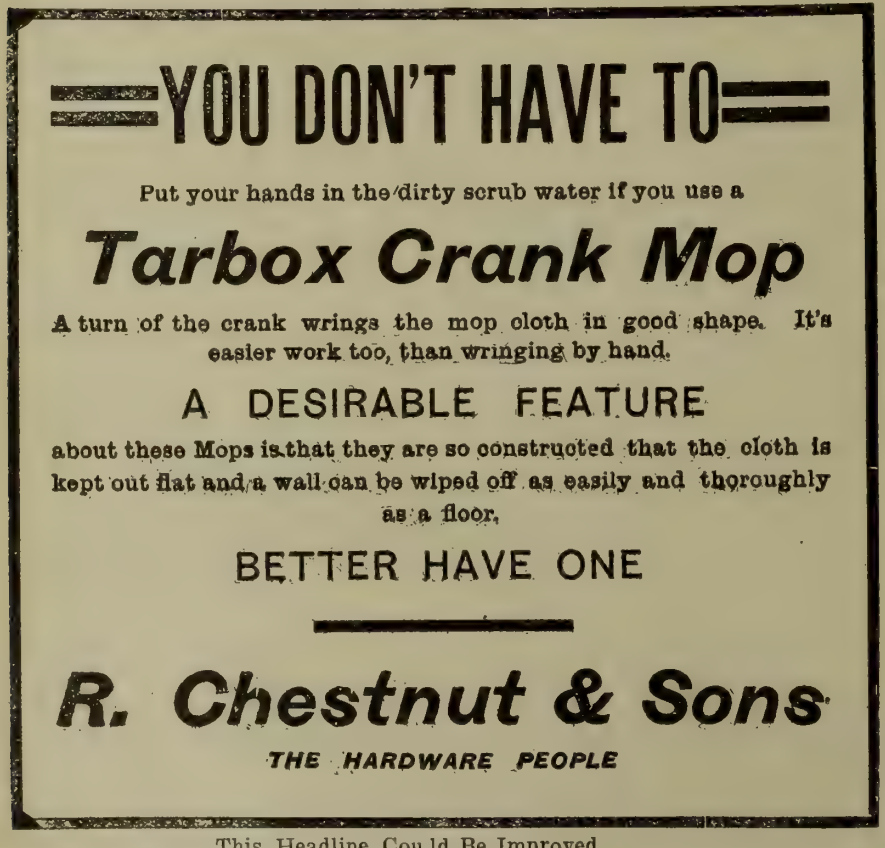
Finally, the real season opened. Spring buying commenced with a rush. Before long, it was seen that, instead of any falling off, business was much better than ever before, and best of all, the close of each day saw real money in the cash register, instead of entries in the day book.

Wouldn't Go Back.

"I would not go back to the old style for a great deal," said Mr. Henderson. "but there are still two or three classes to whom I allow a limited credit. Sometimes a mother sends her boy or girl down for something, and, perhaps, does not like to trust the child with any money. So she sends me a note saying that she will drop in while down town, in two or three days, and pay for it personally. In such a case, if the people are all right, I send the goods and put the note on file. If, within a few days, the mother does not call in to settle, I can remind her of it without causing any offence, because I hold her promise to pay.

With the factories, Mr. Henderson does business on a thirty day basis as he finds it more convenient both to himself and his customers. The same plan

is also followed with contractors who are known to be good.



An important branch of Mr. Henderson's business is the contract department, who look after contracts and jobbing, in tinsmithing and plumbing. This is one department which Mr. Henderson does not think advisable to put on a cash basis. In the first place, it would be putting temptation in the way of the men, if they were asked to collect, after they had completed a job. Furthermore, it might tend to make them dissatisfied with their wages, if they knew just what price was being obtained for their work.

An Effective Headline Helps the Ad.

Most Important in Arresting Reader's Attention—Should be Brief and to the Point—Headlines That Arouse Readers to Action—Write the Copy First, Then Prepare Pithy Headline.

If you were to ask a dozen advertisement writers to tell you what part of the ad. they found it most difficult to write, the majority would probably say that they were in the habit of spending more time in thinking out a suitable head-line, than in writing any other part of the ad., and yet the head-line is, in the majority of cases, the shortest sentence in the whole ad.

The reason for the difficulty of composing a head-line is not hard to find. In the first place, the head-line is the most important sentence in the advertisement so far as attracting attention is concerned. In fact, the great function of the head-line is to secure the attention of the reader, and whether the ad. will be read or not, depends, in no small degree, upon the cleverness with which the headline has been evolved, and the manner in which it is displayed.

This Headline Cou ld Be Improved.

Requisites of a Headline.

The saying that "brevity is the soul of wit" has never had a truer application than in the case of the headline of an advertisement. But brevity is not the only requisite, nor, indeed, is it the most important characteristic of a good headline, as it is conceivable that a headline might be very brief and yet quite ineffective.

One important feature of the problem, which is too often overlooked by ad. writers, is that the headline must have some direct connection with the subject of the advertisement. Other things being equal, the more direct this connection, the better it will be for the advertisement.

The effective headline, which arrests the attention of one who is scanning the paper, may be compared to the sign, "RAILWAY CROSSING," which catches the attention of the traveler on the highway, whether driving, wheeling, or motoring, and leads him to stop and investigate whether a train is coming. It may be doubted whether the sign would serve its purpose equally well, if it were worded after the fashion of a good many hardware advertisements, in some such way as this:

THIS IS THE PLACE

Where the Railway Crosses the Road.

The wayfarer who encountered such a sign, if he did not know beforehand what it meant, would be likely to say to himself: "There's another of those sign-boards." And, in the same way, a man or woman reading the newspaper, will probably pass over an announcement which commenced: "This is the place to buy hardware, stoves, etc.," with the mental comment, "There's another of those ads."

Must Be Distinctive.

The effective headline, therefore, must stand out from the jumble of reading matter and advertising in the newspaper; it must be distinctive. It must especially differentiate itself from all the other ads. in the paper, and, if its opening sentence is to the effect that "This is the Place" to buy so and so, the chances are that there will be two or three other advertisements in the same issue, which have just about the same beginning.

The headline, as has been said, must be intimately connected with the subject of the ad. It should, in fact, be a very brief synopsis of the ad., if possible—a resume of its contents.

As an illustration of this idea, consider the way the average man skims over his morning paper. He scans its pages, one by one, to see whether any of the articles or reports it contains are of interest to him. He reads those whose headlines appeal to him, and skips most of those headlines which appear to herald something dull or uninteresting. Possibly, a little later in the day, he may hear some friend mention a certain article that he may have read in the morning paper. It concerns a matter in which he is vitally interested, and yet he cannot remember having seen it in his paper. Upon investigation, he learns that the reason he skipped the article

was that the headline did not arouse his interest.

The "Yellow Journals" long ago learned the value of catchy headlines. Many thousands of papers have been sold on the strength of apt introduc-

tions to their subject matter, through effective headlines.

For ideas on the subject of headlines it would be wise to carefully examine the best newspapers, and note the rules followed by the editors in preparing their headlines. It will be found that they are, generally, clever phrases which size up, briefly and effectively, the contents of the article to which they are prefixed.

Write the Headline Last.

It will not take long to discover that the headline cannot be written until the contents of the article are known. Headlines in the newspapers are written after the articles to which they refer. Although they are the first to be read by the subscriber, they are the last to be written by the correspondent or editor.

The same rule should apply to the writing of headlines for advertisements. They cannot be effectively prepared until the copy proper has been written. It will then be far easier to think out some catchy phrase which will synopsize the ad. This is a case of writing last, the words which will be read first.

The "Hypothetical Imperative."

A form of headline which is favored by a good many of the most experienced ad. writers, is that, known, technically, as the "hypothetical imperative." This is a style which is considered peculiarly likely to induce action, on the part of the reader.

To explain what is meant by the "hypothetical imperative," let us consider also the interrogatory headline which also has many followers. An ad. man who wished to use this form of headline in a refrigerator advertisement, for instance, would probably open in this way: "Have you bought your refrigerator yet?" This heading would be quite effective in securing the attention of any reader, who might be interested in refrigerators. But the advocates of the "hypothetical imperative" style would say that the headline was not positive enough—did not call forth action on the part of the reader. And so, they would prefer to alter the wording to something like this: "Buy your refrigerator now!"

The idea, though very effective, is simple, and the above illustration will readily convey to aspiring ad.-writers the

Making Full Use of a Small Space.

advantages of the "hypothetical imperative," and the means of accomplishing it, in a head-line.

Space Must be Considered.

So much for the method of wording the headline of an advertisement. Another feature which must not be overlooked is the space which it is to occupy. This has an important bearing on the question, for, obviously, the headline for a single-column advertisement must be on entirely different lines from that of the full-page ad.

As a general rule, the headline should not take up more than one line. It loses much of its effectiveness by being broken up; but this brings us back to the subject of brevity which has already been discussed. Even, aside from other considerations, the exigencies of space often demand that the headline shall be brief.

To sum up the question of headlines, they should not be prepared until after the advertisement is written. The ad. should then be carefully reviewed, its salient points seized upon, and from them a short pithy phrase or sentence evolved, as the headline. It must be such as to attract attention, whether it be interrogatory or imperative in form, and must be closely connected with the subject matter of the advertisement. By all means do not try to make it humorous, unless the element of humor is in some way connected with the article described. Many a headline cheapens the ad. which it introduces and renders it ineffective, through the efforts of the writer, to be funny.

Every reader should mentally criticize the advertisements reproduced on these pages, on the basis of the ideas given in this article. How many of them are introduced by effective headlines?

Improving the Headline.

The advertisement of R. Chestnut & Sons, shows that the writer has been giving the matter of advertising some study. It could, however, be improved in effectiveness, by a few changes, one of which will be suggested by reading this article.

The "hypothetical imperative" could be used effectively in the headline of this advertisement. "You Don't Have To," does not appear to have any special significance, nor does it either compel or invite a further perusal of the advertisement. Surely a better introduction would be "Use a Tarbox Crank Mop."

Another point is that a cut of the mop would make the ad. much more vivid, and the description would be much more clearly understood. Any woman in reading the ad. would like to have some idea of how a turn of the crank could wring the mop, and an illustration might increase her interest and curiosity to the point of visiting the store and personally examining the article.

Another oversight is the omission of the price of this crank mop. One class of readers might say: "O that's some

Just the Old Style Announcement.

expensive piece of machinery. I guess the old-fashioned mop will do me." Another class might look at it this way: "Probably some cheap and flimsy contrivance. I'll stick to the old reliable." If the price were quoted in the advertisement, a happy medium would probably be struck between these two opinions, and sales would result where only a flagging interest would be aroused if no price were mentioned.

METALS ARE STRENGTHENING.

An encouraging development of the past week or ten days, has been the strengthening of almost all metals, in the primary markets. This improvement has taken place owing largely to a more hopeful feeling which has possesed United States business men, since the announcement of the Standard Oil decision. For weeks the veritable stagnation in the metal trade of the United States has affected the situation throughout the world, but with conditions there clearing somewhat the inherent strength of the market, especially in European countries, becomes evident.

Tin has furnished the most spectacular features of late, having advanced two cents per pound during the past ten days. It was felt for some time that this was bound to come if U. S. buyers offered any encouragement. The visible supply has been unusually small, but in the absence of any buying movement in the United States, foreign holders did not consider themselves strong enough to force an advance. Now, however, it is reported that the strong syndicate who have been manipulating tin, have succeeded in cornering the supply for the whole of June, and they are now showing their hand.

One of the largest Canadian consumers of tin, in talking to the writer a few days ago, admitted that he had not correctly gauged the trend of the tin market. When leaving on a six weeks' trip, he left instructions with his superintendent to buy for immediate needs only. He now faces a rising market with a very small supply on hand, and, as he buys in five-ton lots, he is likely to feel rather severely the success which has attended the efforts of the English syndicate.

The situation in Canada throughout the metal market is much more hopeful this week. The leading consumers in all lines appear to be well employed, and present crop prospects are favorable. Should the definite crop reports, which may be expected shortly, bear out opinions which are now being expressed, the way will be opened for very brisk trading during the latter half of the year.

ENCOURAGE THE LADY BUYER.

In another column reference will be found to the fact that Stanley Mills & Co., Hamilton, Ont., have, by following a set policy for years, encouraged women shoppers to visit their store until to-day fifty per cent. of their trade is with the ladies. They seem to have solved a problem which is worrying most hardware retailers to-day.

The hardwareman finds that the disinclination, which women showed a generation ago to shopping in the hardware store, has not entirely disappeared. The fact that hardware stores are now infinitely more inviting in appearance has helped to remedy this condition. The widening of the scope of the business has done quite as much. But there is still a great deal left to be done. There can be no doubt that the trade of the lady buyer is worth cultivating, as it would help to keep in the hardware store much trade that is now carried elsewhere. By following the systematic plan adopted by Stanley Mills & Co., this purpose could be effected. Appeal directly to the women, write your advertising matter so that it will have an interest for them as well as for the men, give prompt service and courteous attention, and keep the store neat and clean. By following this course, the desired result will in time be brought about.

THE NEW BULK SALES ACT.

At the last Session of the Saskatchewan Legislature, an Act, entitled, "The Bulk Sales Act" was passed and made law on the 14th of March by the assent of the Governor General of the Province.

This Act will have a far reaching effect upon the sale of businesses in bulk in the future. It has been enacted for the protection of the purchaser and the creditors of the Vendor and to prevent the perpetration of fraud on the part of persons desiring to sell their business, secure the cash for same and decamp without settling up their outstanding liabilities for the goods that they may have transferred in the transaction of sale.

Briefly, the Bulk Sales Act provides that the Vendor must supply the purchaser with a sworn statement containing the names and addresses of all his creditors together with the amount owing. It shall then be the duty of the purchaser before paying to the Vendor the purchase price, to obtain the written waiver from the creditors of the Vendor before paying over the sale price, or he shall pay the purchase money, or sufficient thereof to satisfy the claims of all the creditors of the Vendor into the hands of the Official Assignee to be distributed pro rata amongst the creditors, less the usual Assignee's fees. The purchaser, however, can obtain the consent of the creditors to turning over sufficient of the proceeds to a nominee mutually satisfactory, thus avoiding the expenses consequent upon handing same over to the Official Assignee. If the total purchase price is less than the total indebtedness of the Vendor, it is necessary to obtain the consent of 60 per cent. of such creditors before any sale can be effected, thus preventing a bogus sale at a low figure and preventing fraud by any side deal being effected by the Vendor in order to evade the provisions of the Act.

A sale is considered to be a sale in bulk whenever the entire stock-in-trade of the vendor is sold, or part thereof, out of the usual course of business or trade of the Vendor. The Act in Saskatchewan covers not only a stock of goods, wares, and merchandise, but also an Hotel or Wholesale License for the sale of intoxicating liquor.

If the provisions of the Act outlined above, are not carried out, the sale is void, as against the creditors of the Vendor, unless the creditors are paid in full, and said sale shall be deemed to be fraudulent, and the creditors are, through the Courts entitled to issue a Writ of Attachment against the goods covered by such sale.

The Manitoba Bulk Sales Act, which has been in operation for the past two years, and upon whose provisions the Saskatchewan Act was founded, was amended at the session of Parliament just closed, so as to require the consent of 60 per cent. of the creditors in case of a sale, thus remedying a defect in the original Act. This Act has been a great protection to the mercantile community and is very beneficial in its results.

BUY-AT-HOME CAMPAIGN.

The competition of the mail order house is found to be so keen in some sections that, for purposes of self protection, the home dealers have to unite in the waging of a "buy-at-home campaign." Recently the retail merchants of Charleston, South Carolina, jointly issued a little circular which read as follows:

"I Buy at Home."

Because my interests are here.

Because the community that is good enough for me to live in is good enough for me to buy in.

Because I believe in transacting business with my friends.

Because I want to see the goods.

Because I want to get what I buy when I pay for it.

Because my home dealer "carries" me when I run short.

Because every dollar I spend at home stays at home and works for the welfare of Charleston.

Because the man I buy from stands back of the goods.

Because I sell what I produce here at home.

Because the man I buy from pays his part of the town, county and state taxes.

Because the man I buy from gives value received always.

Because the man I buy from helps support my school, my church, my lodge, my home.

Because when ill luck, misfortune or bereavement comes, the man I buy from is here with the kindly greeting, his words of cheer, and his pocketbook, if needs be.

Here I live and here I buy.

This gets right down to the root of the matter and covers the ground pretty thoroughly. Confronted with such a formidable list of reasons, what man would continue to buy from catalogue? The trouble is in the fact that people are not shown why it is against their own interests to deal away from home. They continue to do so, not because they are impervious to reason, but because they have never been brought face to face with the facts.

THE VALUE OF A WINDOW DISPLAY.

A man who has studied the question of window display advertising very closely sums the relative value of different forms of display as follows:

> Goods under counter, one chance in a hundred—customer may call for it; goods on shelf, ten chances in a hundred—customer may see and call, or clerk may see and be reminded to suggest; goods on display table, fifty chances in a hundred—will be seen by both customer and clerk, and is a suggestion to each; goods in window, one hundred chances in a hundred—goods are already sold and customer has only to come in to order them wrapped up, and unless the store is dirty or the clerk impudent, the money is practically in the till.

This valuation refers of course to effective window advertising. It does not take into account the goods carelessly stocked in a slovenly, unattractive window. The chances of making sales in such a case are far indeed from one hundred in a hundred, for the average person will give only a casual glance at an indifferently arranged window.

It is quite true, however, that a good window display is one of the surest methods of selling goods known. It places the article in a position where the passerby cannot help but see it, and shows it to the best possible advantage. More effective in some ways than verbal argument, the window display is a great factor in sales-making.

THE TINPLATE SITUATION.

There have been some unusual developments in the tinplate situation this year. Warned by the delays experienced last year in getting their orders filled, the jobbing houses have in almost all cases endeavored to overcome this by ordering bright and early. Some houses ordered plates last fall for delivery this fall—just a year in advance. The precaution is a wise one, as shipments last year were six months late in many instances, thus creating much confusion and trouble.

It follows, however, that there is very little prospect of a falling off in prices this year. Early ordering will have the effect of maintaining prices on the present basis; at least, such is the expectation of men closely in touch with the situation. In view of these facts, the present lethargy of the market is hard to understand. Buyers seem inclined to hold off, seemingly in the expectation of better quotations. Whether this hope will be realized is very problematical.

POINTED EDITORIALS.

* * *

This is "refrigerator weather." Have you made any effort to clear out your stock?

* * *

No new mergers have been reported so far this week. In view of past experiences, this is deemed rather unexpected.

* * *

Keep a "comparison book." It is then possible to keep close watch on the progress of the business or to detect lack of progress.

* * *

Rubber hose is in such demand that the leading factories can scarcely keep up with their orders. Are you selling your share of this record output?

* * *

The traveler who assists the retail dealer to improve his sales paves the way for more business for himself. The more the retailer sells, the more he buys.

* * *

Hardware conventions are still the order on the other side of the border. If dealers are as busy over there as they are here, the attendance must be pretty slim.

* * *

A man will seldom buy an article he does not need simply because the price is low, but women do it right along. This is one reason why it pays to cater to the trade of the ladies.

* * *

The time is ripe for dealers to advertise their "June Bride Specialties." The month of weddings offers innumerable opportunities for the hardwaremen who are wide awake to them.

* * *

With the passing of the convention season, little is heard of that famous order, The Hookworms of the World. If the weather of the past week continues, however, there will be plenty of men living up to the precepts of the order who do not belong. This is certainly hookworm weather.

* * *

Last week's Hardware and Metal told how a Western dealer moved into his new store after working hours, in order not to disturb the transactions of business during the day. This spirit, though by no means confined to the Westerner, is typical of that great, bustling prairie country, where towns spring up in a few weeks, and grow into cities in a few years.

Making Patterns for the Tin Shop

How to Draw Pattern for Y Joint, Pipes Being all of the Same Diameter.

By Wm. J. Finnigan.

First describe a circle of the required diameter as Fig. 1, then extend down the lines A—C and B—D, from the points Nos. 1 and 9, shown on Fig. 1, and draw an elevation of the intersection of the three pipes as Fig. 4. The point E is the intersection of the centre lines of each pipe. Divide the bottom half of circle Fig. 1 into eight equal parts and mark from Nos. 1 to 9 as shown, extending the lines down from these points until they intersect with lines C—E and E—D.

Describe a half circle on the line G—H, the same diameter as Fig. 1, and divide this into the same number of equal parts as Fig. 1. Extend up the lines from Nos. 1 to 5 until they intersect with lines F—E. Extend the line G—H up to J—K in Fig. 2, and set off twice the number of spaces shown in the bottom half of Fig. 1, commencing at J, numbering up to 9, and then down again to 1 as shown. Draw lines through these points as shown at right angles to line J—K. On line E—D extend the points from Nos. 5 to 9, which have been brought down from Fig. 1, over to Fig. 2, running parallel with line J—K, and where No. 5 intersects with line 5 will give the highest point in Fig. 2. Extend in like manner the lines from Nos. 1 to 5 which intersect line F—E, and, where the corresponding numbers in Fig. 2 intersect these lines, will give the points of the profile of pattern.

Draw a line through these points as shown. Fig. 2 is the exact pattern required for either of the lower pipes. For the top pattern extend the lines A—B over to M—N in Fig. 3, and set off the same number of spaces as shown in the bottom of Fig. 1, and draw lines through these points as shown, at right angles to line M—N. As lines C—E and E—D are the same angle and the same length only half of this pattern will be necessary. Extend the lines from Nos. 1 to 5 which intersect lines C—E over to Fig. 3. No. 1 will intersect with lines Nos. 1 and 9 ; No. 2 will intersect with lines Nos. 2 and 8 ; No. 3 will intersect with lines No. 3 and 7 ; No. 4 will intersect with lines Nos. 4 and 6, and No. 5 will intersect with No. 5. Draw a line through these points as shown. This will give only half of the required pattern, the other h alf being exactly the same.

Hardware Letter Box

Patron Cook Stove.

Inquiry was made in this column last week, for the name of the manulacturers of Patron Cook Stoves. We are informed that Clare Bros. & Co., of Preston, Ont., make this stove.

Sewing Machines.

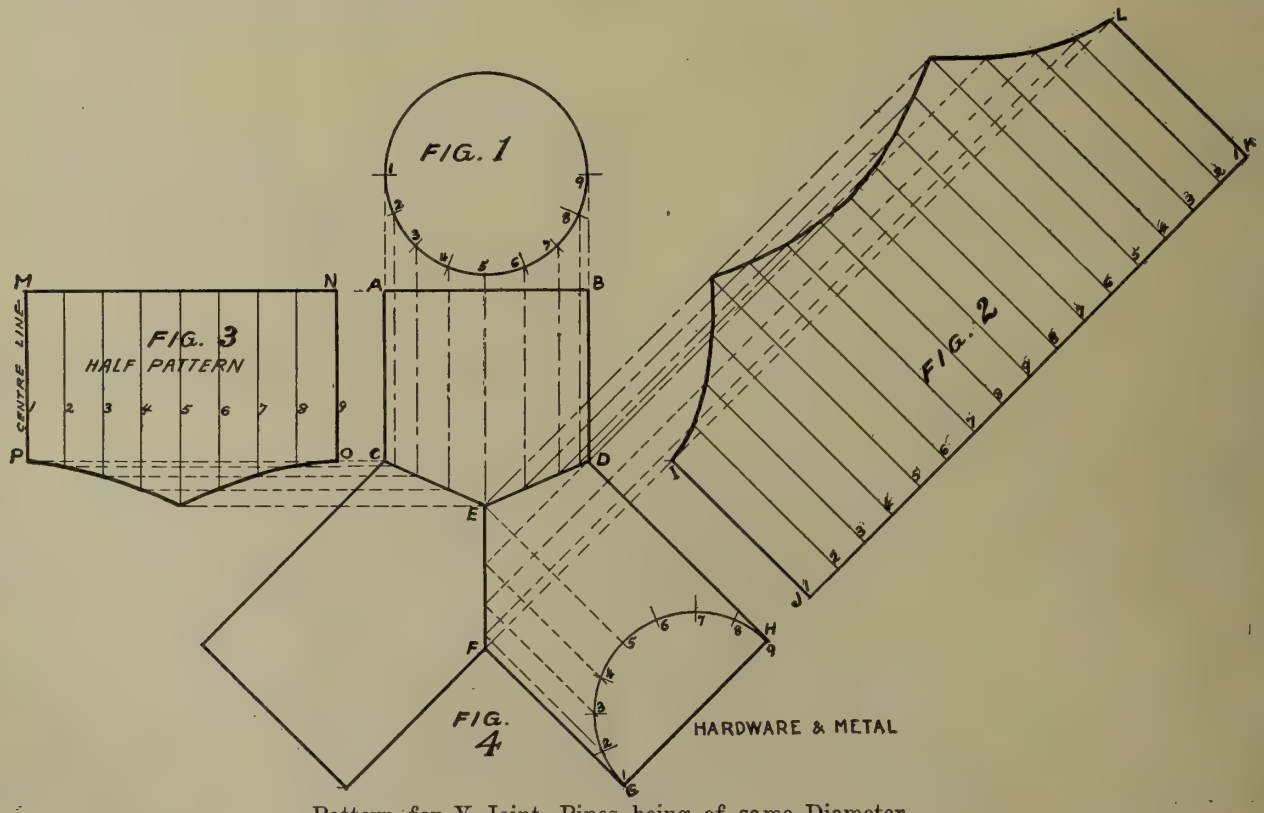
Pratt Hardware Co., Indian Head, Sask.—"Can you give me the name and address of the manufacturers of the 'Honeymoon' Drop Head Sewing Machine?"

Try Raymond Sewing Machine Co., Guelph.—Editor.

House Force Pump.

W. H. Rumball, Victoria Harbor.—"Can you inform us who manufactures a house force pump that screws on the side of the wall?"

R. McDougall Co., Galt, Ont., and F. E. Myers & Bro., Ashland, Ohio.—Editor.



TYPOGRAPHICAL ERROR CORRECTED.

In the advertisement of H. Nagle & Co., Montreal, in last week's issue, the price of a stand of cement was given as $2.00. This was a typographical error as the price is $2.50 per stand. Their advertising copy was correct, and the mistake is, therefore, entirely ours.

JAPANESE FANS GIVEN AS ADVERTISEMENT.

The Bissell Carpet Sweeper Co., of Grand Rapid, Mich., and Niagara Falls, Ont., are offering to supply the trade with well made Japanese fans for advertising purposes. The object in view, is to encourage buying during the hot season, and the firm undertake to supply fifty of these fans with each order of one dozen ball bearing sweepers, shipped between now and August 10th.

F. H. Scott, manufacturers' agent, Montreal representative of Maleham & Yeomans and Chesterman, sailed on Thursday night for Europe. While in England he will visit the head offices and factories of the two firms he represents.

Pattern for Y Joint, Pipes being of same Diameter.

Methods of Improving Refrigerator Sales

Dealers Should See to it That Their Stock is in Early—Sending out Circulars Has Been Found a Valuable Plan—Advertising and Window Displays.

The aggressive retailer always strives to forestall the seasons. If his stock is in before the demand starts for a seasonable article, the dealer will reap full benefit. If he is caught napping by early customers, however, he not only loses sales, but the good opinion that had formerly been entertained for him by those customers.

During the past week, wholesale houses have been worried considerably by the multitude of orders sent in for refrigerators. Retail dealers, who had neglected to order and had consequently been caught with not a refrigerator in stock when the thermometer suddenly rose to a mid-summer level and customers began to drop in, were importuning the wholesalers by special delivery letter, telegram and telephone to rush on consignments without a moment's delay. The writer paid a visit to one of the Toronto supply houses on Tuesday and, during the few minutes he was there, two long distance phone messages were received ftom nearby points soliciting a shipment of refrigerators on the following day.

The wisdom of preparedness in this respect cannot be too forcibly voiced. As a general rule, the demand for refrigerators starts simultaneously with the arrival of the first real hot day. People do not buy usually until they suddenly find a scorching sun overhead and discover that their food supplies are spoiling in the kitchen. Then they hurry out to the hardware store. If, through procrastination or forgetfulness, the proprietor of the store has not yet put in his spring stock, he loses a valuable sale, for the customer feels that a refrigerator is needed that very day and will not wait for Mr. Behindhand's stock to arrive. To avoid any more losses, the dealer then goes to the telephone and gets his jobber over the wire with a request for an immediate shipment.

The number of rush orders received during the past week at all jobbing houses would seem to indicate that a great many dealers had been taken unawares by the sudden turn of the weather. Doubtless, however, the experience will prove a valuable one.

Handling Refrigerators.

The refrigerator trade is in every respect desirable. It is an article, which is needed in all homes and it carries a good profit. While almost as bulky as the stove to store and display, it is not as hard to sell; that is, the salesman does not require to have so complete a knowledge of the article. There is not a great deal to explain about a refrigerator and it does not, therefore, require as much time and study as stove salesmanship.

In other respects the refrigerator requires attention quite as much as the stove stock. A certain amount of advertising is not only desirable but necessary. The stock should be kept well to the front at seasonable times. Window displays will help along the good work very considerably.

Refrigerator Windows.

At first glance there does not seem to be much scope here in the matter of window display. The refrigerator, it must be confessed, does not lend itself readily to this form of advertising. The window dresser, particularly if cramped for space, finds it difficult to evolve anything novel or more than ordinarily attractive when a refrigerator is to form the central part of his display. Some have succeeded admirably, however, in arranging unique windows.

The writer recalls one case where a good effect was secured by the utilization of imitation snow. The window was of unusual size and no less than three refrigerators were shown, two being large. The background had been arranged to represent arctic scenery. No less than three cut out scenes were used, pretty much after the manner of stage scenery, thus giving the effect of distance. On the last screen was a fairly good representation of the aurora borealis. The floor was strewn with imitation snow. The doors of the refrigerators were left open, showing an array of tempting viands. Cakes of real ice were shown in the refrigerators.

This window display had exactly the effect desired. Spectators out on the hot pavement mopped their brows and gazed on this scene of delightful coolness with envious eyes. To them it seemed to represent the very acme of comfort. Likewise, it showed just how valuable the refrigerator was in the household during the warm weather.

This idea could be carried out on a less elaborate scale and with probably equal effect, by covering the floor and background with an imitation of snow.

Planning Out Campaign.

Early in the season, the retailer should plan out a campaign for getting after the refrigerator trade. The first step to take is to order early. It is highly necessary that the stock be in the store before the rays of old Sol begin to show summer intensity.

The second step is to plan out some method of advertising. Many dealers adopt the circular idea. They print letters, calling attention to the fact that during hot weather a refrigerator is a household necessity and, after the first real warm day, they send them out. It is a wise plan to address each circular to the lady of the house. It reaches her hands on the afternoon mail, probably, right in the midst of her efforts to keep the provisions in the house from spoiling.

The letter could be worded something after this fashion.

Dear Madam,—

We have just received a stock of refrigerators of a highly improved pattern. They have been built with an eye to space economy and are of such size that they can be conveniently placed even in the smallest kitchens. At the same time, the interior arrangements are so perfect that there is plenty of room for the storage of all kinds of provisions and in unlimited quantity. The price is an unusually low one for an article of this description.

We would like you to look over our stock and would be glad to have you call at our store at any time. Our clerks will be pleased to show you the——refrigerator, which is undoubtedly the best on the market in its particular line.

Yours, etc.

Refrigerator demonstrations are frequently carried out with a splendid measure of success. In such cases, letters of invitation are sent out and a small souvenir, or something to eat, is handed to all who attend.

BUILDING LARGE FACTORY.

The Dominion Roofing Co. have acquired a site on the Lake Shore road near Mimico, a few miles, out of Toronto, and will begin work at once on the construction of a large factory building. The structure will be 250 by 120 feet, one storey in height, and it is expected that it will be completed and the plant in full operation by next spring. The output of the company will be largely increased.

SHEET METAL BUILDING GOODS.

The Metal Shingle & Siding Co., of Preston and Montreal, have issued a valuable trade catalogue dealing with their complete line of sheet metal building goods. New cuts have been prepared which permitted the use of a standard size book, and it may be kept conveniently in any bookshelf. The first part of the book is devoted to steel ceilings, and the remainder to exterior sheet metal building goods, such as shingles, sidings and corrugated sheets. The catalogue is copiously illustrated, has a most attractive cover, and is printed on heavy coated paper. It will be of great assistance to the dealer who sells sheet metal building goods from catalogue.

FURTHER IMPROVEMENT IN U. S.

Cleveland, O., May 25. — The Iron Trade Review to-day says: "Interest in the iron market is centered in the heavier shipments of rails and track supplies to the railroads; the fact that farming implement manufacturers are quietly negotiating for their steel bar requirements for the year beginning July 1, and the more general buying of heavy melting steel at higher prices. In some instances, railroads, which on April 1 ordered shipments of rails and track supplies suspended, are again accepting shipments. Another encouraging feature is that orders for steel ties this month have been heavy, the leading interest having booked orders for several thousand tons. There has been a still further improvement in sentiment, and, while manufacturers do not expect heavy buying at this season of the year, a moderate gain in bookings during the next several months is looked for. Orders for pipe placed during the week include 27 miles of steel pipe for shipment to Ashland, O., and 30 miles of steel pipe for delivery in Oklahoma. Upward of 15,000 tons of heavy melting steel has been sold at $13, delivered, an advance of 50 cents a ton. A large portion of this tonnage has been taken by consumers having large stocks on hand. Malleable pig iron has been sold at the low price of $13.35, valley. Shipments of tin plate are slightly heavier than last month.

Small Goods Counter Brings Splendid Results

How Some Stores Have Made a Success of New Department—Stanley Mills & Co., Hamilton, Estimate That Half Their Customers are Women Shoppers—Policy of Store Has Been Shaped to Encourage This Trade—Idea is Worth Trying.

The advance of the novelty counter in public favor has been very rapid of late years. In a good percentage of hardware stores nowadays, 5, 10 and 15 cent departments can be found where, but a few years ago, it would have taken a long time to find one so equipped. The truth of the matter is that the plan has been found a good paying one wherever tried and it has, accordingly, found high favor.

One of the first hardware firms to adopt this plan was Stanley Mills & Co., Hamilton, Ont. It was found eminently successful, and now a large part of the ground floor is given over to this class of goods. Long counters run the length of the store. They are divided into compartments and each section contains goods of one price, seldom exceeding 15 cents.

"We have found that this method of display leads to heavy sales," declared Mr. Flintcroft, who has charge of the hardware store. "The goods are thus shown in the most conspicuous manner possible. The large assortment and the low price jointly compel attention. People will glance along the counter and find things there that they need but would probably not have thought of buying. One of the first things in salesmanship is the art of suggestion. Well this method suggests ideas to the customer more thoroughly than any salesman could do."

In a large store like that of Stanley Mills & Co., there are bound to be customers wating their turn more or less continuously. They will almost invariably be found inspecting the contents of the small goods counters. The chances are all in favor of their finding something that they need in the interval.

"I have seen customers without number," declares Mr. Flintcroft, "come in with the intention of buying some one article—a pint of paint, say. They look over our display of small articles and see something they want. They keep on looking and end up by buying probably forty or fifty cents worth. This is a regular occurence.

"The buyers who patronize this department are largely ladies. This is due to the fact that the goods sold in that way are, for the most part, household articles. I believe that the department in question has had considerable to do with the steady increase of trade with women buyers, which has marked the progress of our business.

Capturing Trade of Ladies.

By way of digression, it may be remarked that the Stanley Mills Co. estimate that fifty per cent. of their customers are women. This is truly a remarkable showing. It is doubtful, very doubtful, if the typical hardware store of a decade or so ago could claim more than ten per cent. Women did not care to enter the dingy, ponderously stocked stores of those days and left the hardware shopping to the men. The introduction of plate glass windows, metallic ceilings and "silent salesmen," has been gradually changing this but few hardware stores are doing yet anything like the trade they should have with lady shoppers. It is worth while considering, then, how Stanley Mills & Co. managed to bring about this seeming miracle.

The policy of the store for years past has been shaped in that direction. In the first place an effort is made to keep the store neat and inviting always. This is a prime essential, for ladies do not care to shop in a store which presents an untidy appearance. Prompt and courteous service is given. The clerks strive to please the lady customer in every way and invite her to return. Attention is paid to complaints, and the advertisements are planned very largely with an eye to the female reader. In fact, in every ad., in every circular sent out, there is some note especially for the attention of the ladies.

The results have been far reaching. Women shoppers have acquired the habit of visiting the Stanley Mills store and have taken there a good share of the trade which so often drifts elsewhere in household goods, kitchen utensils, cutlery, etc.

In a Smaller Store.

To return to the original topic. The small-goods counter is found to be a success in a large retail business; how about the smaller store?

Recently the writer visited the establishment of Howie & Feely at Brantford. Near the front of the store was a large table loaded with goods of a miscellaneous character. The table was divided into sections and a price tag over each section showed that a common price was asked for everything shown.

"That is a regular clearing house for odds and ends of stock," explained Mr. Howie. "When we find that we have on hand certain small articles which have been in stock too long, we put them up there and mark up the price. They are soon sold. The contents of the table are changing almost daily.

"For instance, look at those saucepans. We had about a dozen of them on hand and were beginning to think people had stopped calling for saucepans. We put them out there yesterday and now there are only four left. It is the same with everything we display in that way. Sales come quickly and without any solicitation."

For Kitchen Showers.

The method is found particularly useful at the present time. Kitchen showers are much in demand at this season and there is, consequently, a steady call for the many small articles needed in the kitchen.

"But," some dealers will urge, "we haven't got the room."

Then make room. It should always be possible to find the means to carry out a measure which spells profit. And then, when you come to figure it out, not a great deal of room is needed. Some stores use a table for the purpose, about ten by four feet, sometimes even smaller. It is advisable, of course, to devote more space to the purpose, if at all possible but it is surprising what a large assortment of goods can be shown, even in so small a space.

The place commonly adopted for the novelty table or counter is the centre of the store. Here it cannot be overlooked. Every customer sees the goods no matter how short his or her visit may be.

The department will "run itself" to a certain extent. The staff of the store can do much, however, to help along sales.

"Is there anything else?" the salesman asks. "We have a few bargains over there on our specialty counter today. Perhaps there is something you would like."

A brief word in this way to each customer helps to make the department a big success.

METAL COMPANY EXPANDING.

The Canada Metal Co., of Toronto, have now moved into their new premises on Fraser Ave., which have been built upon the old baseball grounds. Their new factory will afford much better facilities than their old location on William St., being much larger and having the advantage of railway sidings. They are using an automobile for their city deliveries.

WOULD NOT MISS AT DOUBLE PRICE.

Lemberg, Sask., May 15, 1911.

MacLean Publishing Co.,
Toronto.

Gentlemen, — Kindly find enclosed cheque for Hardware and Metal, which we would not miss for double its price per year.

Yours truly,
J. Landreth, Jr.

Our Page for Hardware Clerks

Intensive Selling

Getting All There is Out of a Given Territory — Try to Sell More to Each Customer—An Application of Modern Agricultural Methods to Hardware Salesmanship.

The farm is the mainstay of our country. But there are various kinds of farms, and various kinds of farming. There's farming—also, there's intensive farming.

In the old days, if a farmer wished to make more money, he bought extra land and put in additional crops.

Nowadays, when a farmer wishes to make more money, he pays closer attention to the land he has, and raises a larger crop, and a better quality of stuff from the same area.

The first sort of farming is extensive; the second is intensive.

Selling is just the same. There are salesmen who go on the time-worn and shop-worn assumption that there are just so many customers, and that they will purchase just such-and-such a quantity of goods. If a merchant is to make more money, there is only one way—by the addition of new customers.

And there are other merchants—and these are the kind that succeed—who aim, not merely to increase the number of customers, but to sell more to each individual.

With these last there is more to the selling of an article than just handing it over and ringing up the amount received.

Here comes a customer who wants a pane of glass. He desires a particular size.

"Single glass or double glass?" enquires the intensive salesman. He proceeds to point out that the difference in cost for that particular size—the difference between 35 cents and 60 cents—is more than made up by the difference in durability and the better light furnished. The argument suggests to the customer's mind new possibilities. He may still buy single glass; but the way is paved for the sale of double glass in the future, and the buyer, in this slight degree, is educated on the subject of quality.

"How much putty would you like?" is a question which reminds the customer of an item which six buyers out of ten forget. Putty is cheap—all the more reason then, why every buyer of a pane of glass should buy also a few cents worth of putty.

"And," adds the salesman, "have you a supply of glazier's points?"

Here the customer scratches his head. He doesn't know what glazier's pionts are till you show them. Then he remembers what a deuce of a time he had putting in the last pane of glass, and how the wind later whisked it out, putty and all.

Incidentally he remarks that he is busy, that he doesn't know when he'll find time to put in the pane. In fact, he adds, there are very likely half a dozen panes in the house badly cracked or broken, but which still manage to endure stuffed with rags.

"Why don't you let us do the work for you—and do all six while we're about it?" is the natural question for the intensive salesman to put.

The intensive farmer gets all he can out of his land. He does it by cultivating and fertilizing. The intensive salesman isn't satisfied with just the one sale which each customer brings. He uses that one sale as a foothold, from which to reach out for the additional sales to which it logically leads. The first sale is important chiefly for the prospect it gives of adding other sales, and the opportunity it affords for cultivating a customer, and, through the loophole of his present patronage, securing a strangle-hold upon his permanent goodwill.

GIVE QUALITY GOODS A CHANCE.

In a west-end Toronto hardware store, the other day, the writer witnessed an exhibition of salesmanship which showed the weakness of the clerk, and his inability to push quality goods.

A lady came into the store, and said she wished to buy a pair of scissors, and the clerk brought out two pairs of about the same size.

"These," he said, "are seventy-five cents, and those forty-five. The forty-five cent ones are just as good, but in the others, you pay for the name."

The lady looked at the seventy-five cent pair, and read out the name of a very well known and reputable manufacturer, which was stamped on the blade. Then she picked up the cheaper pair, and read the maker's name, that of an obscure manufacturer in the same city.

"Why these are both made at the same place? she exclaimed. "Don't you think it possible that the cheaper scissors are only seconds put out by the same firm? They are certainly not as well finished."

"Oh, no," replied the clerk, "they are made by different firms altogether, only the seventy-five cent pair are made by a firm with a great reputation, and you pay for the name. You try these others and you will find them all right."

The lady took the cheap scissors. In the face of the clerk's strong recommendation, and presuming that he knew what he was talking about, she could scarcely do otherwise. If the clerk had only given the higher grade scissors a fair chance, he would no doubt have been able to sell them, and, besides giving the customer better satisfaction, it would have brought the dealer more profit.

Why did not the clerk, in bringing out the two pairs of scissors, speak in this way:

"We carry these two grades in stock. This one is manufactured by one of the best known firms in the United States, and is of high quality. It sells for seventy-five cents. This other one is only forty-five cents and, of course, is not so well finished as the more expensive scissors. For the price, however, they are splendid scissors, and will give you good service."

A talk such as this, while certainly not pushing the quality line, would have given the customer an opportunity to choose for herself, whether she wanted a good or only a moderately good article.

Does this instance give any clue as to why so many Canadian dealers say: "I cannot sell high priced goods here. My trade demand the cheaper grades."

APPEARANCES SOMETIMES DECEIVE.

Unfailing courtesy is one of the most valuable assets of the successful hardware clerk; and it must be unfailing, in order to be effective as a means of gaining success.

Sometimes an unkempt looking person comes into the store, and there is an evident disposition on the part of the clerks to find themselves very busy about little nothings in the back part of the store. Or perhaps it is someone who has the reputation of being a "regular grouch." The clerks do not want to wait on him, for it is not exactly a pleasant occupation.

However, one goes forward with his accustomed smile and speaks courteously to the customer. He shows him a good line of the articles of which he is in need and, whether he makes a sale or not, does his duty and shows his fitness for his position and for future advancement.

It very often happens that the roughest looking persons prove to be the best customers and, when settling for their purchases, pull out a roll of bills that would be the envy of many better dressed visitors to the store. The writer has seen this exemplified many times, and it is the clerk who can be courteous and attentive at all times, who has the satisfaction of making big sales at times to most unpromising looking prospects. Courtesy is something which does not cost the clerk any money but which bring him ample rewards.

News and Methods of Canadian Hardwaremen

Opportunities Presented by Vacuum Cleaner Clubs—Effective Window Displays in Chatham—The Cash System Spreading.

FISHING TACKLE TO THE FORE.

St. John, N.B.—The demand for fishing tackle, baskets, etc., has been quite encouraging, and the window displays in many of the local hardware stores during the past week have been made very attractive by tempting showings of the latest fishermen's and sportsmen's equipment. The latter part of last week in particular, the local store windows of the hardware dealers had many different lines of sporting goods displayed, because of the fact that on the holiday, Victoria Day, hundreds of the followers of Isaak Walton would seek the woodland streams to indulge in their favorite pastime.

One of the merchants featured in his window the handiness of having a fully equipped basket, and he had several of different sizes and designs displayed to advantage, while not overlooking the need of showing fishing rods, and lines as well. Baskets with various apartments for storing dishes, food, cooking utensils, and the result of the catch, were widely shown, and the usefulness of themselves and their contents was at once apparent.

STARTING ON CASH BASIS.

Emerson, Man.—Charles Whitman has bought out the stock of the Hamilton Hardware Co., and has started in business. He has added very considerably to the old stock and is carrying a number of new lines.

Fred Linton has been placed in charge and it has been decided to conduct the business on a cash basis. In his opening announcement Mr. Whitman says: "Believing it to be in the best interests of all concerned, I have decided to do a strictly cash business—pay cash and sell for cash."

Mr. Whitman believes that this is the only way to conduct a retail business with the greatest measure of success and intends to rigidly carry out the cash principle. His intention, according to his advertisements, is to sell at a smaller margin of profit but to have the cash down on every purchase which he believes is better than getting a larger margin but having to wait for the money.

SOME SEASONABLE WINDOWS.

Chatham, Ont.—The possession of three separate windows enables Stephens & Douglas to make three simultaneous displays. The policy of featuring timely lines of goods in the window displays is adopted by this firm. Three very timely displays are being given this week. The large window is devoted to a "hot weather" display, very appealing in view of the prevailing high temperature. A refrigerator is shown in the background, together with small oil stoves, fireless cookers, screen doors and similar hot weather lines. Ice cream freezers of various devices are given prominence in the foreground. A sporting goods display is shown in a smaller window, baseball gloves, bats, balls and masks being among the articles shown, while the back of the window is curtained off with hammocks. In the small side window there is a grass-cutting display, the back and sides of the window being hung with coils of hose. Lawn mowers, with and without baskets, grass clippers, mower sharpeners, lawn sprinklers and other lawn appliances are arranged in the foreground. The idea of grouping a number of different articles together according to the use to which they are put is carried out in all three displays.

The Willard Hardware Co. has an automobile on display this week—that is, a hardware automobile. The wheels are constructed of hose and hose reels, poles being used for axles. The frame is a step-ladder, while the front box is formed of screens, lighted by large and small lanterns, the steering wheel is from an express waggon, and a bread box constitute the seat. Shade is provided by a huge white umbrella. The moral is embodied on a sign card: "You auto come here first and then you won't have to runabout elsewhere for your hardware."

The Chatham Malleable Steel and Iron Co. will shortly commence the construction of a new factory 100 x 40 feet, and two storeys high, in the new factory district in the southwestern part of the city, Moore & Stephens have the contract for the factory, which is to be completed by July 1.

VACUUM CLEANER CLUBS.

Parkhill.—Vacuum cleaner clubs have been formed in connection with the Women's Institute of Parkhill. Each member pays $1, and has the use of the cleaner once a month as long as the cleaner lasts. Three clubs have now been formed in the town, which has been divided into three sections so that the members of each club may be as near together as possible. Each member is required to make her "dates" with the woman in charge of the club.

This idea opens up a new line of thought for the live hardwareman. There are, no doubt, a good many housekeepers who recognize the advantage of vacuum cleaners, but whose means will not permit their owning one themselves. If five or six of these people could club together for the purchase of a vacuum cleaner, the cost would not fall very heavily on any one of them, and yet they would be able to have frequent use of the cleaner.

In a club where the members contribute only one dollar each, as at Parkhill, too many people would be interested in the one cleaner, and it would not only be hard on the cleaner, but also unsatisfactory to the members whose use of the machine would be very limited.

The dealer who organizes a few of these vacuum cleaner clubs and sells them the cleaners, will find himself well repaid for his efforts. There are possibilities in every town or village, for the working out of this idea.

HELD GRAND SPRING OPENING.

Seaforth, Ont.—A Hardware and Metal representative, who recently visited this town, was interested in hearing of a grand spring opening held by McIntyre & Edge on Friday and Saturday, April 28th and 29th. This firm are successors to the old firm of Reid & Wilson, and have had excellent experience, Mr. McIntyre having spent twenty-five years with some of the largest retail and wholesale hardware firms in Ontario, while Mr. Edge spent a similar period in general contracting.

The occasion of the grand opening, was the completion of extensive alterations and improvements in their store, which were undertaken with a view to permitting customers to see at once, the goods they required, and to select quickly.

To boom the opening, large circulars, 34x12 inches in size, were circulated, containing prices on one hundred hardware articles. It was announced on the circular, that, with every purchase of one dollar, a pound tin of axle grease would be given free, and, with every purchase of three dollars, a pail of axle grease was the premium. This offer made a direct appeal to the farmer, and proved very successful.

DECLINE OF GAS STOVE SALES IN LONDON.

London.—A report in one of the London papers the other day of the firemen being called out twice within twenty-four hours on account of gasoline stove explosions, brings to light the fact that the sale of these stoves has almost reached the vanishing point. Only one dealer in the city, it is said, now stocks them at all. Oil stoves are most popular for summer use, especially with cottagers, and in the city where gas connection is obtainable, the gas stoves have sway. With the expected advent of natural gas, the outcome may be accurately estimated.

RUNS SUMMER HOTEL.

Charles C. Lee, hardwareman, plumber and steamfitter, of Goderich, is also proprietor of the Hotel Sunset, a summer outing house with one hundred rooms. M. Craigie, the head clerk in the store is also head clerk at the hotel during the summer months and the two establishments are run under the same management.

A "COMPARISON BOOK."

Hamilton, Ont.—Stanley Mills & Co. use a "comparison book" which they find extremely useful. It is used to enter the amount of business done each day together with the state of the weather. The records are kept for reference and it is thus possible to find out how the business done each day compares with the record for the same day of the preceding year. The report on the weather is very necessary as it explains many things which would otherwise be hard to understand. For instance, if a Saturday in February 1910. showed a remarkable falling off, it would be hard to understand but if, in the next column, the words "severe snowstorm" appeared, the shortage would be explained.

HARDWARE TRADE GOSSIP

Ontario.

A varnish demonstration was held in D. Mistele's store, Rodney.

W. T. Cotter, of the Fort William Hardware Co., is on a visit to Kenora.

C. W. Gaetz, of Leduc, Alta., has engaged Wm. McGregor, of Ottawa, as a tinsmith.

The Guelph Stove Co. are planning an addition to their plant, to be erected this year.

Vantuyl & Fairbank, Petrolea, held a varnish demonstration last week, which was largely attended.

Gil. Julien, 51 Sweetland Ave., Ottawa, has retired from business, having sold out to Ernest Glande.

Wm. Challenger, president of the Challenger Athletic Goods Co., died at his home, Toronto, on Saturday last.

Major Milton Adams, of Adams & Vandusen, Picton, was in Toronto attending the Grand Lodge of the Maccabees.

David Traill, hardware merchant, Walkerton, has been appointed president of the Bruce county hospital board, to succeed the late Alex. Shaw, K.C.

W. Gordon Madge, formerly clerk in F. A. Campbell's hardware store, Mitchell, and recently employed in Kirkton, has accepted a position in Rosetown, Sask., as clerk and bookkeeper.

The football team of the Standard Valve and Fitting Co., Guelph, defeated the Taylor-Forbes eleven by one goal to nought. Both teams are entered in the Guelph Football Association.

George Leroy, for several years clerk in Johnston & McKenzie's hardware store, Picton, has gone to Harrow, Essex County, where he has accepted a position in a general hardware establishment. He will remove his family from Picton in a month or two.

Thos. Birkett, of Thos. Birkett & Son, Ottawa, denies that the firm would be included in the proposed merger. To a newspaper representative, he stated that all he knew of the matter was what he had seen in the newspapers. His firm had not been asked to join the merger.

Allan Scheifele, formerly of Bechetls, Ltd., has accepted a position on the staff of M. Weichel & Son, Waterloo.

The Imperial Manufacturing Co., of Warren, Pa., have purchased a site at Welland, and will erect a factory for the manufacture of saddlery hardware and different kinds of specialties in small hardware lines. The building will be two storeys in height, with dimensions of 60 by 52 feet.

Quebec.

A stranger entered the store of J. B. Miller, Montreal, and asked the price of a gun in the window. Mr. Miller gave the price as $14 but the stranger offered him a quarter for it and then pulled out a revolver and threatened to riddle the dealer with bullets. He was arrested.

Western Provinces.

W. L. Thomas is opening a hardware store at Silton, Sask.

Henry James has started a hardware business at Silton, Sask.

The Manitoba Sheet Metal Works have commenced operations in Winnipeg.

John McArthur & Co., tinsmiths, have started in business at Edmonton.

M. McLean has started a hardware and implement business at Simpson, Sask.

Wilson Bros., Penhold, Alta., have sold their hardware business to Stewart Bros.

McCulloch Bros., dealers in hardware and implements at Beiseker, Alta., have sold out.

The H. G. Goodeve Hardware Co., Coleman, Alta., are moving into their new quarters.

Geo. H. McDonald, Strassburg, Sask., has sold his hardware and implement business to Rodger Bros.

S. M. McKinley, hardware dealer and plumber, Ninga, Man., has sold his business to A. F. Johnston.

The merchants of Duncan, B.C., will close at one o'clock on Thursdays through the summer months.

Mr. Colback, late of Virden, Man., has accepted a position with the Midale Hardware Co., Midale, Sask.

It is stated that the new brick and steel warehouse of the Wood, Vallance & Leggat Co., Vancouver, will cost $300,000.

The by-laws concerning the location of the Alberta Foundry & Machine Company, Glass Works, ($80,000), Gordon Wire & Nail Works, $40,000, and Preston Planing Mills will be submitted on May 26 to the ratepayers of Moose Jaw.

The Winnipeg Ceiling and Roofing Co., have completed a large new factory at St. Boniface, Man. Five acres of land have been roped in for the accommodation of working plant and storage, and a set of buildings of the most modern type have been erected. These are of brick and stone upon concrete foundation, with slow-burning metal protected interior.

Maritime Provinces.

Ernest Dryden, of Sussex, has taken a position in Jas. S. Neill's hardware store, Fredericton, N.B.

NEW OFFICERS APPOINTED.

A reorganization of the Pease Heating Co., Toronto, has been effected whereby F. J. McKinnon becomes president. J. L. Ross remains as vice-president and treasurer. R. B. McKinnon becomes secretary and salesmanager, vice J. N. Bell, who has gone to Winnipeg as manager of the Pease-Waldon Co. The change may result in an enlargement of the operations of the company ultimately but no immediate changes will result.

DUSTLESS ASH SIFTERS.

An ingenious device for sifting coal ashes, which is manufactured by the Grier & Dail Manufacturing Co., of Lansing, Mich., is described in a booklet which they have just issued. The first page is devoted to an article reprinted from The Saturday Evening Post entitled "The Waste of Anthracite," which gives some startling facts about the amount of coal wasted through not sifting the ashes. The construction and operation of the Lansing Dustless Ash Sifter are fully illustrated in the booklet.

WARNING TO SUBSCRIBERS.

While W. Keppel White, who was arrested on the Island of Grand Manan, in the Bay of Fundy, for collecting monies on behalf of the MacLean Publishing Co. without authority and who broke jail, is now in the United States, it is not improbable that he may return, and attempt to continue his operations, at a later date. It will be remembered that this was not his first offence. Nine months ago he was let off on suspended sentence at Sydney, N.S., for a similar offence, and almost immediately began operations again.

He is described as of light complexion, five feet six inches in height, and weighing about one hundred and fifty pounds. He is clean shaven, and, when in Grand Manan, wore a light rain coat and stiff hat.

DESTROYED BY FIRE.

Lanark, Ont.—At an early hour on Saturday morning, a fire was discovered in the tinshop of Taylor Bros. Before the flames could be overcome the tinshop and storehouse, with the entire contents were destroyed. Damage was also done to adjoining property. The loss on the building, which was owned by J. D. McNab is placed at $1,000 and on the stock at $4,000 with $2,000 insurance.

The origin of the fire is a mystery.

A GROUP OF STOVE SALESMEN.

Gurney Foundry Co.'s Eastern Sales Force Assembled in Convention at the Firm's Headquarters in Toronto.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 54.

MARKETS IN BRIEF.

Toronto.

Tin—Advanced 1 cent. All metals firmer.

Turpentine—Down 8 cents.

Montreal.

Tin—Advanced to 47 cents.

Turpentine—Down 9 cents.

MONTREAL.

Montreal, May 26.—The metal markets have been rather interesting during the past week, tin contributing most of the feature movements. The price in the London market advanced to the £200 mark to all purposes reaching the high figure attained during the winter. The domestic followed up the scale in sympathy with the primary market, and reached 47c. The market has been unsettled under this recent movement and a break is expected. Pig iron has been rather quiet, the only interesting item being a little flurry in English quotations for Middlesboro' brands. This is taken more as a speculative movement than a regular market advance.

Pig Iron.—Practically a waiting game is being played in regard to pig iron. Canadian furnaces are working away, but it is a question how much of their output reaches the market. One authority remarked that the tendency is not to sell at present prices as there is no profit in business on the present basis. The iron is being piled in the yards rather than sold now and is being held until a better feeling prevails. Of course there is business going on but the furnace owners are not attracted by present prices. In the United States there is a prevalent quietness and only those that are favorably located are willing to sell at present prices. The consumption of iron is good and Canadian foundries are considered to be doing as well as at any previous time. One of the steel casting companies is making enquiries for 5,000 tons of pig iron to be delivered throughout the season of navigation. Iron is coming steadily from across the Atlantic for delivery within the Montreal district but not beyond its confines, with prices at the present level. Middleboro' brands of iron have gone up a shilling of late but the movement is regarded as speculative. Prices on dock Montreal are: No. 1 Summerlee, $20; select Summerlee, $19.50; soft Summerlee, $19; No. 3 Cleveland and Clarence, $16.50 to $17.

Tin.—This market is regarded as erratic by the local trade and until the 26th was considered to be very unsettled. It was next to impossible to quote prices with any feeling of confidence and in any event they were looked upon as merely temporary. The primary market reached the high figure of £200 under the manipulation of the syndicate and evidences are not wanting to show a corner in tin. Local quotations advanced to 47 cents, showing an increase over last week's advance.

Copper.—The market has shown a stronger tendency of late but locally the situation does not point to any appreciable change. Demand is steady and the local price is unchanged. The feeling shows some improvement over last week.

Other Metals.—Lead and spelter are steady with a fair demand but without any special feature to the market. The latter market is firmer in tone but in actual change there is no material difference.

Scrap Material.—Heavy lead is in good demand just now and enquiry shows considerable improvement. There is generally a better feeling with quite a lot of business passing. Local quotations are: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $12.50; malleable, No. 1, $9; miscellaneous steel, $5; stove plates, $12.50.

TORONTO.

Toronto, May 26, 1911.—The feature of this week's metal market is the stronger position of tin. The English syndicate who have dominated the situation for some time past are said to have the visible supply cornered until the end of June, at least, and they have deemed the time opportune for the advance in price which they would no doubt have forced several weeks ago had consumption been at all large.

Latest advices from the Old Country are to the effect that tin has advanced £6 per ton, as a result of which local metal merchants have raised quotations 1 cent per pound.

The primary metal markets all show greater strength this week. The commercial situation generally is clearing and the buying which has been withheld for so long is expected to materialize in the very near future. Jobbers here are quite hopeful regarding business for the last half of the year. This is largely due to the fact that, with the Standard Oil case out of the way, business in the United States is picking up, and Canadian business may not longer be threatened by the stagnation across the line, which has clouded the situation here of late.

Tin—This metal is now on the upward move. The English syndicate, having cornered the supply for the whole of June, have deemed themselves strong enough to manipulate a "squeeze." Local prices are now 46 to 47 cents per pound.

Antimony—The same stagnation exists as has been noted from week to week. There is nothing doing locally, but prices are held at the same figures as have been quoted for some time past.

Copper—There is a good volume of business passing and prices are firm. No change is reported from last week's quotations.

Aluminum—A very satisfactory demand is maintained and brisker business is expected to eventuate before long. The price quoted here is still 20c per pound.

Plates and Sheets—The situation is substantially the same as last week. Sellers are looking forward to contracts for the last half of the year being placed very soon, and are consequently watching the market closely. The slight improvement noticed in the United States iron and steel trade lend some color to the opinion that prices will not be lowered to any extent for the last half of the year.

Pig Iron—The foundries in this district are all exceedingly busy, and an improved tone is noticed in the pig iron situation. The better grades of pig have been in good demand, and indications point to a large consumption of foundry grades during the balance of the year. Prices remain as follows: Canadian Foundry No. 1 is $19 and No. 2, 50 cents a ton less. Old country iron is quoted at $19.50 for Middlesboro' No. 3; and $20.25 for Clarence No. 3; Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

Lead.—Deliveries of domestic lead are being held up on account of the trouble experienced at the Trail smelter, in procuring supplies of coke. However, there is plenty of English lead available. Primary markets are stronger, and local quotations are quite firm at last week's figures.

Spelter—Transactions are fairly large. With foreign quotations stiffening, prices here are firmly held. No change is reported.

Old Materials—Business is showing much improvement since the advent of real summer weather. Prices remain as follows: Heavy copper and wire, 10½c to 11c; heavy red brass, 7½c; heavy lead, $2.90; light copper and bottoms, 9¾c; tea lead, $2.40; machinery cast iron, No. 1, $14; No. 1 wrought, $10; malleable No. 1, $8 to $10; miscellaneous steel, $6 to $7; stove plate, $12.50.

DEPENDING ON OTHERS.

It is well to remember that the successful man does not do all the work himself.

Most men who have succeeded, have been surrounded by able assistants. No dealer should be afraid of placing certain duties on his clerks for fear they will not be able to do it properly. Perhaps there are many things that they might do better than their employers.

If the merchant's advertising has not been up to the standard let him give some of his clerks a chance to write the copy. He might discover to his advantage to get them to suggest new ideas and to carry their ideas into use. If a dealer follows only his own ideas, he is apt to get into a rut.

HARDWARE MARKETS

MONTREAL.

Montreal, May 26.—The trade of late has been steady with an improvement noticeable in those departments in which there has been a slight falling off in business. The greatest activity probably centres around seasonable goods for which the demand has been extremely heavy since the warm wave set in. All kinds of lawn goods such as hose, sprinklers, lawn mowers and other accessories, together with ice cream freezers, refrigerators, hammocks, screen wire, etc., have been moving out well and in some cases "over work" was reported. The orders arrived with a rush and were for immediate shipment and naturally employes of the jobbing houses welcome additional work with the weather man establishing heat records. At any rate an impetus was given the demand for seasonable lines. Builders' hardware is moving out consistently, orders coming in freely from all parts of the country. Silverware has been prominent of late, suggesting the demand next month will bring.

Contractors' and Builders' Supplies.—From the orders that have been coming in to the local jobbing houses it is evident that a vast amount of contracting and general building work is now in progress. Orders for all tools used in building operations, hammers, shovels, pulleys, etc., are coming in rather freely and in construction work the present year should make a great showing. For the best quality of shovels and spades, the discount off is 60 and 2½ per cent.; for second quality the same discount is allowed, and for third quality the discount is 50 and 2½ per cent.; picks are quoted at from $3.85 to $5 a doz.; crowbars are listed at $3.25 a cwt.; wheelbarrows, navvy common, $21 and up; navvy full-bolted, $22.50; drag scrapers, $5.75 and upward.

Harvest Tools.—The demand from all parts of the country for harvest tools is brisk. The trade are apparently beginning early to stock up in preparation for the business in these lines that will soon be coming their way. Some quotations and discounts are: Hay forks, manure forks, straw forks, barley forks, spading forks, potato forks, field, garden hoes, Dutch weeding hoes, garden rakes, 50 and 5 p.c.; hay rakes, $1.15 to $2.75 a doz.; scythes, $6 to $8 a doz.; sickles, $1.85 to $2.25 a doz.; grass hooks, $1.65 to $2.10 a doz.; scythe snaths, 40 p.c. discount.

Lawn and Garden Tools.—Business in these lines is steady and assumes considerable proportions. The time for demand in this department will extend for quite a time yet, and retailers should not overlook their opportunity. Some prices quoted are: Lawn rakes, $3.75 to $5 a doz.; garden sets, 25c to $1.50 per set; border knives, $4.80 doz., net; garden trowels, 60c to $1.50 a doz.; garden shears, plain 8-in., 55c; with notch, 8-in., 60c; long-handle border shears, $1.15 each; long-handle surface shears, $1.05 each; lawn mowers, low wheels, 7 in. diameter 12 in. width, $2.55; 14 in., $2.65; 16 in., $2.75 each; medium wheels, 9 in. diameter 12 in. width, $3.30; 14 in. $3.55; 16 in. $3.80 each; high wheels, 12 in. width, $4.15; 14 in., $4.40; 16 in. $4.65; 18 in., $4.90 each; lawn rollers 20 in. diameter, from $13 to $18 each; garden wheelbarrows, small, $2.25; large, $3; garden spades, $6.25 a doz. upwards.

Wire.—There is a continued steady demand for wire. Prices remain unchanged. Enquiry is coming from all parts of the country. Some prices are as follows: Barbed wire, $2.35; plain twist, $2.55; galvanized wire base, $2.27½; coil fencing (9) $2.30; (12) $2.45; staples, bright, $2.60; galvanized, $2.85.

Spring Lines.—The local houses report a steady trade in general seasonable goods. There is a good demand for screen wire and for door and window screens. Hammocks, garden hose and other kindred lines are included in the average order. Business has shown improvement of late in this department. Discounts in garden hose range from 50 per cent. off to 70 and 10 and 10, according to quality. We quote hose clamp, ½ to ¾-in., 25c a dozen; hose couplings, ½ to ¾-in., $1 a dozen; hose sprinklers, ring patterns, $5.75 a doz.; revolving pattern, 12-in., $13 a doz; 24-in., $34 a doz., and 36-in., at $39 a doz.; hose nozzles, Gem, $3.50 a doz.; reels, 75c each and upwards; garden wheelbarrows, $27 a doz. The discount offered is 50 and 50 p.c.

Household Utensils. — Under this heading ice cream freezers are prominent from the fact that they are bringing many orders of late. Jobbers like to suggest that retailers should push this line just now. Washing machines are also going well. Household utensils of a general nature are all in fair demand. Some of the prices quoted are: Food choppers, from $9 to $15 a doz.; ice cream freezers, 1-qt. $1.50; 2-qt., $1.65; 3-qt., $2.05; 4-qt., $2.50; 6-qt., $3.15; 8-qt., $4; coffee percolators, $1.75 to $3.50; washing machines from $3.50 up; wringers, Royal Canadian, $47.75 per doz.; Universal, $37.75 per doz.; Safety, $56.25 less 20 per cent. per doz.; Mrs. Potts' irons, plain, 82½c per set; nickel-plated, 87½c per set; common sad irons, 4 to 7 lbs., $5 per cwt.

TORONTO.

Toronto, May 25.—There has been a steady increase in business during the past three weeks until, at the present time, the demand has reached a point where the jobbing houses find it difficult to meet the situation. The improvement, in fact, has been very marked and it is now estimated that all the lost ground has been regained with a little to spare. By the end of May, the record for 1910 will have been nicely outdistanced if the present pace is maintained.

The extremely warm weather of the past week has increased the demand very materially for certain lines and rush orders have been received in large number.

Prices have remained stationary, the general tone of the market being firm.

Seasonable Goods.—There is a vertible clamor for warm weather goods. Rush orders are being received for refrigerators and a large sale in all grades is reported. Screen doors are also moving out as they can be shipped. The evidences of activity on the part of old Sol and the advent of the fly have brought out large orders for mosquito netting, awnings, verandah shades and hammocks. There have been particularly large shippings of hammocks during the past week. Ice cream freezers are "selling like sixty"—to quote the enthusiastic opinion of one jobber. Lawn mowers are in heavy demand and the same can be said with reference to all such goods as garden hose, clamps, couplings, sprinklers, nozzles, rakes, watering cans, shears, spades, wheelbarrows, etc. Many of the orders are of the sorting up variety but quite a few merchants seem to be buying these goods for the first time this season.

Household Goods.—All articles used in the household are selling well. Demand for house cleaning and moving articles has fallen off considerably with the advance of the season but there is still some call. Tinware and graniteware sell briskly as at practically all seasons of the year. Vacuum cleaners continue to sell and it is apparent that there is an increasing demand from householders.

Builders' Hardware.—The improvement shown in the last month has become even more marked and the demand is now exceptionally large. Builders are already drawing regularly on the retail dealer for supplies as well as tools. Reports received from different sections of the country indicate that earlier reports as to the extent of the building operations were not exaggerated and that conditions will be fully as active as had been anticipated.

Heavy Hardware.—There is a steady call for heavy goods such as chain, tackle, pulleys, etc., for use on construction work. Barb wire is starting to move steadily as the farmers are now hard at work in the fields and there has been a heavy call for wire fencing. Nails, bolts, nuts, screws, etc., are all selling well. No price changes are noted. Present quotations are: Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7⅛.

Stoves and Heating Goods.—Business is confined pretty largely to gas stoves and oil stoves. The demand for gas ranges has been larger than ever this year and, now that the exodus is starting to the summer resorts, the call for oil stoves, which are used very largely in cottages, has been heavy. In fact, the manufacturers have found some difficulty in keeping up with the orders. Heating accessories, such as pots, pans, kettles, etc., have been moving briskly.

The Western Hardware Market Situation

Fall Lines Receiving Attention —Fine Weather and Good Crop Prospects Encourage Buying—Money Rather Tight and Collections Slow—No Price Changes But Paint and Oil Market Weaker.

Winnipeg, May 26.—The fine weather of the past week is resulting in heavy orders being placed with Winnipeg hardware jobbers. Crop prospects are splendid, at the present time, so that the situation is very satisfactory in almost every respect.

Western dealers are now ordering fall lines, and harvest tools are in specially good demand. The trade in builders' supplies is also heavy, showing that Western expansion is going on apace. Another evidence of growth in these provinces is the multitude of new hardware stores which are opening every week.

Some dissatisfaction is expressed regarding collections. The banks are holding money awaiting sure crop reports, and, although this is undoubtedly the safe method to pursue, it curtails the money in circulation, and, in a growing country, tightens collections.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.00; 2, $1.60; p.g. oak, $2.75.

Auger Bits—"Irwin" bits, 47½; other lines 75 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3; small lots, 2½; stove bolts 77½.

Bar Iron—Bar Iron, $2.50; Swedish iron, $4.75; sleight shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs. $8.50; Jessop, $15

Blocks—Steel, 45; wood 60 per cent.

Cut Nails.—$3.15 per keg base.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.50; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron.—Apollo, 16 gauge, $3.70; 18, $3.75; 20, $3.80; 22 and 24, $4; 26, $4.10; 28, $4.50; 30 gauge or 10¾ oz., $4.65; Queens Head, 20, $3.85; 24, $4.05; 26, $4.45; 28, $4.65.

Galvanized Iron Pipe.—⅜ in., $3.50; ½ in., $4; ¾ in., $5.20; 1 in., $7.00; 1¼ in., $10.25; 1½ in., $12.45; 2 in., $16.25.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2, and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel, No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $2.75; 6 $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $7.75; grass, $1.70.

Iron Washers — Full box, 40 p.c.; smaller lots, 35 p.c.

Iron Pipe, Black—⅛ in., $3; ¼ in., $2.45; ⅜ in., $2.50; ½ in., $3.25; ¾ in., $4; 1 in., $5.65; 1¼ in., $7.75; 1½ in., $9.25; 2 in., $12; 2½ in., $19.60; 3 in., $25.75; 3½ in., $33.50; 4 in., $38.35; 4½ in., $44.10; 5 in., $50.40; 6 in., $65.10; 7 in., $95.50; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.75.

Poultry netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.55.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8c; pure manila, 10¾c; British manila, 8¼c; lath yarn, 9¼c.

Sheet Zinc — Casks, $8.75; broken lots, $9.50.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $25 per cwt.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 65 per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate—I. C., $9.75; I. X., $11.75.

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25; ½ box, $5.50; I. X., full box, $12.25; ½ box, $6.50; I. X. X., full box, $14.25; ½ box, $7.50; 20 x 39, I. C., full box, $15.50; ½ box, $8.25; I. X., full box, $17.50; ½ box, $9.25.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 35.

Wire.—Barbed wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3; annealed wire, base, $3; oiled, 10c extra; bright iron $3.20 base; brass spring wire, base 29c; plain galvanized wire, Nos. 6, 7 and 8, $3.40; No. 9, $2.90; 10, $3.50; No. 11, $3.55; No. 12, $3.10; No. 13, $3.25; No. 14, $3.95.

Wire Nails—$2.90 Winnipeg, and $2.45 Fort William.

Wringers — Royal Canadian, $39.25; New Easy, $42.50.

Paints and Oils.

The market in paints and oils is very active and a large business is being done. Prices, however, are not so firm as last week, in some lines, and a decline in turpentine may be expected. In the meantime, we quote as follows:

Petroleum and Gasolene.—Silver Star, in bbls., per gal., 15c; Sunlight, 18c; Family Safety, 22½c.; Searchlight, 20½c; Red Rose, 23½c; Keystone Special, 18c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c.; White Rock, in bulk, 22½c; National Light, in bulk, 21c.; Engine Gasolene, 24c.; White Lily, 26c.; Royal, 24c.

Turpentine—In barrels, $1.05; small lots, $1.10.

BUSINESS GROWING IN INTERIOR OF B. C.

Vancouver, May 23.—A realization of the business done in the interior of British Columbia may be gained when it is known that during April the Wood-Vallance Hardware Company, of Nelson, B.C., brought to that city nine carloads of hardware material for distribution to points reached from that commercial centre. In March, this firm imported six carloads. The company has found it necessary to obtain additional warehousing room and purchased the Ashdown Hardware Company's building and track.

A recent visitor to this city was R. T. Crane, of Chicago, founder of the firm of Crane Company, which has a large store in Vancouver. He is over 79 years of age, and his business has 42 branches and 16 factories. While here he inspected the site where his company is to erect a $300,000 warehouse on Beatty street. J. E. McIlreevy, the local manager, looked after the party while they were Vancouver.

STRIKE HURTING BUSINESS.

Kingston.—The strike among the stone masons, the stonecutters and the masons' helpers is hurting the hardware trade somewhat, as everything is tied up in the building line, and of course there is not the same demand for tools and material. It is three weeks now since the strike started, and at the present time of writing there is no sign of a settlement, although a big effort was made this week to have the matter settled by arbitration. Three weeks of fine weather has been lost, and building operations have been tied up.

Your correspondent had something to say a couple of weeks ago about a record sale of bicycles. Dealers still report that sales are brisk.

Harvey Milne, a leading dealer, sold three wheels in five minutes the other day. This is certainly a record. The three customers had, of course, been looking over the wheels before, but it so happened that they all came about the same time to look them over again, whenthe sales were finally put through.

Methods of Retailing Paints and Varnishes

How Travelers Can Help the Dealer

Retailers Should be Kept in Touch with All the Latest Information with Reference to the Use of Paint—How Traveler Made Good Customer for a Retailer Dealer.

"The chief difficulty that most of my customers find in selling paint," declared a traveling salesman with a Canadian paint house, "is that they do not know enough about the subject. Customers ask questions about the application of paint that the dealer cannot answer. The customer probably makes some mistake in putting on the paint or varnish, that he buys, and gets poor satisfaction from it and he blames the dealer."

There is considerable truth in this. The dealer does not as a general rule know as much about the uses, and misuses, of paint as he should and customers, as a result, are not usually given much instruction when they make purchases. It is even true that in some stores a customer cannot get what he wants because the man waiting upon him has only a vague idea of the stock in the store and the uses of each brand.

Now here is where the traveling salesman comes in. He can do much to help the dealer in this matter. An instance came to the notice of the writer last week, which illustrated what a traveler can do to help. A demonstration of the use of a paint remover was being held in the store of P. H. Finkle, Queen street west, Toronto. During the second day of the demonstration a gentleman, residing in the neighborhood, dropped in for some floor paint. He told the dealer what he required, professing to be a little puzzled as to the way of applying the same. The traveler, having a half hour off, offered to accompany the man to his home and show him just what to do. He found the floors required special treatment, being rough in spots and full of knots. He went to some pains to explain just how the cracks should be filled, the knots bleached and the stain applied.

By so doing, he made a satisfied customer for the dealer and, consequently, for the brand of paint he was selling.

This form of assistance could not, of course, be converted into a regular practice by any means. The traveling salesman has plenty to do without running around explaining matters to the customers of the retail dealers. The incident is merely quoted to show that the traveler has it in his power to render valuable assistance to the dealer, if he cares to do so.

How it Can be Done.

Of course, the best method to pursue is to give the information to the dealer and his staff and thus place them in a position to hand it on to the customer. After making a sale, get the staff together and tell them what you can about each article on the order list. In the first place impress on them the importance of explaining such matters to each customer. The average customer has too much confidence in himself to ask for instructions in such a small matter (to his mind) as the application of paint. It therefore devolves on the salesman to throw out a few suggestions as to the way of thinning the paint, preparing the surface and applying the liquid. The customer will become interested, will realize that there are, after all, somethings that he should know and will feel highly grateful to the clerk.

Impress that point first, the necessity of volunteering information. Then proceed to tell the staff what they should in their turn tell the customers. It will take a few minutes only and it will almost certainly save much after trouble.

By doing this, the traveling man will be working in the best interests of the firm he represents. He should realize that the average customer knows little or nothing about paint and will probably get far from satisfactory results if left alone. The customer is then practically certain to complain, "That paint you sold me was no good," the customer will say. He does not take his own ignorance and faulty handling into account. The dealer may take the same view. If a number of such complaints are heard, the dealer will begin to think that he is carrying a poor stock and losing custom thereby. Next time the traveler for that make of paint comes around, he finds that his erstwhile customer has put in a rival's paint.

It follows that the traveler benefits as well as the dealer, if the latter knows enough about paint to work up a good business. It is, then, in the traveler's own interests to do all he can to improve the standard of retail salesmanship. This he can accomplish by undertaking to spread as much knowledge as he can among hardware dealers and clerks.

PAINT WINDOW AT NEW WESTMINSTER.

H. T. Kirk, of New Westminster, past president of the British Columbia Hardware Association, had a very effective paint display in his window, at the opening of the present season.

For the background and frame of the window, liberal use was made of advertising matter supplied by the paint manufacturers, and sample tins of the vatious products carried in stock, were shown in attractive arrangement. These samples furnish a good idea of the extent and variety of Mr. Kirk's paint stock. This display undoubtedly succeeded in increasing Mr. Kirk's sales of mixed paints.

Roy Grills, formerly with the Binkley Co., has joined the staff of the Geo. Taylor Hardware Co., New Liskeard, in the capacity of bookkeeper, vice Mr. Pearson, resigned.

How H. T. Kirk, of New Westminster, Boosts His Paint Department.

Burlaps a Profitable Line for Dealers

Open New Possibilities for Business—Will Increase Demand For Interior Paints—May be Re-decorated When Desired — Hardware Dealer is the Natural Distributor.

Canadian retail hardware dealers should be interested in decorative burlaps. A number of reasons may be given for this assertion. In the first place burlap is being regarded with more and more favor for uses that greatly increase its demand. In other words its poularity is rapidly growing and the openings it is finding will be given further attention later. Another reason is that decorative burlaps are as natural to the hardware man's stock as is paint, varnishes and the other similar goods that are now in demand. For both these reasons and the fact that where new business is presented an effort should be made to secure it, burlap commands the attention of the trade.

What It is.

It is hardly necessary to state what burlap is. Everyone has seen and admired the effect secured in hotel dining rooms, theatres and "theatoriums," and generally in other public places, churches being among the number. It is also largely used on the walls of dens, living rooms, kitchens and new uses are being found all contributing to the new demand mentioned above. Decorative burlap is a wall covering that lends itself to many pleasing designs. It has a long life and is therefore economical, it is highly sanitary and one of the best evidences of its general worth is the place it is finding on the market. Burlap is made from strong and heavy specially selected jute canvas, which is carefully stretched by machinery for that purpose and it is then either dyed or given a special preparation for what is known as prepared decorative burlap. It is the latter article that special mention is made of in this reference.

Points in Its Favor.

As above stated the natural canvas after being stretched is coated with odorless compounds that will not rot it and it is also given a priming coat of paint. It is claimed that this burlap will last longer than the wall. It does not fade nor shrink and can be painted and repainted any shade desired at little trouble and expense. If it becomes dirty it is easily washed off and stains can be removed. The special paint used before this burlap is sent out of the factory always retains a slight odor of paint, which as it is known, drives away insects of all kinds. This is a decided advantage over paper wall coverings in as much as this odor is not noticed by persons. It keeps out dampness, drafts and cold, and some of the heaviest orders for burlap have come from the west where it is extensively used in houses of wood that required something extra to keep out the chilly blasts. In addition to this if dust settles on the wall, it is easily removed with a damp cloth.

It is a Protection.

Prepared burlap is a protection to new walls, or to those which are already cracked or dented. In its preparation it is oil coated and made a double thickness. It is therefore quite stiff and offers the walls excellent protection. For this reason architects welcome it as a substitute for and an improvement on the old idea of wooden wainscottings, etc. Therefore its particular qualities are worth noting. As a sanitary substitute for methods to which people have been long accustamed, for its durability and its economic advantages, for its comfort and attractiveness, for these reasons alone it is commending itself and is worthy of the retail hardware man's attention.

Other Points of Interest.

Decorative burlap is easily put on the wall and there is no shrivelling or shrinking or gathering such as might be expected by those who have not handled it. The priming coat of paint it received in the factory is not sufficient and when placed on the wall the burlap requires a painter's attention and any color at all may be selected.

This color can be changed whenever desired, and excepting the initial cost, there is no after expense, but that entailed in repainting. As to the use in the average home, it is felt that it will not be long until it is generally used. It lends itself to so many attractive arrangements that it is bound to appeal to those with a sense of what is in good taste and appropriate. It is used from kitchen to bedroom, different colors and arrangements being used in the various rooms. Burlap may be said to be one of the present day tendencies. There is a feeling abroad to relegate the parlor to the same region wherein are the the shades of the old horse hair chairs, stuffed owls in glass cases and other relics of our grandfathers' days.

It is in this movement that the demand for burlap has found a place. The new idea is to make rooms to live in and that old awe in which the "front parlor" was held is passing. The bungalow type and the well lighted cheery living rooms of the average house of today show what the trend of opinion is and it is in this regard that burlap is favorably considered.

It is hardly necessary to point out that the hardware store is the place where these goods should be stocked. The architect, the painter, the builder, all look to the hardware man for their supplies and burlap if not already in stock is going to be soon carried extensively.

DISTRIBUTING BOOKLETS.

The Canada Paint Co. are issuing neat booklets to all prospective buyers of paint throughout the Dominion. The names are sent in by the local dealers and already 250,000 of the booklets have been distributed.

The books contain a large assortment of color samples and concise directions for the use and application of paints. Among the pointers given are :

"Be sure the surface is clean, dry, and free from grease.

"Shellac all knots and places showing sap.

"Do not grudge a little labor in preparing the surface. You will have the reward when the work is done.

"Thoroughly stir the contents of the tin from the bottom ; and if the surface to be painted should be extremely dry or porous, the paint may be thinned by adding a little raw linseed oil. Use turpentine if thinning for inside work.

"After first coat is thoroughly dry, putty up all cracks and nail holes carefully and then apply second coat.

"Never apply a second coat until the first is hard."

STRONG PAINT ADVERTISING.

W. F. Macpherson, of Prescott, Ont., is a believer in the business-pulling virtues of printers' ink. His advertisements are always well to the fore, and a particularly notable appeal was made in a recent issue of his local paper, when Mr. Macpherson fired the opening gun of his spring paint campaign.

Almost half the front page of the paper was taken up with Mr. Macpherson's advertisement, which was divided into four panels. Each panel was devoted to some line of the Canada Paint Company's products, which Mr. Macpherson carries in stock. The goods featured were ready-mixed paints, liquid aluminum, coach colors, and varnish stains. An illustration of the distinctive tin in which each product is marketed, helped ta brighten the advertisement, and a valuable feature was a brief talk on the kind of work for which each class of goods was peculiarly suited. Prices were quoted on all the lines described.

INCREASING TRADE IN BRUSHES.

It is astonishing how many apparently small lines there are in the hardware store, whose sale could be increased by a little extra effort on the part of the dealer and his clerks.

A case in point is furnished by the sale of brushes which is neglected by some dealers, but pushed with remarkable success by others. There is not a factory which does not require a number of brushes and brooms, either for sweeping out, or for some of the processes of manufacture. Every butcher shop in the town must use wire brushes for cleaning the tables, and every barber shop consumes a fair quantity of shaving brushes.

In the majority of cases, these requirements are filled by supply houses who send around their travelers to take orders. There is no reason why the local hardware dealer should not capture this business, and there are many reasons why he should, if he goes after it. He will probably be able to offer just as good prices as the supply houses, and will have the additional argument that trading with him, means keeping the money in circulation at home.

If the hardwareman or one of his clerks, would form the habit of making a weekly circuit of the mills, factories and stores of his town, soliciting orders, he would soon find his business growing, in such supplies as are most frequently in demand, and are nearly always carried in stock at the hardware store.

Special mention has been made of brushes, and this is a line in which a good business can be worked up, in the manner suggested. But there are hosts

PAINTS AND VARNISHES

Are you getting a fair share of this growing business?

A 76-year reputation stands behind Minerva Brand—a reputation gained by manufacturing an honest, quality paint that will stand the hardest tests of time and climatic conditions. We have been supplying the constant demand from large Railroad and Steamship companies and prominent decorators all over the world.

There are reasons why consumers like these insist on Minerva Brand.

Write us for information—we have the right line for you to handle—a brand that means your reputation and profit.

PINCHIN, JOHNSON & CO. (Canada), Limited

Established in England in 1834. 377-387 Carlaw Ave., Toronto, Can.

of other articles which might be sold if the business were solicited.

A traveler for a brush manufacturing firm recently told Hardware and Metal that he had frequently been of assistance to hardware dealers, in working up this kind of trade. After consulting with the dealer, and posting himself on prices, he would call upon some of the local factories or stores, in the dealer's interests, and secure some nice business for him. This would open the dealer's eyes to the opportunities for extra sales, and he would follow it up by making regular visits himself, or sending one of his clerks. In this way, he was enabled to become better acquainted, and obtain a standing in the community which he had not previously enjoyed. Needless to say he would also land business which he had not in the past even thought of, and the men who gave him orders in their business, also thought of him first, when placing orders for their household.

The idea is not patented, and it is well worth a fair trial. Though it may be difficult to "get in" at once, it will pay to persevere, and good work will surely be rewarded in time.

PAINT AND OIL MARKETS

MONTREAL.

Montreal, May 26.—The paint markets have been rather steady during the week with the exception of turpentine which in sympathy with the primary market has been going down the price ladder rather consistently. Trade is healthy in tone, orders coming forward freely. Varnishes, mixed paints and general paint and oil requisites are going out satisfactorily. On the whole business might be heavier but, as it is, the situation is rather bright and encouraging.

Linseed Oil.—During the past week linseed oil has maintained that steadiness that has characterized it of late. Prices quoted locally remain unchanged, $1.08 per gal. for raw and $1.11 for boiled. Crop reports vary to a certain extent but on the whole the primary market is steady.

Some reports are to the effect that owing to the increased demand for flax the acreage will likely be larger, but scarcity of seed is given as a reason for less extensive slanting. There is a good demand for oil and the market is looked upon as being strong just now.

Turpentine.—Prices show another reduction this week, having dropped from the dollar mark to 91 cents. Shipments of new goods coming on to the market in plentitude and although there is a healthy demand for turpentine the price had to sag under the pressure of present supplies.

Japan and Varnishes.—The demand for Japans and varnishes is very encouraging. The decline in the price of turpentine naturally is welcome to manufacturers and more attention is being given to both Japans and varnishes. The latter in particular is especially before the trade just now.

Prepared Paints.—Manufacturers report a steady demand with enquiry unabated. Prepared paints have been doing very well of late and are compensating to a certain extent for the slowness that was noticeable when the season opened.

Paris Green.—The market is practically unchanged. Business is still coming in. Prices are unchanged as follows :—In barrels, about 600 lbs., 17c per lb. ; arsenic kegs, 250 lbs., 17¼c ; 50-lb. and 100-lb. drums, 18¼c ; 25-lb. and 100-lb. drums, 18⅜c ; 1-lb. packets, 100 lbs. in case, 20¼c per lb. ; 1-lb. packets, 50 lbs. in case, 20¾c per lb. ; ½-lb. packets, 100 lbs. in case, 22¼c per lb. ; 1-lb. ; 1-lb. tins, 100 lbs. in case, 21¼c per lb.

Arsenate of Lead.—There is still a fair demand for arsenate of lead which with Paris green should soon be taken up by the retailer. Prices are :—In bbls., about 800 lb., 9c ; in half bbls., about 400 lbs., 9½c. ; in 25 lb. wooden kegs, 10c ; 5 lb. bottles, 12c ; in 2 lb. bottles, 13c ; in one lb. bottles, 14c.

White Lead.—The white lead market is healthy. Prices are steady, the demand is good and orders are being forwarded quite freely. There is no particular feature. Prices are as follows :—Lots of one ton, $5.85 ; contracts of five tons and over, $5.70 ; shipments less than one ton, $6 f.o.b. Montreal.

Putty.—Manufacturers report a satisfactory demand for putty with the market quite unchanged. Prices are as follows :—Bulk bbls., $2.20 ; bulk, cwts., $2.45 ; bladder, bbls., $2.70 ; bladder, cwts., $2.80 ; 25's, loose, $2.55 ; 25's, cased, $2.70 ; 12½'s, cased, $2.90.

TORONTO.

Toronto, May 25.—Turpentine has provided a healthy sensation by dropping off 8 cents in price. This brings it down to the prevailing figure at the same period last year, 87 cents, and makes a drop of 53 cents in the course of the last six weeks. From $1.40 to 87 cents in so short a space of time is a remarkable drop, but it is quite apparent that turpentine has not yet exhausted its possibilities for creating surprises.

The market has seen a splendid degree of activity during the past week. Orders have been large, bringing evidence to the fact that the warm weather has created active painting conditions. All lines have been moving out well.

Linseed Oil.—Firmness is shown in the price of linseed oil, the prevailing quotations here being $1.12 and $1.15 for boiled. On reviewing market conditions it is found that there is little, if any, possibility of the crushers obtaining new seed sooner than June 15, and it will probably be a couple of weeks later before any great bulk comes on the market. The stock which does come forward by that time will be from East India, but it is as yet, too early to say positively if this seed can be secured at a price to permit of oil being made at a cheaper figure than the price now asked. For the next six weeks, therefore, stability can be expected in the linseed oil market. Present stocks are reported to be quite light and, as a natural result, there is a regular and healthy demand.

Turpentine.—An eight cent reduction has been made and the price now asked is 87 cents. It may be that some, on learning of the level to which turpentine has descended, will entertain the suspicion that the recent era of high prices was brought about by expert manipulation, that some of the jobbers, in fact, were "holding up" the trade in order to make large profits. As a matter of fact the high prices asked were caused by the shortage of supply, the market being almost bare. As a natural result of the shortness during the first two months of the year, producers of turpentine rushed the new stock on the market as soon as it appeared, in order to share the unusual price. But users of turpentine had abstained from active operations, and the new supplies were left on the market without sufficient purchasers and the price at Savannah slumped from $1.02 per wine gallon to 57 cents. It is now reported that an active demand has sprung up both for local requirement and export to Europe.

Rosin.—In regard to rosins it seems rather strange that the market has not been as seriously affected as it has in the case of turpentine, and all the finer grades of rosin are being held up at a high price while the darker grades have receded about ½ cent per lb. in the past two months.

Putty.—There is a better demand. Prices gre standing at the same figures. Standard putty is quoted at: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same; bulk in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

White Lead.—The advance in the west has not affected local prices nor does there seem to be much possibility of any change taking place. The demand is growing almost daily.

Prepared Paints.—Painting season is now in full swing, thanks to the brand of weather provided, and the demand for prepared paints is rapidly clearing out retail stocks. Sorting up orders are now being received and the manufacturers and jobbers are having their hands full catering to the demand. The tendency to use the ready mixed article is more marked this year than ever before.

Varnishes and Japans.—The same rule applies with equal force to varnishes and Japans. The holiday trade has stimulated the demand this week. In every locality householders have been putting off painting floors, etc., until Victoria Day, and in consequence the stores for a few days previous to the holiday were crowded with customers asking for floor stains and other specialties. In anticipation of this heavy rush of business, many sorting up orders were sent on the jobbers.

Specialties.—There is no let up to the demand for specialties. Brushes are moving briskly and other supplies such as boat pitch, kalsomine, pine tar in tins, axle grease, alkali, sand paper, pumice stone sponges, tar, shellac, furniture polishes, colors ground in varnish are in steady demand.

Petroleum.—With the exodus to summer cottages and holiday resorts, the demand for oil has picked up considerably. The prices remain at: Canadian prime white, 12c; United States water white, 13½c; Pratt's Asreal, 15½c.

Glass.—There is now an improved movement. A large number of import orders are being received and the situation is judged to be indicative of a brisk future demand.

B-H "ENGLISH" PAINT

70% PURE WHITE LEAD – 30% PURE WHITE ZINC

100% PURE PAINT

There is Nothing Secret About it

¶ There is a formula guarantee on every can, and this formula is recognized as the "last word" in paint quality.

¶ Therefore when you stock **B-H "ENGLISH" PAINT**, you have the active support of the practical man---the man who knows---and your store becomes the paint headquarters of your town.

¶ There is a good substantial profit for the dealer in **B-H "ENGLISH" PAINT** and a strong advertising campaign back of the paint that helps you sell more paint.

¶ **B-H "ENGLISH" PAINT** will be sold in your town. If the agency is still open you have the opportunity of securing it. **Write to-day for 1911 price list and details of selling plans. Address our nearest office.**

ICE CREAM FREEZERS

White Mountain, 50 p.c.

Amatite ROOFING

"NEEDS NO PAINTING"

AMATITE means more to the man who needs a roofing than just merely something to put on the top of a building.

It means a thoroughly satisfactory and reliable roof covering, without future *expense for painting*—because the *real mineral surface* makes painting unnecessary.

Frequently the cost of painting a roofing amounts to almost enough to buy a new Amatite Roof.

Amatite can be laid right over shingles, tin or other ready roofings. The directions hold good for laying Amatite anywhere and over anything, and are as simple as A B C.

For further information, booklet, samples, etc., address nearest office.

Everjet Elastic Paint A very tough, durable paint, at a low price. One color only—a lustrous black. Use it for machinery, heating apparatus, smoke stacks, roofs, fences, water tanks, etc.

Creonoid Lice Destroyer and Cow Spray Cows give more milk if sprayed with Creonoid to keep away the flies which make them restless. The poultry output will be increased if the henhouse is made obnoxious to insect pests by disinfection with Creonoid.

THE PATERSON MANUFACTURING COMPANY, Limited

MONTREAL TORONTO WINNIPEG VANCOUVER ST. JOHN, N.B. HALIFAX, N.S.

HAVE NO HESITATION in stocking and recommending—

And Every Agent

for Ramsay's Paints knows that he has a great fund of profit stored up behind the Outside Paints, made for Barns, Fences, Bridges, Roofs, etc.

RAMSAY'S PAINTS

include all kinds of paints, the best for the house, the best for the barn, the best for the decorator.
Agents everywhere! Once again we suggest to take advantage of our numerous helps to get orders. Look out for the man who is painting, and the man who ought to paint, then send us his name, and we will get you the order. Hundreds of orders are reaching our agents every day through our helps.

A. RAMSAY & SON CO.

THE MELLOWED

RICHNESS OF A WELL-PAINTED, DECORATED HOUSE, LESSENS IRRITATION AND LEADS A MAN SOMEHOW TO CALM AND SWEET CONTEMPLATION OF

HIS PROPERTY

THE CANADA PAINT COMPANY'S COLORS and VARNISHES are made absolutely by themselves. This insures uniformity.

THE CANADA PAINT COMPANY'S VARNISHES are made for all who are looking for a good article properly manufactured at a fair price.

THE CANADA PAINT COMPANY'S COLORS and VARNISHES are tested and reported on by their practical staff before shipment.

THE CANADA PAINT COMPANY'S LIQUID COLORS after being well stirred in the can by the purchaser will flow smoothly and evenly.

THE CANADA PAINT COMPANY will cheerfully mail color cards to show the scope and variety of their manufactures.

THE CANADA PAINT COMPANY'S wishes to state that microbes, germs and dry-rot have "no habitation or abiding-place" where their paints, colors, stains or varnishes are used.

THE CANADA PAINT COMPANY'S COLORS should be appled wisely and well. They will be found to be very economical.

THE CANADA PAINT COMPANY has a good class of customers who are desirous of selling a good class of paint and varnish.

Four Magazines that will Increase your Paint and Varnish Sales

"The SWP"

This splendid little magazine is regarded as a modern trade journal by thousands of the live paint Agents and Dealers who receive it every month. It is beautifully printed and illustrated and contains strong, helpful articles on advertising and window-trimming, stock-keeping, store display and plain educational talks on paint and varnish products. Best of all are the articles contributed by successful S-W Agents on practical advertising and selling methods for increasing paint and varnish sales. You cannot duplicate this information. S-W Agents and Dealers get it without cost. Write for sample copy.

"The Colorist"

Is an attractive magazine devoted exclusively to the interests of the painters. Over thirteen thousand get and read it each month. Few other house organs can approach it for live, interesting topics and good illustrations. Its keynote is helpfulness. Besides able articles on modern color harmony and decoration, illustrated with beautiful plates in exact colors, the S-W Decorative Department is now conducting a free, practical course on decoration, which is proving of wonderful interest to hundreds of painters who are taking up this course. The Colorist is sent regularly to lists of desirable painters furnished by S-W Agents and Dealers.

"The Home Decorator"

Makes a special appeal to housewives of moderate and limited means who want suggestions for simple, artistic and inexpensive interior home decoration. The subscription price is 20 cents a year. It now has a paid circulation of over 5,000 and the free copies distributed by Agents bring the total monthly circulation to over 65,000. This means a lot of splendid advertising for the Agent as these copies are imprinted with his name. Many Agents have worked up large lists of subscribers and have found it has stimulated their sales. Write for particulars

"The Spectrum"

Circulates among 5,800 architects and contractors each month. It's a business-builder for the Agent because it keeps the Sherwin-Williams paints and varnishes before the men who are specifying these finishes for most of the new buildings in the Agent's territory. Each issue contains beautiful plates of many of the finest buildings in the country finished with S-W products.

Link these powerful selling helps to your store

The S-W Agent is invited to send us lists of names for three of these magazines which are sent free. The cost of the fourth is little and the possibilities are great. Taken together, they form a combination that is working to increase your sales every month. The S-W Agency brings them to you.

PATTERN DRAWING

A CHEAP, PRACTICAL and Complete Home Study Course on Sheet Metal Pattern Drafting, Estimating and Construction. Send for particulars to THE SHEET METAL SCHOOL, Box 419, Galt, Ont. (21tf)

MISCELLANEOUS

ACCURATE COST KEEPING IS EASY if you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto.

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

725,000 LIVE MERCHANTS use National Cash Registers. We couldn't sell them unless they saved people money. The National will guard your money too. Write us for proof. National Cash Register Co., 285 Yonge St., Toronto.

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

BUSINESS GETTING Typewritten Letters and Real Printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms—real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Company, Ltd., 129 Bay Street, Toronto.

COPELAND-CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson-Crain, Ltd., Toronto and Ottawa. (tf)

COUNTER Check Books—Especially made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for Binders and Monthly Account Systems. Business Systems, Limted, Manufacturing Stationers, Toronto. (tf)

DOUBLE YOUR FLOOR SPACE — By installing an Otis-Fensom handpower elevator you can use upper floor as stock room or extra selling space and increase space on ground floor. Costs only $70. Write catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS are devised to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE. INSURE IN THE HARTFORD. Agencies everywhere in Canada.

HUNDREDS OF TYPEWRITERS of every make and condition are being traded in as part payment on the famous Monarch. Price and quality are the levers we use to prevent over stock. We believe we can give the best bargains in rebuilt typewriters in Canada. A postal will bring our catalogue and full information. The Monarch Typewriter Co., Limited, 46 Adelaide Street West, Toronto.

INDISPENSABLE in office, store, home—Canadian Almanac, 1911—a National Directory. Complete classified information on every subject of Dominion interest. Full Postage, Customs, Banking, Insurance, Legal, Educational, Newspaper, Army, Clerical, Governmental, Particulars of leading institutions and societies, Paper cover, 60c; Cloth, Leather Back, 75c, All stationers, or sent postpaid on receipt of price by The Copp-Clark Co., Ltd., Toronto.

KAY'S FURNITURE CATALOGUE No. 306 contains 160 pages of fine half-tone engravings of newest designs in carpets, rugs, furniture, draperies, wall papers and pottery, with cash prices. Write for a copy—it's free. John Kay Co., Ltd., 36 King St. West, Toronto.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost. "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN PENS. If you have Fountain Pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. GAGE & CO., Limited, Toronto, sole agents for Canada.

PENS—The very best pens made are those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find the pen to suit you.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto (tf)

WAREHOUSE AND FACTORY HEATING SYSTEMS. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

SITUATIONS WANTED

AN IRONMONGER, who will shortly dispose of his business in Wales, is anxious to obtain a situation in Canada in any of the following departments of the hardware trade: Salesman in any branch; office or counting house. Young, healthy and energetic; of good address, having a wide experience of British trade, in all its branches. An expert draughtsman and designer, holding 3 first-class certificates for "Advertisement Designs," and 3 first prizes for designing at the Royal National Eisteddfod of Wales. Engraver on metals, such as coffin plates, monograms and inscriptions for presentations, etc. Expert window dresser. Total abstainer and holds the highest possible character. Box 2011, HARDWARE AND METAL, Toronto. (23)

EXPERIENCED HARDWARE CLERK desires position; good salesman and stock-keeper. A1 references. Apply Box 359, Red Deer, Alta. (22)

EXPERIENCED General Hardware man desires position as traveller. Eight years' experience in retail and wholesale houses. Good references. Box 32, HARDWARE AND METAL, Winnipeg. (21)

ENGLISH HARDWARE SALESMAN DESIRES situation. Good experience implements, dairy appliances, general hardware, workshop. Excellent references. Abstainer. Box 777, HARDWARE AND METAL, Montreal. (21)

HARDWARE MAN, experienced in buying and selling, wide awake, knows the hardware, stove and tin and paint trade, would accept a position as manager of a business or as traveller in Ontario or the West. Address, 793 Helimuth Ave, London, Ont. (21)

POSITION WANTED in wholesale or retail hardware business. Have had good experience and can give best references as to ability and character. Box 510, HARDWARE AND METAL, Toronto. (21)

SITUATIONS VACANT

WANTED—One first-class hardware man. Steady work and good wages if suitable. A. FULTON, Enderby, B.C., in the Okanagan Valley. (22)

WANTED—Hardware clerk, experienced, good stock keeper Give references and state wages. Apply to W. J. HEARD, Fenelon Falls, Ont. (29)

WANTED—City Traveller to cover Hardware and Blacksmith trade. Must have thorough knowledge both lines. State experience and salary required. Peart Bros. Hardware Co. Ltd., Regina, Sask. (21)

WANTED — A reliable, ambitious man in every town to look after the entire circulation of our thirteen publications. Work very remunerative. MACLEAN PUBLISHING COMPANY, 143-149 University Avenue, Toronto, Ont. (tf)

WANTED—At once, a reliable man, one capable of taking charge of shop, who can estimate on tinsmithing, plumbing and heating work. A steady job for a first-class man. Apply, stating experience, also wages expected, send written references. Apply to HICK-SEHL HARDWARE CO., Lethbridge, Alta. (22)

Keep in mind the dominant fact that mankind from its first appearance on the earth has been schooled by nature to look for signs; for invitations to taste; for suggestions as to what to wear. Tell your story briefly, forcibly, truthfully, and address it through the proper media and you can successfully apply advertising as a means to increased distribution.

NEU-TONE

A PAYING PROPOSITION

It pays, brother, when you can make a friend of everybody that comes into your store. And it is not so hard to do, either.

Take for instance, the paint proposition. If a man comes into your store, and you make a lot of promises that the paint doesn't fulfill — that man will not remain your friend many days.

When you lose him — well — you will lose many more. But on the contrary, if the paint "*makes good*" you make a fast friend and gain a lot of more customers.

NEU-TONE COLORS

(Washable — Sanitary)

Please Everybody — Dealer, Decorator and House-Owner

It pleases the dealer because it is a paying proposition — carrying with each sale the twang of a come-back order. It pleases the decorator because it enables him to give his work a "*style*" that triumphantly asserts itself.

It pleases the house-owner because with it, the house can be finished in the soft, restful, "flat" tints and rich colors of kalsomine. Dust, grease and smoke stains easily removed with a damp cloth. Think of it. It pays to sell this kind of paint, Mr. Dealer. Drop us a postal and we will tell you a few more things you will be glad to hear about this *paying proposition.*

THE MARTIN-SENOUR CO., Limited

Montreal Chicago Halifax Toronto Winnipeg

SPECIAL LINES OF MARINE VARNISH

You will have call now for varnishes for boats, canoes, and all sorts of water craft. Are you prepared to meet the demand?

Have you varnish on your shelves which will positively stand the marine test? How much is a customer worth to you who you satisfy with a varnish which will stand the marine test?

DOUGALL'S MARINE VARNISHES

are made especially for boat work. A surface varnished with "Dougall Marine" will keep a smooth and beautiful finish proof against salt or fresh water—brine—spray—exposure of any kind—heat or cold or hot sun.

"Dougall Marine Varnishes" are MADE to stand this severe test. Woodwork treated with this varnish CANNOT be hurt by exposure.

Be sure of DOUGALL'S name on the label.

Dougall's Marine Exterior Varnish — **Dougall's Marine Interior Varnish**

How To Buy Varnish

YOU Dealers ought never to buy goods on promises and predictions of immediate re-sale to customers. Look to the manufacturers, examine their past. What you want is **facts**—and **past performances,** not promises. Don't let any big-one-time-and-gone-advertising, influence you to place an order. You want thorough and complete co-operation, which includes big, broad and consistent advertising straight through the year, this year, next year and for all time.

This is your backing when you sell Pratt & Lambert Varnishes—the most thorough and complete varnish selling assistance in the trade. It's yours for the asking. I advise you to write now for prices and terms.

"All International Varnish Products are Sold in full Imperial Measure Cans"

Figure out what that means to the average Hardware Merchant.

Many are willing to testify right over their signatures that it means trade Insurance---a permanent patronage.

Simply because it means more satisfaction and better goods for their customers at the same money.

Every International Varnish Product is hall-marked "Superior Quality."

Elastica, Lacqueret, Satinette, Flattine and Wood Stains—all conserve and build up your reputation and give you a reasonable profit.

You can confidently expect repeat orders when you specify International Products.

AMERICAN CAN COMPANY

MONTREAL **HAMILTON**

Paint and Varnish Removers

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	Name of Brand.
The Sherwin-Williams Co., Montreal, Canada.	"Taxite"
International Varnish Co., Ltd., Toronto, Canada	"Klensa"
Pratt & Lambert, Inc., Bridgebury, Ontario, Canada	"Expedite"
British American Paint Co., Victoria, B.C.	"Bapoo"
Mount Royal Color and Varnish Co., Montreal, Canada	"Scrape-off"
James Robertson Co., Ltd., Toronto, Canada	"Robertson's Paint and Varnish Remover"
Sanderson Pearcy Co., Ltd., Toronto, Canada	"Devolite"
Stewart & Wood, Toronto, Canada.	"Solvo"
Martin-Senour Company, Ltd., Montreal, Canada.	"Martin-Senour Paint and Varnish Remover"

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

H&R ARMS Co

¶ Right in every hardware store is the most logical place for a line of reliable, accurate, and moderate-priced single guns.

For ridding premises of pests—snakes, rats, 'chucks and the many kinds of crop and poultry destroyers, the Harrington & Richardson single guns are specially suited.

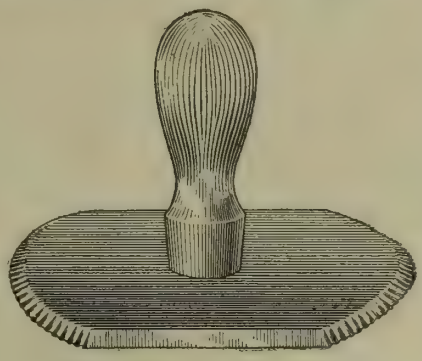
¶ There is a large and growing demand for an economical and efficient weapon for just that purpose, as well as for occasional hunting.

Here's the gun:

TRADE H&R ARMS CO. MARK

TRADE H&R ARMS CO. MARK

Specifications, 12 to 28 gauge—26 to 32 inch barrel—ejecting or non-ejecting—fine black walnut stock—hard rubber butt plate—weight 5¾ to 6½ lbs., according to gauge and barrel. For black or smokeless powder.



¶ These guns are quick sellers. They are made and sold under the broad H. & R. guarantee of quality, reliability and satisfaction. With a few of these H. & R. guns in stock, the hardware dealer is equipped for a profitable and increasing trade.

Our 40-page catalogue is yours for the asking. It contains valuable selling points for every hardware dealer and shows the complete H. & R. line. Ask for it now while you think of it.

Harrington & Richardson Arms Co., 715 Park Avenue, Worcester, Mass.

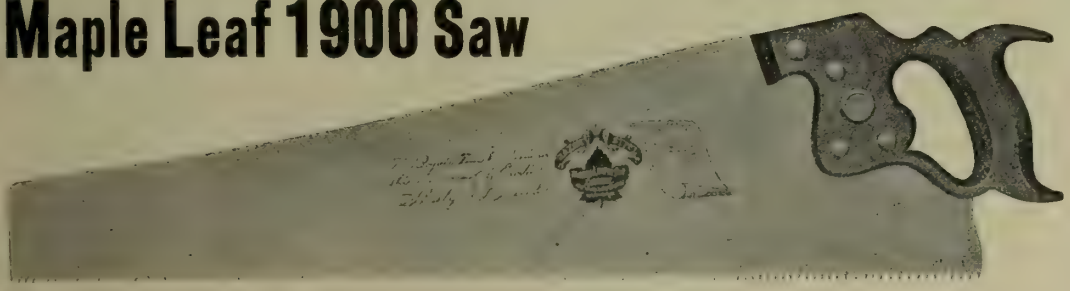
THE FLANGE HOG SCRAPER

This new Flange Scraper has many points of superiority over all other hog scrapers now in use. The main piece or scraper proper is a steel plate with an oval, making a real scraper four inches long. The ends are crimped, twelve crimps to the inch, the crimped ends being adapted for use on the head, where scurf is generally found. The one end is rounded, while the other end has a longer point, as seen in the sketch, making it a convenient scraper to clean the head, ears, eyes, or any other part of the carcass.

It has a handle four inches long, suitable for a scraper, fastened with a bolt passing through the handle and plate.

It will scrape on the side four inches, while others, being round, will not cover so much hide at one stroke, and cannot be operated nearly so swiftly. This improved scraper has a scraping flange, while others have none.

A glance at the above sketch will give an idea of the great usefulness of this article.



Retails at 10c each

IT IS PERHAPS NOT GENERALLY KNOWN

That we have an Information Department, consisting of trained and practical men, whose time is employed solely in answering enquiries from people interested in cement.

NOW IT WILL BE READILY UNDERSTOOD

that out of the mass of enquiries that come to us, there are a number that include questions as to what might be termed Allied Industries. These we now answer to the best of our ability, but we could answer them still more satisfactorily if manufacturers of materials used in conjunction with cement would co-operate to the extent of sending copies of their catalogues and other literature, to be placed on file in our office for reference.

WE SHOULD LIKE TO OBTAIN

the names and addresses, together with catalogues, and any other obtainable information, of manufacturers of and dealers in:—

(1) CONCRETE MACHINERY. (2) BUILDING BLOCKS. (3) CEMENT BRICKS. (4) TILE MOLDS. (5) FENCE POSTS. (6) REINFORCING MATERIAL. (7) WATER-PROOFING COMPOUNDS.

It is not alone for our own convenience that we make this suggestion—firms who manufacture or deal in such articles will find it to their own advantage to have this information in the hands of our Information Department, thereby enabling us to hand on to them, from time to time, enquiries for such materials as they severally make.

In sending catalogues, literature or information, please address same to "Sales Department."

Woodyatt Lawn Mowers

"Standard of Excellence"

The "WOODYATT" Mower has four blades and is the most satisfactory machine on the continent to-day. It has been on the market continually for over thirty-five years. It is a machine that is well known among gardeners and has shown more reliability than any other machine offered to-day.

Give our line a trial—it will increase your trade.

The "WOODYATT" runs for years without needing repairs. All parts of this mower are made from the very best material—all wings being malleable iron and the cylinder and lower knife Sheffield Steel.

Wherever the name "TAYLOR-FORBES" appears there is an absolute guarantee. We will replace any machine that gives trouble through fault of ours.

The Taylor-Forbes Co., Limited, Guelph Ont.

The IRONCLAD *Alarm*

"It Rings to Beat the Band."

IF we placed our IRONCLAD movement in an ordinary alarm case, the chances are it would *turn turtle* within a year. And if it lived to tell the tale, it would be to *tell a tale*—for it would get so *clogged* with dust, it could not tell the *truth.*

But it's CLAD in heavy IRON armor and it can't *keel over.*—It's stocky, sturdy, steady.—If it's *cleaned* every other year, there's *no telling* how long it'll last.

Packed 12 in a box with advertising matter. Dealers' names printed free on dials in lots of 24. Height 5 inches. Dial 2¾ inches. Weight 2½ lbs. Rings 35 seconds; can be shut off at will.

Stocked by 28 Canadian Wholesalers.

The Western Clock Mfg. Co.,

La Salle, Illinois.

Sportsmen Will Soon Be Getting Their Outfits

They will find many a use for the Carborundum sportsmen's stone—it will quickly sharpen an axe, hatchet, or hunting knife, or point hooks and gaffs—Put up in neat leather belt case—Sportsmen will also want a Carborundum razor strop or razor hone—The big popular magazines and sportsmen's papers will tell them to get them from you—Be sure that you carry them in stock—

WRITE TO-DAY for information regarding the Complete Carborundum Line, the trade helps, free display case offers, etc.

The Carborundum Co., Niagara Falls, N.Y.

Have You Seen These

New "Yankee" Tools?

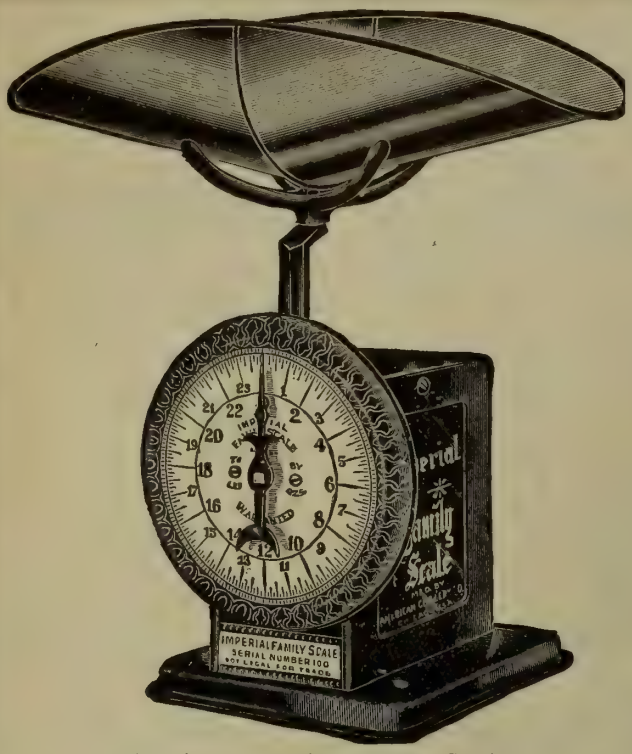
No. 1530 Hand Drill for holes up to 3-16 in.

Takes round shank drills. Has the famous Automatic Double Ratchet movement the same as our other "Yankee" geared Drills, so helpful in many ways especially at close quarters where only part turn of crank can be obtained. The wood Handle has magazine for drill points. A fine tool for metal workers, amateur mechanics, etc.

No. 130 Quick Return

Same tool as the No. 30 but with a Spring inserted in the Handle to drive the spindle back quickly, ready for the next push. A great advantage for overhead work or where only one hand can be used. Takes all the Attachments used in the No. 30.

No. 75 Push Brace



Bores holes up to ⅝ inches in hard woods and ⅝ inches in white pine, quicker and easier than a Bit Brace. Drives and draws screws—takes all the small tools and works in close quarters where a Bit Brace cannot be used. Bearing down on the Handle drives it with that quick and easy motion of the "Yankee" Spiral Driver.

They are catching the Mechanics.
Better let your Jobber quote at once.

DISSTON

INSULATE SCREW DRIVER

This tool is designed expressly for Electricians' use. The blade of crucible steel, hardened and tempered, is embedded in a handle of hard rubber of a texture that eliminates brittleness. It WILL NOT work loose. The rubber handle is milled grip, with projecting rings which prevent the hands from slipping down on to the blade. The hard rubber handle acts as insulation.

The Disston Insulate Screw Driver is something new. Most practical Electricians' screw driver ever made.

HERE'S
THE GUN YOUR CUSTOMERS WANT

Of course it's a

Greener Gun

and it's only logical to suppose that you will supply it

There's no gun quite as good as the Greener. It is made in the most completely equipped Sporting Gun Factory in the World, under the direct supervision of expert Gun Manufacturing Sportsmen who know exactly what "gunners" require and there's a Century's aggregate experience at the back of every Greener gun.

The name "Greener" is a gilt-edged guarantee and is supported by the highest honors won at 27 International Exhibitions, from the first Exhibition of all Nations in 1851 to the Grand Prix won at St. Louis, in 1904.

There are other features which make the Greener just the Gun for your trade, its SHOOTING Capabilities have achieved a World Wide reputation and the World's greatest Pigeon shooting trophies have been won time after time with Greener guns.

All the old sports remember Dr. Carver's wonderful "old widow," the gun with which he made his World's records fifty years ago, while the "young bloods" know that men like Elliott, Fulford, Brewer and quite recently George Robins made their universal reputations with Greener guns.

There's life in a Greener gun, and it's long life, too, they'll wear for Generations, they look well and handle well, not like lumps of wood and iron, but guns with brains in them, you strip one and you'll see what we mean.

Think these points over and remember there are 38 grades to select from, ranging in price from $56.00 to $1,000.00 and we can give you prompt delivery from our Montreal depot.

Will you let us send you a hanger showing a High Grade Greener gun, it's beautifully embossed in colors and is next best to the real thing, it would prove an attraction to your store ? May we tell the Sportsmen in your district that you stock Greener Guns ?

TRANSPAROL

Transparol is the finish that makes every surface a mirror, and is the leading finish for railroad cars, automobiles, and all other vehicles, also for leather.

Transparol is a particularly choice finish, and one that is positively indifferent to all effects of

Atmosphere
Acids
Oils
Gasoline
Salt Water, etc.

Transparol is the best preservative of wood known, and is equally as good a preventative of rust and corrosion of metals.

The gloss finish given a surface by an application of Transparol is so great that Transparol is the wonder of the paint and varnish experts.

Transparol comprises the following universal qualities:—

Flexibility
Elasticity and
Durability

History records that in Egypt they had a fluid which resisted the atmosphere for ages, and which modern civilization up to date has never been able to produce. THE OLD EGYPTIAN PRESERVATIVE HAS BEEN RE-DISCOVERED.

Transparol stands alone among the multitude of paints, varnishes and shellac products like the pyramid amidst the ruins of Old Egypt.

Transparol is indestructible; and when all other products have worn away, Transparol will still be there.

Transparol is sold on a guarantee to be satisfactory.

For Exterior and Interior Use

SHEFFIELD, ENGLAND

When the Merits of a "Tobin" Simplex Have Sold it to a Customer---Tell Him About the Guarantee

If your customer knows guns, he will ask you for a Tobin. If he doesn't, it is your duty to show it to him, and start him right. Few guns can furnish as many selling points—few have so many merits. Let your customer feel its weight, show him the selected steel parts of mechanism and barrel, the handsome finish, how it cannot fail in accuracy; and when he is convinced that he is a "Tobin" sportsman, tell him about the "money-back" guarantee that accompanies—

Tobin Simplex Guns

Each gun is manufactured from known stock, and every part is made right here in Canada. By scrupulous care in the selection of material, and by honest workmanship we have succeeded in producing a gun the equal of which is not manufactured in Canada, and in but very few other parts of the world is a gun of the hammerless type. But we want to give our customers still more than that, and we have added a guarantee that each "Tobin" gun sold, shall give complete satisfaction. If we fail to please any customer, we will refund every cent of the purchase price without question.

Do you know of another gun which gives you more to offer to a customer? Priced to sell at from $20.00 to $210.00. Write us for full particulars.

GEORGE WASHINGTON didn't know as much about cherries as the average housewife does to-day. Wherever cherries grow, women are familiar with "Enterprise" Specialties, and many of them will want an

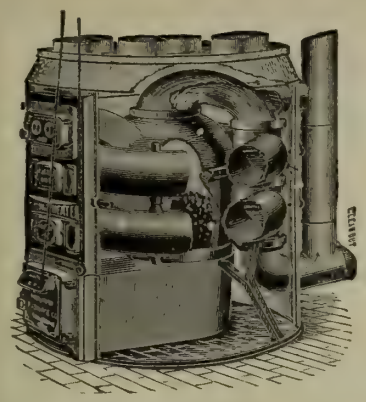
"ENTERPRISE" Cherry Stoner

Now is the time to order. The cherry season is short, and it is best to have these machines on your shelf ready to meet the demand when it comes.

Ask your jobber, he has them in stock.

The "Enterprise" Fruit, Wine and Jelly Presses should also be ordered now.

Remember, we also make the famous "Enterprise" Meat and Food Choppers; Rapid Grinding and Pulverizing Mills; Sausage Stuffers and Lard Presses; Bone, Shell and Corn Mills; Cold Handle Sad Irons, Etc. Complete catalog on request.



The Enterprise Mfg. Co. of Pa.

PATENTED HARDWARE SPECIALTIES

Philadelphia, Pa., U. S. A.

21 Murray Street, New York

544 Van Ness Avenue, San Francisco

Large Radiation Means Less Fuel

From the point where the products of combustion leave the dome to the smoke exit, the travel is from twenty to forty feet, according to the size of the

"CANADIAN HOWARD" Double Radiator Furnace

used, consequently affording an enormous radiating surface. The gases in combustion reach the smoke pipe at a greatly reduced temperature, the heat having been absorbed for the benefit of the house, hence—economy in the use of fuel, one of our strong claims for this furnace.

It is to the dealer's benefit to handle such a well-made heater.

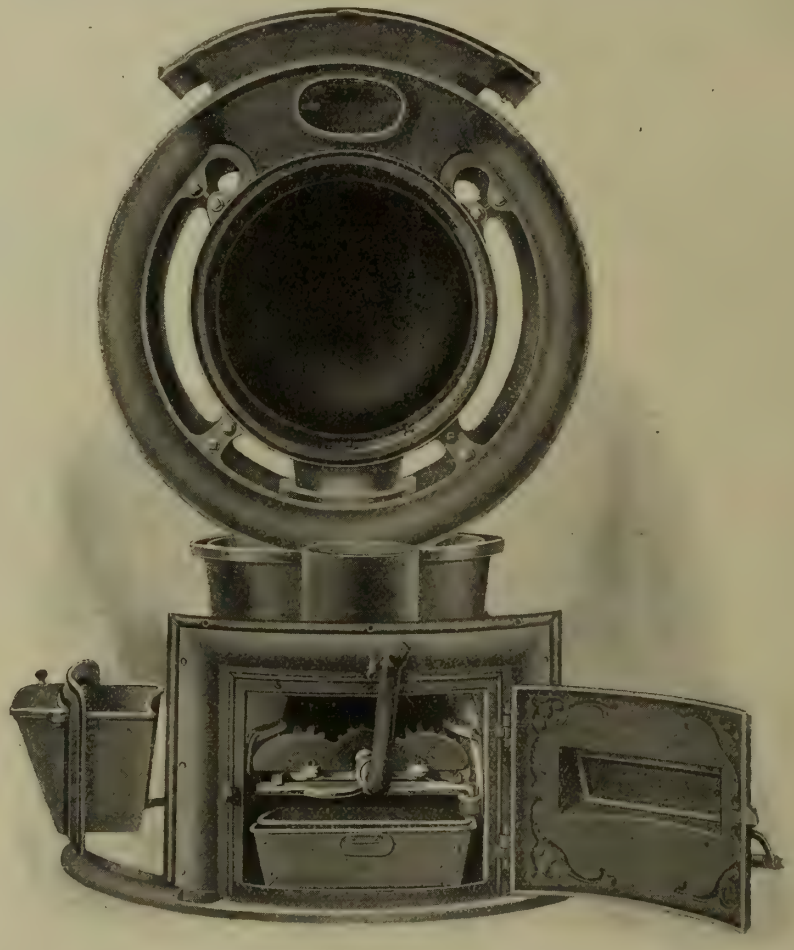
EVERY TOOL



"JEWEL" FURNACE New Pattern. Two Sizes, Nos. 21 and 23

A Special Low Furnace

Different in shape and proportion from our other Furnaces, being specially constructed to surmount the difficulty of obtaining a sufficient pitch to the Warm Air Pipes in buildings with **LOW CELLARS.**

When flat top is used the No. 21 Furnace, cased, will not exceed 4 feet in height.

Diameter of Fire Pot—No. 21, 19 in.; No. 23, 22 in. Feed Door Opening, 13 x 13 in.

All our Furnaces are constructed on Correct Scientific Principles, and are mounted and fitted with the greatest care, under the direction of skilled and experienced men.

OUR FURNACES GIVE SATISFACTION AND STAND THE TEST.

This cut shows the construction of the Furnace.
The part of Furnace above Fire Pot is tilted on its side in order to show Combustion Chamber and Radiator.

The Fire Chamber is of ample dimensions and the **Feed Door** measures 13 x 13 inches.
The Radiator is made of heavy steel plate and surrounds the Fire Chamber, except at Feed Door.
The Fire Pot is made of heavy Cast Iron in two sections, upper and lower. This construction prevents the cracking of Fire Pot by unequal expansion and contraction of the iron. The Fire Pot of No. 21 is plain. The Fire Pot of No. 23 is flanged and has therefore a much greater radiating surface. The two sections of Fire Pot are attached by deep **Cup Joint** packed with asbestos cement. All other joints in Furnace are similarly constructed and a **Jewel** Furnace properly set is **ABSOLUTELY GAS TIGHT.**
The Water Pan is inserted through the outer casing near the base of the Fire Pot. When the pan is kept full the evaporation of water ensures ample humidity at all times.
Notice the **Dust Flue** in front of the Fire Pot, Connecting Ash Pit with Fire Chamber. Through this flue all dust is carried off when cleaning out ashes or using poker or shaker.
No. 21 Furnace has a heating capacity of 15,000 feet. **No. 23 Furnace** has a heating capacity of 25,000 feet.
This is the latest addition to a very large line of **WARM AIR FURNACES.** **Manufactured by**

GOOD AGENTS WANTED THROUGHOUT CANADA

Code: A B C, 5th Edition

BISSELL'S Annual Fan Offer for 1911

Grand Rapids, Mich., May 25, 1911.

To Our Canadian Customers:

In presenting our Fan Offer this season, we want to emphasize that we are supplying the best quality folding Japanese fan that has ever been furnished gratuitously (as far as we know), for advertising purposes.

With each dozen "Cyco" or Ball Bearing sweepers ordered in response to this Offer, and to be shipped between now and August 10th, we will furnish free 50 of these extra quality fans. We are trying the experiment this year of giving our customers a better quality fan that we have furnished heretofore, believing that while reducing the quantity we furnish with a dozen sweepers to fifty, results will be better and that your good customers will be highly pleased to receive one of these better quality fans. Please note that when we already have orders for "Cyco" or Ball Bearing Sweepers to be shipped while our Fan Offer is in force, the fans will be included with such shipments just the same as if you ordered sweepers in response to this letter.

As this offer is made to stimulate business during the hot season, you will understand that we cannot furnish the fans on account of orders received and shipped prior to the date of this letter. Please bear in mind that we cannot undertake to print dealers' names on the fans; you can put your name on the fans easily with a rubber stamp.

We trust you will see wherein the fans will be of benefit to you during the hot season to pass out to your customers, and that we may be favored with your order. Goods will be shipped from our Canadian Factory at Niagara Falls, Duty Free.

Yours truly,

No. 1—4 Quarts of Dirt.

Remember the "Automatic" "Blows" as well as "Sucks," which no other Hand Power Machine does.

No. 2—1½ Quarts of Dirt.

No. 3—1½ Pints of Dirt.

Retail Price, $25.00.

A Vacuum Cleaner Test

The "AUTOMATIC" The Greatest Cleaner

Here are three piles of solid dirt.

PILE No. 1. (4 quarts) was pumped out of one strip of carpet by the AUTOMATIC.

PILE No. 2 (1½ quarts) was removed by another well-known vacuum cleaner.

PILE No. 3 (1½ pints) was also pumped out by a well-known suction cleaner. Each cleaner was given a perfectly fair test under exactly the same conditions.

The AUTOMATIC removed nearly three times as much as the next best and more than five times as much as the second best.

This simply shows the difference in cleaning power between the powerful but easy-running AUTOMATIC and other vacuum cleaners.

Every AUTOMATIC is sold with the positive guarantee to clean carpets, rugs, upholstered furniture, mattresses, pillows, etc., cleaner than any hand-power machine on the market or we will refund your money.

The AUTOMATIC removes every atom of dirt, moths, microbes of every kind, leaving the carpets and all household furniture as fresh, bright and clean as new. It is easy to operate and so well made that we guarantee it absolutely in every respect. We also make an Electric Vacuum Cleaner, which retails for $110.00. **Write for our free circular and discounts which tells you why the "AUTOMATIC" is the best.**

Unusual Ideas in Window Displays

Attention is Attracted and Business Increased by Novel Fishing Tackle Display —Interest Maintained by Offering Prizes for Trout Catches—Hardware Window Display Capped by Masonic Emblem—Price Cards Add to Selling Value.

If there is one direction more than another, in which the Canadian retail hardwaremen are making progress, it is in window dressing. Go where you will, you will find a good proportion of the hardware dealers of the country who are making a conscientious effort to develop the business-bringing efficiency of their window displays.

Of course, there are many cases where windows, as an advertising medium, are

Miniature Fish Pond in a Window.

apparently much neglected. At any rate they produce anything but a favorable impression on the passer-by. But even in several of these instances, it will be found that the dealer has really made a very studied effort to fix up his window, evidently recognizing its possibilities as a trade bringer.

The trouble with such dealers is that they have not the right idea of window dressing; and in this work it is the idea that counts. Some hardwaremen seem to think that their window should contain a sample of everything carried in their store. The result is a badly jumbled and miscellaneous collection which repels rather than attracts the public.

Quite naturally, such dealers do not think it necessary to change their windows, except when they add a new line, and then by dint of strenuous exertions, room is found for samples of the new goods, and the window looks worse than ever.

The writer passes two or three of such stores on his way to the office every morning. The only change he has noticed in their make-up during the past five months, has been the addition of an occasional paint poster, furnished by the manufacturers.

In one of these store windows, there is a paint poster, stuck to the window, so high from the sidewalk as to be almost invisible to the passer-by, and it is actually pasted on wrong side out. That dealer, in pasting up the signs, no doubt considered that he was doing a meritorious act, but he simply had the wrong point of view. He was on the inside looking out, and his imagination couldn't picture the attitude of the man who might be on the outside looking in. The sign read all right to him as he was pasting it on the glass, therefore it must look all right on the outside, as well.

The Attitude of the Buyer.

In window dressing as in advertising, it is the man who can, on occasion, put himself in the attitude of the buyer, who achieves success. The question which the window dresser should constantly ask himself, is "how will that window impress the passer-by ?"

Sterling Moffatt, who dresses windows for Connelly-Fairweather Hardware Co., at Sussex, N.B., has evidently grasped the idea, and he has evolved some windows which have materially added to the firm's business.

A very novel but effective idea was recently tried out by Mr. Moffat in dressing a sporting goods window. The feature of the display was a miniature fish pond, supplied by an upright pipe in the centre, with a sprinkler on top, which threw a spray of water over the pond. The window is trimmed all over, with moss, and the spray-pipe is also entwined with asparagus. In the left-hand corner, there is a deer, looking down into the pond, and the back ground of the window is adorned with all kinds of fishing tackle suggestions, which are also scattered about among the moss.

Fishing Competition a Feature.

As an added attraction the miniature pond is stocked with different specimens of trout such as are caught in the lakes of the Sussex district. These trout are supplied as a result of a competition held by the firm, which is arousing a lot of interest among local sportsmen. A prize consisting of a Special Two-Tip Split Bamboo Rod, has been offered for the best average of one half dozen trout, caught in or about Sussex. The competition has been eminently successful, no less than forty-two trout having been put into the pond during the past two weeks. The sportsmen of Sussex and surrounding country, are taking a keen interest in watching the trout in the pond, and this is creating an unusually brisk trade in fishing tackle.

The windows in which Mr. Moffat displayed paints and brushes on the one side, and tools on the other, were well designed and proved to be good business bringers. In both these windows, every article had a plainly marked price card attached, but the illustration is on too small a scale for these to show prominently.

A cleverly conceived idea in connection with the tool window, was the Masonic emblem of square and compass, which capped the display.

Well Designed Paint and Tool Windows.

Aggressive Methods of Handling Stoves in Summer

Orangeville Dealer Follows Up All Prospects by Personal Calls—How Stratford Firm Ousted Transient Traders in Their Section—It Pays to Feature Gas Stoves at This Season of the Year—An Ingenious Method of Securing the Trade of "Newly-weds."

Selling stoves in summer time is an occupation that entails much work, thought and ingenuity. The difficulties presented are such that few dealers ever really strive to lift their store departments out of the mid-summer rut. After the spring trade, they are content to rest on their oars until the big autumn rush. Three or four months of active selling constitute the stove year of a great many dealers.

There are, however, bright exceptions to the rule. By timely efforts to stimulate demand, many retailers manage to keep things moving pretty much all the year around.

The Gas Stove Trade.

At the present time the trade in ranges has just about petered out but gas and oil stoves are still selling well. People are rapidly learning that a gas stove is a great convenience during the warm weather and practically all homes where gas is available are being equipped with that very useful article. The demand for oil and gas stoves for use in summer homes is also on the increase. As this is the season of the year when the fortunate families, who can afford to flit to a summer resort, are rapidly leaving the cities, there is a well sustained demand for oil stoves and small gas ranges and grates. It is, therefore, found highly profitable to advertise these lines. "Take a gas stove to your summer cottage," reads an ad. used by an Ontario hardwareman, which has brought splendid results.

Noticing that the capacious windows in the Gurney Oxford store on Yonge Street, Toronto, were stocked with an interesting assortment of gas stoves, the writer made some enquiries as to the results obtained.

"We are doing a good business right along," declared F. H. Smith, the manager. "Of course, our trade centres very largely at the present time in gas and oil stoves. People are now pretty well settled for the summer and consequently the demand for ranges is not very active."

"As you noticed," he continued, "we are featuring gas stoves just at present and are doing a first class business, despite the fact that the season is getting on. The best method of stimulating demand is to keep attractive displays in the windows. Newspaper advertising, combined with continuous and effective use of the store windows, can be depended upon to create a demand."

Offered Cook Books.

The season is not so far advanced, however, that the dealer need despair of selling coal stoves and ranges. Many young couples are starting housekeeping this month and the trade of the "newly weds" makes June a highly profitable month for the furniture dealer. Why not for the hardware and stove man? The new home needs a range just as much as chairs and tables. Many couples, of course, leave the purchase of a range until the fall; some, however, fit up their homes completely at the outset. More could be induced to do this if a little effective advertising were done.

A case is recalled where a dealer in stoves advertised that he would give a cook book free with every purchase of a range. The book he offered sold at $2 and was consequently a valuable premium. The offer was, of course, a direct and rather wily bid for the trade of the newly married couples. It is an open secret that the bride finds a cook book very handy. The plan worked out so well that he repeated the offer each year afterward with equally satisfactory results.

Feature Small Ware.

An effective method of stimulating trade in the stove department is to feature the sale of tinware and kitchen utensils of all kinds. Women shopers will be attracted by a display of small articles of this description where, perhaps, they would pass a stove window without a second glance. Once inside the store, the salesman has a splendid opportunity to interest them in the question of a new range or a gas stove.

In some homes still the old time method of cooking with wood in a range is still observed during the summer months. It makes the house unduly warm and turns the kitchen into a mild inferno, but the long suffering and patient housewife has done the same for years and has never seriously considered any other way. When asked why she does not use a gas stove, she would probably reply that the price is too high. But let the salesman broach his proposition this way:

"Would it not be worth a dollar or two a month, to you to do your cooking in greater comfort? Certainly it would. Well, you can get a gas range for just that amount. Pay us so much down and a couple of dollars a month and we will sell you this range. By next summer, it will be paid for."

An argument of that kind is invariably found effective. What the dealer so often lacks, however, is the opportunity to present his arguments. A sale of tinware, which attracts women buyers to the store, gives him an opportunity to canvass them on the question of a new stove.

Followed Up Prospects.

Outside canvassing can be done with splendid success during the summer months. This is proven most conclusively, and often to the home dealer's undoing, by the transient stove salesman. Some retail dealers are wide awake enough, however, to follow out a campaign of the same kind themselves.

S. A. McCartney, of Orangeville, has adopted a system of following up prospects, which brings splendid results. He makes it his policy to secure as many names as possible of prospective purchasers, either in the town itself or in the surrounding district. This is done by enquiries from customers in the store and by generally keeping in touch with the happenings of the district. When a prospect has been secured, Mr. McCartney loses no time in getting after the business. He does not depend on a letter nor yet on a personal call. Instead, he loads a stove on a rig and drives out to the house in question. It is seldom that the rig does not come back empty.

The advantages of such a plan are obvious. It enables the salesman to see the customer before any competitors. He is able to demonstrate the stove effectively and, if the purchase is made, to install the article right there and then. The latter point is an important one. The salesman can bring the bargain to a head by placing the stove in the kitchen and showing the housewife how neat it looks and how it adds to the appearance and brightens up the room. As a "clincher" in binding the bargain, it has no equal.

Mr. McCartney does a splendid stove business and can, no doubt, place much of the credit to the thorough and aggressive system that he has adopted.

Meeting Transient Traders.

As stated above, the transient stove salesman has demonstrated that selling stoves in summer time is not an impossibility. Hawkers of this description generally concentrate their efforts on the country districts. They make a centrally located town their headquarters, ship in a carload or two of stoves, hire

a rig and start out to canvass the country. They do their work thoroughly, canvassing the country from end to end.

They make many sales. In the first place, they are prepared to meet any terms that the farmer cares to demand. Cases are known where stoves have been sold on two years' time. The traders will sometimes take second hand articles in exchange as part payment—an old stove, a washing machine or a cream separator. It looks like a bargain to Mr. Agriculturist and he buys the stove, little thinking that he is paying $60 for something that he could get from his hardwareman for $40. The trader has to get the top notch price because he takes all kinds of chances and has to wait for his money.

In many cases, the sales made by the hawker do not infringe on the trade of the home dealer. Stoves are sold to persons who would not otherwise have thought of buying. But in a majority of cases, the people who buy would otherwise have gone to the home dealer sooner or later and the latter has lost a valuable sale.

In all sections where the transient trader is found—and, like the measles, he is liable to break out at any time in any district—it behooves the stove dealer to "take counsel with himself" as to means of meeting this insidious and dangerous form of opposition.

A vigorous measure was adopted by Macdonald & Henry, of Stratford. The peddler was making himself particularly obnoxious around the Classic City and the whole district was being raked clean. Macdonald & Henry kept their ears open and soon began to hear complaints from people who had bought stoves from the plausible peddlers. Singling out one instance, McDonald & Henry went to the man—a farmer, residing not far from the city—and found that he was not satisfied with the working of his stove. They gave him one of their own in exchange. It was a good stove and they knew they could recommend it. The man could have bought it from them in the first place for less than he had paid to the peddler. The discarded stove was then placed in view in McDonald & Henry's store window, with a statement of the facts of the case and an offer to sell it for $15. There were no takers at the price, although that figure was about a quarter of what it had been originally sold for.

This incident set the people of the district thinking and the hawkers found that they had been "checkmated." People would meet their proposition with the crushing retort: "I can get that stove from McDonald & Henry for $15."

The fact remains that the home dealer is seriously menaced by the opposition of hawkers. In some sections, the situation is grave. It would pay the dealers in these sections to adopt some measure to impress on the public a few home truths.

Enclosure Privilege Should Not Be Abused

Some Dealers Do Not Show Due Consideration in Shipping Through Jobbing Houses—One Instance of Recent Date Recalled—The Situation Reviewed From all Standpoints.

Having often heard the complaint voiced that some retailers are prone to overdo the enclosure privilege, the writer took up the question the other day with the sales managers of several jobbing houses. To judge from what these gentlemen said, the privilege has been abused to a considerable extent in some cases. The jobbing houses receive an immense assortment of goods to send on as "enclosures" with goods ordered from them. Sometimes, though of course only in rare cases, the enclosures exceed in bulk the order filled by the jobber.

Here is one instance. Recently, an Ontario dealer sent in an order to his jobber for an assortment of goods and had a collection of enclosures sent to the jobber's warehouse so completely out of proportion to the size of the order that the salesmanager had a list prepared for purposes of comparison. The shipment sent out to this one dealer was found to be as follows:

Jobber's Goods.

1 box hardware.
1 parcel hardware.

Enclosures.

2 boxes tinware
1 parcel tinware.
1 bundle stove bricks.
1 parcel rubber goods.
1 parcel shoo fly rockers.
1 bundle toy barrows.
1 bundle iron wheels.
2 boxes paint.
1 only single wagon.

The goods ordered from the jobber weighed 70 lbs., the enclosures made up a weight altogether of 170 lbs. "But that is not what we complain so much about," declared the sales manager. "Many of the enclosures were articles which we could have sold to that dealer ourselves. For him to go to another firm to buy goods which we sell ourselves and then ask us to ship them on for him, is the last straw."

In the Warehouse.

A visit was made to the shipping warehouse. One corner of it has been dubbed "enclosure corner," and set aside for the storing of goods of that description. It was found to be heaped up with a motley collection of articles. Many heavy boxes, attaining almost to the dignity of packing cases, were to be seen, together with an infinite variety of small articles.

"That box of paint," the writer was informed, "has been here for months waiting until such time as the purchaser gives us an order so that it can be sent on." A large packing case was pointed out; it had been in the warehouse for a couple of weeks and was taking up a lot of valuable room. There were piles of goods consigned to individual dealers which had been gradually accumulating.

It was quite apparent that a tremendous amount of work was involved in handling the enclosure department. Articles must be looked up, telephoned for, and kept track of. The work of making up and checking over shipments has been materially added to in this way.

There is equal responsibility with enclosures as with orders. If anything goes astray or is damaged, the onus is on the jobber.

One man is told off in this one establishment to look after enclosures. It does not take him all his time, but there are occasions when he finds it necessary to secure assistance. It follows then that the enclosure system costs the jobber considerable.

The Other Side.

There are two sides to every story. In the present instance, there is this to be said in favor of the enclosure system. The retail dealer cannot afford to have all the goods that he orders from separate sources shipped to him separately. The larger the bulk the lower the express or freight charge. It is, therefore, a saving to the dealer if he can have his purchases collected at one point and sent on to him in one consignment. The logical point of collection for goods bought by the hardwareman is the jobber through whom he orders his hardware, as it is practically certain that the great bulk of the goods will be ordered from the hardware jobber.

The latter has always recognized the position of the retailer in this respect. When the order of a customer is ready for shipment, the jobber is quite willing to receive other goods and ship them on with the rest. By doing so, he saves the customer, particularly if the latter lives some distance away, considerable expense, trouble and delay.

But, in fairness to the jobber, the retailer should be careful not to overdo the practice. In the particular instance

quoted, the dealer has gone far beyond the limit. The wholesaler has, of course, splendid shipping facilities but his establishment is maintained to handle his own stock, not to serve as a distributing centre for all kinds of goods. When the dealer gives the jobber an order for goods weighing 70 lbs., and sends in articles bought elsewhere weighing 170 lbs., he is very seriously infringing on the privilege accorded him. What is more, he is taking a course unfair to his fellow dealers. The jobber has to meet the expenses of his establishment on the goods that he sells to hardwaremen. The more enclosures received, the greater the expense and this must indirectly be borne by the customers of the house. Therefore, the man who loads up the wholesaler is making his fellow dealer, who perhaps only occasionally avails himself of the privilege of shipping through his jobber, help pay the cost of handling his, the unthinking dealer's, supplies.

Frankly, the problem is one which calls for the exercise of fair-minded consideration all around. The jobber cannot in reason refuse to accomodate his customers by sending on small supplies; but at the same time, the dealer cannot expect to convert the warehouse of the jobber into a gratis distribution centre.

It is doubtful if any rule could be set, such as the establishment of the relative weights of order and enclosure. For instance, it might be mutually decided that the merchant could send enclosures to the extent of one-fifth, say, of the bulk or weight of the goods bought from the jobber but such a plan would not work out satisfactorily. The solution lies in the exercise of fairness and consideration on the part of both the jobber and the retailer.

PECULIAR TROUBLE WITH AN ENCLOSURE.

There is not a hardware jobber in the country, who does not know what it is to receive an order from a country customer, with the instructions "hold for enclosure from Blank & Co." Sometimes this practice is carried to such a length that it becomes somewhat of a nuisance, especially when the enclosures are more bulky and composed of more numerous packages, than the order itself.

Discussing this question with Hardware and Metal, a few days ago, a prominent Montreal jobber related an amusing incident which had come under his notice, in connection with an enclosure for one of his customers.

"This customer," he said, "was a boot and shoe merchant as well as a hardwareman, and the enclosure he wished us to forward with his shipment, was a case of shoes.

"The instructions went through to the shippers in regular order, the case of shoes was delivered to us by the manufacturers and sent out with our goods. We did not think anything more about it, until we received a letter from our customer saying that the case had arrived with one pair of shoes short. He had written to the manufacturers who declared that the case was intact when it left their shipping room. The customer intimated that something had happened to his case of shoes while it was in our warehouse.

"We immediately began to investigate the matter, tracing the case from the time it reached our warehouse, until it was shipped away, with our own goods. The first clue we unearthed was the information that one of the packers had recently attracted attention by appearing in a pair of new and very squeaky shoes. Every time he crossed the floor that squeak would resound through the whole warehouse, and it had become a standing joke among the staff.

"Further investigation revealed the fact that this packer had been the one who had assembled the shipment in question, and we soon had him on the carpet taxing him with the theft of the shoes. Seeing the evidence was so strong against him, he finally confessed that he had opened the case and taken out a pair of shoes of the proper size. The man was immediately given his dismissal and sent to the cashier, who paid him his wages to date.

"Of course we had to settle with our customer for the shoes, but we had our money's worth of amusement out of it. Even yet, it is laughable to think of the feeling of conscious guilt that man must have had, every time his shoes squeaked—and that was whenever he moved, for the shoes seemed to feel it their duty to make as much noise as possible."

A STOVE THAT SELLS.

Montreal, June 1st.—Talking about his stove trade, a local hardware man said a few days ago: "You would hardly believe that I am selling even coal stoves these days, but it is a fact. Just now there is quite a demand for gas ranges, and I am handling a stove that permits the use of coal, wood or gas. If I find that my customer is a possibility as a big stove buyer when she enquires for gas ranges, I call her attention to this combination stove. The result has been most satisfactory."

The work of building the plant of the Alberta Linseed Oil and Paint Co. has been started.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

A CORONATION SOUVENIR.

A booklet issued by Hobart, Bird & Co., of Coventry, England, in commemoration of the Coronation, is a fine sample of artistic printing. The cover, in harmonious colors, shows portraits of King George and Queen Mary, and beneath, a colored sketch of Windsor Castle. The body of the book is printed in blue and gold, the principal article being a reprint from "Bicycling News," describing a recent visit paid by the editor of that paper, to Hobart, Bird & Co.'s works. It is written in a very entertaining style, and conveys a good idea of the extent of this plant, and the volume of business done, both at home and abroad. The book also contains illustrations and descriptions of the "Royal Hobart" and "Handy Hobart" machines, the later being a motor cycle which is a leader with Hobart, Bird & Co.

BUILDING AND MECHANICAL SPECIALTIES.

A condensed catalogue has been issued by Eadie-Douglas, of Montreal, Toronto, Ottawa and Winnipeg, giving, in concise form, information regarding the various lines of manufactured goods, which they handle. The booklet is of a convenient coat pocket size, printed in two colors, and each line, such as building materials, steam specialties, or mechanical supplies, is taken up separately, and the products of each manufacturer represented, briefly described.

CARBORUNDUM RAZOR STROP CATALOGUE.

The Carborundum Company has just issued a neat catalogue describing and illustrating the complete line of Carborundum Razor Strops. These strops have several distinguishing features that make them ready sellers. The strops are of high-grade leather. One side of the strops is corrugated and the corrugations and the texture of the leather are filled with the finest of carborundum powder. This gives a quick keen edge to the razor and the smooth side of the strop is used for finishing. The strops are fitted with handsome hardware including the new split ring holder, which enables the user to hang the strop from almost anything. The razor case handle in which the razor can be slipped when not in use, is another novelty found only on these strops. The catalogue will gladly be sent with full information regarding discounts, etc., to any hardware dealer.

New Goods for Hardware Men

A PATENT STOVE PIPE.

One of the latest products of E. T. Wright & Co's. factory at Hamilton, is the "Perfect" Patent Stove Pipe. The feature of this device is a lock, which holds the pipe perfectly rigid when it is set up. As there are no staples to drop out, and as the lock is proof against either pressure or expansion, there is no danger of "Perfect" pipe telescoping, or falling apart.

The quality of plate used in making this pipe is of a special grade, suitable for going through the necessary operations, without breaking or cracking. As a precaution against rust, each length is thoroughly oiled before being crated. This pipe is made in 6 and 7-inch sizes, and is crated 25 lengths in a crate.

SPRING CLIPS FOR X-CELLS.

The Canadian Carbon Company, manufacturers of X-Cell batteries, (the ones which show Nine Lives,) have brought out an excellent improvement on their battery connections. Instead of the old style split binding posts with knurled nuts and brass caps with threaded studs to which also knurled nuts were attached, they are now using spring clips which they attach to the carbon electrodes on X-Cells by soldering the spring

clip to a flat carbon brass cap. While this may look very simple it is said the improvement hits the point and fills a long-felt demand. All the user of X-Cell batteries has to do now, is to press down the spring, slip in the wire and to forget everything else about the batteries. No matter how heavy the vibration is, the wires which connect the cells cannot become loose and the trouble encountered before by using pliers has become a thing of the past. There are no more screws to turn, no pliers, no more sore thumbs. We show here an illustration of the improvement, which, as we understand, is used now exclusively by the Canadian Carbon Company, on their X-Cell Ignitor type, which type is made especially to meet the most severe conditions of strenuous ignition service. Our representative, who visited the factory of the Canadian Carbon Company, Limited, at 12 Shuter street, Toronto, the other day, was shown the first X-Cell Ignitor type made, which was manufactured on April 22nd, 1909. Although being kept for over two years on the shelf under changes of weather conditions, the battery showed, on a Weston ammeter, strong 15 amperes.

We are told that the improvement on the connections of X-Cell batteries referred to above has met with such approval by the largest firms in the automobile and motor-boat supply line that they have specified that their future orders should be filled with this new type of connections only. Even the Bell Telephone Company of Canada, who have adopted X-Cell batteries exclusively for their apparatus, demand that each cell should be fitted with this latest improvement.

TORONTO MAN INVENTS NEW AUTO WHEEL.

Mr. May, mechanical foreman of the Toronto Silver Plate Co., has invented a new spring auto wheel, which bids fair to solve the problem of finding a substitute for pneumatic rubber tires. The wheel consists of a metal rim, carrying a small hard rubber tread. This tread has nothing to do with the resilience of the wheel but it is used solely to give traction. There are from eight to ten spokes in the wheel, each one of which is in reality a very heavy coiled metal spring, seated in the hub. The drive is taken by one rigid spoke running through the diameter of the wheel.

This rigid spoke is perhaps the most notable feature of the invention. Many spring wheels have been made before, but those with sufficient resiliency have not been adequate to take the drive from the live axle. This problem is entirely eliminated in the May wheel.

The first wheel, run on a car owned by Mr. Vissack, a Toronto automobile expert, has already done nearly a thousand miles and is still in perfect condition. Anyone riding in the car to which it is attached, would never know but what the largest and best pneumatic tires were being used. Big bumps are taken with ease and cobble stones—the hardest test of all—produce absolutely no vibration on the side of the car that is equipped with this wheel.

It is claimed that in every way it will equal if not surpass the ordinary pneumatic tire. Its cost is very much less, its life is very much longer, and there is absolutely no danger of a puncture or a blowout or any other form of tire trouble.

A company has been formed to manufacture and sell this wheel in Toronto. There is a considerable sum of money behind it and several prominent Toronto men are interested. Among these is Mr. G. E. Gooderham, president of the Toronto Silverplate Company.

A NEW FISH GAFF.

This new and practical gaff is the latest product of the Marble Arms & Mfg. Co., Gladstone, Mich., and is due to the inventive genius of W. L. Marble who has perfected the Marble Game Getter Gun, the Marble Safety Axe and many other outing specialties.

This new Marble product, known as the Clincher Gaff does not have just a few long teeth, but a series of short teeth, just sufficiently pointed to hold

the fish in a vice-like grip, but not long enough to cut through the scales and tear the flesh. The points are held open by the coiled spring and by contracting the muscles of the hand, the fisherman can bring the points together instantly and with much or little pressure according to the size of the fish.

The larger illustration shows the gaff open ready for business, while the smaller one shows how the jaws close over the fish holding him in a grip that he can't possibly get away from no matter how hard he struggles. It is designed for fish of all sizes from a half-pound up to twenty pounds.

PUBLISHED EVERY SATURDAY

WHAT CONSTITUTES NEWS?

In conducting a trade newspaper, the question frequently arises whether the material which is periodically furnished by manufacturers and jobbers is to be classed as news, or merely as "puffs," which have no real place in the reading columns of a well edited paper.

Hardware and Metal is called upon, every week, to discriminate between these two kinds of copy, and, in order that full justice may be accorded to all, a definite rule has been adopted, which is followed in every case.

The test applied is that the copy shall have real news value, and shall be of interest to a sufficient number of our readers.

New goods which are just being put on the market possess news value of a high class, in a trade paper whose readers have their eyes open at all times for novelties and improvements in staple goods. News regarding changes in management, descriptions of new manufacturing processes, are also admissible, as are announcements of any vital changes in business policy. When a manufacturer erects a new plant or an important addition to his old factory, the distributors of his goods are naturally interested in knowing about it, and Hardware and Metal is glad to publish news items of this description. It is our policy, however, to exclude illustrations of exteriors of buildings, as architectural drawings are usually misleading, the size of the building being merely a matter of of perspective.

An actual and recent occurrence, therefore, should form the basis of any reading matter for publication in Hardware and Metal, and this policy of accepting news and rejecting "puffs" from manufacturers has been taken in the interests of both readers and advertisers.

It is only natural that readers who are in the habit of stumbling across pointless "puffs" in the reading pages of a paper should soon begin to question the value of such a paper to them, and, even though they might continue as subscribers, the tendency would be to pay less and less attention to it. Just at this point, the advertisers' interests would be affected, as a paper which has not the absolute confidence of its readers, and is not really interesting to them, cannot accomplish results for its advertisers.

It is not long since manufacturers, in placing advertising contracts, wished it to be understood as a part of their contracts that they should have the privilege of contributing "write-ups" to the reading columns of the paper. A different opinion now prevails, however, and the closest students of advertising realize that a paper which carefully guards its reading columns against matter which does not interest its subscribers, is also performing a service for its advertisers, who benefit from it in direct proportion to the confidence reposed in it by its readers.

CIVIC HOLIDAYS SHOULD BE WIDELY ANNOUNCED.

The season of civic holidays will soon be at hand, and, unless some special precautions are taken this year, commercial travelers will be running into the same old traps as before. It very frequently happens, that, in a single week, travelers will encounter one or two unexpected Civic Holidays, with possibly a couple of half holidays thrown in.

Any business man can readily understand what an economic waste results from so much lost time. The manufacturer or wholesaler who pays the salaries and traveling expenses of a staff of salesmen, feels acutely the loss of business attendant upon these local holidays which may cause his men to be idle for one or maybe two days a week, during the summer months.

The fact that these holidays and half-holidays are matters of purely local interest and arrangement, makes them an added hardship to traveling men, for it is often impossible to learn the dates of Civic Holidays, except in the actual towns concerned. It is quite a regular thing to find that a merchant in one town does not know when another town, eight or ten miles away, will hold its Civic Holiday. And so the traveler goes from town to town in constant fear that he will be held up some place down the line, by a Civic Holiday or weekly half holiday.

On another page, is a letter from a hardware traveler who has lost time, in the past, through these local holidays, and wishes to guard himself against it this year. His letter contains a good suggestion, that Hardware and Metal should publish a list of Civic Holidays and half holidays, so that readers, both travelers and hardwaremen, may know the dates, and make arrangements not to visit any of these towns on holidays. In preparing this list, we would ask the co-operation of our subscribers, and invite them to write us giving us the date of the Civic Holiday in their own and surrounding towns, and also stating what local arrangements have been made for the holding of half holidays during the hot weather.

KEEP WELL POSTED.

In the paint department this week will be found a review of the conditions on the turpentine market during the past four months. There have been sensational developments during that period. The price of turpentine first soared steadily upward until it reached an unprecedented height. Then the turn came and the price sank even more rapidly. The situation altogether has been one of unusual interest.

It has demonstrated, among other things, that no dealer can afford for a moment to lose sight of market conditions. The price of turpentine to-day is about 60 cents lower than on April 1. What an opportunity that spells for gain or for loss! It is not judged wise to buy in a speculative mood but no dealer can afford to ignore the possibility of loss and he must therefore keep alive to the market situation and make sure that he is buying wisely and at the right pirce. The market pages in Hardware and Metal have given full news of the turpentine situation right through the high price crisis and readers have therefore been kept posted on the points that they should know and understand.

The weekly market pages of Hardware and Metal are well worthy of careful and regular perusal.

CO-OPERATION FROM MANY DIRECTIONS.

It is safe to say that the hardware trade has never had so many and diverse influences working in its favor, than is manifested in the remarkable anti-fly crusade which has agitated the civilized world, during the past couple of years.

Newspaper columns have been open to contributions from any and every source, calling the public's attention to the dangers arising from the typhoid fly. Doctors have warned their patients against these disease-carrying pests, and lecturers have thundered from the platform against the terrible risks incurred by permitting the typhoid fly to have access to any dwelling, or place where people congregate.

Authorities are all agreed that it would be humanly impossible to exterminate the fly. The only relief comes through preventing its entrance into dwellings, or other places where it could spread infection. And the only way to exclude the fly, is to securely screen all doors and windows. This is the advice which the public are receiving on all sides, much to the profit of the hardwareman.

The latest force to ally itself with the screen door and anti-fly crusade, is the moving picture theatre. In St. John, N.B., lately, the dangers of allowing flies to have free access to dwellings, were graphically presented in a series of motion pictures, and the hardware dealers of the city were not slow to take advantage of the effect produced, by dressing their windows and shaping their newspaper advertising accordingly.

It is for every hardwareman to use for his profit, the various forces which are working on this anti-fly crusade, which is calculated to so largely increase the sale of screen doors and windows and fly traps of different kinds. Above all, he should see that his local newspapers do their share to educate the people of the district to the necessity of screening their houses.

THE JOBBER AND ENCLOSURES.

The complaint has been heard that dealers frequently abuse the privilege of shipping "enclosures" with goods ordered from their jobbers. A case is cited where a certain dealer ordered hardware from his jobber weighing 70 lbs. and then had enclosures weighing 170 lbs. sent to the jobber's warehouse to be shipped on with the original order.

The retailer has a similar problem to face. His own customers too frequently make a purchase and then leave an armful of parcels to be sent with the order. It is an aggravating practice and every dealer has had ample reason at times to express harsh opinions on the thoughtlessness and presumption of the average person. It will, therefore, be readily understood why the jobber has sometimes found the enclosure system a great hardship, as it amounts to pretty much the same thing.

Many dealers are in such a position, however, that they require a certain amount of assistance from the city jobber in this respect. The town or country merchant would find it a great hardship if he had to have everything ordered in the city sent on separately. Therefore, the practice of collecting all purchases at the jobber's and having them sent on together, has arisen. The jobber has always been willing to oblige in this way. But the practice should not be carried beyond reasonable bounds.

CHANGE WINDOW DISPLAYS.

There are some hardware stores which can boast of window displays almost as familiar to the general public as the name of the firm itself. This familiarity has been created by reason of the fact that the windows go almost unchanged from year to year. The writer could name half a dozen firms which, to his certain knowledge, have not changed their windows since early last fall. How much longer they will be left is, of course, problematical, but they look to be good for a long time yet. Assurance has been received that the displays in some at least of the stores are always allowed to reach a ripe old age and then, seemingly, are retired with regret.

A window display is not like good wine; it does not improve with age. Some things in connection with the hardware business do; an advertising "slogan", for instance. But, whereas an advertising phrase becomes more familiar and forceful, the longer it is used, a window display, which is allowed to outlive its usefullness, gathers only dust and earns contempt for the proprietor.

Only in cases where a display of exceptional interest has been devised, should it be left longer than a couple of weeks. Rapid changes make the window a continual source of interest to the paser-by. Indifference only is accorded to the display of long standing.

POINTED EDITORIALS.

A venerable window display is a menace to the prosperity of the business.

* * *

If everybody in your town who should paint his house, were to do so, how much would your paint business increase?

* * *

The transient trader is even more of a menace than the mail order house. A glib peddlar can argue better even than the attractively illustrated catalogue.

* * *

More brass goods will be sold during the next few weeks than at any other season of the year. Get your stock out and display it as prominently as possible.

* * *

This is one of the busiest seasons of the year in the furnace trade. Keep tab on building operations and see that a good share of the heating contracts come your way.

* * *

Experts judge that turpentine has now reached the bottom rung on the price ladder. But turpentine is too unsteady just now for even experts to judge with certainty.

* * *

The man who would rather borrow his neighbor's lawnmower than buy a new one from the hardware store, is sorely in need of a little timely education. The dealer should see that he gets it.

* * *

Nothing has been heard with reference to the workings of the Offensive Weapons Act for a fortnight or so but it is only too apparent that the trade in revolvers has fallen off to an appreciable extent.

* * *

There cannot be too many holidays to suit the paint dealer. Few householders can withstand the temptation to get busy with a paint brush on a spring holiday. It seems to be somewhat of a natural instinct.

* * *

Hardwaremen sell screen doors in the winter time, so why not stoves in the summer? Stoves are necessary, even through the summer, while it would take a fertile imagination to conjure up any really useful purpose that screen doors serve when the snow is on the ground.

Wall Paper Should Be Carried by the Trade

It is a Legitimate Line for Hardware Men—Brings Women to The Store and Gives a New Impetus to General Business — Helps Paint Trade and Other Spring Lines—Many Dealers Already Carry It Extensively and Speak Highly of the Manner In Which it Assists Business.

Wall paper, by its very nature, is an article that should be carried by the hardware trade.

Why? asks the practical retailer, and he is answered by others of the trade who have found this line well worth their attention. Several of the reasons may be put down as follows:

Like paint, whiting, varnishes, etc., it is natural to the hardware store.

It attracts women to the store.

It thereby helps the sale of articles that women are especially interested in.

It is a profitable line when handled properly.

It Belongs to the Trade.

Hardware men in different parts of the country have affirmed that wall paper is a legitimate line to carry. In Perth, Carleton Place, Smiths Falls and other places, it is carried extensively. In Montreal during recent years, it has been taken up by the trade and is becoming more and more regarded as a hardware staple. L. N. & J. E. Noiseux, Notre Dame St., have a large wall paper department, and their experience amplifies the statement that this article can be and is handled by the trade with profit, and thereby, with satisfaction.

To a representative of Hardware and Metal, L. N. Noiseux stated that when people require goods for housecleaning it is seldom only one article they demand. They begin say with whiting, and they want paint, varnish, wall paper, window blinds, putty, brushes and many other kindred articles. They probably do not want all of them, but their demands are generally quite generous.

But apart from the statement of this hardwareman, why should a woman order whiting from the hardware man and go elsewhere for wall paper? If the hardware dealer does not want the business, that is about the only reason he could give. But there are not a few who refused to allow some other merchant to corner the wall paper trade, and it is these retailers who have the best wall paper departments, and it might be added that their paint departments are flourishing. The same might be said of their general business. There possibly have been failures, but the writer does not know of them.

It is hardly necessary to deal further with the question as to whether wall paper is natural to the trade. The retailer that does not admit it, simply does not want to consider it such, for some reason known to himself.

A Magnet for Women.

It goes without saying that wall paper attracts women. A visit some afternoon to the Noiseux store will demonstrate how much the wall paper department contributes to the whole business. About three o'clock in the afternoon women entering the store for one article or another took their time to look over the various articles displayed, and Mr. Noiseux takes full advantage of this fact. Conveniently placed inside the door were refrigerators, ice cream freezers, screen doors, wash tubs, wringers and such household goods. On a second visit to the store there was a noticeable gap in the arrangement, and on enquiry it was stated that a large refrigerator had been disposed of, the sale being largely due to the fact that wall paper was carried, and had attracted this buyer.

Mr. Noiseux stated that he did not recall any particular sale outside of that mentioned, but his daily experience had taught him that when a hardware man carries house furnishing goods, he should make his line complete. When a person makes one purchase in the store, he or she should not need to go to some other store to complete his or her order. There is not the danger then of losing the customer by this breaking up her trade. This is one of the reasons for carrying wall paper. It is one of the principal lines connected with the big spring and autumn cleaning campaigns. It is linked with every one of the articles that is in so great demand at those seasons.

The hardware man knows that there are many men whom he never sees in his store. The factory man, the office man and others who work all day and have but little need of hardware goods, these are rather rare visitors. But there are many things the wives of these men could buy and do buy, and the question is where she buys them. In the larger places, it is generally the case that the big departmental stores that attract her with one "bargain" catch her eye in other departments and secure her trade that should have rightly gone to the big hardware dealer around on another street.

That Afternoon Shopping Business.

It seems that the hardware man is beginning to realize that he should get more of that afternoon shopping business. Carrying stocks of household utensils, seasonable lines, etc., light goods that are for home use, he should have more of the women folk in his store. One article helps another and so on, but none will be more beneficial in this respect, especially at two seasons in the year, than wall paper.

An Ottawa retailer told the writer not long ago that his business in graniteware was not as satisfactory as it might be. Now women are practically the only purchasers of these goods, and it follows that this retailer was not drawing the women to his store in sufficiently large numbers. The attention he was giving this ware was probably not enough of itself to bring the women to his store. He needed publicity in a combination of directions, and wall paper is just one of those lines that brings the women to the store during quite a few months in the year while the husbands are earning the wherewithal to pay for their purchases. The fact that other hardware men have made this department a success is one of the best reasons for its appealing to the trade.

Permits Must Be Secured for Every Order

Ontario Wholesalers and Retailers Will Not be Able to Do Business in Revolvers on a "Blanket Permit," According to Toronto Chief of Police—Nothing Further Has Been Done in The Matter, but Steps Will be Taken Later.

No "blanket permits" for the sale or purchase of revolvers or knives, included under the new Ontario Offensive Weapons Act, will be granted. This is the latest development; otherwise, the situation with refrence to the Act and its workings remains the same.

The decision was given by Chief Grassett, head of the Toronto police force, in response to a letter from a Toronto wholesale house. The wholesaler in question had written asking if it would be permissable to secure a permit for the sale of revolvers to retail dealers, one permit to cover all cases. The Chief's answer was to the effect that such a course would not be allowed; that a permit would have to be secured for each specific sale. The wholesaler interprets his letter to mean that he (the wholesaler) will have to get a permit every time he wants to sell goods to a dealer, and that the dealer will also have to get one every time he wants to buy a consignment. If this interpretation is correct, it throws a new light on the

Act, and further complicates the situation. It had never before been suggested that the jobber would have to get a permit to sell, the only restriction under the act being that no sales could be made to dealers who had not secured permits to buy; which was deemed to be more than sufficient in the way of restriction.

At any rate, Chief Grasset's letter disposes of the hope that dealers would be allowed to purchase through their jobbers, after securing a permit from the local police to do so, the one permit to apply in all cases, after the manner of a license. If such a course had been permissible, the difficulties in the way of legitimate trade would have been in a measure cleared away. As matters now stand, new difficulties have been added.

No Orders Filled.

As far as can be learned the jobbers are doing absolutely no business in revolvers, hunting knives, etc. Orders have been received from dealers, but, as no permits were sent along, the orders have been in all cases refused. Not a single case has been heard of where an order for revolvers has been filled.

Wholesalers have decided to accept the inevitable—for the time being. The refusal of their request for an audience with the "powers that be" at Queen's Park, has deprived them of an opportunity to present their views and explain the difficulties under which they have been placed by the act. Opposition has been, as a result, dropped for the time being. "We are too busy just at present to go into this matter more deeply," declared one jobber. "But that does not mean that we have dropped it. Something will be done later on." It can be accepted as a certainty that, when the hunting season arrives and the demand for this class of goods starts, a determined effort will be made to have the unfair restrictions removed.

Dealers Not Selling.

In the meantime, retail dealers have taken pretty much the same stand as the wholesalers. They have adopted what a certain statesman once termed "the masterly policy of inactivity." The inactivity extends to the sales, and little, if any, business is being done. It is given out at provincial police headquarters that a number of permits have been given out, but it is true that a great number of requests have been refused. Many dealers report that they have not made a sale since the act went into force.

Partnership of Forty-five Years' Standing Ends

W. S. Harland Retires From Firm of Harland Bros., Clinton—Some More Reminiscences of This Pioneer Hardware Firm—Several Patents Were Taken Out.

Harland Bros., Clinton, Ont., have dissolved a partnership which has lasted over forty-four years. W. S. Harland, the retiring member of the firm, learned the woodworking and carriage building trade, being for several years in the employ of Fred Rumball. Subsequently, he carried on for a couple of years a wagon and carriage business in company with R. Lane. On the dissolution of this partnership, Mr. Harland went to the State of Ohio, returning to his native land on June 24, 1867 to help celebrate the first birthday of the Dominion. At that time he entered into partnership with his brother John T. Harland, who had learned the tinsmithing and had filled a position for some time with T. J. Birch, Stratford. After that he had been in St. Mary's and, on returning to Clinton, had been employed with Searle and Davis. The two brothers went into business in a small shop. The following year they rented from Commander & Elder, one of the stores in a brick block just completed at that time. This they bought later and have continued to occupy it ever since.

During their business career, they took out letters patent for four different articles:—1. A glue pot, which they sold in large quantities; 2. A cream can, of which the shop right to manufacture they disposed of in nearly every city and town in the province; 3. A wood furnace, the patent of which was purchased by the William Buck Stove Company, Brantford, who named it "The Clinton Furnace," and which is still listed in their caralogue; 4. An oil can, of which they sold the patent outright in Canada, Great Britain and the United States.

In a business so long and extensively carried on, there were of course, many apprentices who have since become scattered in all parts of the country. Those still residents of Clinton are: "Tom" Johnson, for many years foreman at Davis & Rowland's, and who has since taken over the business himself; "Tom" Greig, general agent of the Massey-Harris Co., who has so gained in rotundity of late years that he would now scarcely trust himself on a roof to do an eavetroughing job; "Billy" Webb, an artist at the trade and who could turn out as much work in ten hours as any one the firm ever had experience with. Prof. McKay was also one of their students. After working at the trade for several years he turned his attention to business college work and at the time of his decease owned a school at Kingston and another at Toronto. Ed. Paulin and John Worsell, who subsequently lived in Goderich, received their thorough knowledge of the trade with Harland Bros.; John Brownlee, now proprietor of a large concern in the city of London; John Kelly, who crossed the bourne a few weeks ago; Charles Whitney who passed away some years ago; T. Swantz, now in Sask., James Richardson, in Mich.; Phil. Gies, who carries on an extensive foundry in Berlin; "Bob." Johnson, in business at Sask., but who always asks to be remembered to his old "bosses" in Clinton; W. Gillespie, in Brussels; John Donaghy, brother-in-law of Captain Sheppard; James Burns, and George A. Knox, now of Toronto, and son of "Old Man Knox" of Wingham; were among those who graduated from Harlands.

As has already been noted in Hardware and Metal, Harland Bros. disposed of their plumbing, heating and tinsmithing department to Byam & Sutter, of Stratford, some weeks ago. J. T. Harland will continue the hardware business under the old firm name of Harland

UNIFORM DATES FOR CIVIC HOLIDAY.

The following letter which has been received by Hardware and Metal from a commercial traveler calling upon the hardware trade, voices the opinion of practically the whole traveling fraternity:

Editor Hardware and Metal,—There are a number of half holidays during the summer months, and each town seems to vary in the day selected, some choosing Wednesday, while others have Monday or Friday. Civic holidays are also very irregular, some coming in July, and others in August or September.

If some uniform date could be arranged by the various Boards of Trade, for these holidays it would be much better for the travelers. The writer would suggest that a list of these holidays be published, for the benefit of travelers and readers of your valuable journal.

Last summer the writer happened into two of these half holidays and one civic holiday, in one week, and this greatly upset business and other arrangements.

If it is possible to publish a list, as suggested, it would be very beneficial, especially to the numerous travelers, and other business interests.

TRAVELER.

News and Methods of Canadian Hardwaremen

Hardwaremen Profit by Anti-Fly Crusade — Free Baseball Score Cards Advertise Sporting Goods Dept.—Demonstrating il Stoves.

DEALERS INSTALLING PIPE-THREADING MACHINE.

Preston.—Bernhardt & Gies, of this town, have for the past four years, conducted a very successful plumbing and steamfitting department, many of their contracts having been for public buildings in towns and villages quite remote from Preston. Their business in this line has been growing so rapidly that they have found it necessary to instal a pipe threading machine. They are looking forward to having lots of work in this line during the summer.

NOVEL EXPEDIENT.

Regina.—J F. Robinson & Co. have originated a novel form of advertising. Two handsome bicycles are to be given away free to customers of the store. Every customer who makes a purchase amounting to two dollars is given a key. If the purchase amounts to $4, two keys are given, and so on. At a certain date the holders of keys will be invited to the store and the parties holding the keys, which open the bicycle, will take the wheels.

In the meantime, the two bicycles are on display in the window and much interest is being created.

TO BUILD FINE NEW STORE.

Hamilton.—The Mills Hardware Co. of this city, who are now operating two retail stores, one on John St. South, and the other on Barton St., have recently put through an important deal which will eventually place them in a commanding position among Hamilton's retail establishments.

This firm have purchased the John B. Gay property on King St. East, and it is their intention to erect on the newly acquired site one of the handsomeest retail stores in the Dominion. The front will be of English glazed terra cotta and the store will cover an area of 38 feet by 137 feet in depth, and in one span, there being no columns on the inside. It is said that this will be the largest single span store in the Dominion, and everything will be up-to-date in its appointments as a hardware store. The Barton street store will continue in busi- just the same, and both will be run in conjunction with each other under the present management of Mr. Nelson Mills. The John St. south store will be discontinued when the new building is ready for occupancy. The ground floor area of the new purchase will be nearly double that of the Barton street store, which being 34 x 100 ft. in size, is now looked upon as a pretty large affair, doing business away from the centre of the city.

TAKING ADVANTAGE OF ANTI-FLY CRUSADE.

St. John, N.B.—Local hardware dealers are beginning to feature in their windows and about their stores quite prominently, fly screens, fly catchers of different patents, and screen doors.

It is expected that the sales in screen doors and window screens will be particularly large this year for the reasons given above, and because the people have become educated to the dangers accruing from the fly. In the daily press, both in the editorial and local columns, articles have appeared warning the citizens to prepare for the extermination of the pest, and of the serious consequences of not doing so, and in some of the local motion picture theatres, hundreds of citizens have seen a film illustrative of the dangers of allowing flies to make their homes where people reside.

With this in view, some of the larger merchants have already made displays of screen doors, and window screens, making their display quite attractive by show-cards, containing "catchy" lines on the habits of flies, as to where they breed, what gathers them, etc. and showing one means of being rid of them —screens on all the windows and doors Of course it is rather difficult to properly display screen-ware, but in the larger windows, it is being done, while in the daily press considerable space is being devoted by hardware merchants to their stock of screens.

FREE SCORE CARDS ADVERTISE SPORTING GOODS.

Fredericton, N.B.—The enterprise and up-to-dateness of the sporting department of the firm of Messrs. James S. Neill & Sons, of Fredericton, was shown this week in their issuing score cards for the opening of the professional baseball games in that city. The cards were presented free and besides proving a great convenience to the fans, were a good means of advertising the sporting wares of the firm.

DEMONSTRATED OIL STOVES.

Bradford, Ont.—A. T. Howes & Co. held a demonstration on Friday of the line of oil stoves that they are carrying. A large crowd was attracted to the store.

An interesting and satisfying feature of the demonstration was the serving at a table placed in the centre of the store of a cup of tea and a hot biscuit to all who attended. The tea had been made on the stove and the biscuits had been baked in the oven—the latter operation requiring but nine minutes.

During the demonstration, figures were given out as to the cost of running oil stoves and the results which can be obtained.

DEALER MANUFACTURERS BICYCLES.

Blenheim, Ont.—C. E. Myers, hardware merchant of this place, makes a specialty of bicycles, automobiles and repairing, and has been very successful in this line. During the winter months he manufactures his own wheels—the "Myers Special."

As a means of boosting his bicycle and automobile department, Mr. Myers has issued a very neat road guide of the route from Detroit to London, Hamilton and Buffalo. This feature proves very popular with tourists.

DEATH OF A VETERAN TRAVELER

After being practically laid up for almost a year, J. A. Demers, who represented Lewis Bros., of Montreal, in Eastern Quebec, has passed away.

Mr. Demers had covered the territory from Quebec City to Chicoutimi, for the past sixteen years, and he had hosts of

The Late J. A. Demers,

Lewis Bros.' Representative in Eastern Quebec.

friends on that ground who will keenly regret his demise. He was the soul of honor—one of the finest of the old French school, and from the moment he joined the sales staff of Lewis Bros., he was one of the firm's most conscientious workers.

Captain Demers, of the Richlieu & Ontario Navigation Co., was a brother of the deceased.

HARDWARE TRADE GOSSIP

Ontario.

Freek & Clark will shortly open a hardware store at 10 Adelaide St. West, Toronto.

E. Holt Gurney, of the Gurney Foundry Co., is leaving on a trip to Europe. He will be absent about six weeks.

W. H. Gerke, manager of The Martin-Senour Co., Montreal, spent Monday of this week, at the firm's Toronto office.

The Standard Sanitary Manufacturing Co. are already enlarging their factory and plant at Toronto. A new building is being erected for the production of small ware.

Thos. Rutherford, who has been for years head tinsmith with J. S. Moir, Arnprior, has gone to Calgary, where he has secured a position. His wife and family will remain at Kingston for some time before moving out.

W. H. Lake, Queen street west, Toronto, is showing a chair in his window, only half of which has been painted. A placard announces that the splendid result on half the chair was attained by the use of the varnish shown in the window.

The Paroid Roofing Co. have presented each member of the staff of the Geo. Taylor Hardware Co. with a bronze medal for their success in selling roofing supplies. Ed. Hansman, a member of the staff, has been placed in charge of the hose department.

On Tuesday morning Miss Margaret Kelly, who for the past two years has been bookkeeper at P. Cunningham & Co.'s hardware store at Tillbury, was united in marriage to Joseph Bedard, for the past five years head plumber with J. C. Wanless & Co., Chatham. The bride was the recipient of a handsome hall rack from the company, and Mr. Bedard was presented with a marble clock.

The National Hardware Co., Orillia, have decided not to move, despite the splendid inducements offered by Peterboro and other places. Instead, the company will double the capacity of their present work. Plans for the enlarged plant are now in course of preparation. An addition, 100 ft. by 45 ft., two storeys in height, will be built, and the old plant, which is 100 feet by 40 ft., will be reconstructed and bricked, making a fine factory, 95 ft. by 200 ft.

The property owners of St. Catharines endorsed the by-law fixing the agreement with the Canadian Yale and Towne Lock Co., by a large and almost unanimous vote. The votes for the by-law totaled 1,468, and there were only seven against. The agreement is to the effect that the city give the company nine acres of land, free water, and practically total exemption from taxation for a period of ten years. The company agrees to erect buildings at a minimum cost of fifty thousand dollars, and to employ within a short time two hundred workmen.

It is said that another American paint manufacturer is likely to locate a Canadian branch in Toronto this year. This week representatives of the company were in Toronto, looking over the ground and considering sites. They seemed well impressed with the city. As far as can be learned, a definite decision was not reached, but it is deemed probable that a branch will be established.

The firm of Rogers & Nicoll, Perth, has been dissolved. The business will be continued by Mr. Rogers. Mr. Nicoll has not yet fully decided upon his plans for the future.

Quebec

The steamer Bornu from Mexican ports, recently landed at the Montreal docks, three thousand tons of sisal hemp and 1,650 tons of asphalt.

W. T. Earle, representing Oneida Community, Ltd., of Niagara Falls, Ont., called on the Montreal local trade this week.

Z. Labrosse, Vankleek Hill, Geo. Parent, Pte. Claire, and Arthur Desjardins, St. Jos. du Lac, were among the retail hardware men in Montreal this week on business.

Western Provinces.

H. H. Johnston, dealer in hardware, of Aylesbury, has removed to Talmage, Sask.

The Fraser Lennox Hardware Co., Winnipeg, have applied to change their name to the McGavin, Lennox Hardware Co.

Kidd & Clements, hardware merchants, Rocanville, Sask., are painting their store. Other improvements are being effected.

Vancouver merchants along Fraser street have decided to give a half-holiday on Wednesday afternoons for the rest of the summer.

A game of football was played between the employes of T. J. Trapp and the Cunningham Hardware Co., at New Westminster. The latter team won, and the losers had to treat to an oyster supper for both teams.

PAINT MERGER RUMORED.

For some weeks rumors have been persistently circulated with reference to a merger of several Canadian paint firms. The stories heard differ very widely in regard to the companies suggested as included in the negotiations. Leading paint firms deny that there is any foundation for the rumor.

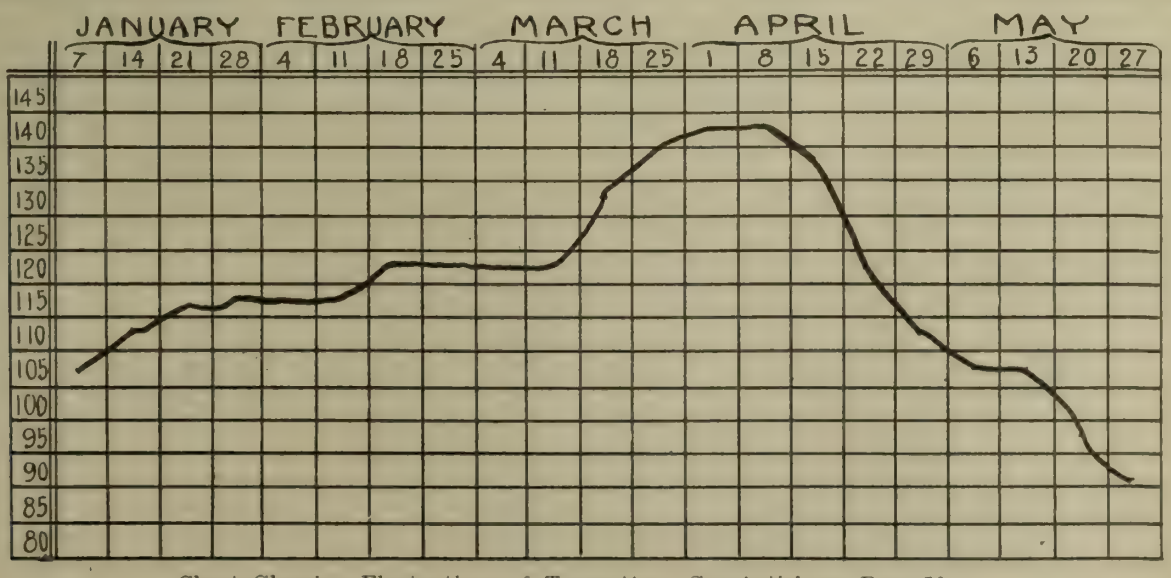

Chart Showing Fluctuations of Turpentine. See Article on Page 56.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 54

MARKETS IN BRIEF.

Montreal.

Tin—Up 3 cents.
Turpentine—Down 3½ cents.

Toronto

Linseed Oil—Down 2 cents.
Tin—Advanced 3 cents.
Turpentine.—Down 2 cents.

MONTREAL.

Montreal, June 2.—On Wednesday of this week, the day of the Banca sale, tin touched the abnormal price of £210. This figure does not fall far short of the 1906 high price when it soared to £215, said to be the highest price it was quoted at. On the days previous to the sale the price hovered around the 204 mark and no doubt the advance was proclaimed by these in control because of the sale thereby desiring to secure a high price. Locally the price was advanced to fifty cents a pound and at that figure there was very little business reported. Some of those handling tin stated that the conditions were so unsettled that it was difficult to say anything in particular and that it were better to wait until something like a reasonable basis was reached. The other metals have been rather quiet with a fair amount of business passing. Of interest to the metal trade was the recent announcement of the United States Steel Corporation to the effect that they had readjusted the prices of their products. It is nothing more than a cut in prices and while members of the trade may say that it was expected for months and have good reasons for their statement, still it seems to naturally follow the combination of circumstances, viz., the listless market across the border, the judgment of the Supreme Court, and the aggressive tactics of the Republic Iron and Steel Company. The latter company last announced a cut in steel bars and was pursuing an aggressive policy. The U.S. Steel Corporation came to the conclusion that owing to recent developments a change in prices was necessary. The commodities affected are steel plates and sheets, structural steel, black sheets, galvanized sheets, blue annealed sheets, steel billets and sheet bars.

The opinion was expressed by several metal men that this action of the Steel Corporation would not have any effect on Canadian prices. It was thought not sufficiently large to be given serious attention here. The declines range from 10 to 20 cents per hundred pounds off. The cut was not drastic enough according to one man, to be taken seriously. Another thought that it might affect the western trade to some extent but the general opinion seemed to suggest that the movement had been looked for and that it would not interfere with the present trade as far as sheets are concerned.

It is no doubt a bid for any business that may be offering across the line, but it is not believed here, seemingly, that it will have any effect across the border.

Tin.—As stated above the local price of tin this week is 50 cents, an advance of three cents on last week's figures. There is not a great deal of business passing locally and interest is rather central in the doings on the primary market.

Copper.—The market does not show any changes in copper. There is a steady demand but apart from that there is no special feature. There is a feeling that the markets should show some improvement in the near future.

Other Metals.—Lead is quiet with a fair trade passing. Spelter is dull with its position practically unchanged.

Scrap Materials.—Prices are unchanged and there is a steady demand for old material. Local quotations are: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $12.50; malleable, No. 1, $9; miscellaneous steel, $5; stove plates, $12.50.

TORONTO.

Toronto, June 2.—Tin has again supplied all the fire works of the week's situation in metals. The London syndicate seem to have absolute control over the destinies of this market, and they have used their power to force prices up to an almost unprecedentedly high figure, since last week's report.

Importers of lead find a splendid demand for their goods, this situation being brought about by the fact that the market is practically bare of domestic lead.

There is some speculation among the trade, as to what effect the cutting of steel bar prices in the United States, will have upon Canadian conditions. So far, there is no noticeable difference either in price or sentiment, as prices on the Canadian product have been quite considerably under the foreign goods, all along. It is not expected that conditions across the border will affect the situation here, except sentimentally. Even an active price war in the States would have little effect here, other than to cause a hesitancy in buying.

On the whole the metal market here is quiet but steady, and a normal trade is passing.

Tin.—The hand of the English syndicate is shown in a further sharp advance this week. Prices as compared with those of a week ago, are 3 cents higher per pound, and, as might be expected, there is no big business being done at present quotations. Even the largest consumers are ordering merely a few pigs at a time, whereas, under ordinary circumstances, their specifications would be at least one or two tons. Local metal merchants are now quoting from 49 to 50 cents per pound, depending upon the quantity specified. For future delivery the price is 5¼ cents less

Antimony.—"I have never," said a prominent metal man, "seen anything so dull as the antimony market has been, ever since the formation of the syndicate. There is simply nothing doing." Prices remain nominally the same.

Copper.—Further strength is shown this week, although no price change is reported. A fair amount of business is being done.

Aluminum.—This metal has practically become a staple, and a good steady business is reported. The price quoted here is 20 cents per pound.

Plates and Sheets.—Sellers are opening the campaign for fall contracts, and it will be possible to estimate, very shortly, the year's business in this line. As a matter of fact, however, the trade of late years has shown more of a disposition to order from month to month, rather than to contract for spring and fall, and this has resulted in more satisfactory condition.

Pig Iron.—Butiness is about as usual and is devoid of special features. We are still quoting: Canadian Foundry No. 1, $19 and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro' No. 3; and $20.25 for Clarence No. 3; Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

Lead.—Trade in imported lead is humming, stocks of the domestic article having become depleted through the tie-up at the Trail Smelter. Prices are unchanged but firm.

Spelter.—This week's business has been quiet, but prices are unchanged.

Old Materials—Conditions are unchanged, prices remaining as follows: Heavy copper and wire, 10½c to 11c; heavy red brass, 7½c; heavy lead, $2.90; light copper and bottoms, 9¾c; tea lead, $2.40; machinery cast iron, No. 1, $14; No. 1 wrought, $10; malleable No. 1, $8 to $10; miscellaneous steel, $6 to $7; stove plate, $12.50.

HARDWARE MARKETS

MONTREAL.

Different reports are heard from the jobbing houses, some mentioning a tendency to quietness, and others regarding trade as being pretty well maintained. Seasonable lines are active, harvest tools and contractors' and builders' supplies, too, but on the whole, business shows a little easier feeling this week. The weather has been responsible for new activity in some lines, but has also caused a diminishing of business in one or two directions. Electrical goods are particularly sought after just now. Flashlights, toasters, irons, etc., are moving out well. One house reports that for the second time this spring they are cleaned out of electric irons, but of course have fresh supplies on the way. Extensive construction work maintains the heavy demand for construction supplies, the railways contributing largely to the existing activity.

Lawn and Garden Tools.—Rubber hose has been selling so rapidly that several lines were reported cleaned up for about a week, manufacturers being hard pressed to meet the demand. The dry weather of late has called the water service into use, and there followed a run on hose, with orders coming from all parts of the country. This business has also given an impetus to the sales of lawn goods, and the whole department has been rushed by the new business.

Some prices quoted are: Lawn rakes, $3.75 to $5 a doz.; garden sets, 25c to $1.50 per set; border knives, $4.80 doz., net; garden trowels, 60c to $1.50 a doz.; garden shears, plain 8-in., 55c; with notch, 8-in., 60c; long-handle border shears, $1.15 each; long-handle surface shears, $1.05 each; lawn mowers, low wheels, 7 in. diameter, 12. in. width, $2.55; 14 in., $2.65; 16 in., $2.75 each; medium wheels, 9 in. diameter 12 in. width, $3.30; 14 in. $3.55; 16 in. $3.80 each; high wheels, 12 in. width, $4.15; 14 in., $4.40; 16 in. $4.65; 18 in., $4.90 each; lawn rollers 20 in. diameter, from $13 to $18 each; garden wheelbarrows, small, $2.25; large, $3; garden spades, $6.25 a doz. upwards.

Spring Lines.—The real advent of the fly has been responsible for many new enquiries for screen wire and doors. Orders have been freely received. Hammocks are also going out rapidly, and the general spring trade just now is quite satisfactory.

Household Utensils. — Demand for household necessaries is steady. Refrigerators have been moving freely. Ice cream freezers are also "good sellers" just now, and the retail trade are apparently doing a good business in this line. Washing machines are receiving quite a large share of attention.

Some of the prices quoted are: Food choppers, from $9 to $15 a doz.; ice cream freezers, 1-qt. $1.50; 2-qt., $1.65; 3-qt., $2.05; 4-qt., $2.50; 6-qt., $3.15; 8-qt., $4; coffee percolators, $1.75 to $3.50; washing machines from $3.50 up; wringers, Royal Canadian, $47.75 per doz.; Universal, $37.75 per doz.; Safety, $56.25 less 20 per cent, per doz.; Mrs. Potts' irons, plain, 82½c per set; nickel-plated, 87½c per set; common sad irons, 4 to 7 lbs., $5 per cwt.

Harvest Tools.—Western orders are specially strong for harvest tools, and from all parts of the country, in fact, the demand is large. It is still early for this business, but the trade are buying already, anticipating the need for these goods that will be felt later.

Some quotations and discounts are: Hay forks, manure forks, straw forks, barley forks, spading forks, potato forks, field, garden hoes, Dutch weeding hoes, garden rakes, 50 and 5 p.c.; hay rakes, $1.15 to $2.75 a doz.; scythes, $6 to $8 a doz.; sickles, $1.85 to $2.25 a doz.; grass hooks, $1.65 to $2.10 a doz.; scythe snaths, 40 p.c. discount.

Contractors' and Builders' Supplies.—There is no diminution in this branch of the hardware trade. Construction work is going steadily forward, and in general building operations there seems to be special activity. Railway work has contributed most to the demand for heavy hardware, but there are many kinds of work influencing these departments now. For the best quality of shovels and spades, the discount off is 60 and 2½ per cent.; for second quality the same discount is allowed, and for third quality the discount is 50 and 2½ per cent.; picks are quoted at from $3.85 to $5 a doz.; crowbars are listed at $3.25 a cwt.; wheelbarrows, navvy common, $21 and up; navvy full-bolted, $22.50; drag scrapers, $5.75 and upward.

Wire.—Enquiry for fencing wire is good, the farmers throughout the country evidently being engaged in this work to a great extent. Demand is general. Some prices are as follows: Barbed wire, $2.35; plain twist, $2.55; galvanized wire base, $2.27½; coil fencing (9) $2.30; (12) $2.45; staples, bright, $2.60; galvanized, $2.85.

TORONTO.

Toronto, June 1.—The expectations held that the month of May would prove a record breaker have been fulfilled. A splendid volume of business was done and it is doubtful if past records can show anything to equal it. April was slower than had been expected after the brisk way in which the year opened up, the slackness being due entirely to the long continued cold weather. This has been more than made up, however, by the exceptionally good trade carried on during the past month.

Prices have remained steady, the market showing a firm tone.

Seasonable Lines.—The demand for warm weather goods has not fallen off by any means. During the past week large orders have been received for refrigerators, and screen doors have been moving well. The demand has become heavy for awnings, window netting, verandah shades, hammocks, and ice cream freezer, the latter line having been unusually active. Everything pertaining to lawn and garden culture is selling. Lawn mowers are in strong demand. Garden hose, clamps, couplings, sprinklers, nozzles, rakes, shears, spades and wheelbarrows are also moving out regularly. Wire fencing has been coming more heavily on the market and poultry netting is selling equally well. Watering cans, galvanized and otherwise, are active.

Household Goods.—The demand has been more pronounced than is usually expected at this time of year. Tinware and granite goods are selling well and it is quite apparent that the retailers are experiencing a heavy demand. The exodus to summer homes is, no doubt, having much to do with the demand, as new kitchen utensils are required then. There has been a larger call for aluminum goods than in past years.

Builders' Hardware.—A shortage of bricks has been felt and in consequence building operations are being held up some. Nevertheless the call for builders' hardware and general supplies for contractors has not shown any noticeable diminution. If the shortage in bricks continues, the effect may be seen in a slackening of orders later on. The demand at present for tools is seasonably large.

Heavy Hardware.—Barb wire is moving well, and there is a heavy call for wire fencing. Chain, rope, pulleys, etc., are selling briskly. Nails, bolts, nuts, screws, are all in demand, the prospects pointing to an exceptionally big year in all these lines. No price changes are noted. Present quotations are: Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7⅛.

Stoves and Heating Goods.—The demand for gas and oil stoves continues to be unusually brisk. A few ranges are being sold, but the demand has fallen off with the advance of the season. A good demand is now being shown for furnaces. Building operations are being conducted on so large a scale that it seems reasonably certain that the call for furnaces this year will be heavy.

Heating contractors state that they are busier than ever, and the manufacturers are finding some difficulty in filling all their orders Heating accessories, such as pots, pans, kettles, etc., have been in active demand.

Sporting Goods.—The volume of business being done in all lines of sporting goods is highly satisfactory. Baseball supplies, lacrosse goods, cricket goods, tennis, golfing and boating supplies are moving well. "One of the biggest years yet in sporting goods," declared a local jobber. "The demand from the hardware dealers has been about the best on record."

The Western Hardware Market Situation

Plenteous Rains Have Developed Optimistic Spirit—Jobbers Cutting Down Some Orders—Too Much Business in Proportion to Money in Circulation—Farmers' Supplies Moving Well.

Trading in every department of business is very active this week throughout the western country. Plenteous rains have developed crop conditions, labor is plentiful, railway facilities are excellent and everything points toward a very prosperous summer. Jobbers are cutting down orders from ambitious merchants and the lament is not that trade is dull but that the movement of stocks is too heavy for the amount of money in circulation. At this season this condition is natural and must be expected. Should the predictions of a leading local railway official be nearly realized that 200,000,000 bushels of wheat will be harvested this year, there should be no need of anxiety. As the country stands the banks have the money but at present they are wise in curtailing lending. Collections therefore are not heavy, but wholesalers and many retailers as well, have profited from experience in previous years of money scarcity and are guarding against over-zealousness.

The hardware trade is particularly brisk, railway construction, bridge building, town and city building is taxing the wholesalers for shipments of iron, steel and builders' supplies. Farmers' supplies are moving well, the chief lines being wire, both barbed and woven, and harvest tools. Plumbers' supplies of all kinds of pipe and solder are going out well. Lead pipe dropped to $5.25 and this comprises the only change in the list this week.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.00; 2, $1.60; p.g. oak, $2.75.

Auger Bits—"Irwin" bits, 47½; other lines 75 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3; small lots, 2½; stove bolts 77½.

Bar Iron—Bar Iron, $2.50; Swedish iron, $4.75; sleight shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs. $8.50; Jessop, $15

Blocks—Steel, 45; wood 60 per cent.

Cut Nails.—$3.15 per keg base.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.50; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron.—Apollo, 16 gauge, $3.70; 18, $3.75; 20, $3.80; 22 and 24, $4; 26, $4.10; 28, $4.50; 30 gauge or 10¾ oz., $4.65; Queens Head, 20, $3.85; 24, $4.05; 26, $4.45; 28, $4.65.

Galvanized Iron Pipe.—⅜ in., $3.50; ½ in., $4; ¾ in., $5.20; 1 in., $7.00; 1¼ in., $10.25; 1½ in., $12.45; 2 in., $16.25.

Galvanized Ware—Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2, and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel, No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process—No. 3, $4.30; 4, $3.80; 5, $2.75; 6 $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $7.75; grass, $1.70.

Iron Washers — Full box, 40 p.c.; smaller lots, 35 p.c.

Iron Pipe, Black—¼ in., $3; ¼ in., $2.45; ⅜ in., $2.50; ½ in., $3.25; ¾ in., $4; 1 in., $5.65; 1¼ in., $7.75; 1½ in., $9.25; 2 in., $12; 2½ in., $19.60; 3 in., $25.75; 3½ in., $33.50; 4 in., $38.35; 4½ in., $44.10; 5 in., $50.40; 6 in., $65.10; 7 in., $95.50; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.75.

Poultry netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.25.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8c; pure manila, 10¾c; British manila, 8¼c; lath yarn, 9¼c.

Sheet Zinc — Casks, $8.75; broken lots, $9.50.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $25 per cwt.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 65 per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate—I. C., $9.75; I. X., $11.75.

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25; ½ box, $5.50; I. X., full box, $12.25; ½ box, $6.50; I. X. X., full box, $14.25; ½ box, $7.50; 20 x 39, I. C., full box, $15.50; ½ box, $8.25; I. X., full box, $17.50; ½ box, $9.25.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 35.

Wire.—Barbed wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3; annealed wire, base, $3; oiled, 10c extra; bright iron $3.20 base; brass spring wire, base 29c; plain galvanized wire, Nos. 6, 7 and 8, $3.40; No. 9, $2.90; 10, $3.50; No. 11, $3.55; No. 12, $3.10; No. 13, $3.25; No. 14, $3.95.

Wire Nails—$2.90 Winnipeg, and $2.45 Fort William.

Wringers — Royal Canadian, $39.25; New Easy, $42.50.

Paints and Oils.

The market in paints and oils is very active and a large business is being done. Prices, however, are not so firm as last week, in some lines, and a decline in turpentine may be expected. In the meantime, we quote as follows:

Petroleum and Gasolene.—Silver Star, in bbls., per gal., 15c; Sunlight, 18c; Family Safety, 22½c.; Searchlight, 20½c; Red Rose, 23½c; Keystone Special, 18c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c.; White Rock, in bulk, 22½c; National Light, in bulk, 21c.; Engine Gasolene, 24c.; White Lily, 26c.; Royal, 24c.

Turpentine—In barrels, $1.05; small lots, $1.10.

A NEW FACTORY.

James Munro, manager of the Munro Steel and Iron Works, Winnipeg, will establish a branch in Vancouver during the next few months. The new plant will be devoted almost exclusively to the manufacture of wire fencing by a new machine invented by Mr. Munro.

He was in Vancouver recently to select a site. While there, he stated that the plant ought to be in operation within three months and that it would represent an investment of $50,000.

Methods of Retailing Paints and Varnishes

The Economy of Paint

Practical Arguments for Painting Which are Generally Overlooked—Dealers Should Emphasize Importance of Protecting Property—Regular Repainting is an Economic Necessity — A Plea for Conservation.

Readers of United States magazines were almost startled, recently, by the appearance of a double page advertisement setting forth in graphic fashion the fact that "Only twenty-five per cent. of the country is painted."

This statement was not made recklessly, but after a most careful survey of the situation, and it may be taken as true. It means, briefly, that structures which are composed of lumber and metal and which represent the investment of a large proportion of the national capital, should be receiving four times as much paint as they are at present, in order to be properly conserved. Think of what this means in an age when conservation in all lines, has taken so tight a hold on the people.

The Conservation Argument.

There immediately looms up in the mind of the hardware dealer, the thought that he has been neglecting one of the most potent arguments in favor of the use of paint—the argument of conservation. Even the dealers who have been most aggressive in pushing the sale of paint, have probably been working along other lines and have failed to make their proposition as convincing as they might have done, had they more fully developed the dollars and cents side of the question.

Our forests are being rapidly depleted, with the result that lumber is becoming more expensive and of poorer quality every year. It has been stated that if all the lumber that is now in structures throughout the country should be suddenly destroyed, it could not possibly be replaced at any price. If, however, the lumber is allowed to remain unprotected it will certainly decay and ultimately be destroyed. If the nation is to avoid such a disaster, some more effective steps must be immediately taken to protect these structures, and the only effective means of protecting them, is not only to paint them, but also to regularly repaint them.

Paint as a Beautifier.

The average citizen only decides to paint his property, when its ugliness, through want of paint becomes unbearable to him. Those of little aesthetic taste (and there are many such), are often satisfied so long as there is the slightest evidence of paint on their buildings. They do not see the advisability of improving the appearance of the buildings, and the absolute necessity of protecting them against decay, has never occurred to them. They do not use paint because it would cost them some money to do so, whereas they should use paint because the gradual destruction of their buildings through not doing so, really constitutes a ruinous expense. If some enterprising paint dealer were to approach people of this class, and show them how much they would actually save, by periodically repainting their properties, the argument of economy and conservation would, in all probability, result in their buying and using paint.

Canada Should Use More Paint.

It is altogether likely that Canada could be accused, just as properly as the United States of being only twenty-five per cent. painted. In the majority of our towns and villages, frame buildings are the general rule, and there are few of these places where more than one quarter of the buildings are kept adequately protected with paint.

The writer of this article has often been impressed with the great possibilities for paint selling, in some of the towns he has visited. A walk along some of the residential streets, invariably reveals an appaling percentage of dwellings in pressing need of paint, both for appearance and protection. Very frequently, quite well designed residences are seen which have apparently been erected for some little time, and have remained unpainted.

A recent visit to a Georgian Bay town during which several of the principal streets were surveyed, left as its chief impression, the great need for paint, and the fine opportunities for paint salesmanship in that town. It was really astonishing to notice how many frame houses had been erected and were being occupied without even a priming coat of paint having been applied. The rains and snows of many months had rusted the nail heads and dirty streaks down the sides proclaimed the location of every stud.

The owners of these buildings had probably deferred painting because they didn't particularly mind the appearance, and, in their opinion, the question of whether they should paint or not, was purely one of pride, and not of protection or conservation. If they had been shown, in a convincing manner, that an immediate application of paint would certainly lengthen the life of their dwelling and thus save them money by protecting the valuable lumber in the building, they would likely have made strenuous efforts to have the place painted.

Better Than Fire Insurance.

In these days, if a man were to neglect insuring his house against fire (especially if it were a frame building) he would be regarded as a fool. Yet there are better reasons for painting a frame building, and keeping it painted, than for insuring it.

Taking out a fire insurance policy amounts to buying protection against the possibility of loss by fire. On the other hand, painting a house is equivalent to buying protection against the certain loss caused by decay. Paint does not only protect against loss, as is the case with fire insurance, but it actually prevents it, as a structure which is kept properly painted will last indefinitely. Therefore, regular use of paint is a more sensible and more profitable investment even than fire insurance, which is regarded as a necessity.

Every hardware dealer and clerk should familiarize himself with this unanswerable line of argument in favor of the use of paint, both for first and renewal coats. It has been said that the property owner who neglects to keep his property adequately protected by paint acts strictly after the manner of him who neglects to throw a pail of water on an incipient fire in his house or barn.

APPEARANCE OF PRODUCTS IMPROVED.

Recently a very decided improvement has been made in the appearance of the product of the Boeckh Bros. Company Ltd. factories, they having added a new machine for printing the name and size on the handles of all their brushes, which also shows quite distinctly their trade mark, the "boar's head." This does away wih the old-fashioned style of hand stamping, which is very irregular and often indistinct, and, besides, the new process adds much to the appearance of these well-known brushes.

A Review of Recent Developments in Turpentine

The Price Has Fallen Over 50 Cents in Six Weeks—Turpentine Has Had a Chequered Career Since the First of the Year —The Course of the Price Fluctuations Shown.

Cut referred to in this article is on page 51.

On the seventh day of January, turpetine was selling in Toronto at $1.05. On the first of April it sold at $1.42. On the twenty-seventh of May, the price asked was 87 cents.

These figures tell in a concise way the story of turpentine's unprecedented fluctuations during the past four months. To start from a point slightly above the normal, and advance by gradual stages to the highest prices since the Civil War —which means, practically, the highest point ever reached, as turpentine was unobtainable during the war years — and then to fall back to normal in a little over two months, is indeed a remarkable proceeding. Turpentine has always been regarded as more or less unstable, but this year it has excelled itself in that respect.

Now that the price has reached the normal figure, it is pretty generally expected that turpentine will steady down after having "had its fling," but it would not be safe to count on such a contingency. Those in closest touch with the situation are inclined to think that the market has not yet been exhausted of its store of sensations, and developments are to be looked for in the not far distant future.

Due to a Shortage.

The successful attempt of turpentine to break the "altitude record" was prompted by a shortage in the supply. During the early months of the year the stock at Savannah sank lower and lower, until the stores were almost completely depleted. At certain stages the records showed that, whereas at the same date in 1910 there had been 11,000 barrels in stock, not more than 1,100 could be mustered. The stores finally showed even a greater scarcity than that, the supply becoming almost a negligible quantity.

Whether there was a shortage, due to the ever-increasing consumption, or whether the producers were holding back to stimulate a bull movement, cannot be divined, but the former is the more probable cause. In the face of so distinct a dearth, it is not surprising that the price soared until the Toronto quotation reached the $1.42 mark. The advance in price began steadily, but became more marked and rapid as time went on. This acceleration was probably due to the panicky feeling which prevailed as the situation developed. The accompanying illustration shows that the price gradually grew until it reached $1.20, at which figure it stuck for some weeks. On March 18, or thereabouts, it took a sudden jump to $1.30. The reports from Savannah on that date indicated that the famine point was not far off. Eight cents more were tacked on the following week, and on April 1 the high water level was reached.

The Downward Trend.

When turpentine started to fall, however, it went down with a rush. Rapid though the upbuilding had been, it could not compare with the velocity of the descent. The highest price was attained just about the time that new stocks became obtainable. Anxious to realize the high price, producers almost simultaneously rushed their supplies on the market. The advent of the new stock was unpropitious — for the producer. The high price had killed off any tendency to buy in anything but "stop-gap" quantities. The new supplies arrived, therefore, on a market singularly devoid of buyers. The price fell, with what might be termed a dull thud. On April 15 Hardware and Metal reported a reduction of from 5 to 10 cents. The following week the "back to normal" movement was even more pronounced, the reduction in price varying from 10 to 15 cents. April 29 saw 10 cents more chipped off the price, thus making the Toronto quotation $1.10. The chart tells the story of subsequent changes in price, which culminated in the 87 cent quotation made on May 27.

The Lowest Price.

It is interesting to note in passing that the lowest price reported on the Savannah Board of Trade was 22 cents a gallon on Sep. 4, 1896. This would mean a price at Toronto of about 60 cents.

With reference to the price now prevailing, there is much disappointment among the producers and factors.

A Better Tone Noted.

Buyers report a more general inquiry during the present week, says the Naval Stores Review, in commenting on the situation. They express the belief that there will be a steady flow of orders now that there have been such aditional sharp declines. "If prices remain firm the coming week," said one large buyer, "it will convince waiting consumers that the movement in their favor has about ended and there will be more of a desire to stock up and not await further drops. The consuming trades need the stuff, even though it is accepted that trade has been off in volume for the past few weeks, but the desire to wait until the lowest point has been reached has lead to the withholding of orders of any magnitude. This week brought a better inquiry, and it looks as though both the foreign and domestic trade were about to bestir themselves and gather in turps at what we must all acknowledge are reasonably cheap prices."

Use of Substitutes.

Despite the almost prohibitive price of six weeks ago, there was not as marked a tendency to resort to the use of substitutes in this country, as might have been expected. Enquiries have been made, and few of the supply houses experienced much of a demand for adulterated brands It would seem that just enough pure turpentine was bought to meet pressing needs, and other work was allowed to slide until prices were more favorable.

CARBORUNDUM CO. ENLARGING OFFICE.

The Carborundum Company office force must have more room in which to handle the greatly increased business and accordingly work has been started in enlarging the present office building at The Carborundum plant, Niagara Falls, N.Y. The plans call for a storey and one half addition to the present building and the addition will give about 6,000 square feet more space. The present building will be remodelled under the most approved plans of modern office construction. It is expected that the work will be completed late in the summer.

SENT FIRST CONSIGNMENT.

Regina, Sask.—Peart Bros., wholesale hardware dealers, have the distinction of shipping the first carload of freight over the Regina-Bulyea branch of the Canadian Pacific Railway. The C.P.R., however, is not yet in a position to take shipments of freight over the new line, as the ballasting work has not been completed. The company only shipped the car load of goods for Peart Brothers to accommodate the firm. The shipment of merchandise was sent to W. L. Thomas, of Silton, and it was imperative that the goods be forwarded without delay.

In addition to the carload of goods sent out by Peart Bros., two loads of lumber were also shipped out.

FURNACE MERGER.

Chicago, May 25.—A merger of nine of the largest furnace manufacturing concerns of the United States has been effected. A. W. Williamson, of Cincinnati, will be president of the new company, capitalized at $9,500,000.

The new concern, which will have headquarters in Chicago, includes companies in Milwaukee, St. Louis, Detroit, Elyria, Cleveland, Cincinnati and Utica.

PAINT AND OIL MARKETS

MONTREAL.

Montreal, June 2nd.—Further reductions in the price of linseed oil and turpentine are reported this week. There is a good general tone to the paint and oil markets, with the demand well maintained. Orders are coming in freely, and the bulk of trade now passing reaches an appreciable figure. Demand covers all lines, with each making a good showing.

Linseed Oil.—Local prices of linseed oil are down again this week, quotations being, for raw $1.06 per gal., and boiled $1.09. The primary market has shown a stronger tendency during the past week, and has advanced accordingly. The market is regarded as firm and, if anything, with steadiness to be expected, but each week finds the local market down a little lower than the figures for that preceding it. The demand for oil is reported good, owing to extensive painting operations, and this with a reported scarcity of seed might be thought sufficient to stem the price decline, but such has not been the result, at least not yet.

Turpentine.—With the primary market steadily declining, it was to be expected that local prices would follow in sympathy. Such has been the case, and 87½ cents a gallon is now being asked. The demand is good, and while conditions are favorable, the ampleness of supplies has been sufficient to keep the turpentine toboggan on the move. The price at Savannah has, of late, been lower than for the same time last year. One estimate of the new crop is placed at 600,000 bbls., which under ordinary conditions should make the situation easier than last season, according to one claim. Substitutes have apparently cut into the legitimate trade to a considerable extent, and may, if their use is continued, have an effect on the price of turpentine, by curtailing the consumption of the genuine article.

Arsenate of Lead.—A fair enquiry for this article is reported, but there is no special feature or change. Prices are: In bbls., about 800 lbs., 9c; in half bbls., about 400 lbs., 9½c; in 25 lb. wooden kegs, 10c; 5 lb. bottles, 12c; in 2 lb. bottles, 13c; in one lb. bottles, 14c.

Putty.—A good steady demand is reported for putty, with firmness noted. Existing prices are as follows: Bulk bbls., $2.20; bulk, cwts., $2.45; bladder, bbls., $2.70; bladder, cwts., $2.80; 25's, loose, $2.55; 25's, cased, $2.70; 12½'s, cased, $2.90.

Paris Green.—Dealers are still asking for Paris green although the trade should be pretty well supplied by this time. Prices are unchanged yet. The season for heavy demand is not far distant, and it is possible that the demand for this article may be greater than usual. Prices are unchanged as follows:—In barrels, about 600 lbs., 17c per lb.; arsenic kegs, 250 lbs., 17¼c; 50-lb. and 100-lb. drums, 18¼c; 25-lb. and 100-lb. drums, 18⅜c; 1-lb packets, 100 lbs. in case, 20¼c per lb.; 1-lb. packets, 50 lbs. in case, 20¾c per lb.; ½-lb. packets, 100 lbs. in case, 22¼c per lb.; 1-lb. tins, 100 lbs. in case, 21¼c per lb.

White Lead.—Although the early demand for white lead was disappointing, owing to unfavorable weather, the May demand was good, and according to manufacturers, practically made up for the slowness for the heavy demand to show itself. Prices are steady as follows:—Lots of one ton, $5.85; contracts of five tons and over, $5.70; shipments less than one ton, $6 f.o.b. Montreal.

TORONTO.

Toronto, June 1.—The market has been marked by high activity. All lines are selling well, with the prospect of even better conditions in the future. "This has been the best year yet," said the sales manager of a large manufacturing firm. "I thoroughly believe that it will prove the best on record by long odds. There is every indication of continued activity." Other manufacturers and jobbers speak rather more guardedly but they seem to feel that conditions are in every way satisfactory.

The only price change this week has been in turpentine, a further reduction of 2 cents being noted. One firm is quoting a lower price on linseed oil but the prevailing quotation is the same as for the past month.

Turpentine.—The marked decline has continued and the price quoted to-day is 85 cents. As might be expected, the demand has become pretty active. For all painters' supplies, turpentine is again being freely used and substitutes are being utilized less than before. This, combined with a special demand from the varnish makers, is making the market active—a distinct contrast to the conditions which prevailed up to a few weeks ago. As the season is favorable to the production of turpentine in the southern states, the price has continued to fall, despite the improvement in the demand and has now become pretty near the normal for this season of the year. The return has been rather sooner than was anticipated a couple of months ago.

One local firm, which is generally rather low than otherwise, to-day quoted 91 cents for turpentine. The prevailing figure, however, is 85 cents.

Linseed Oil.—There is nothing of note with reference to linseed oil. Conditions are normal, the demand being perhaps a little better than is usually experienced at this time of year. A large amount of outside work is being done requiring the use of raw material such as linseed oil, lead and other pigments. It is asserted that there are no new supplies of flaxseed coming on the market and that it is not likely there will be any in sight for another month or six weeks. Under the circumstances, the general price remains steady at $1.12 for raw and $1.15 for boiled. One company, however, reported an easier tendency in oil, their quotation being $1.07 for raw and $1.10 for boiled.

Rosin.—The market continues fairly firm. This is probably due to the fact that buyers and speculators in rosin can hold stocks with very little difficulty and with no danger of loss from depreciation or leakage. There is a healthy demand from the makers of soaps and varnishes, so that the holders of rosin seem reasonably assured of a good market during the whole season.

Putty.—The demand is reasonably good for this season of the year. Prices are standing the same. Standard putty in quoted at: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same; bulk in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

White Lead.—The demand is growing in accordance with the increased activity in outside work. Larger orders are now being placed. Buyers are showing more confidence, now that the question of price seems more settled. The fall in turpentine and the steadiness shown in linseed oil have been contributing factors to this satisfactory condition.

Prepared Paints.—Chief activity now centres in prepared paints. The demand all around has been exceptionally good and all jobbers and manufacturers express themselves as well satisfied. Orders are still large, although a great many of the sorting-up variety are received.

Varnishes and Japans.—The demand is well sustained. The price question seems to be settled for good—at least for the present season—and it is highly probable that present quotations will not now be departed from.

Specialties.—Alabastine is in good demand at present, as are all other varieties of interior stains. Brushes are selling well. Painters' specialties, such as kalsomine, boat pitch, grease, pine tar, axle grease, alkali, sand paper, pumice stone, sponges, tar, shellacs, etc., are all showing a good steady movement.

Petroleum.—There is now a steady seasonable demand. The prices remain at: Canadian prime white, 12c; United States water white, 13½c; Pratt's Astrol, 15½c.

Dependon——Light Hard Oil Finish.

Everlastic——Quick-drying Floor Varnish.

Gold Medal——Inside and Outside Varnish.

—These three varnishes meet all the regular demands of your trade—simplify your varnish stock—increase your varnish profit.

If any part of your house or your customer's house, is in need of varnishing, the requirement is met by one of these three B-H Varnish Specialties—Gold Medal, Everlastic, Dependon.

GOLD MEDAL—If the front door, porch, ceiling or bathroom wants brightening. Gold Medal, Inside and Outside Varnish, gives pleasing results with its easy flowing action, and will protect the exposed surface with a durable coating, which will fight the effects of moisture and changing temperature.

DEPENDON—If the furniture, wall, inside door, or any interior work, of either hard or soft wood, is in need of finishing or renovating, Dependon dries free from tack in a few hours, and can be polished, if desired, in twelve, stands hard wear and dries with a brilliant lustre.

EVERLASTIC Quick Drying Floor Varnish has these special qualities. It dries hard and makes a very durable coating. It is elastic and tough. It does not show heel marks nor scratches easily. It dries quickly. Has a fine lustre, and can be walked on the next day after application.

These varnishes are sold in beautiful, lithographed gallon, half-gallon, quart, pint, and half-pint cans, imperial measure. The packages make a most attractive store display. Handsome lithographed illustrated signs will accompany your order.

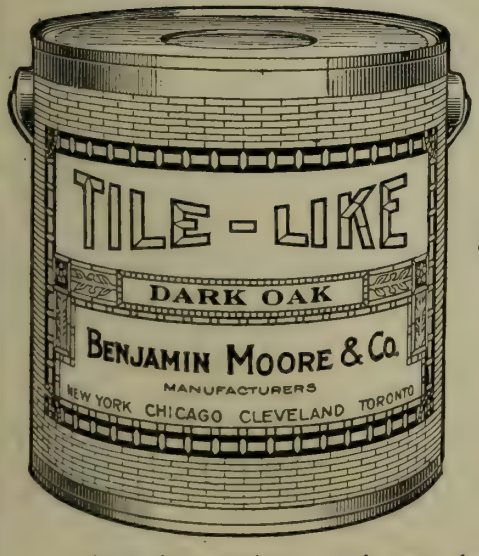
SORTING UP ORDERS

For Brushes should be placed at once.

Examine your stock now; do not wait until your stock of the best selling lines is depleted, but order right away and thus avoid missing sales. Remember brushes will be much in demand during the month of June, and particularly

BOECKH'S BRUSHES



We are decidedly busy now, but our large, well assorted stock and large manufacturing facilities make it possible for us to give prompt attention to your requirements.

The BOECKH BROS. COMPANY, LTD.

Factories:
158 to 168 Adelaide St. West,

TORONTO, CANADA

Offices:
80 York Street.

MOORE'S *Tile-Like*

is full of attractive selling points, and can be handled with profit by every hardwareman. "TILE-LIKE" is a colored **Varnish and Stain Combined**, and requires no stirring. No other varnish stain is so uniform in color as "TILE-LIKE," which has the added advantage of not hiding the grain of the wood.

Will not mar when used on floors, works easily, is slow in setting, and can be rubbed in 24 hours. Suitable for all kinds of interior woodwork. Buying "TILE-LIKE" means saving the cost of staining, and it will be found a high-grade varnish, the equal of any on the market.

GIVE "TILE-LIKE" THE PROMINENCE IT DESERVES.

Other MOORE Leaders are: Mooramel, Muresco, Floor Paint, Saniflat, House Colors, Impervo Varnish.

A Real Surety Bond

CONGO ROOFING

THE owner of a building covered with Congo has the satisfaction of knowing that his roof is *guaranteed for ten years*.

In each roll of Congo 2 ply and 3 ply is a *genuine legally binding Surety Bond* issued by the National Surety Company of New York.

This year we will guarantee thousands of roofs to *last till 1921*.

Guaranteed Until 1921

Of course we are not going to lose—we are offering a sure thing. We know Congo will last *more* than ten years. One thing the guarantee forces upon us: it makes us extremely careful in manufacturing.

We provide, free of charge, *galvanized* iron caps which are rust proof and will last as long as the roofing.

Send for free copy of our Guarantee Bond, a sample of Congo Roofing and further information.

Your Money In It

All over the country you see men in this position to-day. It is a favorite spring position. It is a position which predominates wherever a live agent for

RAMSAY'S PAINTS

realizes that his money is in it, and now is the time to get profits out of it. You have invested money in Ramsay's Paints—The Right Paint to Paint Right—are you doing your share to help us get orders for you? Look about your town! How many houses need paint? How many householders are thinking of painting? Then write us and tell us who they are. The result will be business and profit for you. Many agents are doing this. Are you?

A. RAMSAY & SON CO.

Established 1842

The Paint Makers

MONTREAL

"JAMES" RED LEAD

Genuine English Lead. Dry or in Oil.

"James" Leads have been the favorites amongst particular users for many years.

If it's "James" Lead, it is good Lead.

A. C. LESLIE & CO., LIMITED

MONTREAL

THE BEST ALL 'ROUND PAINT FOR EVERY PURPOSE

EXCEPTIONAL COVERING CAPACITY

MADE WITH MANITOBA LINSEED OIL

That's why the Agents for

Stephens

Pure Ready-mixed Paints are more than satisfied with their paint business

"Absolute satisfaction guaranteed in every case where STEPHENS' Paints are used" is our motto, and every dealer is fully authorized to make it good. It is this policy, combined with good, high-standard goods, that has won for our goods the premier position on the Western Paint Market.

¶ The CHAMELEON may change its "COLORS" and the ETHIOPIAN his skin, but the "ELEPHANT'S" hide is impervious to climatic conditions. The "ELEPHANT" brand of GENUINE WHITE LEAD is without a peer for DENSITY, BRILLIANCY, COVERING PROPERTIES and DURABILITY.

¶ The "ELEPHANT" is the HARDWARE MAN'S FAVORITE and the PAINTER'S CHOICE because it is the great "MULTUM in PARVO" WHITE LEAD. A GREAT deal in a LITTLE space.

WE LEAD THE WORLD

The ever-increasing demand for

BEAR BRAND LAMP BLACKS

has necessitated this increase in our manufacturing facilities, as shown in the figures below:

	CAPACITY
1902 - - -	3,000,000 pounds
1905 - - -	6,000,000 "
1911 - - -	10,000,000 "

Our growth is entirely due to the consistent high quality and absolute uniformity and purity of our products, together with the courteous treatment always extended to our customers.

If you are not using OUR BLACKS, write us and we will submit samples and prices which will save you money and secure your orders.

WILCKES MARTIN WILCKES CO.

The Largest Makers of Fine Lamp Blacks in the World.

Facts Supply Strong Selling Talk For

Ru-ber-oid Roofing

TRADE MARK REGISTERED

No need to tell customers what you **hope** RU-BER-OID Roofing can, or will, or ought to do---the plain, unvarnished facts about what it **has done** are the strongest arguments you could possibly use.

RU-BER-OID has **proved,** in 20 years of actual service, from the Tropics to the Polar Circle, that it is weather-proof, strongly fire-resisting, unaffected by acids, fumes or gases or by extremes of heat or cold---that it will neither rot, warp, rust, crack, peel off, get soft and porous nor hard and brittle. Let us send you a sample which stood 17 years on a foundry. This evidence of what RU-BER-OID **has done** under the most adverse conditions is the best proof of what it **will do.**

Send us the names of those in your locality who are interested in roofing and we'll gladly send them copies of our new Booklet, "RU-BER-OID---WHY." It will help to make RU-BER-OID sales for you.

PATTERN DRAWING

A CHEAP, PRACTICAL and Complete Home Study Course on Sheet Metal Pattern Drafting, Estimating and Construction. Send for particulars to THE SHEET METAL SCHOOL, Box 419, Galt, Ont. (21tf)

MISCELLANEOUS

ACCURATE COST KEEPING IS EASY If you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

BUSINESS GETTING Typewritten Letters and Real Printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms—real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Company, Ltd., 129 Bay Street, Toronto.

COPELAND-CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

COUNTER Check Books—Especially made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for Binders and Monthly Account Systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

DOUBLE YOUR FLOOR SPACE—By installing an Otis-Fensom handpower elevator you can use upper floor as stock room or extra selling space and increase space on ground floor. Costs only $70. Write catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS are devised to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE. INSURE IN THE HARTFORD. Agencies everywhere in Canada.

HUNDREDS OF TYPEWRITERS of every make and condition are being traded in as part payment on the famous Monarch. Price and quality are the levers we use to prevent over stock. We believe we can give the best bargains in rebuilt typewriters in Canada. A postal will bring our catalogue and full information. The Monarch Typewriter Co., Limited, 46 Adelaide Street West, Toronto.

KAY'S FURNITURE CATALOGUE No. 306 contains 160 pages of fine half-tone engravings of newest designs in carpets, rugs, furniture, draperies, wall papers and pottery, with cash prices. Write for a copy—it's free. John Kay Co., Ltd., 36 King St. West, Toronto.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost. "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN PENS. If you have Fountain Pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. GAGE & CO., Limited, Toronto, sole agents for Canada.

PENS—The very best pens made are those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c assorted box of Mitchell's Pens and find the pen to suit you.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto (tf)

WAREHOUSE AND FACTORY HEATING SYSTEMS. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

YOU DON'T BUY a National Cash Register—it pays for itself. Saves money. Prevents mistakes. We can prove it. National Cash Register Co., 285 Yonge St., Toronto.

SITUATIONS WANTED

Keep in mind the dominant fact that mankind from its first appearance on the earth has been schooled by nature to look for signs; for invitations to taste; for suggestions as to what to wear. Tell your story briefly, forcibly, truthfully, and address it through the proper media and you can successfully apply advertising as a means to increased distribution.

TRY A CONDENSED AD. IN HARDWARE AND METAL

NEU-TONE

A PAYING PROPOSITION

It pays, brother, when you can make a friend of everybody that comes into your store. And it is not so hard to do, either.

Take for instance, the paint proposition. If a man comes into your store, and you make a lot of promises that the paint doesn't fulfill — that man will not remain your friend many days.

When you lose him — well — you will lose many more. But on the contrary, if the paint "*makes good*" you make a fast friend and gain a lot of more customers.

NEU-TONE COLORS

(Washable — Sanitary)

Please Everybody — Dealer, Decorator and House-Owner

It pleases the dealer because it is a paying proposition — carrying with each sale the twang of a come-back order. It pleases the decorator because it enables him to give his work a "*style*" that triumphantly asserts itself.

It pleases the house-owner because with it, the house can be finished in the soft, restful, "flat" tints and rich colors of kalsomine. Dust, grease and smoke stains easily removed with a damp cloth. Think of it. It pays to sell this kind of paint, Mr. Dealer. Drop us a postal and we will tell you a few more things you will be glad to hear about this *paying proposition.*

THE MARTIN-SENOUR CO., Limited

Montreal Chicago Halifax Toronto Winnipeg

THERE IS A GOOD REASON

Why you should sell and recommend DOUGALL VARNISHES.

Firstly, the ingredients used in their manufacture are strictly pure.

Secondly, none but the most experienced men are employed in our factory.

Thirdly, no varnish is allowed to leave our factory until it has been properly aged, and we know it will do what we claim for it.

DOUGALL VARNISH is second to none, and we know it. We are not boasting when we say this, but we are justly proud and want you, Mr. Dealer, to have no hesitation in recommending our varnish for we will back you up every time. We know that nothing but satisfaction can result, for Quality counts.

A Dollar Talk

On Paint Oil Storage.

How much oil is:

Soaked up in the floor?

Smeared over the measures and funnels?

Absorbed by the barrel?

Wasted by over-measure and spillage?

Spoiled by evaporation?

How much is your fire hazard increased?

The answer to these questions shows why it is profitable to buy a

Cut No. 115.

BOWSER STORAGE SYSTEM

The pump measures the oil accurately, counts the gallons and computes the charge.
No Measures nor Funnels.
The steel tanks are air-tight and fire-proof.
No danger from fire. No loss from waste.

The Bowser Buys Itself

DO YOU BELIEVE IN---

THE "HORSE SHOE" FAIRY TALE?

Miracles do not happen in business, yet—lots of otherwise sensible men believe in Luck.

They will tell you that things happen—that the successful man is the lucky man. But getting down to brass tacks, you know perfectly well that nothing happens.

You know that success is the result of certain causes—

Causes so obvious that believers in the "Horse Shoe" fairy tale pass through life without noting them.

90 per cent. of the successful Hardware Merchants do not believe in luck—

They use "Buying Sense" instead,

And stock the lines which mean profit and reputation for them—**International Varnish Products.**

"ELASTICA" Floor Finish—the one perfect floor finish—the durable, beautiful, waterproof finish that never turns white or cracks.

"LACQUERET"—the Household Beautifier—a prime necessity in every home.

"SATINETTE" White Enamel—the enamel that stays white—made for both interior and exterior work.

FLATTINE FINISH—the finish that produces a full dead or flat appearance **without the labor and expense of rubbing.**

KLEARSTONE Stains (Acid or Oil)—the perfect wood stains.

Every **International product** you sell adds to your reputation and increases your bank balance at the same time.

N.B.—All International Varnish Products are sold in full Imperial Measure cans.

Department of Railways and Canals.

Ontario--St. Lawrence Canals. Rapide Plat Canal.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Improving Lower Extreme to Lock No. 24," will be received at this office until 16 o'clock on Friday, June 9th.

Plans, Specifications, and Form of Contract to be entered into can be seen on and after this date at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the office of the Resident Engineer of the Ontario—St. Lawrence Canals, Cornwall, at which places form of tender may be obtained.

Parties tendering will be required to accept the fair wages schedule prepared or to be prepared by the Department of Labour, which schedule will form part of the contract.

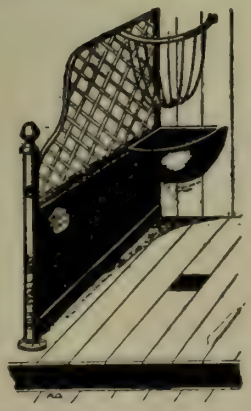
Contractors are requested to bear in mind that tenders will not be considered, unless made strictly in accordance with the printed forms, and in the case of firms, unless there are attached the actual signature, the nature of the occupation, and place of residence of each member of the firm.

An accepted bank cheque for the sum of $9,000.00 made payable to the order of the Minister of Railways and Canals must accompany each tender, which sum will be forfeited if the party tendering declines entering into contract for the work at the rates stated in the offer submitted.

The cheque thus sent in will be returned to the respective contractors whose tenders are not accepted.

The cheque of the successful tenderer will be held as security, or part security, for the due fulfillment of the contract to be entered into.

The lowest or any tender not necessarily accepted.



By order,

L. K. JONES,
Secretary.

Department of Railways and Canals,
Ottawa, May 19th, 1911.

Green Label Varnish Talks

By Glidden

Green Label varnish is THE varnish of all varnishes

Varnish is like *friendship*—its proof is in its *lasting qualities*.

Glidden's Green Label Varnishes go on to *stay*. They flow smoothly, dry evenly, and without brush streaks.

They set mirror-hard and crystal-clear. Do not obscure or cloud the wood, but reveal its full, natural beauty.

And the film that they form is *elastic*.

That is why changes in temperature do not affect them, nor do they scar white.

It's because of this wonderful, lasting quality—because they cover more per gallon—that the Green Label line is really the *most profitable* line to handle.

Glidden's Endurance Wood Stains is the line you will eventually buy. We have a proposition to make you, that sounds like a fairy tale but it's not; write us and we will tell you about it, and when you read it you will send us your order.

GOOD-BYE TO BIT EXTENSION TROUBLES

Here's the new improved **FORD** that solves every Extension problem. It so far surpasses the clumsy, hard-working models that there's no comparison.

Simple in construction, easy to adjust, knurl nut that holds bit as firmly as though in a vise, no parts to get out of order, especially designed for accurate, long-distance work.

The FORD BIT EXTENSION is vastly superior to any other.

It has been tried out by prominent electricians, who pronounce it the most practical ever made.

Every feature is a selling argument, Mr. Dealer, and its surpassing qualities mean big sales, big profits and satisfied customers.

You can unhesitatingly recommend the **FORD**, for it has made good every claim made for it; and satisfaction is certain to follow its use.

We'd be pleased to send you catalogue, terms and name of nearest jobber.

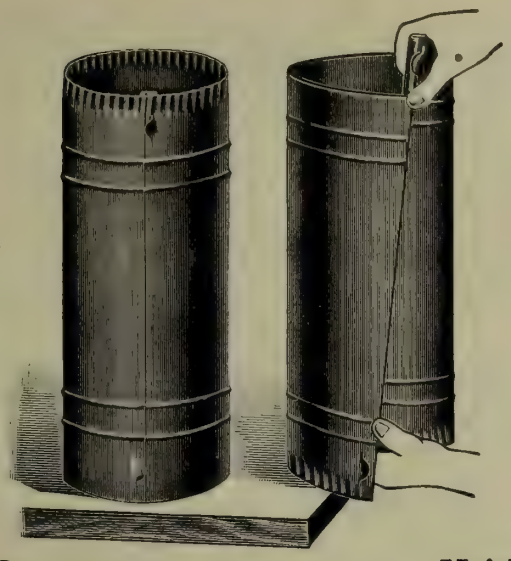
ST. THOMAS, ONTARIO



"PERFECT"

PATENT NESTABLE
STOVE PIPE.

No staples—no trouble to adjust —no complaints from customers.

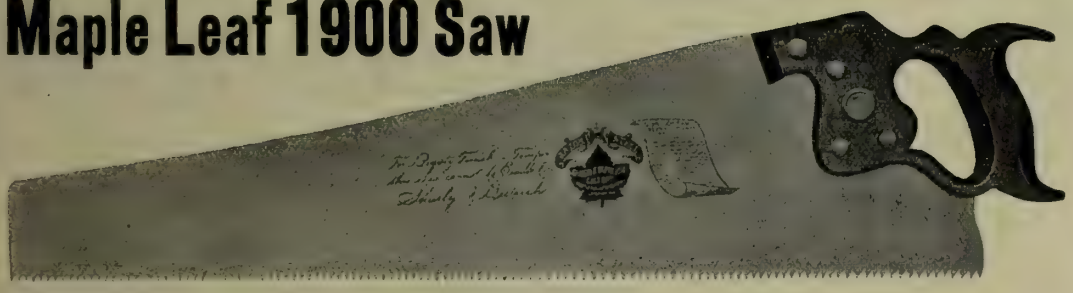
Each length is locked as shown in the cut, and is then as tight and as rigid as though riveted.

The grade of Canada Plate used is especially selected for the purpose, and each pipe is passed through an oil bath before crating, to prevent rust in storage and in shipment.

The "PERFECT" lock will neither allow the small end to collapse, nor the large end to expand.

"PERFECT" Pipe will therefore always fit perfectly, and will never fall apart.

Inches.	Shipping weight.
6	176 lbs.
7	200 lbs.



Packed, 25 lengths in crate.

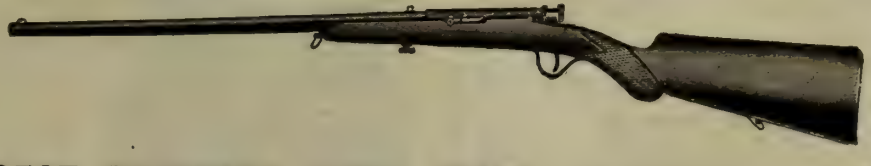
Maple Leaf 1900 Saw

MADE IN HAND, RIP AND PANEL—HOLLOW OR STRAIGHT BACK.

Are you handling the **"Maple Leaf" HAND SAWS?** the line with quality as the first consideration and that shows you the margin of profit you should get.

If not, we can offer you a proposition second to none—one that will appeal to you as a good business man. We have prepared special advertising features for the spring trade that every hardware man in Canada may have the advantage of. This advertising is done direct to the carpenter on our **1900, 100** and **"Narrow Point" Hand Saws.** We are packing the 1900 and 100 in separate canvas bags and have adopted a retail price which is stencilled on each bag.



We will be glad to supply you with full particulars.

SHURLY-DIETRICH COMPANY, LIMITED

GALT, ONTARIO **VANCOUVER, B.C.**

THE BAYARD AUTO-COCKING AND EJECTING SEMI-AUTOMATIC RIFLE

Entirely new features, nothing like it made, stands alone in quality and its class.
Adapted to 22 short or long rim fire smokeless cartridges.

THE STRONGEST SHOOTING RIFLE MADE. "You pull the trigger, the Bayard does the rest." When you shoot the cartridge the recoil automatically opens the breech block, cocks the rifle, throws out the empty shell and leaves it ready for a new cartridge. All you have to do is pull the trigger and drop in a new cartridge alternately. It is the only rifle having automatic features that handles two cartridges, 22 short and long. Strong Shooting, High-Class Workmanship, Handsome Alignment, Simplicity of Mechanism, parts interchangeable, are the main features of the Bayard. It has the quick twist rifling which makes it a powerful shooter. Will penetrate three inches of pine, weighs about 4 lbs., can be taken entirely apart in three minutes for cleaning, the only tool needed is a screwdriver. The rear sight is adjustable for short or long range, and the barrel tapers beautifully from breech to muzzle. Ask your jobber for the Bayard.

IT IS PERHAPS NOT GENERALLY KNOWN

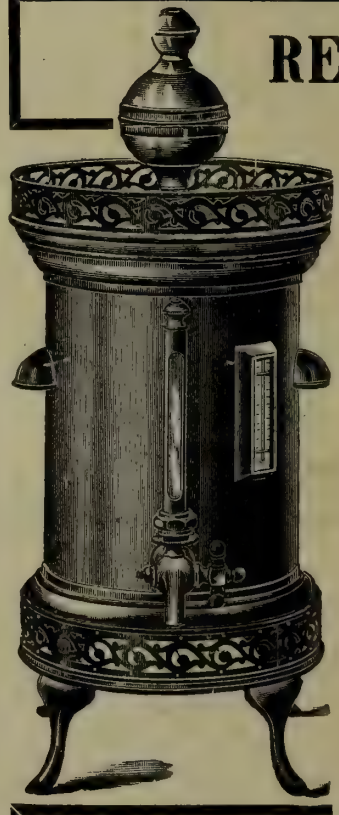
That we have an Information Department, consisting of trained and practical men, whose time is employed solely in answering enquiries from people interested in cement.

NOW IT WILL BE READILY UNDERSTOOD

that out of the mass of enquiries that come to us, there are a number that include questions as to what might be termed Allied Industries. These we now answer to the best of our ability, but we could answer them still more satisfactorily if manufacturers of materials used in conjunction with cement would co-operate to the extent of sending copies of their catalogues and other literature, to be placed on file in our office for reference.

WE SHOULD LIKE TO OBTAIN

the names and addresses, together with catalogues, and any other obtainable information, of manufacturers of and dealers in:—



(1) CONCRETE MACHINERY. (2) BUILDING BLOCKS. (3) CEMENT BRICKS. (4) TILE MOLDS. (5) FENCE POSTS. (6) REINFORCING MATERIAL. (7) WATER-PROOFING COMPOUNDS.

It is not alone for our own convenience that we make this suggestion—firms who manufacture or deal in such articles will find it to their own advantage to have this information in the hands of our Information Department, thereby enabling us to hand on to them, from time to time, enquiries for such materials as they severally make.

In sending catalogues, literature or information, please address same to "Sales Department."

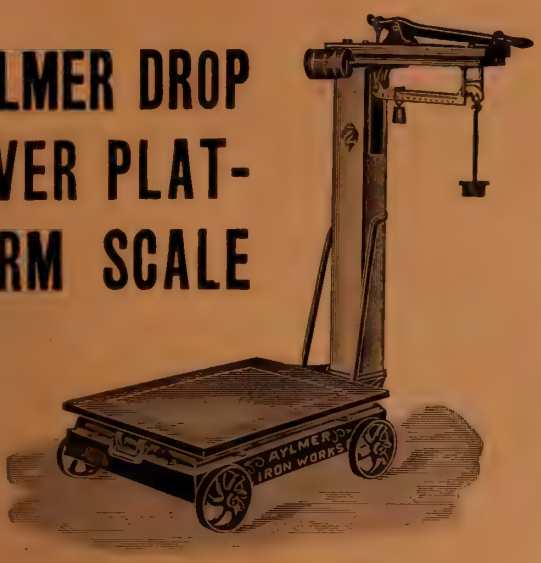
Manufacturers of the Best Known Clippers in the World

THE BURMAN No. 17 AT WORK

BOWN'S NEWMARKET Clipper is made solely by US. This clipper has enjoyed the highest reputation throughout the world for over thirty years. It brings repeat orders wherever sold.

THE GRAND CLIPPER (ball bearing) is the only genuine ball bearing clipper produced to-day, fitted with black ebonized handle and nickel plated. A strong seller.



THE HANDICAP is a lower-priced clipper, but its quality is high. It is a centre-adjustment clipper of very simple construction and is in great demand in all the colonies. It is the standard in Canada. Let us send you a catalogue. These are three of our most popular lines.

NO. 17 POWER CLIPPER STANDS ALONE. The phenomenal success of this power clipper is undoubtedly due to the excellence of the patent clipping head; its wonderful cutting qualities; its anti-frictional design and its perfect balance, and at the same time it runs lightly and easily. Weighs only 35 lbs. packed; size, 26 x 11 x 8 inches.

"The Razor of To-Day"

The Gillette Safety Razor Is Both Staple and Specialty

With its growing, world-wide demand and its steady volume of sales of both razors and blades, the GILLETTE has become a **staple** in most progressive hardware stores.

In its fresh attractiveness, in the vigor of the advertising and selling campaign behind it, and in the substantial profits which it yields you, the GILLETTE is as much a **specialty** as ever.

The Latest GILLETTE Advertising Feature

is a 3-color lithographed postal card illustrating, with some snappy, up-to-date conversation, the KEY TO SUCCESSFUL SHAVING. Mailed to your customers, it will renew the interest of the regular GILLETTE users, arouse the curiosity of those who have not yet bought, and bring both into your store.

Because it thus combines the advantages of both classes of goods, the time and attention as well as the floor and window space which you give the GILLETTE will bring you most satisfactory returns.

The handsome GILLETTE Sets, properly displayed, brighten up your store and windows and radiate the idea of a high-class stock. They grip the attention of the men who intend to buy a Gillette some time, and convert them into immediate purchasers.

Every GILLETTE sale pays you a sure, substantial profit, because the price is protected and no one can undersell you. Every GILLETTE sold means a pleased purchaser coming back regularly for blades—and whatever else you may be able to sell him.

Every year, with its increasing sales, emphasizes the fact that the GILLETTE is "The Razor of To-day." Are you taking full advantage of this fact? Is your store the GILLETTE headquarters for your town? Have you a GILLETTE Depot Sign working for you? Have you mailed your request yet for the new "Key to Successful Shaving" cards? Or is it your competitor who is leading the way and reaping the profits?

DISSTON

INSULATE SCREW DRIVER

This tool is designed expressly for Electricians' use. The blade of crucible steel, hardened and tempered, is embedded in a handle of hard rubber of a texture that eliminates brittleness. It WILL NOT work loose. The rubber handle is milled grip, with projecting rings which prevent the hands from slipping down on to the blade. The hard rubber handle acts as insulation.

The Disston Insulate Screw Driver is something new. Most practical Electricians' screw driver ever made.

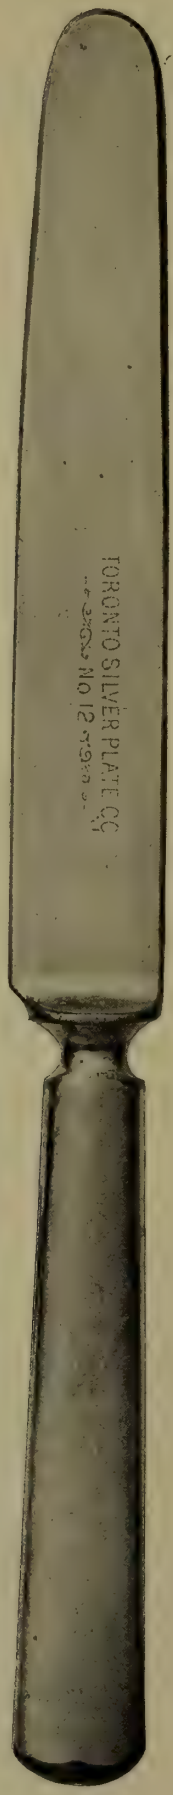
DUCHESS STREET, - TORONTO, ONT.

Hark! Mr. Dealer!

Here's your chance for a brisk, profitable trade. Such trade comes easily to the dealer handling



Acorn Corrugated Galvanized Sheets

which are made of metal so galvanized that it readily passes the severe tests that British Government requires of such building materials. These Sheets are highest quality, yet cost no more than ordinary, uncertain kinds. And you can DEPEND on Acorn Corrugated Sheets, for they are

ACCURATELY MADE

Our powerful machines stamp each corrugation separately and make them absolutely accurate. Therefore, they fit together perfectly and are easily erected. For moderate-priced constructions, repairing old buildings, etc., they are unequalled in value. Build a reputation by selling Acorn Quality Sheets. Thus you get a grip on the trade you want. Large stocks always ready for shipment. Get full particulars.

METAL SHINGLE & SIDING Co LTD.
PRESTON & MONTREAL

26 YEARS

This is an illustration of a Knife which had been in use 26 years, and was so satisfactory that customer brought in a sample to see if we could match it.

If the reader of this advertisement will carefully examine the cut of Knife it will be noticed that where the cut shows white the silver is still intact.

About the edges, the cutting part and the points exposed to the constant rubbing on the table where the cut shows black the silver is slightly worn off. To see how much use the Knife has had, see how it is gradually wearing to a taper from about half way down the blade to the point.

We have a letter from this customer saying whom these Knives were purchased from 26 years ago, expressing very great satisfaction at the way they have worn, and asking what it will cost for some to match.

Fac-simile of this letter we will be very pleased indeed to send any one in the Trade on application.

We are *Not in the Trust,* or are we *Members of any Silverware Association or Combine.*

Partial view of Trinidad Lake. The dark spots are asphalt; the streams are water on the surface.

Backed-up Roofing

You get co-operation all along the line when you sell Genasco; you are backed up at every step in pushing for bigger sales and better patronage. First, you have genuine quality.

Genasco

the Trinidad-Lake-Asphalt Roofing

has the lasting life that only *natural* asphalt can give. This is backed by our experience of over thirty years in the use of asphalts, and by our world-wide reputation. To this we add a full guarantee to Genasco. We go further and advertise it continually to prospective customers through the leading magazines and agricultural papers of the country. Then we make it possible for your jobber to help make Genasco still easier for you to sell, by supplying attractive advertising helps.

Can you imagine anything that will sell better, give more satisfaction to your customers, lay a surer foundation for continuous business, and bring you steadier profits than Genasco? Order Genasco from your jobber today.

The Kant-leak Kleet adds to the satisfaction of applying Genasco. Weather-proofs the seams without cement. Prevents nail-leaks. Ask your jobber for Genasco with Kant-leak Kleets packed in the roll.

H&R ARMS Co

¶ Right in every hardware store is the most logical place for a line of reliable, accurate, and moderate-priced single guns.

For ridding premises of pests—snakes, rats, 'chucks and the many kinds of crop and poultry destroyers, the Harrington & Richardson single guns are specially suited.

¶ There is a large and growing demand for an economical and efficient weapon for just that purpose, as well as for occasional hunting.

Here's the gun:

TRADE H&R ARMS CO. MARK

TRADE H&R ARMS CO. MARK

Specifications, 12 to 28 gauge—26 to 32 inch barrel—ejecting or non-ejecting—fine black walnut stock—hard rubber butt plate—weight 5¾ to 6½ lbs., according to gauge and barrel. For black or smokeless powder.

¶ These guns are quick sellers. They are made and sold under the broad H. & R. guarantee of quality, reliability and satisfaction. With a few of these H. & R. guns in stock, the hardware dealer is equipped for a profitable and increasing trade.

Our 40-page catalogue is yours for the asking. It contains valuable selling points for every hardware dealer and shows the complete H. & R. line. Ask for it now while you think of it.

Harrington & Richardson Arms Co., *715 Park Avenue, Worcester, Mass.*

REMOVING THE APPENDIX

Would you have this operation performed by some doctor who offered to do it cheap or by an experienced successful specialist ? We know the answer.

The same principle applies in many other directions. There has been a wonderful change in the intellectual broadening of operative Engineers and Mechanics. They are no longer satisfied with merely keeping the machinery in good running order. They start in at the coal pile and study the califoric power of fuels in thermal units, the firemen are put through a school of instructions, and they study economies and scientific problems in many other directions,

BUT How many Engineers and Mechanics figure on the loss from frictional resistance in transferring the power from the boiler to the points where it is needed ?

More than half of the power is often absorbed in that way and yet many up-to-date men use or permit to be used the most ordinary grades of babbitts because of the slight initial saving in the cost price.

It is Plain as an Open Book

that the value of a genuinely good and economical bearing metal is summed up in and expressed by a low co-efficient of friction.

A low co-efficient of friction means less frictional resistance, less wear, less heating, less oil, less fuel, less liability of shut downs, less rebabbitting, less consumption of metal, less squashing, less worry, less work. You can secure all of these economies and other advantages by the use of

Magnolia Metal

and we recommend its uses on shafting as well as all other bearings. We represent the specialist who does one thing and does it well.

Special Offer

PRACTICAL ENGINEER POCKET BOOK, 680 pages, over 2,000 subjects. We do not aim to make a profit on this book and therefore offer it at the very low price of 40c. postpaid. Many Engineers write to us that they find it invaluable. Address Montreal Office.

"JEWEL" FURNACE New Pattern. Two Sizes, Nos. 21 and 23

A Special Low Furnace

Different in shape and proportion from our other Furnaces, being specially constructed to surmount the difficulty of obtaining a sufficient pitch to the Warm Air Pipes in buildings with **LOW CELLARS.**

When flat top is used the No. 21 Furnace, cased, will not exceed 4 feet in height.

Diameter of Fire Pot—No. 21, 19 in.; No. 23, 22 in. Feed Door Opening, 13 x 13 in.

All our Furnaces are constructed on Correct Scientific Principles, and are mounted and fitted with the greatest care, under the direction of skilled and experienced men.

OUR FURNACES GIVE SATISFACTION AND STAND THE TEST.

This cut shows the construction of the Furnace.
The part of Furnace above Fire Pot is tilted on its side in order to show Combustion Chamber and Radiator.

The Fire Chamber is of ample dimensions and the **Feed Door** measures 13 x 13 inches.
The Radiator is made of heavy steel plate and surrounds the Fire Chamber, except at Feed Door.
The Fire Pot is made of heavy Cast Iron in two sections, upper and lower. This construction prevents the cracking of Fire Pot by unequal expansion and contraction of the iron. The Fire Pot of No. 21 is plain. The Fire Pot of No. 23 is flanged and has therefore a much greater radiating surface. The two sections of Fire Pot are attached by deep **Cup Joint** packed with asbestos cement. All other joints in Furnace are similarly constructed and a **Jewel** Furnace properly set is **ABSOLUTELY GAS TIGHT.**
The Water Pan is inserted through the outer casing near the base of the Fire Pot. When the pan is kept full the evaporation of water ensures ample humidity at all times.
Notice the **Dust Flue** in front of the Fire Pot, Connecting Ash Pit with Fire Chamber. Through this flue all dust is carried off when cleaning out ashes or using poker or shaker.
No. 21 Furnace has a heating capacity of 15,000 feet. **No. 23 Furnace** has a heating capacity of 25,000 feet.
This is the latest addition to a very large line of **WARM AIR FURNACES.** **Manufactured by**

Not an Enterprise for the "Quitter"

"If there is one enterprise on earth," says John Wanamaker, "that a 'quitter' should leave severely alone, it is advertising. To make a success of advertising one must be prepared to stick like a barnacle on a boat's bottom.

"He must know before he begins it that he must spend money—lots of it.

"Somebody must tell him that he cannot hope to reap results commensurate with his expenditure early in the game.

"Advertising does not jerk; it pulls. It begins very gently at first, but the pull is steady. It increases day by day and year by year, until it exerts an irresistible power."

"MONARCH" WIRE FENCE

If you have a call for a cheap bush or portable fence we can supply a **"Monarch"** perfectly adapted to this need.

The **"Monarch"** is made in 15 sizes, so you can have one suitable for any purpose, even close enough for hogs. Every wire is No. 9 hard steel, and well galvanized.

The **"Monarch"** has the best Ring Lock in Canada, and cannot slip nor come loose.

It will sell itself if you have it where your customers can see it.

Write us for Catalog and Prices.

Far-reaching Development in Canadian Paint Industry

Sherwin-Williams Co. of Canada Purchases Canadian and British Interests of Parent Concern—Canada Paint Co. Also Acquired—For the Present, Both Firms Will Retain Separate Identity.

Montreal, June 8.—One of the most important transactions in the history of the Canadian paint trade was announced during the past week by which the Sherwin-Williams Company of America, have sold their Canadian and British interests to the Sherwin-Williams Company, of Canada. Walter H. Cottingham, president of the Sherwin-Williams Company of America, and C. C. Ballantyne, managing director of the Sherwin-Williams Company of Canada, are the purchasers and have associated with them other strong financial interests. The extensive plants of the Canada Paint Company, at Montreal, St. Malo, Toronto and Winnipeg, have also been purchased.

An English Connection.

In addition to this transaction the old house of Lewis Berger & Sons, Ltd., of London, England, which has been owned by the Sherwin-Williams Company, of America, since 1905, has been purchased by the Canadian interests. This English firm has been in existence continuously since 1760 and celebrated its 150th anniversary last year. The head works of Lewis Berger & Sons are situated in the heart of the city of London, near the Bank of England, occupying a superficial area of over five acres. This concern occupies a foremost place in the British paint, oil and varnish trade, has a large trade in the British Isles and extensive foreign connections with branches in Australia, India, France, China and Japan.

Retain Their Identities.

The transaction resolves itself into the purchase of the Canadian and British interests of the Sherwin-Williams Company of America and the Canada Paint Company. Robert Munro who for the past twenty years has successfully managed the Canada Paint Company stated to Hardware and Metal that the several concerns would retain their identities. Mr. Munro finds it necessary to relinquish his business activities owing to ill health during the past two or three years, but will continue to act in an advisory capacity and give the management the benefit of his knowledge and experience with the Canada Paint Company.

C. C. Balantyne, who is vice-president and manager of the new Canadian concern is retaining his financial interests in the Sherwin-Williams Company of America. The local firm, Mr. Ballantyne asserts, will receive the benefit of any research work on the part of the United States interests, while each company in Canada and in England which is now separate and distinct, working under its own independent management, will in future conduct its own affairs, and carry on without outside interference all matters pertaining to internal growth and development of trade.

W. H. Evans, selling representative of the Canada Paint Company at the Montreal factory states that there has been absolutely no change in the style or brands of that concern and business is going along with unusual activity, May having been a record month, overtopping any previous month in the company's career.

WALTER H. COTTINGHAM,

President and General Manager Sherwin-Williams Co. of America, and President of New Company.

Walter H. Cottingham's Career.

Walter H. Cottingham is one of the most brilliantly successful of those Canadians who have taken a prominent part in developing the industries of the United States. Born in the village of Omemee, Ont., he received his first business experience in a Peterboro hardware store. He came rapidly to the front, and, at an early age, founded the paint manufacturing firm of Walter H. Cottingham & Co., in Montreal.

When the Sherwin-Williams Co. decided to invade the Canadian field, they acquired the plant of Walter H. Cottingham & Co., placing Mr. Cottingham in charge of their Canadian business. He was thus the founder and first manager of this important firm's Canadian enterprises.

In 1898 he was called to Cleveland as general manager and a few years later was made president of the entire company. The success of the company with which he has been so prominently associated is in a large measure due to the enterprise and organizing ability of Mr. Cottingham who as the president of the newly formed company should conduct it with an equal measure of success.

C. C. Ballantyne, Vice-President.

C. C. Ballantyne, one of the foremost figures in Canadian industrial life, will be vice-president and general manager of

the new concern, comprising the entire Canadian and British interests.

Mr. Ballantyne has been associated with Mr. Cottingham for twenty years. In 1898, when Mr. Cottingham assumed the general managership of the parent concern, Mr. Ballantyne was promoted to fill the vacancy in the Canadian Division. In this capacity he has demonstrated great business ability, and is largely responsible for the important place held by the Sherwin-Williams Co. in the Canadian paint and varnish world.

Mr. Ballantyne has been president of the Canadian Manufacturers' Association and, for some years past, has served on the Montreal Harbor Commission, which is rapidly bringing the port of Montreal into the front rank of the world's sea ports.

C. C. BALLANTYNE,

Vice-President and General Manager of New Firm's Canadian and British Interests.

Robert Munro, a Veteran Paint Manufacturer.

Robert Munro, president and general manager of the Canada Paint Co., will sit at the board of the new company, which will thus have the benefit of his long and varied experience in the paint trade.

Twenty years ago, when the Canada Paint Co. was organized, Mr. Munro, who had already had forty years' experience in paint manufacturing, was chosen general manager of the firm, a position which he has filled with signal success ever since. He recently became president of the company, upon the retirement of S. F. McKinnon in 1898, when Mr. Cottingham was removed to Cleveland.

He has been associated with Mr. Cottingham for over twenty years and as general manager of the Canadian business he has demonstrated his ability, bringing the Canadian company to the fore in the ranks of the paint and oil trade in this country.

Capitalized at $8,000,000.

The details connected with the recent transaction are not all complete. Although known as the Sherwin-Williams Company of Canada, this point does not seem to be definitely settled and from what has been given out each company will still retain its previous name and its former identity. The new concern is capitalized at $8,000,000 divided into $4,000,000 seven per cent. preferred and $4,000,000 of common stock. It is stated that only a portion of the preferred will be offered, a considerable portion of it having been already taken up, leaving about $1,500,000 for public subscription. The management has decided to make application to the London and Montreal Stock Exchanges to list the stock and it is expected that they will receive favorable consideration. The listing in London is due to the fact that interest in the new concern is pronounced from a financial point of view.

Formation of Canada Paint Co.

It is interesting to note that the Canada Paint Co. was formed on March 2, 1892, as the result of the merging of three of the largest Canadian paint companies then in existence—O. G. Peuchen Co., Toronto, Ferguson, Alexander & Co., Montreal, and the William Johnson Co., Montreal.

The merger was effected largely through the efforts of the officers of the O. G. Peuchen Co. Hardware and Metal, in giving a detailed account of the negotiations, states: "A large share of the credit for bringing the big scheme to a successful close is due to ex-Mayor Howland, the vice-president of the company."

The first directors of the Canada Paint Co. were the men who constituted the board of the O. G. Peuchen Co.: President, S. F. McKinnon; vice-president, W. H. Howland; H. M. Pellatt, Samuel Trees, Thos. Walmsley, William Bell, and O. G. Peuchen. Robert Munro, manager of Ferguson, Alexander & Co., was appointed manager of the amalgamated concern while Mr. Peuchen was made assistant manager and placed in charge of the Toronto works. The charter of the company limited the capital to $450,000.

Hardware and Metal outlined the plans of the company as follows: "The company does not contemplate the raising of prices, but it aims at the cutting down of expenses. It is expected that the yearly cost of doing business will be reduced by almost $100,000. In the first place, the work of manufacturing will be concentrated in two factories. The Montreal factory will be that formerly run by the William Johnson Co."

It was stated that Ferguson, Alexander & Co. got stock for their plant, but the William Johnson Co. were bought out.

Later News.

Latest advices from Montreal, as we go to press, are to the effect that the Sherwin-Williams Co. of America, received for their Canadian and British interests, a million and a half in stock as well as a cash consideration, while the other firms concerned, accepted stock only. Each part will still be run under its own name.

ROBT. MUNRO,

For twenty years Managing Director Canada Paint Co., who will serve on Board of New Company.

The new company is capitalized at 7 millions, not 8 as at first announced; the stock is divided into 3 million preferred and 4 million common. Among the new directors are Wm. McMaster, J. W. McConnell and Robt. Munro.

To Erect Corroding Works.

It has been decided to erect a large modern Old Dutch Process white lead corroding works immediately, as the consumption of lead will now warrant this undertaking. Although no announcement has been made, it is probable that the plant will be established at Montreal.

To Invade Canadian Paint Market

Prominent American Firm Expected to Establish Plant in Toronto—Definite Plans Likely to be Announced This Month.

While many United States paint manufacturers have been attracted to the Canadian field by the rapid expansion in the past of this country, several firms of first importance have disregarded Canada as a market for their products. Among these were Lowe Bros., of Dayton, Ohio.

Mr. Kennedy, a prominent executive officer of this company, like many other successful paint men of the United States, is a Canadian by birth, and, for this reason, his friends in the Canadian trade have frequently expressed surprise that his firm did not follow the example of other American paint manufacturers and establish a branch on this side of the line.

It would appear, however, that Lowe Bros. have been watching the development of Canada and awaiting a favorable opportunity of breaking in. That opportunity has now presented itself, and it is expected that, before the end of the present month, negotiations which have been under way for some little time, will be completed, and Lowe Bros. will get off to a good start by securing control of an established paint business in Toronto.

Mr. Lowe, who was recently in Toronto looking over available sites, was much impressed with the possibilities here, and, as a result of his visit, the negotiations which the firm had been carrying on with the object of taking over the paint department of a well-known Toronto firm, have every prospect of being concluded, and it is believed that only the details remain to be settled.

One circumstance which has no doubt hastened action on the part of Lowe Bros., has been the acquiring by the C.P.R. of an extensive block of land south of King St., Toronto, by expropriation. Among the firms whose property was thus expropriated, is the James Robertson Co., who, with others affected, will have to secure new sites for carrying on their business. The opportunity was thus presented of making some changes, and, as announced in Hardware and Metal some few weeks ago, arrangements were made whereby the paint department was separated from the other end of the business. This left the James Robertson Co. in a position to reorganize their paint factory, and it was to them that Lowe Bros. directed their proposition. Under the circumstances which have been described, the proposal was well received, and, although no official announcement has been made, Lowe Bros. have under consideration the purchase of a large block of stock of the James Robertson Co.'s paint department which would give them a controlling interest in the Company.

In the absence of an official announcement, it is not known whether the new amalgamation will operate under the name of the James Robertson Co. or Lowe Bros., nor can it be said with authority what plans will be adopted regarding the management of the company.

Among the paint and varnish trade of Toronto, considerable interest is expressed in Lowe Bros.' entrance into the Canadian field. General satisfaction is expressed at their decision and it is believed, in many quarters, that they will lend valuable assistance in educating the Canadian paint consumers to the use of high-grade mixed paints.

AMALGAMATION OF PAINT MAKERS.

About twenty years ago, the Canada Paint Co. was formed by the amalgamation of three large Canadian paint manufacturers. In view of the fact that this company has just been acquired by the Sherwin-Williams Co., of Canada, the following article which appeared in Hardware and Metal twenty years ago, will be of interest to the trade :

"On Tuesday last, negotiations that had been long on foot for a consolidation of paint manufacturers, were brought to a conclusion, when the Canada Paint Co., formally took over the properties of the houses it bought out. The manufactories thus merged in the new company are the A. G. Peuchen Co., Toronto, Ferguson, Alexander & Co., and the William Johnson Co., both of Montreal. The directors of this big composite concern are the same men, with the addition of Mr. Munro, as constituted the Board of the A. G. Peuchen Co., namely : Mr. S. F. McKinnon, president ; Mr. W. H. Howland, vice-president ; Mr. H. M. Pellatt, Mr. Samuel Trees, Mr. Thos. Walmsley, Mr. William Bell, and Mr. A. G. Peuchen. Mr. Munro is manager, with head office at Montreal, and Mr. Peuchen is assistant manager and will look after the works in this city. Ferguson, Alexander & Co., have got stock for their plant, but the William Johnson Co. goes out. The company's charter limits the capital to $450,000, of which already a considerable proportion has been subscribed. A large share of the credit for bringing the big scheme to a successful close is due to ex-Mayor Howland, the vice-president of the company.

"The new concern starts under promising auspices. It is in capable hands and has a strong financial backbone. There is not a dollar of debt against it, as it has assumed none of the liabilities of constituent concerns. Mr. Munro, the manager, held a like position in the business of Ferguson, Alexander & Co. in which firm he was a partner. Forty years of experience in paint manufacturing makes him a competent man to undertake the direction of the new company's affairs. He is ably seconded by Mr. A. G. Peuchen.

"The company does not contemplate the raising of prices, but it aims at the cutting down of expenses. It is expected that the yearly cost of doing business will be reduced by almost $100,000. This will be the source of dividends. In the first place the work of manufacturing will be concentrated in two factories and the division of labor between these will be with an eye to further economy. The Montreal factory will be that formerly run by the William Johnson Co. Dry colors, Paris green, heavy goods and chemicals will be made at the Toronto factory, which also will be the western shipping depot for all the lines formerly made by the three manufactories incorporated in this. The Montreal factory will make all the other goods, and the grinding will be done in Montreal as well. Many large salaries will be saved through the industrial concentration alone, as one expensive color maker, one expensive varnish maker, etc., will do where three were employed before. The number of travelers will also be diminished. The labels and brands of all the companies absorbed will be retained, as the formulas for the manufacture of all the staples and specialties, as well as the right to use the brands have been transferred from the former proprietors to the Canada Paint Company."

REMEMBER THESE NOW.

Cherry stoners, apple parers and corers, fruit presses, spring scales, fruit jars and rings, strawberry cleaners, etc., will soon be necessary in the household. To get this trade it is best to be prepared for it, and there is nothing like the present for undertaking such preparations.

The fly season is just beginning. There are at least three months to suffer from this pest. The May demand was but a curtain-raiser. Screen doors and screening, together with fly exterminators, are worth attention.

And, by the way, the potato crop is sure to demand Paris green. Stocks of this insecticide are probably complete by this time.

PUBLISHED EVERY SATURDAY

GETTING ACQUAINTED WITH NORTHERN ONTARIO.

The Toronto Board of Trade, were recently addressed by J. L. Englehart, chairman of the T. & N.O. Railway Commission, who told them some astonishing facts regarding the greatness of Northern Ontario, and its possibilities for developing the manufacturing cities of Old Ontario. The Board were so impressed with Mr. Englehart's address, that Northern Ontario has begun to occupy a large place in the interests of Toronto business men.

A special commissioner, Fred. W. Field, has been appointed by the Board of Trade, to thoroughly cover New Ontario and report upon its business possibilities, especially as they relate to Toronto.

The first letter from the commissioner has been received, and it breathes of optimism throughout. The fact is emphasized that there are 20,000,000 acres of valuable agricultural land, in Northern Ontario, awaiting labor. The settlement of these rich farming districts will mean an immediate impetus to business, in the older parts of the province.

The development of the northern mining districts has already resulted in an increase in the freight traffic of the T. & N.O., of 540 per cent. since 1905, and, in the passenger traffic, of 674 per cent. in the same period.

The action of the Toronto Board of Trade, means that capitalists and merchants of that city are looking forward to the early settlement of Northern Ontario for the expansion of their own interests. As the hardware trade are an important factor in the development of any new country, readers of this paper will watch closely the progress made in the north, and not a few will prepare to profit from the opening up of New Ontario's rich agricultural acres.

THE PARCEL POST STRUGGLE.

The parcel post agitation in the United States seemingly "will not down." Despite the temporary reverse experienced some months ago, the advocates of the measure are still fighting hard to gain support from the members of Congress. The promoters recently held a mass meeting in Washington, when it was announced that a large number of the Congressional legislators had been won over to support of the measure. On the other hand, the opponents of the measure are not resting on their oars. A constant campaign of dissent is being waged, and it is believed that the telling arguments advanced will again result in the measure being thrown back.

The outcome of the struggle will be watched with keenest interest on this side of the line. While there has been nothing to indicate that the defunct bill of the Postmaster-General would ever be brought back, there can be no doubt that the passing of a parcel post measure in the United States would have some influence here. No opportunity should be neglected, therefore, to point out the weaknesses inherent in the proposal.

SAVE THE FLAXSEED CROP.

This is the slogan of a campaign which has been started throughout the northwest states and has spread into the Canadian Northwest. In many American towns banners are to be seen containing this urgent appeal and the words are displayed outside practically all hardware stores.

The campaign is part of an educational movement started by the paint manufacturers and linseed crushers of the United States, who fear the gradual extermination of the linseed crop. Literature is being sent out to all farmers who have grown flaxseed, dealing with the nature of flax and the growth of the same, together with information relative to the overcoming of the common evils and pests. It is felt that by the dissemination of knowledge along these lines and the awakening of interest in the situation, the present condition can be gradually improved.

Every dealer who handles paint will appreciate the gravity of the situation. The normal crop of the United States is about 30,000,000 bushels of flaxseed. In 1909 the crop raised did not exceed 18,000,000 bushels and in 1910 this was further cut down to the alarmingly low total of about 10,000,000 bushels and the result has been an almost unprecedented increase in the price of oil. The domestic shortage has forced upon the crushers the necessity of importing foreign seed in large quantities.

It is natural, therefore, that alarm should be felt. It devolves upon the dealer to assist in the campaign that has been started for the improvement of methods adopted in the raising of the valuable flaxseed.

THE WOES OF THE FURNACEMAN.

The furnaceman has troubles of his own. He has, in the first place, to solve intricate problems with reference to installation, the proper size of furnace to be used, proper methods of piping, etc. Then he has to contend with the expense-paring propensities of the average householder, who wants to reduce the cost of installing a heating system to the lowest possible figure. Finally, he has to bear repeated complaints, too frequently the result of having given the owner just as cheap a system as he wanted.

Complaints are inevitable, of course, in connection with anything that requires a certain amount of skill in operation. Householders mismanage the furnace and blame the lack of satisfactory results, either on the make or the methods of installation. The dealer, therefore, is compelled to face the music, even in cases where the installation has been well-nigh perfect. Complaints can be reduced to a minimum, however, by the exercise of proper care in determining the requirements of each house before undertaking the installation of a warm air system. The dealer owes it to his customer to go into each problem carefully and to see that all contingencies are provided for. Furthermore, he should refuse to handle contracts where he feels sure that the style of furnace desired by the owner would not give satisfaction. Such contracts are bound to prove the source of continual trouble and worry, for it is doubtful if satisfaction will be given.

DUST-LADEN GOODS REPEL TRADE.

There is altogether too much dust in many hardware stores that are big enough and prosperous enough to present a cleaner and neater appearance. It is, no doubt, a fact that heavy traffic creates dust and keeps it in the air with the result that it is bound to cause the hardware retailer trouble. But this is no excuse for dusty windows and a general dusty appearance about the entire place.

If the stores referred to were at a standstill and were accomplishing nothing in the way of business they might be over-looked as not worthy of attention, but in the instances referred to the number of customers suggests prosperity and should demand neater and cleaner conditions. Dust is an easy thing to remove if the proprietor will insist on his clerks looking after it. There are always one or two days in the week during which business lulls sufficiently to provide time for a couple of clerks to chase the dust. It is not entirely an inviting prospect to see a window display dust laden, or a light coating over the goods in show cases. These are things that should not be and the proprietor who says he has not time to look after this defect must have received a mighty poor training in his clerkship days.

A clean, well-arranged store is an asset in the fact of its orderliness and it requires but little trouble to secure the desired condition. The general appearance of a hardware store suggests the interest the proprietor has in his business and in the same measure may he expect the buying public to be interested in it. A little housecleaning of the regular weekly or semi-weekly nature in many a hardware store would certainly be a step in the right direction.

HANDLING SPECIALTIES.

It is quite true that this is an age of specialists and, it might be added with equal truth, an age of specialties. Man's inventiveness is showing itself in the continual production of some substance or article to meet some one particular need, which he has felt. These new articles which are generally in a class by themselves, being designed with just the one purpose in view, are taken up with avidity as soon as their real usefulness has been demonstrated. Adequate advertising can put some such specialty into every home in the country inside of a few years following its introduction on the market.

It follows that specialties are valuable for the retail dealer to handle. An article, which represents the "specialized" efforts of many years and is as near perfection for the one purpose as man can get it, is bound to prove a splendid seller, particularly if the maker has recognized the necessity for a nation-wide campaign of publicity. In handling goods of this description, the dealer has the trade-getting genius and the extensive advertising of the maker behind him. In the hardware business, the opportunity presented of handling specialties is unexcelled. It pays the hardwareman, therefore, to keep abreast of the market and to see that he himself handles all the most desirable new goods.

COMMERCIAL CARAVAN CARS.

A writer in a contemporary comes forward with the suggestion that commercial travelers be provided with caravan motor cars. His idea is that each traveler should have a car large enough to convey himself, one attendant (who would act as chauffeur and chef) and a full set of samples. Thus fitted out, the traveling salesman would be independent of timetables and hotels and would travel at less expense than at present. He would be able to adapt his time to that of his customers and would possibly cover more ground ; provided, of course, that his machine and his chauffeur were both reliable.

The idea makes up in originality what it may lack in practicality. If put into effect, we would see conditions revert back, in a sense, to the early days of the traveling man, when like Tom Smart, of Pickwickian fame, the traveler was called a "bagman" and drove around the country in his own "shay" or gig.

But the difficulties in the way of putting this bright idea into effect are such that we fear the traveling man will for some time to come be forced to govern himself by the timetables and to get bed and board at the hotels. The era of caravan commercialism is not yet at hand.

POINTED EDITORIALS.

Keep ahead of the seasons. Don't let the seasons get ahead of you.

* * *

As a rule, the dealer who tries selling for cash, has no desire to "come back."

* * *

This is the first of the two cutlery seasons. Do your sale records bear evidence to this ?

* * *

Prepare now to take a vacation during the hot weather. You will come back refreshed for the fall campaign.

* * *

Probably this week's cold spell merely came along to help out the refrigerator manufacturers, who are congested with orders.

* * *

Manufacturers and jobbers of hardware lines having merged almost to the limit, a merger of retail hardwaremen is the next logical development.

* * *

The agitators of the Parcel Post measure in the United States are still active. The perserverance shown by these promoters of a detrimental and ill-starred measure is worthy of a better cause.

* * *

The fact that a Toronto hardware firm are winning success in a wedding present campaign, in spite of the fine jewelry stores in the Queen City, should open the eyes of hardwaremen who have not yet taken up presentation lines.

* * *

Not one hundred miles from the corner of King and Yonge streets, Toronto, is a hardware store with skates still displayed in the window. Is this just a case of Rip Van Winkleism or is this energetic dealer out already after the early winter trade in skates ?

* * *

At the convention of the National Association of Master Plumbers next week, the question of changing the name to "Association of Sanitary and Heating Engineers" will be considered. Hardwaremen will watch with interest the outcome of this movement.

* * *

In many places throughout Ontario the return of the caterpiller pest is reported. This should create a demand for sprayers as these hairy worms do a lot of damage to foliage. It's an ill wind that blows nobody some good. There should be some new business for the hardware man in helping to meet this pest.

* * *

A Palmerston, Ont., hardware firm are advertising, in their local newspaper of May 25th, a sale of washing machines at less than cost, for April 15th. If the machines are really priced at less than cost, no doubt they are hoping that the effect of the advertisement will have worn off by this time.

Typical Canadian Hardware Advertisements

The "Store Slogan" Idea is Developing—Prices are Quoted More Freely Than Previously—Department Store Advertising Closely Followed by Some Dealers —Increased Attention Paid Newspaper Advertising, is a Hopeful Sign.

A hurried survey of newspapers from representative Canadian towns and cities reveals a very noticeable improvement in the advertising methods of hardware dealers. It is evident that the trade are awake to the importance of getting the attention of the public through the columns of local newspapers, and the subject of advertising is in many cases, being studied as it should be.

A feature of the advertisements noticed this week, has been the development of "store slogans" some of which are very catchy. "Horne's Hardware" is the euphonious slogan adopted by that progressive hardwareman Robt. Horne, of Sudbury. "Workingman's Hardware Store," is the pithy way in which John Rhodes, of Dryden, Ont., advertises his establishment. The Traders Co., of Buckingham, Que., have a good slogan in "Try The Traders," which is amplified by the words :

Hardware—all lines—always right
in Quality and Right in Price.

This company use big space in their local paper, but it is so crowded, and printed in such small type, that the slogan appears to be the most effective part of their advertisement.

Adam Forbes, of Rathwell, Man., uses "Old Reliable Hardware" as his slogan, while W. F. Mickus, of Preston, who has recently remodelled his store, using fine green glazed brick on the front, advertises it as "The Green Front Hardware."

Another marked improvement is noticed in the more general use of cuts, and quoting of prices in hardware ads. These are all signs of progress and the time is probably not far distant when hardwaremen will be able to successfully fight the mail order houses at their own game—effective advertising.

On the opposite page are some specimen hardware advertisements, selected at random, for review. No. 1 is a good talk on lawn mowers. The space is of satisfactory size and shape for the "copy," and the cut in the upper left-hand corner invites the attention of all who may be thinking of buying a mower. The quoting of a price on the mower described will focus this attention, and is very likely to result in a personal investigation of the mower. If this price is a little beyond the means of the reader, he will be interested in knowing that Campbell's Hardware Store has some lower priced mowers also in stock. This store's slogan, "Good Goods—Low Prices," is a good one to work on.

Ad. No. 2, approaches very closely to the department store style of advertising. The idea of panelling the ad. and devoting each panel to some special item, has proven successful in so many cases that it may be safe to predict good results from W. W. McCubbin's ad. The head-line "Fencing Time," calls attention to the lines advertised, but it may have been rather more effective if put in some such way as this : "Buy Wire Fencing Now," thus making use of the hypothetical imperative which was discussed in the May 27 issue of Hardware and Metal. A feature of this advertisement is the "special offer" occupying the entire width of the space, across the bottom. This is worded in such a way as to clearly bring out the excellent value of the offering, and to explain why the price has been cut on this lot of fencing.

Ad. No. 3 has not been very carefully prepared. The head-line "Screen Doors and Windows" would lead one to suppose that these goods would be quite fully described, but, as a matter of fact, the "copy" is a mere list of some of the seasonable lines in this store. Mr. Cummings has made the mistake of trying to advertise too many lines in a small space. His ad. would have been made more effective by devoting it entirely to a description of the assortment he carries, of screen doors and windows, using as a head-line : "Keep Out The Flies !"

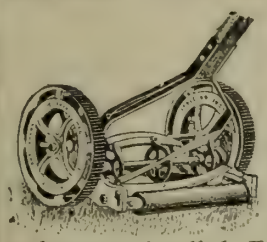
In Ad. No. 4 Simpkins Bros. have adopted a good idea in the stock border with the firm's name in white on black, at the bottom. This electro, however, has evidently been used for some time, and is worn out. It should be replaced. This idea gives the double advantage of repetition, by means of the stock border, and regularly changed copy. The advertisement of screen doors and windows gives a good idea of the line carried by Simpkins Bros., and the fact that prices are quoted, is an additional advantage.

No. 5 is introduced by a headline which is bound to make an impression on the housewife who is accustomed to cooking in summer over a wood fire. A cut of the oil stove Mr. Mills is selling backs up the forcible head line, and the principal talking points of the stove are pithily expressed, at the close. These would answer most of the arguments which would be likely to occur to a prospective customer. If the price of this stove were quoted, it would make the ad. more effective.

No. 6 is a good example of copy and cuts being nicely fitted to the space used, thereby giving a well balanced advertisement. The cuts represent Japa-lac being used to renovate four common household articles—an old chair, fenders in front of a grate, a domestic boiler, and a hanging plate holder. The offer to present a sample can to lady visitors, should attract a good attendance of the fair sex to the store.

No. 7 contains several good features. A cut of the wringer advertised gives pulling power to the ad.; prices being quoted gives it the nature of a real business proposition ; the fact that the wringer is guaranteed for three years is a telling argument, and the offer of 10 p.c. off for spot cash should prove very attractive, and result in a good run of cash sales.

No. 8 is just a mild invitation to visit the store of J. A. Rice & Son, to secure prices on wire fencing. To invire a buyer to drop in and get a price on his requirements, is to encourage him to go around and secure tenders wherever he can. This ad. would be more convincing if it took for granted the fact that prospects would buy when they got Rice & Son's price, and investigated their quality. Newspaper advertising, to bring results, should compel rather than coax or cajole. Make your copy as strong as the true facts of the case will warrant ; don't be at all shy in the way you use the space for which you pay your good money. Go after results !



TRADE PAPER ADS. FULL OF IDEAS.

"I only recently began to read trade-paper advertising," said a dealer not long ago. "I kept the ads. more as a directory of the trade. But nowadays there's getting to be such live business-like stuff in some trade-paper advertising that I feel I'm missing something if I don't look them over."

This dealer went on to say how he once got an idea from a live trade paper ad. that induced him to alter his basic theme of doing business. "Some advertisers are hiring people to write their trade-paper ads. who have such good ideas that I would feel delighted to take them out to lunch and ask their advice about various matters. And my trade paper is more valuable to me, because many of its ads. are so full of real ideas."—Printers' Ink.

Boating Supplies a Good Line to Handle

Dealers Situated on Waterways Have Good Opportunity — Demand is Steady Throughout Summer Months—Clerk in Charge Should Have Knowledge of Boating Technicalities.

When a hardware dealer builds up his sporting goods department, only one condition is necessary to induce him to add an extensive line of boat supplies, a sub-department that seems to lead naturally from the sporting goods part of the store. This essential condition is the demand for boats and boat fittings. There must be a body of water near the town or city and in addition among the citizens there must be a love for aquatics. In other words there must be the water and in addition, the townspeople should take advantage of it. Regarding the latter point it is safe to say that wherever the opportunity presents itself the people are not slow to show their fondness of the pleasure of being on the river or lake as the case may be.

Two Essential Conditions.

The clerk in charge of the sporting goods department puts in a stock of canoes and paddles and finding that they create interest with resulting sales, he is attracted toward this end of the sporting goods business. He finds the customers asking for motor boat supplies, for sail boat goods and realizing that his stock of goods is not complete without these necessaries, he "lays to" and fills out the list. Or he may decide not to touch them and while retaining paddles and canoes he misses the opportunity to build up a reputation of having a complete stock. Citizens who want articles in this class know where they can secure them and they also know the place where supplies are kept in a haphazard condition with only certain lines carried in full.

Considering the boat supplies part of this department, therefore, the first two points to be provided for are the natural demand from the locality and, with that assured a complete assortment of the goods required, is a great factor to the establishing a store's reputation in this regard.

Several Sub-divisions.

In considering the boat supply department, it should be remembered that there are several sub.divisions. There are supplies for sailing boats, and other supplies for motor boats each sub-division of the department being quite a figure in itself. Then there are canoe and skiff supplies, and the dealer who decides that this part of his business is going to be complete has to remember or to know by experience the articles he has to have in stock. While some of the articles are the same for sailing and motor boats there are others which are principally concerned with but one of these lines.

Instances in Montreal.

It is but natural to expect among Montreal hardware dealers quite a number who carry these lines. The Durand Hardware Co., St. James St., the Jas. Walker Hardware Co., Ltd., and I. L. Lafleaur are among those who carry rather complete stocks in this department. The Durand store is perhaps better known to the owners of sailing boats, and it was stated to a representative of Hardware and Metal that practically everything required in this line is carried. One of the windows was recently devoted to a display of boat goods, but apart from this the Durand store enjoys a reputation among sailboat owners of having all the necessary supplies. Friday of last week was one of their busy days. Boat owners are already on the water or are preparing for the first dip of the year with the result that the demand just now is steady and heavy. Although all the smaller articles used are going out well, one of the features has been a special rope for sail boats, which has proved a favorite with owners. It is very pliable and soft and possesses all the qualities that commend it to the man who is depending upon the wind to carry him along in that which has been well called the sport of kings.

A Separate Section of Store.

In the stores visited it was found that these boat supplies are kept in one section of the store. The smaller goods are kept in drawers on the shelves. The heavier articles such as anchors, steering wheels, rudders, etc., have a certain space allotted to them. Thus a customer has every opportunity of looking over the goods and there is the possibility of some lines which he had not thought of, appealing to him. There does not seem to be any stirring effort to go after this trade, the leading houses apparently being satisfied with the reputation they already enjoy among that fortunate section of the public who can boast of a speedy motor boat or a sailing yacht. This is practically admitted, window displays being one of the principal methods by which the public is reminded of this department.

One of the strong points in favor of carrying these lines is the fact that purchasers are generally men fairly well possessed of this world's goods. They like to have their craft well equipped and as a rule they not only buy the necessities, but also what may be termed the luxuries.

Stocks Move Well.

In several of the stores it was claimed that boat supplies present no danger of stocks becoming old and out of date. With but few exceptions the articles are the same from year to year, and the exceptions are new ideas that are at times put forward in motor boat notions. As a rule, however, the various lines are good sellers. They meet with a flourishing demand and should there be a carry over, it can be brought forward again in the following year.

Knowledge of Goods.

A thorough knowledge of the various supplies is a strong point in the salesman's favor. He should know the goods asked for, their use and to create the best impression should be able to talk boats and fittings as well as the average boat owner who enters the store. Only in this way can the salesman suggest any new goods that may be received or can discuss even the ordinary supplies.

The following partial list gives an idea of the supplies that should be carried—chocks, cleats, hand rail stauchions, brass railings, flag pole sockets, row locks, bow plates, inlet and outlet connections, tiller pulleys, awning blocks, boat hooks and snap hooks, wire rope and thimbles, anchors, ensigns. rudders, steering wheels, anchor shackles, rope, pumps, fenders, headlights, searchlights, propeller blades, and so on. The possibilities of suggesting articles in this department are as numerous as in any other, and perhaps more so.

On the whole the question of boat supplies should commend itself to the average hardware man in those cities and towns approximate to a body of water. To secure the best results, it must be given adequate attention. The goods are always in demand throughout the summer and excepting specialties they lose none of their value from year to year.

Watch for Opportunity to Feature Special Lines

Policy of Aikenhead Store Outlined—How Record Sale of Water Filters Was Accomplished—At Present Time Aikenheads are Waging a Successful Wedding Present Campaign—Window Displays an Effective Lever.

Watch for opportunities to feature certain goods at seasonable times and splendid results will be obtained. This is the policy followed out in the retail store of Aikenhead Hardware, Ltd., Toronto. Advantage is taken of current events and changes of weather and season to bring to the front any goods which can be made particularly salable at that juncture.

For instance, during the past few months the question of the water supply in Toronto has been very prominently to the front. For weeks after the first of the year, the supply was so bad that Toronto people ceased drinking water except in distilled or boiled form. Not only was the water bad but it was very scarce. Now, there is nothing more effective than a water scare to get the populace of a large city stirred up and all Toronto literally seethed with disaffection.

The opportunity to do a profitable business in water filters was seen by the Aikenhead company and a vigorous campaign was begun. One of the most effective levers employed in creating a demand was a window display, consisting of a tap with two faucets, one running filtered, the other unfiltered water, into glass bowls at opposite sides. The bowl of unfiltered water showed murky and unclean and highly suggestive of the presence in the liquid of the deadly colli communi. The other showed clear as crystal and apparently quite pure. This display was left in the window some weeks and attracted much attention. A tremendous business was done in Toronto. Filters were sold for use in stores, hospitals, schools and also very largely in private homes. Particular efforts were directed to selling to doctors and a large number of filters were disposed of to members of the medical profession. Manager W. J. A. Lytle estimates that $20,000 worth of filters were sold. That figure, of course, covers sales in other parts as well as in Toronto.

Wedding Present Trade.

The present season offers a splendid opportunity for trade in the lines which custom has prescribed for wedding presents. Aikenhead's were alive to the situation and early planned out a campaign to catch a share of the trade. The newspaper advertising space was devoted largely to the topic of wedding gifts and a window display was arranged last week. The display was largely made up of cutlery, some very handsome sets being shown. There was sufficient variety, however, to please all tastes and suit all purses. As the cutlery stock is shown at the front of the store, all the year around, no change was necessitated in that respect.

Splendid Results.

Results were immediately obtained. Although the display was placed in the window as late as Thursday, by Monday morning a large amount of cutlery had been sold. Not only had sales been made from stock but a number of customers had called in and asked for sets, which they had seen in the window. It had been found necessary to replace probably half of the goods in the window as a result of this class of demand.

This is one of the strongest proofs that has yet come to the writer's attention of the selling power of an effective window display. An attractive article, shown in a store window, is as good as sold. In the present instance, price tags had been used and this had doubtless helped materially in selling the goods displayed.

"We have found the wedding present trade highly profitable," said Mr. Lytle, in discussing the situation, "and we certainly intend to pay attention to that line during the rest of the month. The window display idea will be kept up and newspaper space will also be used."

Systematic Display.

A definite system is followed out in Aikenhead's, in the matter of window displays. Two members of the staff look after the work and, as there are four windows and each window is changed on an average once a week, they have plenty to do. F. O. Harrison dresses all the builders' hardware and cutlery windows and James Howe looks after the tools. Manager Lytle pays considerable attention to this department also and helps the window dressers quite frequently with suggestions.

The scope thus presented for the stimulation of business by window display is wide. With four windows, it is possible to keep well in touch with existing trade conditions and to follow the vagaries of popular demand. A study of the windows in Aikenhead's at any time of the year will give an accurate impression of the goods selling at that season. When it is decided to feature any particular line, in consequence of some current event which makes that article readily salable, the windows are invariably employed as the best means of inaugurating the campaign.

A Noteworthy Display.

At the present time, Aikenheads are showing a collection of tools which is quite out of the ordinary. The display centers around a giant blacksmith's drill which stands 6 feet high and is the largest of the kind even made. Around it are shown a number of lathes and lathe tools and also drills run by motor. The drills are not in operation but they are shown ready for action.

A collection of this nature would prove of singular interest to any man interested in mechanical pursuits; and most men are, for that matter. It would be a valuable feature for any dealer located in a factory city or town.

In outlining the policy that he pursues, Mr. Lytle states that he is ever on the lookout for a chance to feature some particular line. The turn of the seasons is always anticipated and seasonable articles are rushed to the front. The value of such a policy is felt both directly and indirectly. The featuring of one line results in a good turnover and it also gets people interested and brings them into the store, thus stimulating demand in other lines.

Follow the Example.

Every hardware dealer could follow out this policy with profit. All too frequently dealers are caught by the turn of the season without a stock of seasonable goods on hand. It is the exception rather than the rule for retailers to watch passing events and act upon the opportunities therein presented of active sales. Nevertheless there are some progressive men who are always on the alert and who, in consequence, are rapidly building up splendid trade connections.

TO BUILD WAREHOUSE.

The Canadian Fairbanks Co. will erect a $250,000 warehouse in Vancouver next year. Henry J. Fuller, president, Montreal, was in Vancouver to select a site. Several favorable locations are under consideration.

Safety Razors.

Inquiry was made in this column two weeks ago, for the name of the firm manufacturing Enders Safety Razors We have just been informed by Pow & Wilcox, Tillsonburg, Ont., that these razors are made by Simmons Hardware Co., of St. Louis.

HARDWARE STORE BURNED.

Regina, Sask.—An explosion of oil in the hardware store of C. T. Laird & Co., Eleventh Avenue, resulted in a fire, which completely gutted the establishment, doing damage to the extent of $12,000 to the store and stock. A couple of the employes were carrying a small barrel of oil from the cellar to the main floor when suddenly, from some unknown cause, the barrel exploded. One of the men was hurled down the cellar steps from the force of the explosion. The interior of the store became almost immediately a mass of flames, and the staff hurriedly left. They had no sooner reached the door when there was another explosion, the force of which blew out the plate glass front, breaking windows in neighboring stores as well. Geo. Realey, the driver, was just driving out of a lane to the east of the building, and was struck in the face by large pieces of flying glass.

When the fire department arrived, it was quite apparent that the hardware store was doomed, and attention was paid to saving the surrounding buildings. For a time it looked as though the whole block would go, but the firemen worked like Trojans and finally got the blaze under control.

The stock was fully covered by insurance in the American Central, Commercial Union and the Union.

Mr. Laird is at a loss to understand how the explosion could have occurred, unless it was due to the paint oils. The gasolene is not kept in the store, and none of the employes are allowed to smoke.

He has not yet decided what to do with reference to the future of the business. It is expected that there will be considerable salvage in the stock.

AN ATTRACTIVE HANGER.

The Dominion Cartridge Co., Ltd., have issued a new and very attractive hanger, entitled, "His First Duck.'

which they will be pleased to mail free of charge to any sportsman sending his full name and address, together with the make of shells or cartridges and the powder used.

DATES OF LOCAL HOLIDAYS.

As a result of the letter from "Traveler" appearing in last week's Hardware and Metal, we are enabled to publish a list of civic holidays and half holidays in some prominent Ontario towns. This information has been supplied by our subscribers in the various towns, and will be extended, as further information comes to hand. This week, our list is:—

Ailsa Craig.—Half holidays Thursday afternoons from June 15th to September 14th inclusive. Date of Civic Holiday not yet decided. Fall fair Sept. 21st and 22nd

Almonte.—Fall fair, Sept. 5, 6 and 7.

Brantford—Civic Holiday Aug. 6th. South Brant Fair October 4th and 5th. Half holidays not yet arranged.

Carleton Place.—No regular half-holiday. Date for Civic Holiday not yet named. No fall fair, district covered by Almonte Fair.

Cobourg.—No half-holidays in hardware and plumbing trades. Dates for Civic Holiday and fall fair not yet named. Civic Holiday is usually during week of Horse Show, Aug. 15 to 18th, which is a bad week for travelers in Cobourg.

Lanark.—Fall fair, Sept. 8th.

Lindsay.—Civic Holiday, Aug. 14th; fall fair, Sept. 21-23. No general half-holiday, but dry goods stores close at 5 p.m., except Saturdays, during summer months.

Owen Sound—No half-holidays. Civic Holiday Aug. 7th. Fall Fair, Sept. 12 to 14.

Perth.—Civic Holiday and fall fair dates not yet announced. No half-holidays. Close three nights in week at 6 o'clock, and farmers come in to do business other three nights. For two months in winter, close every night at 6 o'clock.

Picton.—Weekly half-holidays Thursday afternoons during July and August. Civic Holiday probably August 10th, but not yet named. Fall fair, Sept. 26th and 27th.

Prescott. — No half-holidays. Civic holiday, Aug. 7th. Grenville fair, Sept. 26th to 28th.

Tillsonburg—Stores close every Wednesday afternoon during July and August. Civic Holiday Aug. 3rd. Fall Fair Sept. 13-15.

St. Catharines—Stores close 1 p.m. Wednesdays during June, July and August. Civic holiday, Aug. 7th.

A selling-out sale is being conducted at Lamont's hardware store, Whitehood, Sask.

O. H. Hellekson, Fred Nordquist and H. J. Hellekson, hardware and furniture dealers, Halbrite, Sask., are dissolving partnership by mutual consent.

Our Page for Hardware Clerks

DO CLERKS PREFER DEPARTMENTIZED STORE?

A great deal of discussion has taken place in hardware trade papers of late regarding the tendency among hardware dealers to departmentize their stores. By this is meant the organizing of the stores into separate departments, such as builders' hardware, sporting goods, silverware, household supplies, etc., and then placing each department under the management of some particular clerk.

The criticism of this plan is, in almost every case, distinctly favorable, the majority of experts commending the departmentized store idea. It is argued that in this way a certain amount of responsibility is transferred to worthy clerks, who will feel a special interest in advancing the department with which they are connected. If every department in the store were to feel the impetus of increased interest on the part of the clerks the result would be a general improvement throughout the store. Furthermore, by concentrating the attention and abilities of the clerk on one department, a corps of specialties would soon be developed, and this is the age of specialists.

On the other hand, there are not a few who oppose the idea of departmentizing a hardware store, and back up their opinions with plausible arguments. Their principal objection is that customers do not like the departmentized store.

"My mind was made up on this subject," said a prominent hardwareman in the Georgian Bay district, "when I went into a general store down the street one day to make a few purchases.

"In buying what I wanted, I was sent to three different clerks, in charge of three separate departments, although all my requirements were in much the same line. I didn't enjoy introducing myself and explaining my needs to three different people, and I really felt ill at ease all the time I was in the store.

"Now, if the first clerk who waited on me had been able to fill my complete order, I would have wasted less time and felt more comfortable."

"Just at that time, I was thinking of departmentizing my store, but I thought that if my customers felt the same in my store as I did in this other departmentized store, they wouldn't be likely to come in to make any varied purchases unless they really had to."

Another point which has been raised against the departmentized store is that while it tends to develop specialists it discourages the development of the all-round hardwareman, and perhaps the majority of hardware stores, taking the country as a whole, are not of sufficient size to appreciate the specialist.

What do hardware clerks think of the departmentized store idea? Hardware and Metal is anxious to know the frank opinions of the men who are on the firing line, and are in a position to understand the feelings of customers on this question. Will the clerks who read this article write the editor, and give him their views of the departmentized store?

THE USE OF THE TELEPHONE.

The sales manager of a Toronto wholesale hardware house tells the following incident. On the way to the office the other morning in his automobile, he found that the tires skidded badly on the streets, which were wet from a recent rain. He decided to try non-skidding tires and, by a coincidence, the first thing that greeted his eyes on his arrival at the office was a circular lying on his desk from a tire company. He immediately called up the Toronto office of the company. The man at the other end of the line had apparently risen that morning in a bad humor. His voice had a snappy ring to it.

"Do you carry non-skidding tires?"

"Yes."

"What do they cost?"

"Oh, about twenty per cent. more than the other kind."

"Well, what would that make them?" rather impatiently.

"I haven't a list just handy," was the reply. "Look here, you might drop around." And he rang off.

He might drop around. But he didn't. The sales manager, exasperated to a degree by the indifference of the other man, promptly placed his order with another firm.

This incident demonstrates how much harm can be done if proper attention is not given to 'phone inquiries. The enterprise shown by the tire company in sending out that circular was sadly counteracted in this instance by the indifference of the member of the office staff who answered the telephone. It would have taken but a minute to hunt up the required information; in any case, it was a serious mistake to ring off without any attempt to ascertain who the inquirer was.

There is a moral in this for the hardware clerk. It probably devolves on every clerk to answer the store telephone frequently. Do you make or unmake customers by your manner of attending to telephone enquiries? The display of courtesy and willingness to serve will make the enquirer at the other end of the line a customer. A grumpy tone and an unwillingness to look up information will prove the most effectual method of sending a possible customer to the opposition store. If a price is desired, look it up, even if some trouble is involved. Always ascertain the name of the person on the line, for such information is valuable. Last, but not least, do not adopt a tone of voice that implies annoyance or undue hurry. The customer will surely resent brusque or snappy replies.

APPOINTED MANAGER.

D. F. Porter, who has, for the past year occupied the position of head clerk in the hardware store of A. T. Fife & Co., Kenora, Ont., has just won a deserved promotion. He has been appointed manager of the Keewatin Hardware Co., at Keewatin, Ont., and has left for that place to take up his new position.

FORMING ASSOCIATION.

The clerks in Regina have called a meeting for the purpose of organizing an association. They have circulated a petition which has been signed by over three hundred clerks asking that during the months of June, July and August, the retail merchants of the city grant their employes a half holiday. It is the purpose of the clerks to form an athletic association and to devote the half holiday to sports if they are successful in obtaining it.

ARE THESE FAMILIAR?

"You remember the lawn mower I bought from you five years ago?"

"How long will this dozen of razor blades last?"

"Give me enough shingle nails to patch the back shed with."

"How long will this flashlight remain in working order?"

"Do you really think this refrigerator is worth $15?"

"My wife wants one of those washing machines that runs itself."

News and Methods of Canadian Hardwaremen

Demonstrations Greatly in Vogue — Mechanical Window Attracts Attention in Kingston—Dealers Suffer Loss Through Fire.

DISPLAYING WHITE LEAD PROCESS.

West Toronto, Ont.—In May Bros.' store this week, the Old Dutch method of corroding white lead is shown in an interesting window display. The whole process is represented in miniature.

Building operations are brisker than ever this year, and in consequence the local hardwaremen report an exceptionally good demand for builders' hardware and contractors' supplies.

PRESENTING SAMPLE CANS OF PAINT.

Beaverton, Ont.—Great interest has been aroused by the advertisement of Glassford's Hardware Store in the June 1 issue of the Beaverton Express: "The first one hundred housewives who visit this store next Monday morning, will receive a sample can of Jap-a-lac free." This was a direct appeal to those who wish to get something for nothing—and their name is legion.

BOLD BID FOR ATTENTION.

Goderich, Ont.—The Howell Hardware Co. have been running an advertisement in the local papers, the most prominent feature of which is an illustration of a skate. At first glance, it would appear that the firm had been guilty of the grave mistake of forgetting to change their copy for six months or so, but the presence of this highly unseasonable article in the ad. is intended solely to draw attention to the advertisement. Under the illustration appears the following notice: "We are not advertising Skates, but hot weather goods; things that are needed in every household these hot days. We have bought lines that we can recommend, and you will find the price right."

The articles mentioned in the body of the ad. are coal oil and gasolene stoves, screen doors, paint, varnish, hammocks, garden hose, refrigerators and lawn mowers.

SAYS NOTHING BUT SAWS WOOD.

H. W. Marshall, hardware merchant, Princess Street, Kingston, had a clever mechanical device in his window for several days which has attracted a good deal of attention. It represents a man sawing a board with an Atkins saw, for which Mr. Marshall is agent. The mechanism is rather intricate as the man goes through half a dozen or more motions drawing attention to the saw which he is using. Electrical power is used and the device is both amusing and interesting.

The stock of the late John Hersey's hardware store has been sold to C. J. Boyce, Warkworth. J. M. Strange is closing the estate.

Owing to the scarcity of timber, the work of constructing the piers of the Ontario Exploration Company at Collins' Bay, for the shipment of iron ore from the Wilbur mines, is much retarded. An immense amount of timber is required, and it is almost certain that there will be no shipping of ore this year by water.

SUCCESSFUL DEMONSTRATION OF OIL STOVES.

Lindsay.—D. Cinnamon held a very satisfactory demonstration of New Perfection oil stoves in his store here on May 31st and June 1st. On account of the rain on May 31st, the attendance for that day was not as large as expected. However, the weather was fair on the following day, and a large number of people visited the store.

Mr. Glover, of the Queen City Oil Co., was in charge of the demonstration, assisted by two local ladies. Hot biscuits and tea were served to a large number, and everyone was delighted with the way the stove baked. It was a revelation to many, who did not think it possible that a coal oil stove should do such fine work.

Mr. Cinnamon states that he has had a highly successful season thus far, having sold about 25 stoves, and a like number of ovens.

EARLY CLOSING AT ST. JOHN.

St. John, N.B., June 6th, 1911.—The half-holiday movement for the summer months is growing in popular favor in this city, and the scheme inaugurated by the leading hardware houses some years ago, has met with approval from dealers in other kinds of wares, who have now announced their intention of closing their stores along with the hardware stores, on Saturdays at 1 o'clock during June, July and August. This is one month more than last year, but still one month behind the hardware stores, who it is planned will close early on Saturday during September as well.

Under the name of the Canada Nail & Wire Co. with a capital of $800,000, E. C. Elkin, S. E. Elkin, G. McR. Johnson, and R. L Johnson, are seeking incorporation to carry on the business of wire nail manufacturing, and working in metal, iron and wood. The headquarters are to be in St. John with E. C. Elkin, S. E. Elkin, and R. L. Johnson as provisional directors. It is understood that this company will take over the business of the Maritime Nail Works, representing the syndicate that recently purchased the property.

TO BUILD OFFICE BLOCK.

Sault Ste. Marie, Ont.—The Cochrane Hardware Co. have purchased fifty-five feet of land on the northwest corner of Queen and Elgin Streets, at $275 per foot and purpose erecting a large business block thereon. It is not likely that anything will be done this summer as the firm now occupying the property have a year's lease.

J. D. H. Brown, manager of the Cochrane Hardware Co. states that his firm have found it necessary to make some preparation for the future and have bought the property for building purposes later on. It is interesting to note that the land purchased sold for $130 per foot less than a year ago.

IN TEMPORARY QUARTERS.

Strassburg, Sask.—Henry B. Devine, who was recently burned out, has started up again in temporary quarters. He advertises that he "will soon be in a position, with a complete stock, to give our former and new customers everything in the hardware, building, tinsmithing, bicycle and motor supplies."

A big salvage sale is now being held. All the goods which were damaged in the fire, are being offered for sale at greatly reduced prices. Large crowds have attended every day since the sale started, and it is expected that the stock will soon be cleared out.

WAS BURNED OUT.

Alexandria, Ont.—D. Courville, hardware merchant, was burned out recently, his store and business block being practically wiped out. Mr. Courville at once made arrangements, however, to take temporary possession of the Hayden block, situated on Main Street, south. He expects to be open for business again shortly.

METAL TRAVELER MARRIED.

On Tuesday of this week, Allan L. Brown, who, for four years has represented the Metal Shingle & Siding Co in eastern Ontario, was married to Miss Ellen Lorena Crawford, in St. James church, Kingston. A reception was held, after the ceremony, at the home of the bride's parents, 241 Alfred Street.

HARDWARE TRADE GOSSIP

Ontario.

W. J. Hermiston, hardware merchant, of Walkerton, is ill with typhoid fever.

J. Eyre & Son, hardware merchants, of Richmond Hill, are going out of business.

G. Julien, Sweetland avenue, Ottawa, has disposed of his business to Ernest Claude.

W. J. White, of Hensall, has taken a position as clerk with the Wanless Hardware, East London.

James W. Webb, of Westman's Hardware, Crediton, was united in marriage to Miss Emma Wein, on May 24.

J. W. Peacock, Toronto, advertises that he has vacuum cleaners to rent. He is doing a good business in that connection.

M. Weichel & Son, Elmira, are advertising maple syrup in 1 gallon cans. This is an original line for hardwaremen to handle.

In a window of the Rice Lewis retail store, Toronto, is shown a very handsome display of cut glass for wedding presents.

Work on the new C.P.R. roundhouse at London, was suspended for a few days this week, for lack of steel to put in the concrete.

Jas. Mackenzie, who has been connected with the French Hardware Store, Renfrew, has gone to Ottawa, where he has secured a position.

Geo. Taylor, of the Geo. Taylor Hardware Co., New Liskeard, and his son, G. E. Taylor, of Moose Jaw, left on a trip to Europe this week.

The Lumby-Stenhouse Foundry, Fort William, was destroyed by fire. The loss is about $2,500, with insurance of $1,000. The company may rebuild.

A window in the store of Aikenhead's Ltd., Toronto, has been given over this week to a display of wedding gifts. There is a splendid showing of cutlery and silver.

A demonstration of paint and varnish was held in the store of the Peterboro Hardware Co. on June 3, 5, 6 and 7. Staining and varnishing and graining were shown.

Hamilton & Stott, St. Thomas, will erect two modern stores on the vacant lot east of Anderson's store. The east part will be used as a plumbing and heating establishment.

McMillan Bros., Guelph, are advertising bargains for June weddings. They are selling cut glass, brass goods, sterling silver goods and chafing dishes at a discount of 20 per cent.

The debris left on the ground from the fire at the store of Taylor Bros., Ltd., has been cleared away. No definite plan has been announced as to where the new building will be put up but it has been decided to rebuild.

D. Courville, of Alexandria, whose store and stock were destroyed by fire on the morning of May 31st, is already rebuilding, and will conduct his business the same as before. His loss amounted to $9,000 and insurance was $6,000.

It is stated that the plans prepared for the Canadian Yale and Towne Ltd., who are building at St. Catharines, call for a plant considerably larger than the conditions in the by-law call for. A five-storey building will be erected.

Aubrey Cunningham, who has been in charge of the staff in McDowell & Russell's hardware store, Dundalk, for two years, has accepted a position in Chesley. Mr. Cunningham was twice the winner in the "What would you say?" competitions in Hardware and Metal. He will doubtless prove eminently successful in his new position.

Nearly sixty union moulders went on strike in London shops on Monday. The London Foundry and Leonard's foundry are chiefly affected, though most of the men went out at Wortman & Ward's. McClarys have a non-union shop, and the Vulcan Company, Limited, a day or two ago accepted the union scale. The men are asking for a nine-hour day, and declined to accept various wage increases offered by the employers.

LAST MINUTE MARKETS.

MONTREAL.

Linseed Oil—Declined to $1.04 for raw ; $1.07 for boiled.

Western Provinces.

W. H. Fread has opened a hardware store at Ryley, Alta.

The Calgary Furnace and Stove Co. have been incorporated.

S. B. Lynes, hardwareman, Crystal City, Man., has sold to Smith & Hogarth.

H. E. Pickard, who has a tinsmithing shop at Viking, has opened a branch at Strome, Alta.

The hardware stores in Castor, Alta., will close at 6.30 each evening except Saturdays after June 1.

The Keewatin Hardware Co., Keewatin, are advertising vacuum cleaners to rent at 50 cents a day.

The Western Tinsmithing Co., of Lethbridge, is opening a branch at Medicine Hat, under style of Western Heating and Sheet Metal Works.

J. C. Gaston, Sheffield, of the Gaston Cutlery Co., is on his annual tour of the West. He reports that business in all parts seems to be unusually active.

The Farmers' Lumber and Supply Co., Imperial, Sask., have given up their lumber business and the manager, D. Small, has opened a hardware store.

H. F. Chappell has purchased the hardware business of Field Bros., Bradwardine, Man. He has built a commodious store and has opened up with a large stock.

P. P. Krocker has gone into partnership with Peter Niesen, of Aberdeen, Sask., and will open a general store at Main Centre, Sask. A full line of hardware will be carried.

The marriage occurred at Merritt, B. C., of Roy T. Thomas and Miss Mary Gates. The groom was formerly employed with Bourne Bros., hardware merchants, Revelstoke.

A gasoline tank installed by the Manitoba Hardware Co., Reston, Man., was disturbed by the rainfall one day last week. The water ran into the pit under the tank and raised it up.

H. F. Chappell, who recently purchased the hardware business of Field Bros. at Bradwardine, Man., has been elected vice-president of the newly organized board of trade at that place.

The Lethbridge plant will start with a capacity of about 90,000 kegs per annum and will be increased as the demand for its product increases. About fifty men will be employed at first.

H. W. Storey, Camrose, Alta., has found his present store too small for the business he is doing and has decided to rent another store. He will take possession on the first of the month.

H. H. Johnston's hardware store at Fillmore, Sask., is now nearing completion. He has part of his stock in, and expects to be fully settled soon. In addition to hardware, he will carry a line of farm implements.

James Winram has purchased the hardware and implement branches of the business of Chalmers & Watson, of Pilot Mound, Manitoba. Chalmers & Watson will continue in the lumber and other departments of the business.

The Farmers Steel and Wire Co. are opening up business in Regina. The council has sold to the company a warehouse site in the city, on the condition that the company erect buildings thereon to the value of $10,000 within one year.

H. A. Strong, who has been in the employ of G. L. Challenor, hardware merchant, Grand View, Man., has gone to Saskatoon, where he has accepted a more responsible position. He will be missed in baseball circles at Grand View.

The Gordon Nail Works, of St. John, N. B., will locate in Lethbridge. This is the word given out by M. L. McDonnell, one of the partners of the firm, who has been in Lethbridge for the past two or three weeks, sizing up the situation there as a location for a branch of the plant which the firm has decided to place at some point in the West.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 54

MARKETS IN BRIEF.

TORONTO.

Linseed Oil—Reduced 3c.
Turpentine—Reduced 5c.

MONTREAL.

Turpentine—Weak at 85c.

WINNIPEG.

Turpentine—Down 5c.

MONTREAL.

Montreal, June 9.—The tin market even surpassed the mark it made last week, when it reached the highest figure previously recorded. Since then it has gone several pounds higher on the London market, and under the manipulation of those who have it in control it has remained in that vicinity. Just as to what may be expected to follow is hard to tell. It depends upon the interests of those behind this metal. In the meantime enquiry is generally reported of the hand-to-mouth character. Pig iron has been practically the same, with nothing to improve the general situation. General reports regarding the steel output during May indicate a general reduction, reports being practically identical.

Pig Iron—The pig iron market as a whole is none too cheerful. Conditions have certainly undergone no improvement. It seems, rather, that they are worse. In the United States more furnaces have blown out and the production is thus still further curtailed. English and Scotch iron is coming into Canada and is being distributed under contract. General conditions are as before-mentioned, but slightly changed. In the western districts the opposition of American furnaces is even keener than before, and it is a question to what extent prices are maintained, the opinion being that there is a general feeling toward shading. Enquiries are still being made for large lots of pig iron, the quantity being between four and five thousand tons. The Canadian foundries are busy and the condition existing among the furnaces arises, as before stated, from the over-production. It apparently resolves itself into a question of how long it will take until the surplus supply becomes reduced to the normal situation necessary for supply and demand. It may be a few months and it may be longer.

Tin—During the past week tin set up a new record, and is still unsettled and not far from the high-water mark it reached. It is a manipulated market, with those in power seemingly able to accomplish what might have been expected to be impossible, that is to bring about such an increase as that witnessed during the past ten days. Locally, it has had some effect. Consumers have to have the metal, but the natural result has been that they buy simply what they need and no more. The market is so unsettled that there is no confidence in the market, in fact, there has not been any for some time now, with the result that business is but from hand to mouth.

Copper—There is but little to report in the copper situation. There is a steady demand, Prices remain unchanged, although there have been some variations in the primary market. From general reports there is a fair activity, but otherwise no feature.

Other Metals—Lead and spelter have been on the quiet list. There is a fair demand, but dealers report nothing of a feature in the market. Local quotations are: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $12.50; malleable, No. 1, $9; miscellaneous steel, $5; stove plate, $12.50.

TORONTO.

Toronto, June 9.—During the week just passed, spot tin rose, on the London market, to £2 16s., thus equalling the highest price on record, which was previously scored in 1906. A slight drop has occurred since, and to-day's price in London for spot tin is £2 12s., which figure is firmly held.

There is no other feature on the market worthy of special notice, but business is going along very satisfactorily in all lines of metals.

Tin.—Aside from equalling the previous high price, this week's market has developed a sensational advance in the price of futures which rose £6 10s. in London. This means that the syndicate not only control June tin, but that they largely control the output for the next three months, and that will carry them over into the busy fall month when sellers are naturally strong. Toronto prices are still 49 to 50 cents.

Antimony.—Last week's dullness continues with prices stationary. There is no business doing.

Copper.—As a result of the Standard Oil and American Tobacco Co. decisions, a stronger tone is noticed and futures have advanced beyond the price of spot. It is said that brass mills are now turning down business and advancing prices. Copper quotations remain at last week's figures.

Aluminum.—The price is still 20 cents per pound.

Plates and Sheets.—Conditions are satisfactory for the season, but there is no special activity.

Pig Iron.—Business is about as usual and is devoid of special features. We are still quoting: Canadian Foundry No. 1, $19 and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro' No. 3; and $20.25 for Clarence No. 3; Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

Lead.—There is a decided scarcity of spot lead. Good lots are arriving but they are being eagerly taken by buyers.

Spelter.—This week's business has been quiet, but prices are unchanged.

Old Materials.—Conditions are unchanged, prices remaining as follows: Heavy copper and wire, 10½c to 11c; heavy red brass, 7½c; heavy lead, $2.90; light copper and bottoms, 9¾c; tea lead, $2.40; machinery cast iron, No. 1, $14; No. 1 wrought, $10; malleable No. 1, $8 to $10; miscellaneous steel, $6 to $7; stove plate, $12.50.

HARDWARE MARKETS

MONTREAL.

Montreal, June 9.—Seasonable lines continue to hold the centre of the hardware stage, with general business good, but not quite up to what was expected. This is according to those connected with some of the leading wholesale firms. It is claimed that, on the whole, trade is hardly up to that of last year, although it is indeed satisfactory. The demand for rubber hose has been exceedingly heavy, due probably to the rather warm weather which was experienced earlier than usual. Lawn mowers have been selling well, and stocks have been cleaned out in some lines, so report has it, with other lines quite limited. Of course, there is always the consolation that manufacturers are generally prepared for such contingencies and this should not prove an exception. Harvest tools are moving out well, with enquiry for rope rather pronounced of late. In carpenters' tools and kindred lines there is a good sorting trade reported.

The demand for material used in railway construction is maintained, and with the general demand for construction work, is a welcome feature to the trade. Household goods are holding

their own, and general orders contain quite a sprinkling of articles from this department.

Lawn and Garden Tools—One of the most prominent lines just now is that of lawn and garden tools. This department is good for considerable business yet before it begins to dwindle. Lawn mowers seem to be receiving particular attention and the other articles should not be overlooked. Some prices quoted are: Lawn rakes, $3.75 to $5 a doz.; garden sets, 25c to $1.50 per set; border knives, $4.80 doz., net; garden trowels, 60c to $1.50 a doz.; garden shears, plain, 8-in., 55c; with notch, 8-in., 60c; long-handle border shears, $1.15 each; long-handle surface shears, $1.05 each; lawn mowers, low wheels, 7-in. diameter, 12-in. width, $2.55; 14-in., $2.65; 16-in., $2.75 each; medium wheels, 9-in. diameter, 12-in. width, $3.30; 14-in., $3.55; 16-in., $3.80 each; high wheels, 12-in. width, $4.15; 14-in., $4.40; 16-in., $4.65; 18-in., $4.90 each; lawn rollers, 20-in. diameter, from $13 to $18 each; garden wheelbarrows, small, $2.55; large, $3; garden spades, $6.25 a doz. upwards.

Household Utensils—The trade is apparently getting a good share of business in this department. Articles required during the fruit season should receive attention as the period of demand is rapidly approaching. The usual lines are moving steadily.

Harvest Tools—From the orders coming in it is safe to judge that preparations are under way for the harvest season. The west is giving considerable attention to this department. Manila rope for hay carriers is quite prominent on the order sheets. Some quotations and discounts are: Hay forks, manure forks, straw forks, barley forks, spading forks, potato forks, field, garden hoes, Dutch weeding hoes, garden rakes, 50 and 5 p.c.; hay rakes, $1.15 to $2.75 a doz.; scythes, $6 to $8 a doz.; sickles, $1.85 to $2.25 a doz.; grass hooks, $1.65 to $2.10 a doz.; scythe snaths, 40 p.c. discount.

Seasonable Lines—The demand for a line of goods that are now in season keeps up well. Rubber hose is moving better than ever, and sprinklers in the different patterns are also worthy of attention. Ice cream freezers and refrigerators are also in good demand. Discounts in garden hose range from 50 per cent. off to 70 and 10 and 10, according to quality. We quote hose clamp, ½ to ¾-in., 25c a doz.; hose couplings, ½ to ¾-in., $1 a doz.; hose sprinklers, ring patterns, $5.75 a doz.; revolving pattern, 12-in., $13 a doz.; 24-in., $34 a doz.; and 36-in., at $39 a doz.; hose nozzles, Gem, $3.50 a doz.; reels, 75c each and upwards. The discount offered is 50 and 50 per cent.

Contractors' and Builders' Supplies—Jobbers report a continuation of the demand for contractors' and builders' supplies. Railway work is still making itself felt and the general construction work throughout the country is the explanation of the sorting orders now received. For the best quality of shovels and spades, the discount off is 60 and 2½ per cent.; for second quality the same discount is allowed, and for third quality the discount is 50 and 2½ per cent.; picks are quoted at from $3.85 to $5 a doz.; crowbars are listed at $3.25 a cwt.; wheelbarrows, navvy common, $21 and up; navvy full-bolted, $22.50; drag scrapers, $5.75 and upward.

Sporting Goods—Although the season is now wide open, there is still a general demand for lines that have been moving particularly well. Guns and ammunition are receiving more attention now, in addition to the general demand for athletic goods.

TORONTO.

Toronto, June 8.—Although the jobbing houses are all busy, the rainy weather of the past week has had its inevitable effect on trade. When the climatic conditions are unafvorable, the wholesale demand is bound to suffer to some extent, the effect being felt a day or two after the change in the weather. At present, the demand is rather smaller than at the first of the week, but business is still brisk enough to satisfy the jobbers. Trade for the past six weeks has been highly satisfactory, on the whole.

The feature of he market this week is the difficulty experienced in filling orders for refrigerators, oil stoves and furnaces. The demand for refrigerators has been heavy, due to the unusually warm weather which prevailed during the better part of the past month. The manager of one local supply house states that their orders for refrigerators up to May 15 exceeded the number sold during the whole of 1910, and that since then the demand has been fully as heavy with little prospect of any abatement for some time yet.

Heavy Hardware.—There is a splendid all around demand for the heavy class of goods. Wire fencing and barb wire are moving briskly, and there is a steady call for chain, rope, pulleys, nails, bolts, nuts, screws, etc. With the advance of the season, the demand for nails has shown rapid improvement. No price changes are noted. Present quotations are: Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

It is known that one Canadian manufacturing firm have been compelled to refuse orders, owing to their having sold everything in stock, in addition to being behind with their orders. Other firms are probably just as hard pushed. A Toronto jobber ordered 75 refrigerators from one company, and yesterday received word that the first shipment would consist of 8, the rest to be supplied as the company found it possible, no definite promises being given.

The same condition is found in regard to oil stoves and furnaces. It is extremely difficult to get the manufacturers to fill rush orders, owing to the fact that they have not yet caught up with the demand.

Seasonable Goods.—Sorting up orders are now being received, but the volume of business is still as heavy as ever. There is a brisk demand for screen doors, awnings, window netting, verandah shades, hammocks, ice cream freezers and lawn mowers. The trade is also active in such goods as garden hose, clamps, couplings, sprinklers, nozzles, rakes, shears, spades, wheelbarrows, wire fencing, poultry netting, etc. There is now a distinctly heavy demand for campers' supplies. From the northern sections the orders are particularly heavy for tents, ovens, cheap knives, forks and spoons, ropes, axes, etc. It is said that the demand on the retail dealer in the northern sections is a marked feature of the trade at this season.

Household Goods.—Tinware and granite goods are moving briskly. There is still a demand for housecleaning goods and vacuum cleaners are selling well.

Builders' Hardware.—The check noted last week in building operations, partly owing to a shortage in the brick supply, has influenced the hardware trade to some extent, and orders for builders are not as brisk as the activity at the beginning of the season would have led one to expect. It must not be inferred, however, that there is by any means a lull in builders' lines. The demand is still larger than is usually experienced at this season of the year.

Stoves and Heating Goods.—The May trade in heating lines was eminently satisfactory. "Our sales were largely in excess of May, 1910," said one man. "In fact, the records up to date show a good sound advance so far this year, and the business during the May contributed largely toward the increase." There has been some difficulty experienced recently in getting orders filled for oil, gas and gasoline stoves—the lines which are now selling most briskly. One supply house reports that an order for oil stoves placed some weeks ago has not been filled, and probably will not be for some little time yet. The demand for furnaces is becoming brisker and a shortage is felt in this direction also.

Sporting Goods.—Business is quite brisk in all lines. It might be mention-

The Western Hardware Market Situation

Woven and Barb Wire Fencing in Heavy Demand—Threshing Supplies Now Being Called for—Turpentine Drops 5c per Gallon—Market Otherwise Very Firm.

Winnipeg, June 9.—The trade in all lines during the last week has been fairly active. Ideal weather combined with good transportation facilities have succeeded in rendering the work of getting out orders easier for the wholesale houses, who are at this period of the year preparing for the summer rush, which is expected toward the latter end of the month. During the last six weeks, farmers throughout the entire west have been busy with their spring work, and consequently, trade with the retail men has been rather dull in country points. Orders have already started to arrive in large quantities for fencing material, such as wire fencing, post hole augurs, and such lines. All fencing is done in the west during the month of June, which is known as the season "Between Times," that is, seeding and harvesting. From the newer districts the demand, of course, has been for barb-wire, although the trade in woven wire is increasing all the time. In this latter line, southern Manitoba, and southern Saskachewan have been the largest takers, and a few of the older districts in the northern portions of these provinces.

Orders have commenced to arrive for harvesting and threshing material. In many sections of country engineers are busy at work fixing up their steam threshing outfits, and from now until the end of August, a steady demand is expected in this line.

Stocks in all lines are fairly heavy and an optimistic feeling is prevailing. The growth of the crops during the last week after the heavy rains has increased the optimism of everyone.

The market is firm, and no advance has taken place during the week in any lines. Quotations are as follows :

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.00 ; 2, $1.60 ; p.g. oak, $2.75.

Auger Bits—"Irwin" bits, 47½ ; other lines 75 per cent.

Bolts—Carriage, ⅜ and smaller, 65 ; 7-16 and larger, 55 ; machine, ⅜ and under, 60 and 5 ; 7-16 and over, 55 ; machine set screws, 65 ; plough bolts, 50 ; square and hexagon nuts, cases, 3 ; small lots, 2½ ; stove bolts 77½.

Bar Iron—Bar Iron, $2.50 ; Swedish iron, $4.75 ; sleight shoe steel, $2.65 ; spring steel, $3.40 ; machinery steel, $3.50 ; tool steel, Black Diamond, 100 lbs. $8.50 ; Jessop, $15

Blocks—Steel, 45 ; wood 60 per cent.

Cut Nails.—$3.15 per keg base.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.50 ; 8-inch, $3.90 ; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60 ; white 70 and 5 ; diamond, 50 ; granite, 60 per cent.

Files—American, 75 ; Black Diamond, 60 ; Nicholson's, 65 per cent.

Galvanized Iron.—Apollo, 16 gauge, $3.70; 18, $3.75; 20, $3.80; 22 and 24, $4 ; 26, $4.10; 28, $4.50; 30 gauge or 10¾ oz., $4.65 ; Queens Head, 20, $3.85 ; 24, $4.05; 26, $4.45; 28, $4.65.

Galvanized Iron Pipe.—⅜ in., $3.50 ; ½ in., $4 ; ¾ in., $5.20 ; 1 in., $7.00 ; 1¼ in., $10.25; 1½ in., $12.45; 2 in., $16.25.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2, and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel, No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $2.75; 6 $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $7.75; grass, $1.70.

Iron Washers — Full box, 40 p.c. ; smaller lots, 35 p.c.

Iron Pipe, Black—⅛ in., $3 ; ¼ in., $2.45 ; ⅜ in., $2.50 ; ½ in., $3.25 ; ¾ in., $4 ; 1 in., $5.65 ; 1¼ in., $7.75 ; 1½ in., $9.25 ; 2 in., $12 ; 2½ in., $19.60 ; 3 in., $25.75 ; 3½ in., $33.50 ; 4 in., $38.35 ; 4½ in., $44.10 ; 5 in., $50.40 ; 6 in., $65.10 ; 7 in., $95.50 ; 8 in., $118.

Logging Chain—¼ in., $7.50 ; 5-16 in., $6 ; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.75.

Poultry netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.25.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c ; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c ; 9, 32c ; 10, 33c ; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8c; pure manila, 10¼c ; British manila, 8¼c ; lath yarn, 9¼c.

Sheet Zinc — Casks, $8.75; broken lots, $9.50.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $25 per cwt.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80 ; brass, 70 ; coach, 65 per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate—1. C., $9.75; I. X., $11.75.

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25; ½ box, $5.50; I. X., full box, $12.25; ½ box, $6.50; I. X. X., full box, $14.25; ½ box, $7.50; 20 x 39, I. C., full box, $15.50; ½ box, $8.25; I. X., full box, $17.50; ½ box, $9.25.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 35.

Wire.—Barbed wire, 100 lbs., $3.05 ; plain twist, $3.40 ; staples, $3 ; annealed wire, base, $3; oiled, 10c extra ; bright iron $3.20 base; brass spring wire, base 29c ; plain galvanized wire, Nos. 6, 7 and 8, $3.40 ; No. 9, $2.90 ; 10, $3.50 ; No. 11, $3.55 ; No. 12, $3.10 ; No. 13, $3.25 ; No. 14, $3.95.

Wire Nails—$2.90 Winnipeg, and $2.45 Fort William.

Wringers — Royal Canadian, $39.25; New Easy, $42.50.

Paints and Oils.

The growth of the west has been directly reflected in the demand for paints and oils, as these lines are essential in building operations. As considerable building is being done this year in all sections of the country, the demand of course is excessive. In spite of this, however, the turpentine market has eased off 5c per gal. during the last week and present quotations are $1 in barrels and $1.05 for small quantities, with an extra charge for containers. Linseed oil on the other hand remains very firm, and the demand is strong. Existing prices are $1.25 for raw, $1.28 for boiled. The linseed oil mills in the city are running, but the stocks being used to supply the demand are mostly storage stocks, the high price for flax seed curtailing the output somewhat at the present time.

White lead is in pretty good demand, and is quoted $6 to $6.75, according to the brand. An active trade is also present in other lines.

Paris Green.—The presence of the potato bug on the farms of the west have brought about during the last few weeks an active trade in Paris Green. Large orders are coming in pretty freely, and from the demand it would appear as if there would be a considerable increase in the number of farmers who sprayed their potatoes this summer. Present quotations are 23c per lb. in cases of 100 1-lb. cartons.

Petroleum and Gasolene.—Silver Star, in bbls., per gal., 15c; Sunlight, 18c ; Family Safety, 22½c.; Searchlight, 20½c; Red Rose, 23½c; Keystone Special, 18c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c.; White Rock, in bulk, 22½c ; National Light, in bulk, 21c.; Engine Gasolene, 24c.; White Lily, 26c.; Royal, 24c.

Turpentine—In barrels, $1.05 ; small lots, $1.10.

Methods of Retailing Paints and Varnishes

ATTRACTIVE PAINT WINDOW AT NIAGARA FALLS.

A highly successful paint and varnish day was held by Cole & McMurray, at Niagara Falls, about two weeks ago, and on that day the photograph reproduced on this page was taken.

One of the firm's windows was given over to displaying Minerva paints, and the other to Lacqueret, both being attractively arranged, with cans of the different products in each line, and with advertising matter supplied by the manufacturers.

Just outside the door may be seen a vase of carnations, one of which was given to each lady who called at the store during the day.

A feature of the proceedings was a demonstration of Lacqueret, conducted by a representative of the International Varnish Co. A great many people called in the store during the day, which proved a decided impetus to Cole & McMurray's paint and varnish business.

IMPORTANT DEVELOPMENTS IN CANADIAN PAINT INDUSTRY.

Probably no industry in the country has so well reflected Canadian prosperity during the past year or so, as the paint and varnish trades. Not only have old established firms branched out and extended their plants, but many new concerns have commenced operations either as a result of foreign industries establishing Canadian branches, or of domestic concerns springing into existence.

In the West the Martin-Senour Co. are establishing a Winnipeg factory; in Toronto the Glidden Varnish Co., of Cleveland have established a factory for turning out their specialties, and the Pinchin-Johnson Co., have erected and are operating a modern paint factory. The most recent development in Toronto and one which will have a far reaching effect, is the entrance into the Canadian field of Lowe Bros., Dayton, Ohio, who are said to have an option on one of Toronto's old established paint plants.

A most important development in Montreal, has been the incorporation of the Sherwin-Williams Co., of Canada, to take over the Canadian and British interests of the Sherwin-Williams Co. of America, and to also acquire the extensive plants of the Canada Paint Co. The Holland Varnish Co. is another newcomer in trade, having recently established a plant in Montreal. It is further expected that a prominent New England company, making mixed paints and wood stains, will shortly commence operations in the eastern metropolis.

All these activities in the paint and varnish business serve to emphasize the fact that Canada is rapidly becoming recognized as the most prosperous country in the world. Building has been on such a large scale that, in spite of the increase in productive capacity of the paint and varnish industry, there has been plenty of business for all.

M. Grant has joined the New Liskeard staff of the Geo. Taylor Hardware Co.

M. Weichel & Son, Elmira, have disposed of the coal and wood end of their business to Ernie Knoblauch, who has taken possession.

Having sold their property J. Eyer & Son, hardware merchants of Richmond Hill, are holding a "closing out sale." It will last for three days and will be conducted upon a strictly cash basis. They announce that they are clearing out their entire hardware store at reductions varying from 20 to 50 per cent.

Paint and Varnish Display Made by Cole & McMurray, Niagara Falls, Ont.

Convincing Customers of the Folly of Delay

Some Dealers Complain That People are Inclined to Leave Off Painting for a Year—Arguments Which Will Cause Them to Reconsider the Matter—Price of Paint is Not High.

Although the demand for paint this year has been strong, some dealers compain that the price has retarded trade to some extent. People with a natural bent toward economy—false economy it proves in this case—are apt to postpone purchasing paint when they learn that they have to pay ten cents more per quart than formerly. This attitude is hard to understand, but it is a fact that many people are inclined to adopt it, and dealers should study the situation closely for means of combating this tendency.

"One of my best customers has gone back on me," declared a paint dealer the other day. "Up to the present, he has always did some painting on his home each year. But, since learning of the higher price charged, he says that in future he will paint only every other year, and will, therefore, not do anything until next summer. I have had other customers come to me with the same story. Although business has been good on the whole, I have found the tendency to leave painting off a little longer more pronounced than I would like to see it."

It should not be a difficult matter to convince any reasonable man that this attitude is a very unwise one to adopt. In the first place, point out to him that the price is not high. As a matter of fact, it is low in comparison with the prices of practically everything else. Paint has not advanced with anything like the rapidity that has characterized the rise in price of practically all commodities. The advances which have been made have been absolutely unavoidable, as a result of the increased cost of the raw material. While nothing positive can be said with reference to the future, it is reasonably certain that prices will never go below the present figure. It is quite fair to assume that the price now asked will be as low as can ever be expected.

Under the circumstances, then, it is ridiculous to speak of the present price of paint as "high." It is an eminently reasonable figure and, as the future may see advances, to postpone painting operations now is likely to prove an expensive form of economy.

The second point to be urged is that the postponement of painting operations will prove false economy no matter what the price of paint may be. The lack of paint for a year will result in property depreciation, necessitating an outlay greater by far than the price of the paint. The man who lets his house go unpainted for a year because it would cost him a few dollars more than he had expected to buy the paint ,is paving the way for a heavy expenditure to repair the ravages of time and the elements.

Paint is the greatest protection that man can provide for his home. It is not merely a means of beautifying the premises; it is the best form of insurance that can be obtained. The dealer who finds that his customers are inclined to adopt the "penny wise, pound foolish" policy of giving up the idea of painting in order to save a few dollars, should use that argument strongly. It is probable that the customers in question have not looked at it in that light; in fact, have probably not given the matter much thought at all. When shown the folly of delay, they would, in a majority of cases, reconsider their decision.

Educational Work.

It is only by educational work that the dealer can hope to remove the false impression under which so many people are laboring.

A profitable device is to prepare a short, right-to-the-point talk on the value of paint, and send copies to all prospective customers. This enables you to carry your arguments into every home where they can reasonably be expected to have weight. If you depend entirely on personal persuasion, the scope of your influence does not extend beyond the few whom you get a chance to talk with, and, as both merchant and customer are busy nowadays, these chances are not too frequent. The circular then can be depended upon to do the work more thoroughly and to bring best of results.

USE OF FILLERS.

The use of paste wood fillers is treated in P. & L. Varnish Talks as follows:

The proper filling of open grained woods is an all-important consideration in wood finishing. Proper filling is the means by which a perfectly smooth, uniform surface is obtained for subsequent coats of varnish, and much care, should, therefore, be paid to this stage of finishing.

The best paste wood fillers, are made from finely ground silex, linseed oil, turpentine and other substances.

In using a filler, only the very best obtainable should be used, as a cheap filler will shrink and cause even the very best grade of varnish to shrink with it.

Before applying paste fillers, the surface of the wood should be perfectly clean, and sandpapered smooth. The filler should be thinned with turpentine to the consistency of varnish and should be applied with a brush. Fifteen or twenty minutes should be allowed for the filler to set, then rub off with burlap, rag or waste, rubbing it across the grain and into the pores of the wood at the same time. After assuring yourself that the pores have been properly filled, wipe the filler off clean with a soft cloth.

After the filler has thoroughly hardened, which usually takes about twenty-four hours, sandpaper perfectly smooth and dust off, leaving the work clean for the application of the materials following.

If the filler, at any time, sets too hard, moisten the rubbing cloth with turpentine, or, better still, brush the surface over with turpentine.

On a very coarse grained wood, such as chestnut, a second coat of filler is sometimes necessary. When this is done, it should be applied in the same manner as is the first coat.

U.S. SHEET MILLS REPORT GAIN IN ORDERS.

Cleveland, O., June 8.—The Iron Trade Review to-day says: With the possible exception of sheets, the lower prices, which became effective June 1, have not brought out much additional business and in some respects market is quieter than ever. The total volume of business booked since May 31 is light, and specifications in some instances show a further decline. Owing to the fact that jobbers' stocks were extremely low on June 1, and that few contracts had been made for the third quarter, several companies report a fair gain in orders for sheets during the past few days. The reduction of from 3 to $4 a ton in the price of sheets has been carried throughout the entire list of differentials on black, galvanized and blue annealed sheets, as well as painted and galvanized roofing sheets. Some contracts for steel bars have been placed at $1.25, Pittsburg, for delivery over the year, and, while the tonnage involved is not heavy, buyers are showing more interest in the situation. The cut in prices appears to have checked the markets on shapes and plates.

Pratt & Lambert, inc., are enlarging considerably, the manufacturing facilities at their Buffalo headquarters. The enlargement will consist of a modern four storey building 125 x 46 ft. with basement and wing, connecting with their present buildings. The new building will be of modern fire-proof construction; reinforced concrete, brick and steel.

M (MAPLE LEAF) L Pure Paints Floorglaze Elastilite Varnish

Justify every claim you can make for them, every effort made to push their sale—because they are trade-winners and trade-holders in every sense. We help you sell them by effective, persistent advertising—and you make good, steady, easily-earned profits.

You Can't Overlook Facts

Mr. Dealer:—Here are a few statements that you can't afford to overlook.

Minerva Paints and Varnishes were first manufactured in England 76 years ago—their growth was spontaneous and steadily increased until the London house was supplying *Minerva Brands* to the markets of the world. Canada was recently recognized as a market which could produce a large demand, and although the competition was strong, it was decided to build a Canadian factory and manufacture identically the same brands as were made in England. About six months ago the large Toronto factory started to fill the already waiting orders. Since the first day the success of *Minerva Paints and Varnishes* has surpassed all expectations. The demand has been such that the extreme possible output has been taxed. The success of *Minerva brands* has been assured in Canada. There are reasons for such growth.

Minerva Paints and Varnishes give honest value—they contain absolutely the very highest grade ingredients possible to procure.

The Manufacturers co-operate in every possible way with the dealer. Extensive consumer advertising is used.

A good fair margin of profit and an attractive proposition is offered.

This is why Minerva Brands mean your reputation and profit.

Write us for information—be a part of this big selling organization and get your fair share of the waiting profits.

The Pinchin-Johnson Co. (Canada) Ltd. F29

Established in England—1834 **377-387 Carlaw Ave., Toronto, Can.**

PAINT AND OIL MARKETS

MONTREAL.

Montreal, June 8th.—The slight falling away in general business during the early months of this year has undergone a reaction and a very heavy trade is reported to have taken place during the month of May. June, likewise, gives promise of being an exceedingly busy month throughout the Dominion. The damper of high prices of some of the staples has disappeared and a good healthy demand exists for almost all classes of painting material. Ready mixed paints and stains and varnishes in tins for domestic use are showing a particularly good market condition. Two items, however, white lead and putty, are not quite so active as formerly, but with this exception all departments seem to be busily engaged.

Linseed Oil.—Owing to the heavy demand for linseed oil the weaking tendency has positively stopped and cables show a marked strength in liquid oil quotations. Indeed on the 8th inst. the market showed a rise of 3 cents a gal. in liquid oil quotations. The local market shows a firmness in sympathy with this tendency. Local prices still remain unchanged at $1.06 for raw and $1.09 for boiled. Turpentine.—With the usual heavy spring shipments coming forward from various channels in the south, prices have sagged to a slight extent being now quoted at 85 cents per gal. in barrel lots. This price would probably be shaded for round lots.

Arsenate of Lead.—An extraordinary demand exists for this insecticide, and as the hardware trade has been growing acquainted with it generous orders have been coming in from all points. This condition was not anticipated and consequently makers and jobbers are sold out and are unable for the present to fill orders. It has been humorously stated that it would take a lot of scraping to gather together an ounce of arsenate of lead just now. The manufacturers have used up all their chemicals necessary in the manufacture of this article and for a week or so orders will have to wait. Prices are: In bbls., about 800 lbs., 9c; in half-bbls., about 400 lbs., 9½c; in 25-lb. wooden kegs, 10c; 5-lb. bottles, 12c; in 2-lb. bottles, 13c; in 1-lb. bottles, 14c.

White Lead and Putty.—Grinders are easily able to keep up with the sales and the tardiness of the shipments of this article has enabled the trade to buy ripe well matured stock. The building trade is said to be brisk and it is believed there will be a healthy demand for white lead and putty in a short time. Prices of white lead are: In bbls., 800 lbs., 9c; in half bbls., about 400 lbs., 9½c; in 25-lb. wooden kegs, 10c; 5 lb. bottles, 12c; in 2 lb. bottles, 13c; in one lb. bottles, 14c.

Existing prices of putty are: Bulk bbls., $2.20; bulk, cwts., $2.45; bladder, bbls., $2.70; bladder, cwts., $2.80; 25's, loose, $2.55; 25's, cased, $2.70; 12½'s, cased, $2.90.

Paris Green.—To ask a dealer to buy Paris green in January is like offering Panama hats in December but dealers who placed orders six months ahead of their requirements should be pleased with their forethought, for everything points to a shortage of this article. Stocks from over seas have been delayed from sundry causes and manufacturers of Paris green state that they have very little in stock and have advised their travelers to be guarded in making large sales, selling only subject to the stock on hand. There is no change in quotations but if a shortage should come about holders may be excused for asking higher prices.

Prices are as follows:—In barrels, about 600 lbs., 17c per lb.; arsenic kegs, 250 lbs., 17¼c.; 50-lb. and 100-lb. drums, 18¼c.; 25-lb. and 100-lb. drums, 18⅜c.; 1-lb. packets, 100 lbs. in case, 20¼c per lb.; 1-lb. packets, 50 lbs. in case, 20¾c per lb.; ½-lb. packets, 100 lbs. in case, 22¼c. per lb.; 1-lb. tins, 100 lbs. in case, 21¼c. per lb.

Varnishes.—Enquiry among manufacturers who specialize on varnishes show that the trade is in an exceedingly prosperous condition. Varnishes and Japans for carriage work and for interior and exterior finish are moving with a quick step. Gum shellac is quoted at a moderate figure and shipments of shellac and spirit varnish are most encouraging.

TORONTO.

Toronto, June 8.—There is a good tone to the market, the demand being pretty well distributed over all lines. The weather has been unfavorable during the past ten days and trade has suffered to some extent as a result. The effect has not been in any sense serious, however, and it is anticipated that business will return to the active tone which was shown last week.

The tendency in turpentine and linseed oil has been downward, reductions being noted in both commodities. In neither case was the decrease large, however, and, the market has not been seriously affected.

Linseed Oil.—Local jobbers are to-day quoting $1.09 for raw and $1.12 for boiled, a reduction of 3 cents in the price. This alteration in price has been made despite the fact that the crushers are maintaining their prices at the former level, with little indication of a change this month. The demand for linseed oil has been distinctly heavy during the past week, partly as a result of the lower prices.

Turpentine.—The slump in the price of turpentine has continued further than had been expected by those who were closely in touch with the situation. The price was sliced this week to the extent of another 5 cents, making the figure asked 80 cents. This is indeed a remarkable showing, considering the extraordinary figure obtaining less than two months ago. The reduction put into effect this week is in anticipation of the turpentine, which is just arriving at the reduced price in the Southern States. It is claimed that the figure is lower than is justified by the price paid for turpentine now in stock. Correspondents in Savannah and Jacksonville advise that the present price prevailing there is below any quotations that have been made for more than a year past and, in consequence, they are inclined to think that the bottom of the market has been reached. In confirmation of this, comes word that for the past three or four days there has been a tendency shown on the primary markets toward greater firmness. Each day there has been an advance of from one to two cents per gallon in the price at Savannah.

Rosin.—No developments are reported. The price is a little easier and demand remains about the same.

Putty.—The demand is growing stronger for putty. No price changes have been made. Standard putty is quoted at: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same; bulk in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

White Lead.—There has been a steady increase in the demand for white lead and large orders are now being placed. The continued weakness in turpentine and linseed oil has had a good effect, inso much as it removes all possibility of lead quotations changing. At the same time it is felt that the price asked for lead has up to the present not been high enough in view of the cost of oil and there is not much chance of any reductions in the price of lead.

Prepared Paints.—Good sorting up orders are now the rule and the volume of business is such that satisfaction is expressed on all sides. As large outdoor contracts are now starting, it is safe to assume that the active tone now shown will be steadily maintained throughout the summer months.

Varnishes and Japans.—The same applies to all varieties of varnishes and Japans. The exodus to summer resorts and cottages has helped along the demand as there is certain to be a great deal of brightening up to be done around every summer place.

Specialties.—In the specialty line, the Glass.—With the advance of building work, the demand is growing for glass.

China-Lac

The Perfect Varnish Stain---Extensively Advertised Yields the Dealer a Profit of over 58%

China-Lac is a Perfect Varnish Stain

Not made from heavy pigments that obscure the grain of the wood and give an appearance of a solid varnish paint. Not made from dyes that fade out in a week. But made from the most permanent light gravity, chemical pigments it is possible to obtain.

Made from Pigments

Pigments, made in our own dry color works, in the most scientific manner by our chemists, on formula brought direct from Great Britain.
Pigments that give lasting, non-fading effects.
Pigments that allow the grain of the wood to show up through the Varnish.

The Varnish

The Varnish used in China-Lac is specially made for that purpose. It was not hastily decided on, but tested out by time and wear.
The combination of these pigments and varnish made a varnish stain that covers the wood with a rich, lustrous coating, imitating most expensive hard woods.

The Colors

Made in sixteen beautiful colors. Eight to imitate natural woods.

The Store Advertising

Given with China-Lac comprises an attractive Window Trim, beautifully lithographed in three colors, red, black and white. This goes across the upper portion of window, and down each side, showing on the two upper corners the little Chinese boy with lantern. The two side panels have a lithographed bamboo frame and a large Black Dragon running up behind the panel.

Large Display Card for the Counter

This is a very handsome card, size 10x18, showing the 16 colors, in which China-Lac is manufactured; it makes a most beautiful appearance and is bound to command attention.

Eight-Page Booklet

This booklet gives full information about China-Lac, telling about the different colors, also what China-Lac can be used for, and gives other useful information regarding interior decorations.
The cover of this booklet is lithographed in green background, buff lettering.

Small Counter Cards

Lithographed green lettering on a buff background; they have small color strips, showing the 16 colors in which China-Lac is manufactured.

ICE CREAM FREEZERS.

White Mountain, 50 p.c.

Amatite ROOFING

A Word to the Dealer!

Are you selling the old-fashioned "paint-me-oftenoid" roofing, or are you selling the modern "no-paint" kind called Amatite Roofing? We are spending thousands of dollars every month in advertising to tell the consumers that the day of painted roofings is past and that they can secure at the same price Amatite Roofing *which needs no painting.* ¶ Amatite has a practical, durable mineral surface Lay it on the roof and it needs no further care. ¶ Every practical user of ready roofings sees the point in a minute. He knows that painting roofs every two or three years is a nuisance and that it costs him money. He knows that he is liable to neglect it, or find when the time comes round that he cannot afford to buy the paint just then, or hasn't the time, and so the roof gets neglected and wears out. ¶ Show him that you have a "no-paint" roofing which costs no more than the old-fashioned kinds and you will get his order. ¶ Amatite is easy to lay, requiring no skilled labor. Nails and cement are supplied free, packed in the centre of the roll. Booklets, samples and other information on request. Address our nearest office.

THE PATERSON MANUFACTURING COMPANY, Limited

MONTREAL TORONTO WINNIPEG VANCOUVER ST. JOHN, N.B. HALIFAX, N.S.

HAVE NO HESITATION in stocking and recommending—

PATENT TWO AND THREE PLY READY ROOFING

It is adapted to all kinds of buildings and climates, and can be laid on steep or flat roofs, old or new, by ordinary workmen. Only made in one quality—THE BEST. The selling of this favorite line brings YOU a full measure of profit, and satisfaction to your customers. Two other leading brands are—

Black Diamond Tarred Felt, Joliette and Cyclone Sheathing

WRENCHES

Agricultural, 67½ p.c.

WROUGHT IRON WASHERS

Canadian, 50 per cent.

Your Money In It

All over the country you see men in this position to-day. It is a favorite spring position. It is a position which predominates wherever a live agent for

RAMSAY'S PAINTS

realizes that his money is in it, and now is the time to get profits out of it. You have invested money in Ramsay's Paints—The Right Paint to Paint Right—are you doing your share to help us get orders for you? Look about your town! How many houses need paint? How many householders are thinking of painting? Then write us and tell us who they are. The result will be business and profit for you. Many agents are doing this. Are you?

A. RAMSAY & SON CO.

Spring window used by Chas. C. Lee, Goderich, Ont., Can., featuring S-W-P.

Drawing Trade to the Store

Attractive window displays are the best advertisement for your store. Observation has proved to us that merchants who give closest attention to keeping their windows attractive are the real business-getters. They are the ones who are constantly adding new departments and making their stores the live shopping centres.

Strong window displays have always been made one of the most important features of the Sherwin-Williams spring and fall campaigns. These displays are carefully designed by experts who make this work their special study. Force, simplicity and attractiveness must characterize each display. The result is that by making proper use of them the S-W Agent quickly establishes himself as the leading paint and varnish dealer of the town. His windows arrest attention and people do not easily forget that store as the place where Sherwin-Williams Paints, Varnishes and Brighten Up Finishes are sold.

An exclusive Agency for a well-known, high-grade brand of merchandise is invaluable. Sherwin-Williams Paints and Varnishes are known to every one and their reputation for excellence is universal. This combination of undisputed quality, good advertising and intimate co-operation with each S-W Agency is a substantial, profitable business proposition. If there is yet no S-W Agency in your town, better apply for it before someone else does.

HARDWARE AND METAL

NEU-TONE

A PAYING PROPOSITION

It pays, brother, when you can make a friend of everybody that comes into your store. And it is not so hard to do, either.

Take for instance, the paint proposition. If a man comes into your store, and you make a lot of promises that the paint doesn't fulfill — that man will not remain your friend many days.

When you lose him — well — you will lose many more. But on the contrary, if the paint "*makes good*" you make a fast friend and gain a lot of more customers.

NEU-TONE COLORS

(Washable — Sanitary)

Please Everybody — Dealer, Decorator and House-Owner

It pleases the dealer because it is a paying proposition — carrying with each sale the twang of a come-back order. It pleases the decorator because it enables him to give his work a "*style*" that triumphantly asserts itself.

It pleases the house-owner because with it, the house can be finished in the soft, restful, "flat" tints and rich colors of kalsomine. Dust, grease and smoke stains easily removed with a damp cloth. Think of it. It pays to sell this kind of paint, Mr. Dealer. Drop us a postal and we will tell you a few more things you will be glad to hear about this *paying proposition.*

THE MARTIN-SENOUR CO., Limited

Montreal Chicago Halifax Toronto Winnipeg

EARN THE CONFIDENCE OF YOUR CUSTOMERS

If you deal squarely with your customers you will make friends of them and they will learn to respect your opinions.

RECOMMEND DOUGALL VARNISH

The result will be that when your customer returns for more goods he will remember the good varnish that you sold him and his willingness to be guided by your recommendation will help you in a thousand ways.

Dougall Varnish is pure satisfaction from the first to the last drop.

There may be varnishes 'just as good' but they are not yet on the market.

If you will drop us a card we will send you a booklet containing a talk on varnishes in general—write us to-day.

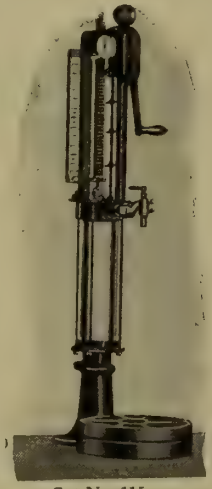
A Dollar Talk

On Paint Oil Storage.

How much oil is:

Soaked up in the floor?

Smeared over the measures and funnels?



Absorbed by the barrel?

Wasted by over-measure and spillage?

Spoiled by evaporation?

How much is your fire hazard increased?

The answer to these questions shows why it is profitable to buy a

Cut No. 115.

BOWSER STORAGE SYSTEM

The pump measures the oil accurately, counts the gallons and computes the charge.
No Measures nor Funnels.
The steel tanks are air-tight and fire-proof.
No danger from fire. No loss from waste.

The Bowser Buys Itself

66-68 Fraser Avenue, TORONTO, ONT.

Build up a trade on **the repeat order** basis by recommending

"International" Varnish Products

A majority of Hardware Dealers *are* doing that.

Don't take it on our say-so, but *investigate* for yourself—

And you will find out that a *big percentage* of Canadian Hardware Merchants *feature* "International" Products.

There are *more than a few reasons* why they should. Take

ELASTICA

for instance—the floor finish that's practically imperishable The only truly elastic finish on the market—the finish that wears like nickel steel.

Elastica does not mar, scratch, white or spot. It dries dust free in four to six hours and hardens over night.

Elastica Nos. 1 and 2 are used for Exterior and Interior work respectively.

Let us know your varnish and finish requirements and we'll give you solid reasons why you should always specify International Products.

All International Products are sold
in full Imperial Measure Cans.

A 24

Moore's Sani-Flat

is a flat drying oil paint, specially recommended for Wall painting, Woodwork, Furniture, Steel Ceilings, Burlap and for all classes of interior decorating.

It produces that desired dead flat finish, having the soft velvety effect of water color, combined with the advantages of being washable and durable as oil paint.

Easy to apply, sets slowly and covers perfectly without showing laps or brush marks.

Saniflat is unfading and covers fifty per cent. more to the gallon than ordinary oil paint.

Paint and Varnish Removers

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	Name of Brand.
The Sherwin-Williams Co., Montreal, Canada.	"Taxite"
International Varnish Co., Ltd., Toronto, Canada	"Klensa"
Pratt & Lambert, Inc., Bridgebury, Ontario, Canada	"Expedite"
British American Paint Co., Victoria, B.C.	"Bapoo"
Mount Royal Color and Varnish Co., Montreal, Canada	"Scrape-off"
James Robertson Co., Ltd., Toronto, Canada	"Robertson's Paint and Varnish Remover"
Sanderson Pearcy Co., Ltd., Toronto, Canada	"Devolite"
Stewart & Wood, Toronto, Canada.	"Solvo"
Martin-Senour Company, Ltd., Montreal, Canada.	"Martin-Senour Paint and Varnish Remover"

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

Show Your Customers This Up-to-date Bit Extension

The Ford Bit Extension is not to be classed with the ordinary Extension—Clumsy, hard to work and in general unsatisfactory. The Ford is a model of simplicity—simple in construction, simple to adjust and simple to use. It embodies the best points of other makes and has several exclusive features that make it paramount. No other Bit Extension contains so many practical features, no other can do the work as easily nor as well as the Ford and

No other is as easy for you to sell.

For the Ford has more selling points than any other Extension and each Ford feature affords a convincing selling argument. You can hand a man a Ford and tell him positively and convincingly that no other extension equals the Ford in simplicity of construction, number of practical advantages, facility of operation, time and labor saving features, convenience, wearing qualities, and in the ultimate satisfaction desired through better results. The Ford comes to you highly recommended, fully guaranteed and with a steadily increasing demand. We have an excellent proposition. Will you write us for circulars, prices, etc ?

Ford Auger Bit Co.

When writing advertisers kindly mention having seen the advertisement in this paper.

Department of Railways and Canals, Canada.

HUDSON BAY RAILWAY.

NOTICE TO CONTRACTORS.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for construction of Hudson Bay Railway," will be received at this office, until 16 o'clock on Tuesday, the 1st of August, for a section of about 185 miles from Pas Mission to Thicket Portage.

Plans, specifications and form of contract to be entered into can be seen on and after Wednesday, May 31, at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the office of the Chief Engineer of the Hudson Bay Railway, Winnipeg, at which places forms of tender may be obtained.

Parties tendering will be required to accept the fair wages schedule prepared or to be prepared by the Department of Labor, which schedule will form part of the contract.

Contractors are requested to bear in mind, that tenders will not be considered, unless made strictly in accordance with the printed forms, and in the case of firms, unless there are attached the actual signature, the nature of the occupation, and place of residence of each member of the firm.

An accepted bank cheque for the sum of $200,000.00 made payable to the order of the Minister of Railways and Canals must accompany each tender, which sum will be forfeited if the party tendering declines entering into contract for the work, at the rates stated in the offer submitted.

The cheques thus sent in will be returned to the respective contractors whose tenders are not accepted.

The cheque of the successful tenderer will be held as security, or part security, for the due fulfilment of the contract to be entered into.

The lowest or any tender not necessarily accepted.

By order,

L. K. Jones,
Secretary.

Department of Railways and Canals,

A CONVENIENT CLOTHES RACK

This High-grade rack can be fastened to the wall near a stove or range.
When closed it projects only 1 1-2 in. When extended, and all the bails are down, it stands out only 14 ins. from the wall and has a drying space of 19 feet.
Each bail can be lowered separately without interfering with the others.
The sides of the rack a e made of hardwood—the bails of galvanized steel, bent so as to be self supporting when in use.
The price of the rack is $1.25 retail, manufacturers' price $9.00 per doz.
This is a sure seller. Order from your wholesaler or direct from us.

Maple Leaf 1900 Saw

MADE IN HAND, RIP AND PANEL—HOLLOW OR STRAIGHT BACK.

Are you handling the **"Maple Leaf" HAND SAWS?** the line with quality as the first consideration and that shows you the margin of profit you should get.

If not, we can offer you a proposition second to none—one that will appeal to you as a good business man. We have prepared special advertising features for the spring trade that every hardware man in Canada may have the advantage of. This advertising is done direct to the carpenter on our **1900, 100** and **"Narrow Point" Hand Saws.** We are packing the 1900 and 100 in separate canvas bags and have adopted a retail price which is stencilled on each bag.

We will be glad to supply you with full particulars.

The "BAYARD" Baby Automatic Pistol, Calibre .32 ($7.65^{m}/_{m}$)

The Little Giant---A Midget High Power Automatic

The .32 cal. (7.65 mm) "BAYARD" Pistol has been designed to meet the demand for a POCKET pistol COMBINING EASINESS OF MANIPULATION AND SIMPLICITY OF CONSTRUCTION WITH MAXIMUM EFFICIENCY.

Its size is that of a .25 cal. pistol, although it shoots THE POWERFUL .32 CAL. CARTRIDGE.

The "BAYARD" pistol possesses consequently THE ADVANTAGE of having a size REDUCED TO THAT OF THE .25 CAL. PISTOLS and a CAL.

OF .32, GENERALLY CONSIDERED EFFECTIVE and heretofore found only in pistols of greater bulk. These features make the "BAYARD PISTOL" the IDEAL POCKET ARM.

"BAYARD" AMMUNITION

The .32 cal. (7.65 mm) "BAYARD" Cartridges adapted to Automatic Pistols of this calibre have no equal on the market as to quality, regularity of charges, penetration, etc. We are specialists in the manufacturing of this class of ammunition and guarantee against misfire, hangfire, etc.

Hardware and Metal
TORONTO - MONTREAL - WINNIPEG

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

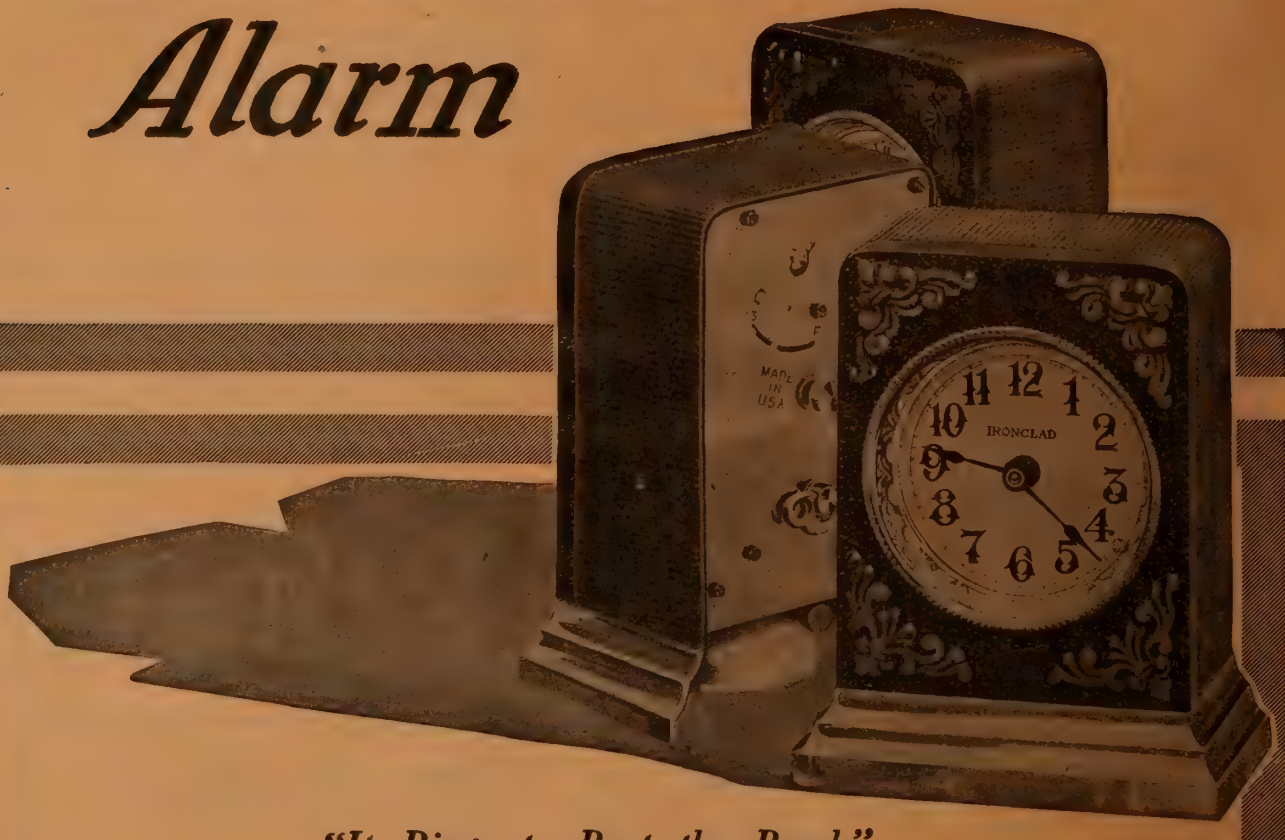
WAFFLE IRONS

THE TAYLOR-FORBES WAFFLE IRONS are recognized by leading hardwaremen throughout the Dominion as having **many advantages for quick selling.**

Years of careful attention paid to the manufacturing of our high-grade waffle irons have put them in a class by themselves for simplicity, durability and service.

You will increase your trade by giving satisfaction—your customers get an iron that will pay for itself many times over.

Don't let your competitor handle this high-grade, **guaranteed seller** before you do.



Write at once for prices and descriptive material.

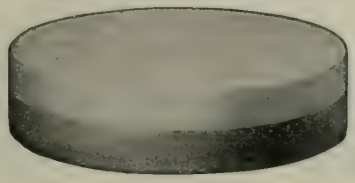
The IRONCLAD *Alarm*

"It Rings to Beat the Band."

IF we placed our IRONCLAD movement in an ordinary alarm case, the chances are it would *turn turtle* within a year. And if it lived to tell the tale, it would be to *tell a tale*—for it would get so *clogged* with dust, it could not tell the *truth.*



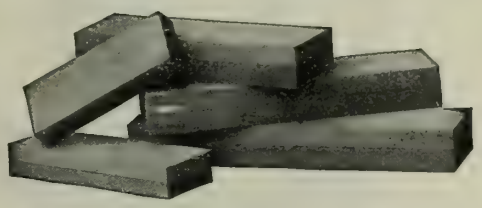
But it's CLAD in heavy IRON armor and it can't *keel over.*—It's stocky, sturdy, steady.—If it's *cleaned* every other year, there's *no telling* how long it'll last.

Packed 12 in a box with advertising matter. Dealers' names printed free on dials in lots of 24. Height 5 inches. Dial 2¾ inches. Weight 2½ lbs. Rings 35 seconds; can be shut off at will.

Stocked by 28 Canadian Wholesalers.

The Western Clock Mfg. Co.,

La Salle, Illinois.



Carborundum Sharpening Stones

Never stay long on the shelves—they sell too fast—the demand is too great. Every dealer wants a stock that keeps moving. Carborundum Sharpening Stones are made to meet every sharpening need from the kitchen to the work bench—from the factory to the farm—they all give a tool a better edge in less time, last longer and do not glaze over. Made from Carborundum—and there isn't anything that is so hard, so sharpening or fast cutting.

The complete Carborundum line, including stones, hones, strops, scythe stones, knife sharpeners and Carborundum paper and cloth, etc., is described in the special catalog. Ask about our free display case offer, discounts, window displays and other trade helps.

THE CARBORUNDUM COMPANY

NIAGARA FALLS, N.Y., U.S.A.

Cable Address: Carborundum. Lieber's Code Preferred.

Have You Seen These

New "Yankee" Tools?

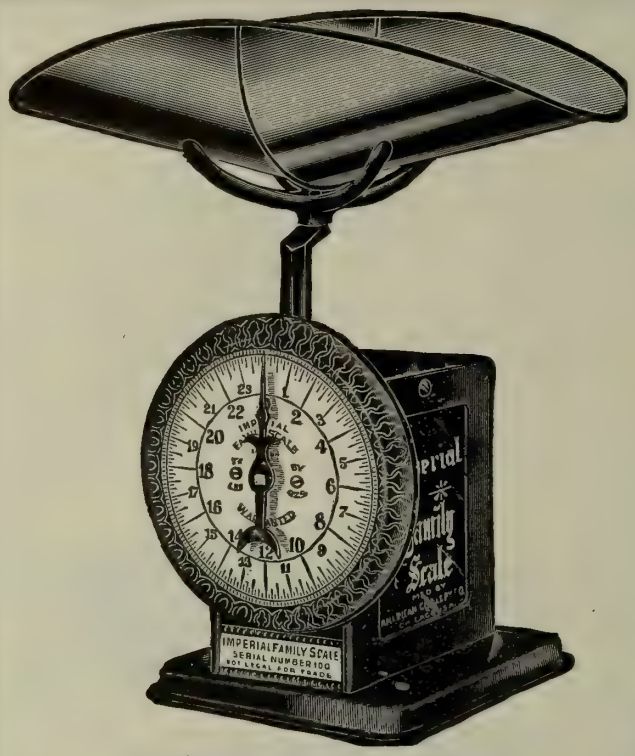
No. 1530 Hand Drill for holes up to 3-16 in.

Takes round shank drills. Has the famous Automatic Double Ratchet movement the same as our other "Yankee" geared Drills, so helpful in many ways especially at close quarters where only part turn of crank can be obtained. The wood Handle has magazine for drill points. A fine tool for metal workers, amateur mechanics, etc.

No. 130 Quick Return

Same tool as the No. 30 but with a Spring inserted in the Handle to drive the spindle back quickly, ready for the next push. A great advantage for overhead work or where only one hand can be used. Takes all the Attachments used in the No. 30.

No. 75 Push Brace



Bores holes up to ⅝ inches in hard woods and ⅝ inches in white pine, quicker and easier than a Bit Brace. Drives and draws screws—takes all the small tools and works in close quarters where a Bit Brace cannot be used. Bearing down on the Handle drives it with that quick and easy motion of the "Yankee" Spiral Driver.

They are catching the Mechanics. Better let your Jobber quote at once.

NORTH BROS. MFG. CO.

Philadelphia, Pa.

No. 700 Imperial Family Scale.

Weighs up to 24 lbs. by ounces. Our Scale has recently been passed by the Canadian Authorities.

No. 1 Kitchen Friend.

Get busy and write us so we can quote price and let you know about our

KITCHEN SET.

Shows value three times its cost.

AMERICAN CUTLERY CO. Chicago, U.S.A.

Manufacturers of High Grade Cutlery, Scales and Household Specialties.

Established 1865

The S.M.P. Improved Deluge Sprayers

Unexcelled for Spraying Trees, Bushes, Plants, Potatoes, Vines, Interior of Henneries. Also Horses, Cattle and Swine for keeping off Flies and Lice.

The "DELUGE SPRAYER" throws a fine vapor spray, thus covering a wide surface, which is very important in the spraying of trees, etc.

At the same time it is a great economizer of liquid, and makes a small quantity go a long way.

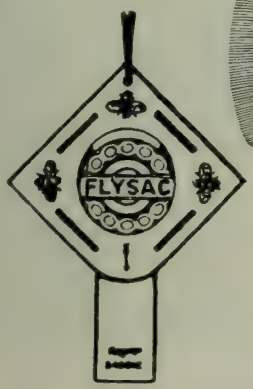
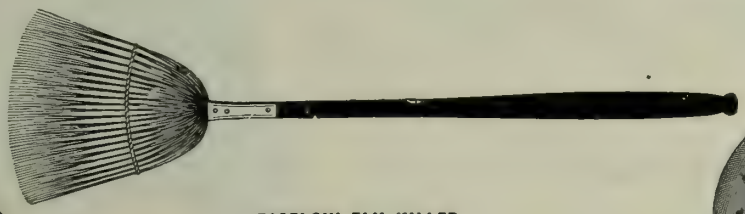
Summer Time is Fly Time

"With slime and filth they
cover their feet:
Then wipe it off on our
bread and meat."



Swat him; catch him; kill him.
He is a dangerous, filthy pest.



Catching flies on the diamond is all very well, but catching the kind that infest our homes is a necessity, the sawbones tell us, if we would be free from filth and disease.

How about your stock of fly-killing devices? Are you prepared to meet the summer demand?

We carry a Complete Assortment.—Novelties for those who wish to try something new—old stand-bys for the more conservative.

FLYSAC

BIGELOW FLY KILLER

So constructed of Fine Wire Tufts that it kills without mashing the fly. It allows the air to pass through the wires and doesn't create a draught to blow away the fly when striking.

Broom Shaped, Tinned Wire Head, 5 x 4½ inches. Black Enamelled Hardwood Handle; Brass Ferrule. Length over all, 15 inches. List Price per dozen, $1.90.

One dozen in a box

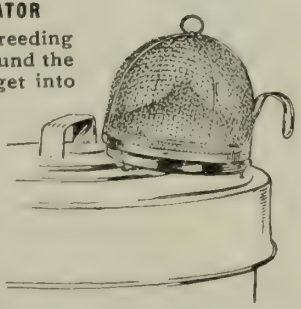
BALLOON FLY TRAP

One of the best means yet devised for catching large numbers of flies in a small space.

Tinned Wire Body, Tin Bound Edges, Red Stained Wood Bottom. Height 6½ inches, diameter 5½ inches.
List price per dozen, $2.70. One dozen in a carton.

The Best Tape Fly-catcher on the Market.

Stocks well and Packs well, Cleanly to handle. Tape pulls out to 27 inches in length, ¾ inch wide; Evenly and Thickly Coated with a Sure-catching Gum. **They Get on and Stay on.** List price per box of 50, $1.50.



TANGLEFOOT FLY PAPER

Economical, Sanitary. Always a good seller. Preferred to Poison Fly Paper or Liquid Poison as it doesn't let the flies get away to fall into the hash, butter or gravy.

Size of Sheet 9 x 16 inches.
25 Double (50 single) sheets in a carton - - $0.80
250 Double (500 single) sheets in a case - - 7.14

OUTDOOR FLY EXTERMINATOR

Catches them in their breeding places, in the stable and around the garbage can, before they get into the house. Same principle as the Balloon Trap, but heavier and reinforced with guard wire.
Can be set on shelf or table, fastened to the garbage can or barrel or anywhere.
Brass Plated Wire, Brass Plated Tin Bottom.
Height 5 in., diameter 4½ in.
List Price per dozen, $5 50
One Dozen in a Box.

DISSTON

INSULATE SCREW DRIVER

This tool is designed expressly for Electricians' use. The blade of crucible steel, hardened and tempered, is embedded in a handle of hard rubber of a texture that eliminates brittleness. It WILL NOT work loose. The rubber handle is milled grip, with projecting rings which prevent the hands from slipping down on to the blade. The hard rubber handle acts as insulation.

The Disston Insulate Screw Driver is something new. Most practical Electricians' screw driver ever made.

TRANSPAROL

Transparol is the finish that makes every surface a mirror, and is the leading finish for railroad cars, automobiles, and all other vehicles, also for leather.

Transparol is a particularly choice finish, and one that is positively indifferent to all effects of

Atmosphere
Acids
Oils
Gasoline
Salt Water, etc.

Transparol is the best preservative of wood known, and is equally as good a preventative of rust and corrosion of metals.

The gloss finish given a surface by an application of Transparol is so great that Transparol is the wonder of the paint and varnish experts.

Transparol comprises the following universal qualities:—

Flexibility
Elasticity and
Durability

History records that in Egypt they had a fluid which resisted the atmosphere for ages, and which modern civilization up to date has never been able to produce. THE OLD EGYPTIAN PRESERVATIVE HAS BEEN RE-DISCOVERED.

Transparol stands alone among the multitude of paints, varnishes and shellac products like the pyramid amidst the ruins of Old Egypt.

Transparol is indestructible; and when all other products have worn away, Transparol will still be there.

Transparol is sold on a guarantee to be satisfactory.

For Exterior and Interior Use

THE WORLD'S BEST GUN IS A GREENER

This is not merely what *we* say. Facts prove it.

International Honors. Greener guns have taken highest honors at 27 International Exhibitions, from the first Exhibition of all Nations, 1851, to the culminating honor, the highest obtainable, the Grand Prix at the St. Louis Exhibition of 1904.

Shooting. The Great London Field Gun trials of 1875, '77 '78 and '79 conclusively proved the superiority of the Greener system of choke boring. Greener guns beat 68 guns by the world's best makers, and the position they then attained has never been seriously challenged. All the world's best pigeon shooters: Dr. Carver, Captain Brewer, E. D. Fulford, Elliott Pennel, George Robbins, made their reputations at the traps with Greener guns.

Quality. The quality of a Greener gun is remembered long after the price is forgotten. There are many instances on record where Greener guns have been in use for twenty-five and thirty years without costing their owners a cent for repairs.

Finish. None can equal the Greener gun for beauty of design, strength and simplicity of mechanism and high class finish, no matter what the quality may be. Greener guns are made by expert gunmakers, having three generations of experience, and possessing a practical knowledge of the sportsman's requirements.

Let us advertise the fact that you handle Greener Guns, and every sportsman in the district will visit your store.

Write at once to our Canadian Branch for list and wholesale terms.

Department of Railways and Canals, Canada.

HUDSON BAY RAILWAY.

NOTICE TO CONTRACTORS.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for construction of Hudson Bay Railway," will be received at this office, until 16 o'clock on Tuesday, the 1st of August, for a section of about 185 miles from Pas Mission to Thicket Portage.

Plans, specifications and form of contract to be entered into can be seen on and after Wednesday, May 31, at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the office of the Chief Engineer of the Hudson Bay Railway, Winnipeg, at which places forms of tender may be obtained.

Parties tendering will be required to accept the fair wages schedule prepared or to be prepared by the Department of Labor, which schedule will form part of the contract.

Contractors are requested to bear in mind, that tenders will not be considered, unless made strictly in accordance with the printed forms, and in the case of firms, unless there are attached the actual signature, the nature of the occupation, and place of residence of each member of the firm.

An accepted bank cheque for the sum of $200,000.00 made payable to the order of the Minister of Railways and Canals must accompany each tender, which sum will be forfeited if the party tendering declines entering into contract for the work, at the rates stated in the offer submitted.

The cheques thus sent in will be returned to the respective contractors whose tenders are not accepted.

The cheque of the successful tenderer will be held as security, or part security, for the due fulfilment of the contract to be entered into.

The lowest or any tender not necessarily accepted.

By order,

L. K. Jones,
Secretary.

Department of Railways and Canals,
Ottawa, May 26, 1911.

Newspapers inserting this advertisement without authority from the Department will not be paid for it. (24)

Hamilton Jewel Gas Ranges

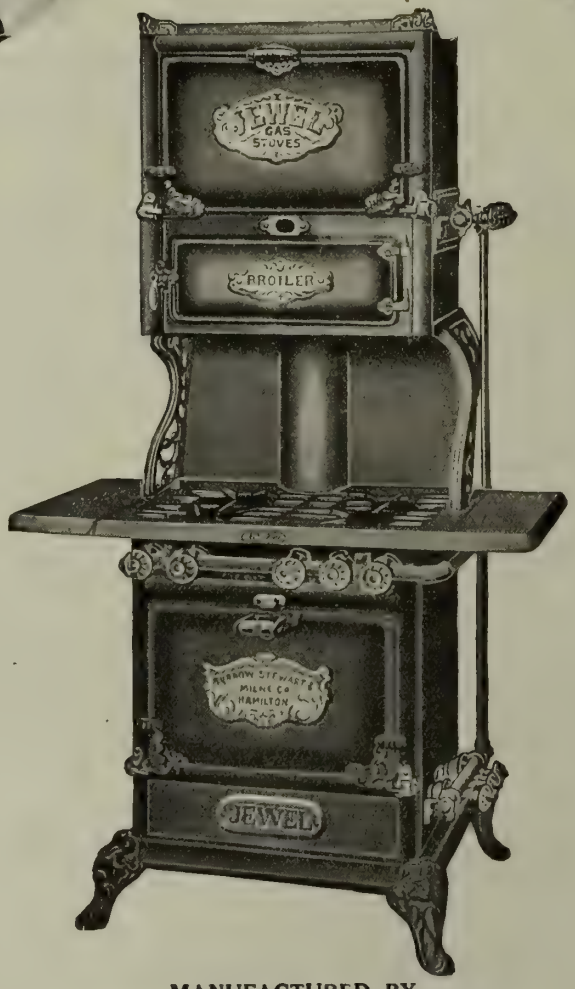
for MANUFACTURED or NATURAL GAS are made in over 125 VARIETIES and Every Requirement can be Supplied.

Single Oven

No.	Size of Oven	Size of Top
15	17x12x12 in.	22x19 in.
20	17x12x12 in.	32x19 in.
30	16x16x11¾ in.	35½x22¼ in.
40	15¼x16½x11 in.	35½x22¼ in.
50	16½x16½x11 in.	36¾x22¼ in.
60	18x16½x11 in.	38½x22¼ in.
65	19x18½x12 in.	39x24¼ in.

Double Oven

No.	Size of Oven	Size of Top
70	15¼x16½x11	15¼x16x8½
80	16¼x16½x11	16½x16x8½
90	18x16½x11	18x16x8½
95	19x18½x12	19x18½x8



The Ovens have Spring Balanced Drop Doors. The Valves, Airmixers and other trimmings are all nickel plated. Galvanized Dust Tray under Top Burners. The body of Range is Asbestos Lined. All these Ranges are equipped with **Grave's Patent Safety Lighters** —see cut above. This lighter is far superior to the old style Pilot Light. It is **absolutely safe** because the oven door **must be opened** before the Oven Burners **can** be lighted, and thus all possibility of explosion through accidental accumulation of gas in the oven is avoided.

A **Thermometer** for registering the heat of Oven can be attached to the Oven door of any Hamilton Jewel Gas Range.

These Ranges can be fitted with **Hot Water Heating** attachments, or with Reservoirs or Side Broilers, and Top can be extended if desired.

Large Hotel Ranges

are supplied in every style.

Elevated Oven

Ranges are made in many different styles which are fully described in our **Catalogue No. 69.**

We also make various styles of

Side Oven

Ranges, which we have not room to illustrate here.

If you have not got our catalogue, write us for one.

All Ranges are thoroughly tested before leaving factory.

Each Range is fitted with

Jewel Adjustable Needle Valve

which gives perfect control of gas supply. For accurate mechanical construction and satisfactory working, no other valve equals it.

Triple Price Mark System Brings Splendid Results

Owen Sound Firm Follow Plan for the Marking of all Goods on Sale—How Percentage to Represent Cost of Doing Business is Arrived at.

There is, fortunately, much less tendency nowadays among hardware merchants to indulge in ridiculous and ruinous price-cutting warfare than formerly. The time when rival dealers vied with one another in handing over their hard-earned profits to the consumer is over. There are plenty of cities and towns, however, where the evil still exists. In some places, it is found only in a mild form; in others it is more virulent. Gradually, a feeling of amity is being established among hardwaremen generally and most dealers now are on perfectly friendly, sometimes even on confidential terms with their most direct competitors. Ill will is still found in some quarters, however, and in these towns the price-cutting evil is found in its worst forms.

The writer was informed recently that in one Ontario town the hardware stores were engaged in a direct price-cutting war. One firm was reported to have done a $60,000 business last year without making one cent of real profit. Of that amount, $25,000 had been made in hardware and $35,000 in plumbing, heating and tinsmithing. The owners estimated that they made 1 per cent. on the plumbing, heating and tinshop, while their profit on the hardware end was of such a negligible quality that it could hardly be reckoned on a percentage basis.

Through Carelessness.

That is an extreme case, of course. In a great majority of cases, merchants are guilty of price-cutting through carelessness or ignorance of the real cost of the goods they are selling. They reckon, for instance, on what they paid for the stock and in many cases fail to consider the highly important fact that the price they paid for the goods is vastly different from what it costs them to sell the same goods. Many, indeed, have not the faintest notion of what it costs them to run their stores.

This arises from the lack of a proper system of price marking. A splendid system for accurately marking the price of each article is followed by Creeper & Griffin, Owen Sound. This enterprising firm have been in business for three years only but in that time, by adopting aggressive and business-like methods, they have worked up a splendid trade connection.

Creeper & Griffin have three prices marked on every article. The first represents the price that the firm paid for the article laid down in their store. The second is the price that it costs them to sell that article, which is arrived at by adding the proper percentage for "Overhead expenses" to the original cost. Third, is the selling price. The difference between the second and the third represents the profit to the firm. The first two prices are always marked in cipher and the third in figures, so that customers can tell the price of any article in the store.

Price-Cutting Avoided.

The chief advantage derived from this system of marking lies in the fact that it obviates the possibility of inadvertent price-cutting. When only two figures are marked—the bare cost and the selling price—mistakes are liable to happen in this wise: A customer comes in to look at a pitchfork, say. He finds an article that suits him, but demurs at the figure asked, $1.10. The dealer, anxious to make a sale, glances at the tag, and sees that the cost price was 80 cents. He reflects that by cutting down to a dollar, he will close the sale and still make a neat profit. Accordingly, he sells it for a dollar, and considers that he has cleared 20 cents. But his real profit figures down to something like 7 cents, for 16 per cent. should have been added to the cost price to cover the expense of doing business.

By following the system of Creeper & Griffin, such mistakes are avoided. The salesman invariably knows just at what figure the real profit begins and he is never permitted to make sales at less than a reasonable margin above that. In other words, sales are made on the basis of the second price, and never on the cost price.

Determining the Percentage.

The firm follows out a painstaking and accurate method to determine the cost of doing business. Each month a record of purchases is kept and to this is added the cost of doing business that month. The cost of doing business is accurately compiled by the bookkeeper, due allowance being made for rent, light, heat, salaries, delivery, etc. Comparison of the two totals shows what percentage the expense of doing business bears to the cost of the goods, and the new goods are marked according to that basis, the selling price being fixed with a reasonable margin above the second cost price.

What is the Percentage?

Much discussion has been heard with reference to the percentage that should be charged for the cost of doing business. Many maintain that 16 per cent. of the total turn-over should be reckoned. Some dealers set the percentage that they believe to be proper and apply it all around, tacking it on to the price of nails just the same as on the price of the most expensive specialty carried in the store.

This policy is not considered a wise one by Creeper & Griffin. Mr. Creeper explained to the writer that it was impossible to fix a hard and fast percentage, because expenses on different articles varied widely. For instance, the expense in connection with a specialty, such as a cut glass article, is much greater than on a stable article which is sold every day. Cut glass may remain in the showcase for months before it is sold, it requires extremely careful handling, and much attention, and it carries much greater risk of loss through breakage. Some dealers charge as high as 100 per cent. on such goods, while it is only possible to add a small margin to the cost of a stable commodity, such as nails, which necessarily sell at a close figure and do not involve much care in handling and stocking.

The better system, therefore, is to obtain the total cost of doing business and distribute it over the stock according to the nature of each article.

The triple price mark system is one which has much to recommend it, and many dealers would, doubtless, stop leakages in their revenue, which they are at present at a loss to understand, if they were to adopt some such idea.

Stick to the Price.

In following out this plan, however, it is necessary to stick to the price set and refuse to budge from that figure. Creeper & Griffin have adopted a firm policy in that regard and their customers have come to understond that the price first asked is the figure at which they intend to sell that article and that it is useless to attempt to obtain better terms.

By following this policy, the dealer knows that the price he is asking is arrived at on the basis of a fair and equitable margin above what the article really cost him, and consequently he feels justified in refusing to lower that figure.

Give Plenty of Attention to Furnace Department

Warm-air Heating Systems Require Care in Installation—Some Common Errors to be Avoided—The Advisability of Canvassing Country Districts for Business —Present Year Has Opened More Actively Than Ever.

If it is desired to make a success of the furnace department in the hardware store, closest attention must be paid. Despite the fact that hot-water and steam heating systems have come largely into favor of late years, the demand for warm-air furnaces has been steadily on the increase and the furnace trade is, therefore, well worth going after. To counteract the tendency shown to use steam or hot water in public buildings and large houses, there is a sentiment gradually growing up in favor of increased home comforts on the farm and more farmhouses are being equipped with furnaces every day. There are, in fact, splendid opportunities now for the dealer in furnaces in the small city or town, where it is possible to cater to the country trade.

The prospects in the furnace line this year are exceptionally bright, W. G. Scott, manager of the Pease Heating Co., Toronto, is authority for the statement that business so far this year has been well in excess of last year, with every prospect of continued activity. It is apparent, therefore, that there are greater possibilities than ever before in the furnace line and that the retail dealer may well consider how best to improve his business.

Every stove dealer knows what splendid results are obtained by keeping a sharp lookout for stove prospects and by following up promptly each prospect received. If it pays well in selling stoves, it pays even better in the furnace trade. It is, in fact, necessary, to do considerable outside work in this department, if best results are desired.

Cases are recalled where dealers have worked up a splendid business in furnaces by systematically canvassing their district. One man made it a practice to watch the building permits issued. When a permit was taken out for a new residence, he lost no time in seeing either the owner, the architect or the builder, sometimes all three. If the plans called for a warm-air system, he made an energetic effort to land the contract. If, on the other hand, some other heating system had been decided upon, he would make an earnest effort to get them to see the error of their ways. He was a firm believer in hot-air heating himself and he often succeeded in convincing others, in that way securing contracts which would otherwise have been placed elsewhere.

Try for Farm Trade.

The furnace is growing so rapidly in favor in the agricultural districts that no dealer can afford to overlook the opportunity thus presented for new business. The best method to pursue is to have the surrounding district thoroughly canvassed. In this way, every man in that district is seen. In addition to the sales made, it is possible to secure information which can be made very useful afterward. The result of each interview should be noted down and carefully filed for further reference. By adhering to this plan, the dealer secures accurate reports on the possibility of future business in that locality. If one man had seemed favorable, but had refused to come to a decision, further calls can be made until such time as the order is placed.

Proper Installation.

The most important consideration of all in handling a furnace business is to see that each contract is satisfactorily carried out. The proper installation of a furnace is a matter requiring much study and close attention. The comfort, even the health of the people living in the house depend to a great extent on the proper installation of the furnace. If through some error of judgment it is not properly placed and does not give satisfaction, the customer is highly incensed and does not scruple to let his dissatisfaction become generally known.

Here is an instance which came recently to the attention of the writer. A furnace had been installed in a newly built house, which according to commonly accepted standards should have been of sufficient capacity to thoroughly heat all the rooms. From the very first, however, it gave poor results. The house was never warm and practically no heat penetrated to the rooms in the upper storey. The man, who had installed the furnace, was unable to locate the trouble so an expert on heating was called in. It did not take him more than a minute to locate the trouble. The cold air duct had been run over the top of the furnace and down one side, quite close to the fire box. Practically no protection had been provided, with the inevitable result that the cold air, becoming heated, had ceased to fall and the circulation of air had stopped.

This is only one case of many. The mistake made by the man who had installed that furnace was by no means the most heinous that could be committed. Graver errors are made every day, with the result that too large a proportion of people, with hot-air furnaces, have cause at some time or other to feel dissatisfied.

The Parsimonious Owner.

The most frequent, and the worst, error that the furnace man can make is in listening to the penny-wise-pound-foolish owner. Some landlords cannot see beyond an opportunity to save a few dollars. They give no thought to what the future may bring forth, but are anxious to put in a system at as low a figure as they possibly can. It is deemed wise by all heating experts to use a largeer furnace than the size of a house actually demands. If the system barely meets the requirements as to size and capacity, it will be necessary to keep the furnace going full blast to heat the house. Not only is this found to be an expensive proceeding, but there are times when the fire is bound to get down and the house will then begin to resemble an Eskimo igloo in point of temperature. Many a good, reliable furnace has been condemned as a heavy consumer and a poor heater, for the simple reason that it has been too small for the building, in which it is placed.

The dealer would do well to pay no heed to the cheese-paring suggestions of the parsimonious owner. If he wants to put in a smaller and cheaper furnace than the circumstances warrant, it is the duty of the dealer to argue him out of the idea. If he proves obstinate, the dealer, who is wise, will politely decline to handle the contract. By doing so, he will save himself considerable trouble and probably not lose anything in the end. It is better to lose half a dozen sales on that basis than to have a few unsatisfactory installations to your credit. A failure, even though it may be due entirely to the short-sightedness and obstinacy of the owner, is hard to live down. The odium attaches to the man who had charge of the installation. One thing is certain. The owner himself will invariably place the blame on the dealer, alleging errors in the installation, whereas the trouble lies in the fact that the furnace is too small for the work placed upon it.

So much depends upon the heating system in a house, that the dealer should never neglect to carefully study each house before going ahead with the work. The building should be examined and its environment looked into with reference to exposure, etc. Attention should be given to the basement, or cellar, where the furnace is to be placed, the flue to which it must be attached, the necessary size of pipes and the elevation of the same. By considering all details, the dealer will make sure that, when installed, the plant will do the work for which it was designed, if managed properly.

Silverware as a Seller

Three Distinct Selling Seasons—More or Less Movement the Year Round—Adds to Dealer's Reputation for Quality.

The retail hardware man carries few lines that make leading sellers at Christmas time and also enjoy another season in June. Snow shovels, for instance, do not, neither do lawn mowers, but the hardware man who carries silverware and cutlery knows that this line receives special attention during the periods referred to, has a fair trade throughout the whole year, and also may be brought forward for the nuptials that occur during September.

During the recent convention at Peterboro, the writer learned that several of the prominent hardware houses in that city, one in particular, does a big business in plated hollow ware and general lines of cutlery. In fact their display of silverware at Christmas can scarcely be duplicated by the leading jewelers, and as a general rule, it is the latter dealers who are supposed to receive the lion's share of this trade.

And in other cities and towns throughout the country there are hardware retailers who have not overlooked the possibilities of the silverware trade. The appropriateness of these articles either as Christmas tokens, wedding or birthday presents is too well recognized to require reference. The fact worthy of note is that they are possibilities to the hardware dealer, and that they are more than that, they are money makers. That they have been handled by other dealers and have proved successful is sufficient reason to demand the attention of other members of the trade, especially those who are on the watch for new opportunities.

Stock Moves Throughout the Year.

The heavy trade at Christmas time is in itself good reason for carrying these lines, but when the retailer is assured of other seasons when the demand will be particularly good, he is that much more reassured that his stock will be kept moving more or less throughout the year. The Peterboro Hardware Co. devote one of their windows to the display of the rich silver plate and gold plate articles that they carry during the seasons when they receive special attention, and in addition they have several large show cases with this same class of goods practically always on display in a prominent place in their store.

Their efforts in this direction have won the reputation of carrying a high class stock, and that asset becomes of more importance with each year, as the number of their customers who have learned the character of their goods increases.

Just now the number of marriages is unusually large, and the hardware dealer gets a large share of trade in the line of household utensils, stoves, etc., and in the same manner there is awaiting for him a good business in wedding presents outside the lines of cutlery, which is practically regarded as a hardware staple now. This line of more expensive goods demands careful attention, and as it has proved a success to many of the trade, it should prove equally successful to those who have not ventured far into this department.

DATES OF LOCAL HOLIDAYS.

Further information having been secured from our readers, we are now able to give the following list of local holidays in some of the principal towns and cities of Ontario:

Ailsa Craig.—Half holidays Thursday afternoons from June 15th to September 14th inclusive. Date of Civic Holiday not yet decided. Fall fair Sept. 21st and 22nd.

Almonte.—Fall fair, Sept. 5, 6 and 7.

Barrie.—Civic Holiday, Aug. 14. Fall Fair, Sept. 25-27. Half holidays not yet arranged.

Belleville—Civic Holiday, July 31st; Belleville Fair, September 13-14.

Bowmanville.—Half holidays, Wednesday afternoon, July and August.

Brantford—Civic Holiday Aug. 6th. South Brant Fair October 4th and 5th. Half holidays not yet arranged.

Carleton Place.—No regular half-holiday. Date for Civic Holiday not yet named. No fall fair, district covered by Almonte Fair.

Cobourg.—No half-holidays in hardware and plumbing trades. Dates for Civic Holiday and fall fair not yet named. Civic Holiday is usually during week of Horse Show, Aug. 15 to 18th, which is a bad week for travelers in Cobourg.

Guelph.—Civic Holiday, Aug. 7. Half holidays, Thursday afternoons during July and August. Fall Fair probably week following London Fair.

Lanark.—Fall fair, Sept. 8th.

Lindsay.—Civic Holiday, Aug. 14th; fall fair, Sept. 21-23. No general half-holiday, but dry goods stores close at 5 p.m., except Saturdays, during summer months.

Orillia.—Civic Holiday, first week in August; date not definitely chosen. Fall Fair dates not yet named. No half holidays this summer.

Oshawa.—Half holidays, Thursday, during June, July and August.

Owen Sound—No half-holidays. Civic Holiday Aug. 7th. Fall Fair, Sept. 12 to 14.

Perth.—Civic Holiday and fall fair dates not yet announced. No half-holidays. Close three nights in week at 6 o'clock, and farmers come in to do business other three nights. For two months in winter, close every night at 6 o'clock.

Peterboro'.—Civic Holiday, Aug. 14.

Picton.—Weekly half-holidays Thursday afternoons during July and August. Civic Holiday probably August 10th, but not yet named. Fall fair, Sept. 26th and 27th.

Port Hope—Civic Holiday, Aug. 7. Half holidays, Wednesdays, during July and August.

Prescott. — No half-holidays. Civic holiday, Aug. 7th. Grenville fair, Sept. 26th to 28th.

Simcoe.—Half holidays, Thursday, during July and August. Fall Fair, Oct. 17, 18, 19.

Tillsonburg—Stores close every Wednesday afternoon during July and August. Civic Holiday Aug. 3rd. Fall Fair Sept. 13-15.

St. Catharines—Stores close 1 p.m. Wednesdays during June, July and August. Civic holiday, Aug. 7th.

Whitby.—Half holidays, Thursday, during July and August.

POPULARITY OF JOINT WELL CASINGS IN WEST.

A new line in which considerable interest is being taken in practically all districts of the west, is the inserted joint well casing, which is gradually replasing the old iron pipes in wells. As the water supply is a very important proposition in the farming propaganda of the west, farmers think nothing of drilling to great depths to secure a good supply, which, when found, is considered a decided boon. Heretofore, the joints on the old iron pipes, where one length joined another, caused considerable trouble in driving down into the drilled well. With the introduction, however, into this country of the inserted joint pipe, where one length screws into the other, thus leaving the flush joint outside, this objection is eliminated, and has come as a boon to the well diggers.

PRICE INCORRECTLY QUOTED.

In Spear & Jackson's advertisement of tool sets in our June 3 issue, the price of No. 2 was given at $1.50, whereas it should have been $1.25.

Also the price of No. 3 should have been given as $1.50, instead of $1.95.

These figures were given correctly in the copy sent us and the error was due to oversight on the part of our proof reader.

VACUUM CLEANERS AS SUMMER GOODS.

There are a good many lines handled in the hardware store which may truly be designated as seasonable goods, because their sale is confined to some one particular season. Refrigerators belong to that class, as it would be practically impossible to sell them except in the spring months. Skates and snow shovels are inseparably connected with winter trade, and, although two or three hardware clerks were reported to have sold screen doors during zero weather, it must be admitted that these, too, belong to the peculiarly summer goods.

So far, the trade have apparently been content to consider vacuum cleaners among the seasonable class, also. Strong efforts have been made to push their sale during the early spring months, when housecleaning is in full swing, but, once the annual ordeal is over, business has been allowed to lapse until the next recurrence of the spring housecleaning habit.

Such a policy is not doing justice to the vacuum cleaner, and the trade should not permit this most useful article to fall into the class of seasonable goods. The vacuum cleaner opposes itself stubbornly to the drudgery of an annual housecleaning. If there is one thing more than another, that this wonderful invention stands for, it is the regular and systematic cleaning of the home, in place of the old-fashioned general upheaval in the spring.

The mission of the vacuum cleaner is not only to make clean, but to keep clean, the home in which it is employed. It is for daily use throughout the year, and its value as an agent of sanitation would be vastly impaired if its use were confined to one big housecleaning campaign a year.

As a matter of fact, there is no other part of the year when a vacuum cleaner is so necessary in the home as during these summer months, when the windows and doors are kept open and the dust blows throughout the house, leaving its traces on rugs, furniture and hangings. The only practicable way of combating the nuisance is with a vacuum cleaner, which, with the minimum of time and labor, will extract the dust from its lodging place, no matter where, and keep the home in a clean and sanitary condition.

The trade will, therefore, find it to their advantage to push the sale of vacuum cleaners throughout the summer. Take advantage of the mid-summer lull, to do some personal work, concentrating first on those who were almost persuaded to invest in a machine at spring housecleaning time. Show them how they can escape the ravages of summer's dust, by frequent use of the vacuum cleaner, and some, at least, of them should succumb. Advertise vacuum cleaners in the local newspaper, and talk them up with the people who come into your store. The time is opportune for an energetic campaign for selling vacuum cleaners.

TWENTY YEARS AGO.

The changes which have taken place in the Canadian hardware trade during the past twenty years—some gradual and others sudden—would be most forcibly brought home to the readers of Hardware and Metal who were to peruse the weekly issues of Hardware and Metal during 1891. The growth of the hardware business in that space of time has been nothing short of marvellous, from the standpoint not only of the retailer, but also of the jobber and manufacturer. Firms which were small and inconspicuous, twenty years ago, are occupying commanding places in the trade to-day, and others who were not even in existence in 1891 are now playing an important part in the activities of the trade.

Realizing the interest which readers would feel in the trade happenings of twenty years ago, Hardware and Metal is this week inaugurating a new department, in which extracts from the issues of 1891 will be reproduced. Hardwaremen of the present day, and especially those whose business career dates back to 1891 and beyond, will follow this department with a great deal of pleasure.

Besides the items which are this week reproduced in the "Twenty Years Ago" column, many other interesting features presented themselves in running through Hardware and Metal of June 20th, 1891. A cut-rate war in glass was reported from Montreal, the result of a broken agreement. While the agreed price was $1.50 to $1.60, some jobbers were discovered to have quoted 20 cents below these prices, and a highly unsatisfactory condition was created. The moral adduced—that agreements should have something more binding than a mere promise to fall back upon—would scandalize present-day legislators who are endeavoring to prevent "restraint of trade."

Another interesting feature was the advertisement of Walter H. Cottingham & Co., who, as is well known to our readers, became the Canadian division of the Sherwin-Williams Co., and only a week ago developed into the Sherwin-Williams Co. of Canada, Limited, of which Mr. Cottingham is president.

It is something for the Canadian hardware trade to feel proud of that their leading trade paper, and the only weekly now in the field, has been published continuously as a weekly for twenty-three years, and has maintained a steady improvement in service to both readers and advertisers during all that time. In line with the past policy of Hardware and Metal, no effort will be spared to maintain its pre-eminent position among trade papers.

INTERESTED IN HARDWARE MERGER.

The hardware trade are manifesting increased interest in the proposed merger of Montreal wholesale hardware houses, and much speculation is being indulged in, as to whether it will go through, and what form it will take.

As stated in Hardware and Metal some few weeks ago the financial aspect of the case is what is holding up negotiations. Efforts to negotiate the big undertaking have, so far, not been successful in this country, and it is generally supposed in the trade that Frank Newman, who is in England along with J. B. Learmont, may be endeavoring to finance the proposition across the ocean.

James Hardy was in New York this week, and returned with E. W. McCarty, who is associated with Mr. Hardy in promoting the merger. This fact may also have

some significance, as it has been reported that attempts were being made to interest Toronto capitalists in the undertaking.

The options on the various properties involved, will expire July 15th, and, as that date approaches, interest in the transaction increases, in the trade. Manufacturers who have been supplying the different wholesalers are beginning to feel somewhat uneasy and a great deal of conjecture is going on regarding the purchasing policy which is likely to be adopted by the merged firms. A much discussed question is whether factory or private brands will be handled.

THE SITUATION IN METALS.

Domestic pig iron producers are facing a very difficult situation, just now. The price cutting which was started by the Republic Iron and Steel Co. when they reduced the price of steel bars, has spread to nearly all the iron and steel manufacturers across the border, and, to almost every line they make. The American furnaces have been carrying heavy stocks of pig iron for some time, and, being unable to reduce them in their own market even at reduced figures, they have turned their attention to the Canadian trade. The result has been that thousands of tons of iron have been sold at ridiculously low prices, to Canadian foundries, the Lackawanna furnaces at Buffalo taking the bulk of the business. No. 2 foundry iron is the grade which has been chiefly sold.

Under the circumstances, the Canadian furnaces, being unwilling to sell their product at a loss, are simply waiting until conditions return to normal. Just when this will be no one can predict. It is a question of when U. S. trade will right itself, and he would be rash who would attempt to make any definite prophesy on this subject.

Although this situation is having some effect upon other branches of the iron and steel industry, business in sheets has recently been very good. Some large contracts are being booked for the last half of the year.

Copper is developing considerable strength, owing to a great increase in the consumption of brass, in Europe. An interesting and significant feature of the situation is the fact that a "contango" has been developed. This, in market parlance, means that the price for future delivery is higher than spot.

Tin went up during the week, to the highest price in the history of the market, London quotations reaching £233. A sharp decline on Thursday, brought it back almost to the same price as last week. At the same time, futures advanced £2 5s., so that there is no danger of the bottom falling out of the market.

HYDRO-ELECTRIC BENEFITS HARDWAREMEN.

Hardware merchants in Western Ontario towns where Hydro-Electric power is now being supplied, have presented to them some splendid opportunities of opening up new avenues of trade.

In many towns, hardware dealers have, for years past, conducted successful departments for selling electric lighting fixtures and taking contracts for wiring buildings and installing fixtures. These departments will receive a great impetus now if energetically pushed, for there are scores of householders who have been using gas or the time-honored kerosene to light their residences, who will readily respond to the lure of electricity, now that cheap and dependable power is available. A little personal work on the part of the hardwareman or his chief clerk, would result in many profitable orders being taken in this line.

Once the house is wired, and electric current is being used for lighting purposes, there will be possibilities for developing business in the host of electrical utensils which are now of such convenience in the household. In the majority of towns, hydro-electric power will be turned on throughout the day, and the housewife will thus be encouraged to use electric irons, electric toasters, chafing dishes, water heaters and other conveniences which are operated by electric current.

The hot days of summer afford the most opportune season for introducing these electrical specialties. Doing the ironing without heating the room means a great boon in the household, and the fact that the expense of operation is even less than that of burning coal or wood to heat the irons, supplies the necessary argument for any good salesman to work upon.

Making toast at the breakfast table while you wait, is not only an appealing novelty, but, when performed by the modern electric toaster, it furnishes a variety of toast to suit the epicure, at a paltry expense for fuel, and with no waste of time. The badly ventilated room is made habitable by means of an electric fan and there are many other comparatively inexpensive electrical novelties which will find a ready sale in localities where there is a twenty-four hour electric service.

These goods will, of course, require some special effort to introduce them, but they give ample scope for the exercise of the dealer's ingenuity in planning a selling campaign. A good, profitable trade awaits the dealers who establish themselves in their localities as the electrical goods specialists.

POINTED EDITORIALS.

Avoid disputes with customers. They cost you money.

Tin has almost reached the dignity of a precious metal.

Success depends more on the way business is handled than on the volume.

Concentration on things worth while is what makes a good business man.

Don't forget that the usual summer dust nuisance is creating prospects for vacuum cleaner sales.

The spread of mergeritis has not yet been fully checked.

If the wet weather continues, hardwaremen may feel constrained to put in a side-line of umbrellas and raincoats.

Spring scales are particularly valuable in the home during the preserving season and are worthy of consideration.

With dust flying these days, it is sure to get on the windows and show cases if the staff is careless. This should be somebody's duty. Dust is no asset.

That hardware dealer who can secure a shipment of low-priced refrigerators just now, will be considered lucky. The market is practically bare of these goods.

"It's an all wind that blows nobody good," say the jobbers who have been shipping glass and putty into Owen Sound to repair the wreckage of the tornado.

STEEL GOODS RACK.

Hardwaremen are always interested in new methods of storing goods, as the display problem is one of the most vital that the dealer in hardware faces. Two views from the Hardware Dealers' Magazine are given of a steel goods rack, which is 14 ft. in length and is so arranged that it will accommodate a large number of steel goods in a manner insuring a good display and rendering the stock easily obtainable. Fig. 1 shows the front and top of the rack; Fig. 2, the end view, showing the height over all and the distances from the floor to the top of the base and between the rackets.

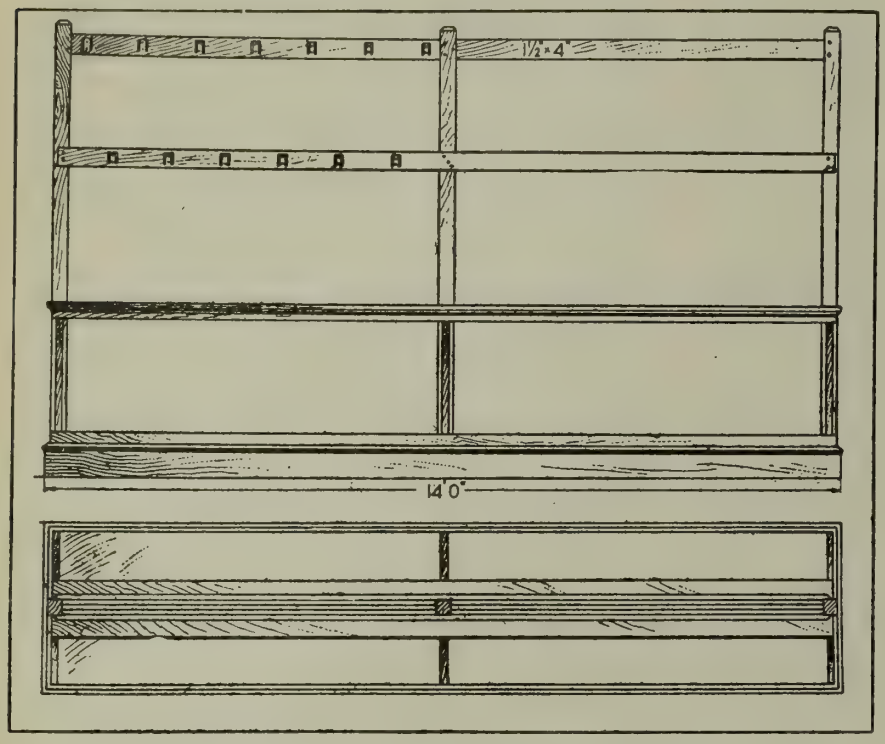

Fig. 1—Showing Front and Top of Steel Goods Rack.

FINE NEW STORE AT COCHRANE.

Frank A. Child, the hardware and iron merchant of Cochrane, Ont., who also conducts branch stores at Matheson and Kelso Mines, was the purchaser in a deal this week which is said to be the largest real estate transaction yet recorded at Cochrane.

To accommodate his growing business he has bought the large cement building on Sixth Ave., owned by B. Rothchilds, and occupied at the present time as post office and general store.

The building is 38 x 70 feet in size, is two storeys high with basement the full size of the building. There are hardwood floors throughout, and the building is equipped with hot water heating, electric lights, cash carrier system and other improvements.

Mr. Child intends moving into his new store about the first of September. He will then branch out, and carry a full line of fine furniture and housefurnishings on the top floor of the new building. Part of his basement will be used for a plumbing and tinshop.

We understand that the amount of money involved in the purchase of this building, is about $15,000.

U. S. MARKET SHOWS MORE CHEERFUL TONE.

Cleveland, O., June 15. — The Iron Trade Review to-day says:—

A more cheerful tone is noted in the iron and steel trade in the central West, and in some branches, including steel bars and sheets, actual bookings show an increase over the corresponding period of last month. Specifications against contracts for billets, sheet bars, rail and tin plate are heavier than in May. Late developments indicate that manufacturers can expect heavier buying on the part of the railroads and implement manufacturers within the next few weeks, and a gradual improvement in general market conditions would not be unexpected. Several contracts for billets and sheet bars, which will expire June 30, have been extended to cover the third quarter, and the tonnage involved is heavier than specified during the current quarter. The Carnegie Steel Co. has received a contract for 5,500 tons of plates and other material for the United States collier Jupiter. The Treadwell Construction Co., Midland, Pa., is the low bidder on the Los Angeles, Cal., aqueduct, and the 4,500 tons of plates will be rolled by a local mill. The Baltimore & Ohio and the Louisville and Nashville railroads are taking bids on 1,000 steel underframes each, involving about 10,000 tons of plates and other material. Other railroads are in the market for bridge material.

NEW HARDWARE FACTORY.

Hesch Bros., Warren, Pa., who compose the Imperial Mfg. Co., are erecting a factory at Welland, Ont., where they will make a variety of hardware specialties. The plant will be ready for occupancy shortly. The machine shop and assembling room will be 30 by 40 feet, one-storey. The nickel-plating room will be 18 by 18 feet.

MOTOR TRUCK TO DELIVER METALS.

Since taking possession of their new plant on Fraser Ave., Toronto, the Canada Metal Co. have inaugurated a motor delivery service for their city trade. A fine new motor truck has been purchased, which affords a rapid means of transporting the heavy products turned out by this firm.

Some Phases of Retail Salesmanship

Appearance and Confidence are Important Factors—Public Like to Deal with Successful Merchant — Avoid Decrying Hard Times—Take Genuine Interest in Customers.

Salesmanship is personal influence, plus a proposition of some merit. Appearance, tone, manner, these are a few of the things that go to comprise the successful retail salesman.

Your own personal appearance is a mighty important element. If you should receive a letter from a fellow applying to you for a job, and that letter was written on an old soiled up piece of paper, that fellow would not have much chance of selling his brains to you, would he? Well that's practically what a letter of application seeks to accomplish, but in this case the appearance would "down" the writer. Now that illustrates the principle, and it is just as important that your appearance be neat, clean and attractive as it was for that letter to be neat and clean, if it would make a favorable impression on you.

Value of Self-Confidence.

Supposing in that letter the young man in particular would say: "I think that I might be able to hold the position," would he have any chance of selling you—would not his hesitancy and lack of confidence impress you most unfavorably? So it is with you right in your own store. You must not hesitate but have absolute confidence in the line you carry, for it is only by having confidence that you can breed confidence in others.

Now, we come to the third proposition, supposing that letter should have an "in the rut," unprogressive tone, would it be able to "sell you?" Most emphatically, no. Just so with you You must be cheery and progressive acting in your manner and talk.

Salesmanship.

To illustrate that, it might be well to illustrate by a little incident related by a grocery dealer. It was in the hard times of '93. Business was at a standstill, but the grocery dealer wasn't going to let that bother him, so when people came in and asked how business was, he replied "fine, never was better." The result was that the report spread that he was doing a big business, despite the hard times, and pretty soon many new customers were coming to the store. When asking one of the new customers why she had changed, she replied: "Why my dealer was kicking 'hard times' all the time and I came to the conclusion that his stock couldn't be fresh if he wasn't doing any business. My neighbor told me that you were doing a big business, despite the hard times, so I decided I'd trade with you." That was probably the reason for all the new business, and while the dealer wasn't doing a big business at the start, and was actually suffering from the financial depression, he finally by his "good times" talk got the trade around to him, and did a bigger business than he ever did before, and as a result his competitors suffered. That simply illustrates the point that a dealer has got to inspire confidence in his trade, and, indeed, it is an axiom that the Canadian people like to deal with a successful dealer.

Attractive Fixtures Help to Sell.

It is vitally necessary that you make a show both in dress and in having an attractive store. Suppose two dealers started alongside of each other in the same line of business. One dealer has cheap, shoddy, second-hand fixtures and the other dealer has new attractive fixtures. After a year trying to do business in his unattractive store, the dealer who tries to produce with old stuff goes bankrupt, and the dealer with the new attractive fixtures makes money and does real business. Now, who paid for the fixtures in the successful dealer's store? Do you know? Why the unsuccessful dealer, of course, thus making a show pay for itself.

In selling goods, you've got to take a real personal interest in the people you sell to—not an affected inferior kind, but a genuine interest. That does not mean over-familiarity, but it's a state of mind which the real live dealer gets, because he's got the right line and he's doing his customers a favor by selling them the goods. The fellow who does not think that people are doing him a favor by buying from him, but that he is doing them a favor by selling them, is the man who makes the biggest success.

Know Your Goods.

It's necessary for the merchant to know his goods, for as it has been said before, you must inspire confidence, and you can't inspire confidence unless you have confidence, and you can't have confidence if you don't know your goods. In selling goods you have got to use suggestion, so to speak, in drawing the people out. Then you have to lead up to the point where a sale should be closed. It's just as necessary that you know when to stop as what to say. Many sales have been lost by saying too much. But when does the stop part come, you may ask. There can, of course be no fixed rule for this. Test your customer a bit—read his features, when you've finally got him to that state of mind where he sort of hesitates, you've just about said enough, and it's here that you should get in your best work, by putting in two or three short, pert, convincing arguments, and hit the bull's eye.

Advertising Can Gain Trade.

As has been said before, the appearance of the store has considerable to do with the influencing of trade, not only this, but the advertising can gain and repel trade for you, for your advertising gives a mental picture of your institution and methods. Special methods, openings, and special "window trims," if rightly handled in an energetic, "confidence breeding" way are sure to pull results.

Credit may have considerably to do with the influence of your business, and much business may be driven away by a niggardly policy in this respect.

Methods of delivery may also drive away many customers after you have secured them, and is one of the little things it pays to develop, if you would build up the most successful kind of a business.

Personality is a mighty big force in selling goods—that personality may be big, generous, noble, or it may be little, grasping and repellant. Personality is one of the biggest things in salesmanship, and every successful merchant will endeavor to build up a personality of his own, not only in his store but in his entire establishment.

Taking it all in all, good or bad salesmanship is the difference between the man who knows and the man who doesn't know—not only one thing, but all things which pertain to his business. This combined with tact and persistence, will make the merchant salesmen who never kicks because his cash register is not earning its salary, for he makes it his business that his cash register will earn its salary.

A BUSINESS MEN'S COURT.

An arbitration court for business men is proposed by the Chamber of Commerce of New York.

The feature of the plan is the establishment of a tribunal where business men who desire to be honest and who desire a fair arbitration of their differences can secure a prompt decision at a minimum expense. It is recognized that such a tribunal will not be available when either side is not desirous of being entirely fair and honest.

It was advanced at the January meeting of the Chamber and it is likely that it will be completed next month.

Twenty Years Ago
In the Canadian Hardware Trade

The following items from Hardware and Metal, issue of June 20th, 1891, will prove of interest to hardwaremen of the present day.

The clerks of the various business places in Port Hope are making an effort to secure a half-holiday every Wednesday afternoon during July and August.

* * *

J. G. Edwards, hardware merchant, Lindsay, Ont., was married on the 3rd inst., to Miss Winnifred Dunsford, daughter of the late James Dunsford, ex-M.P.

* * *

The tender of E. W. Chard was accepted by the Public School Board, of Toronto, for tinsmith's work in the Givens St. School, which is to be enlarged.

* * *

"The Toronto Hardware and Metal announces that it has established a permanent office in New York City, under the management of Roy V. Somerville, late president of the Canadian Press Association. We are pleased to see that the American business of our namesake has grown to be important enough to justify such a step."—N.Y. Hardware.

* * *

Bonnett & Bowyer (later Adolph & Bonnett, and now S. L. Adolph) stoves and tinware merchants, Listowel, Ont., write, June 10th: "We have, this day, paid our renewal subscription of $2 for Hardware and Metal for another year, and must say that we like the paper very much. We would not be without it. Every tinsmith and and stove dealer should read it."

* * *

The miserable wretch who damaged the plate glass fronts of stores in St. Catharines, Ont., a year ago, appears to be at work again. The merchants have made up $300 which will be the reward of anyone giving information that will lead to the conviction of the scoundrel. Several dealers had their windows scored by the diamond.

ALOXITE CLOTH.

Aloxite is a new abrasive material recently developed by The Carborundum Company. It is an aluminous abrasive, the product of the electric furnace and differs materially from other grinding materials in several of its characteristics, the principal one of which is its temper. It is this temper combined with its hardness, sharpness and toughness that gives to Aloxite just the proper qualities to make it an ideal material for steel grinding and metal finishing.

In its crude form, Aloxite is taken from the furnaces in immense compact pigs. These pigs are crushed by special, powerful machinery and the grains, after being carefully cleansed are coated on cloth of the best possible quality with the purest of glues, to make Aloxite cloth. This product, for general use in the machine shop, is said to be superior to emery in its fast, clean-cutting qualities and because of its ability to hold its cutting surface longer. It can be used with good results, for every purpose for which emery cloth is used. Aloxite cloth is uniformly coated, durable and absolutely clean and has already had a wonderful success among mechanics of all kinds.

The new product is offered to the hardware trade, cut in sheets, 9x11 inches, being packed six sheets in an envelope and six envelopes are put up in a neat, attractive display carton. It is also furnished in quire packages and ream bundles.

The Carborundum Company, Niagara Falls, N.Y., are issuing samples of Aloxite cloth, and are quoting prices and discounts to the trade.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

MOTOR SUPPLIES.

A very complete catalogue of automobile and motor boat supplies has been issued by John Millen & Son, Limited, Montreal. To those carrying these supplies this catalogue will be of special interest, as it practically includes every idea used in autos and motor boats.

ELECTROPLATING.

One of the latest of Popular Mechanics' 25-cent series of industrial handbooks, is on the above subject. It gives brief and practical directions calculated to be of benefit to those already engaged, as well as to those about to engage, in the electroplating business, with no more technical detail than is necessary for practical work, and yet with such explicit directions concerning the actual operations as an old hand at at the business thinks may be useful to the beginner. The book may be secured through the Technical Book Department of the MacLean Publishing Co., Toronto, Montreal and Winnipeg.

Hardware Letter Box

Stove Patterns.

J. B. Crawford, Dutton, Ont.—"Can you let us know who bought the patterns of J. M. Williams & Co., stoves, Hamilton ?"

This firm went out of business thirty years ago. Some of their patterns were purchased by James Smart Mfg. Co., Brockville, and their range was bought by Clendenning & Son, Montreal. It is doubtful, however, if they have been preserved to this late date.—Editor.

Lever Punch.

Tedford Bros., Alvinston Ont. — "Could you give us the address of any firm that makes a lever punch that will cut a hole about the size of a 5 cent piece, or about the same size V-shaped?"

Brown-Boggs Co., Hamilton, Ont.—Editor.

CHANGE IN STREET NUMBER.

Many visitors to Toronto intending to call upon Hardware and Metal, take the most convenient method of getting our exact address, the Telephone Directory. Through an oversight on the part of the Telephone Company, the latest directory gives the wrong number—111 University Street. The street was recently renumbered, and the entrance to our office is now 143 University Avenue, just the centre of the next block north of the number given in the Telephone Directory.

EARLY CLOSING IN BARBADOS.

The retail merchants of Bridgetown, B.W.I., have decided in favor of the early closing movement, and have made an arrangement which will come into force July 1st.

A meeting of the joint committee of merchants and clerks, appointed to consider the opening and closing hours of business places in Bridgetown, and weekly half-holiday for clerks, met recently at the Y.M.C.A. Hall. It was unanimously decided to open the stores and offices at 7.30 a.m., and close at 4.30 p. m. daily, and that Saturday be the day for the half-holiday, the hour of closing being 2 p.m.

The Peninsular Tool & Specialty Co., manufacturers of molders' tools, have sold their business to the Detroit Saw and Tool Works. This firm will continue the Canadian trade, but will carry it on from Detroit.

The contract for supplying iron pipe for the Fredericton, N.B., city sewerage connections this year has been awarded to D. J. Shea.

Our Page for Hardware Clerks

UNUSUAL IDEA IN A WINDOW.

Gravenhurst, Ont. — A decidedly unique window display was made recently by the Gravenhurst Hardware Co., here, to advertise a line of electric washing machines which they handle. The firm thought to emphasize the advantages of the electric washer by contrasting this new way of washing with the time-honored but back breaking tub and washboard.

The accompanying illustration does not show the details of the display, but gives an impression of the general idea.

The figures shown, were a couple of the clerks, whose facial contortions were most amusing. On one side of the window, an old fashioned tub is being used, and it will be noticed that the operator is not taking much pleasure out of life —judging, at least, from the expression of her (or his) face. On the other hand, the owner of the Electric washer looks supremely happy. All she (or he) has to do, is to watch the machine in operation.

The manager of the Gravenhurst Hardware Co., informs Hardware and Metal that this demonstration attracted a great deal of attention in the town, and was the means of selling several machines.

THE DEPARTMENTIZED STORE QUESTION.

Considerable interest has been aroused, among hardware clerks, by the article which appeared on the Clerks' Page last week, entitled: "Do Clerks Prefer Departmentized Store?" It is evident that there are some diverse opinions on this subject, and much is to be said both for and against the idea.

The negative side of the question is strongly espoused in a letter from Lisle E. Mills, with Morton & Owen, Campbellford, Ont., which is here reproduced.

Campbellford, Ont., June 12, 1911.
Editor Hardware and Metal,
Toronto, Ont.

Dear Sir,—Have just read, "Do Clerks Prefer Departmentized Store?" and note you ask for the opinions of clerks.

I, for one, am strongly opposed to the idea.

In many large stores it is absolutely impossible to have a store otherwise than departmentized, but by all means give a clerk all the chance possible.

Some of the present clerks must fill the vacancies of present managers later on. How do we expect they are to be efficient if their knowledge of hardware is limited to two or three departments? They, truly enough, may become specialists in their lines, but will this give them sufficient knowledge to start a store of their own where a general stock must be carried?

By all means no; they shall always have to be undermen, though they may have the ability to make good were they but to have a chance.

My idea has always been to work for other than departmentized stores till I think I have gained an inkling to a fair knowledge of general hardware, and then by study to fit myself for the position we all covet.

I should like to know how many managers and proprietors of to-day have gained their knowledge of hardware by working in departmentized stores only.

Much time, too, is lost in running from one counter to another and waiting till each has wrapped your parcel and made your change, besides the discomfort it often causes by being told, perhaps after waiting three or four minutes that "You will obtain the articles desired over at that other counter, please."

Let all the clerks join hands in trying to obtain as wide a knowledge of hardware as possible.

Sincerely yours,
Lisle E. Mills.

A Window Showing How to be Happy on Wash Day—and How Not to be.

WHAT HARDWARE CLERKS ARE DOING.

G. W. Smith has left the Hanbury Hardware Co., Brandon, Man., and is back at home with his father, at Kenton.

Fred Boden, who has been in the employ of Mr. T. J. Campbell, Midland, for the past five years, has secured a position with the Dominion Stove Foundry Co., of Penetanguishene, and left on Tuesday to commence his duties.

Mr. Grant, who has been with Geo. Taylor Hardware Co., New Liskeard, for a short time, has resigned, and his place is being taken by R. Grills, who has been in the office.

The hardware clerks of Kamloops, B. C., bit the dust of defeat in a game of baseball played against the grocery clerks of the same town. The score was 21 to 9.

Will Johnston, of Millbrook, who has been in A. W. Holiday's hardware store for a couple of years, has taken a position with the Kingan Hardware Co., Peterboro.

A. E. Stephens, with the Ross Hardware Co., Oshawa, Ont., leaves, shortly, for a trip to the Old Land. On his return, he intends to settle in Calgary, Alta.

News and Methods of Canadian Hardwaremen

Installing Conveniences for Motorists—Hamilton Dealers Hold "Merchants' Week"—Early Closing at St. John.

ATTRACTING TRADE OF MOTORISTS.

Sutton, Ont.—W. Holborn has adopted a new feature in his hardware store here. He has installed a gasoline tank and pump for the use of automobilists. The tank is buried two feet below the ground, so that there is no danger of an explosion. The apparatus is so arranged that gasoline is procured by simply stretching a hose from the pump to the car, and working the pump, thus doing away with the necessity of carrying a can.

NEW HARDWARE WAREHOUSE.

Saskatoon, Sask.—J. H. Ashdown, of the Ashdown Hardware Co., Winnipeg, was in Saskatoon last week. He stated they would commence work very shortly on a new $100,000 warehouse in Saskatoon.

The new warehouse will be a six story building and will be of heavy mill construction. Mr. Ashdown also stated they were making a big addition to their Winnipeg warehouse on Vannatyne St. The building will be six stories and will cover an area of 80x135 feet. It will be of semi-mill construction.

ADVERTISING HAMILTON-MADE GOODS.

Hamilton.—This has been "Merchants' Week" in Hamilton, and merchants and manufacturers are co-operating in exploiting Hamilton-made goods throughout the city, and in bringing people in from the surrounding country, to see what Hamilton can produce. Excursions at single fare for the round trip were arranged on all the electric lines, and one day was set apart for each, as follows: Tuesday, Brantford; Wednesday, Dundas; Thursday, Oakville; Friday, Beamsville

During the week, many merchants gave up their windows to a display of Hamilton-made goods exclusively. The hardwaremen of the city were especially active in promoting this scheme.

NEW FIRM IN BUILDERS' HARDWARE.

A new firm, known as Freek, Clark & Co., are opening a hardware establishment at 10 Adelaide street, west, Toronto, where they will specialize in builders' hardware.

All the partners of the new firm have had many years of experience in hardware with some of the best known firms in Canada and the United States.

R. P. Freek commenced business with Joshua Henderson, Barrie, Ont., and was afterwards with H. S. Howland Sons & Co., and Vokes Hardware Co., Toronto. More recently he had charge of the builders' hardware department for Miller, Morse & Co., Winnipeg.

A. C. Clark was formerly with the Brooks Hardware Co., and is now connected with the Russell & Erwin Co., of New Britain, Conn. J. Murphy, the other partner, has for the past fifteen years been in charge of Rice Lewis & Son's builders' hardware department, Toronto.

A feature of the firm's store will be a demonstration room, where they will display their line of builders' hardware, under conditions of actual use.

WRANGLING OVER EARLY CLOSING BY-LAW.

St. John, N.B.. June 13.—About $300 was the extent of the damage caused by a fire which took place here this week in the foundry of McLean, Holt & Co., in City Road. The fire took place in the core oven, and quite a quantity of cores and patterns were destroyed. Col. J. L. McAvity, the proprietor, said that the loss was well covered by insurance.

The by-law recently enacted whereby local hardware dealers and other merchants are compelled to close their doors at 7 p.m., is causing considerable discussion, and an opposition party has been formed among some of the merchans with the object of fighting the measure in the courts, where reports of violations have already been taken. The Early Closing Association, composed of both employers and clerks, are determined that the law shall be enforced, while the opponents of the law are vigorously clamoring for its repeal. Counsel has been engaged in connection with the matter, and the outcome of the case is being awaited with interest not only by members of the hardware trade, but by the other merchants, clerks, and the general public as well.

By next week the molding shop of the New Brunswick Foundry, which was seriously damaged by fire at Fredericton some days ago will be in operation again. Plans for the rebuilding of the machine shop and main foundry have not yet been completed.

"SWATTING THE FLY."

Liskeard, Ont.—Geo. Taylor Hardware Co., of this town, have a humorous reference to the anti-fly crusade, in the latest issue of "Taylor's News." This is the way it reads :

"THE PESKY FLY."

The surest way to kill flies is to place them on a block of wood and hit each one with a hammer. This method means time, labor and slaughter.

The more economical way is to keep your house well screened. The flies that are kept outside will do little harm.

Screen wire costs at our store, 3c. per sq. ft.

Screen Doors $1.00 each to $2.25.

Screen Windows, 25c to 40c each.

HARDWAREMAN WHO SELLS COAL

Shelburne, Ont.—R. A. Jelly, of this place, has made a great success of his coal business, which he runs as an adjunct to his hardware trade. Mr. Jelly has taken pains to equip his plant so as to ensure rapid and economical handling of coal, both in unloading from the cars, and in loading into his eagons. Our illustration shows his coal storage shed, and private siding.

R. A. Jelly's Coal Shed at Shelburne, Ont.

APPRECIATES THE EDITORIALS.

"I think you are booming Hardware and Metal splendidly, and your editorials are great. They are quite instructive, and I get a lot of pointers out of the paper."

J. D. MURDOCH,
Simcoe, Ont.

HARDWARE TRADE GOSSIP

Ontario.

Roy G. Stafford, of the Stafford Hardware Co., Belleville, has purchased a new automobile.

Rogers & Nicoll, of Perth, have dissolved partnership and the business will be continued by G. W. Rogers.

The Fife Hardware Co.'s store at Fort William was entered on Wednesday of last week, and some goods stolen.

C. C. Walker, Belleville, is calling for tenders for the erection of a new residence on the corner of Bridge and Foster Avenue.

The Gobeille Pattern Co., of Niagara Falls, N.Y., have opened a branch shop at Niagara Falls, Ont., to look after their Canadian business.

S. L. Webster, representing Delta File Works, Philadelphia, was in Toronto this week calling on H. S. Howland, Sons & Co., who are their distributors in this district.

A recent storm at Fitzroy Harbor created such havoc that Robt. Templeton has a record amount of business ahead of him in his tinsmithing and plumbing departments.

F. C. Lariviere, president of Lariviere Incorporee, Montreal, was a welcome visitor in Hardware and Metal's Toronto sanctum, last Thursday. Mr. Lariviere was attending a meeting of the Central Supply Association.

W. A. A. Chown, of the W. W. Chown Co., Belleville, left on the International Limited, last Tuesday for a trip to Edmonton, where he will visit his parents. On Sunday Mr. Chown was presented with a gold headed cane by the members of the Belleville Business Men's Bible Class, in recognition of his services as organist for the past two years.

McCaque & Watson are now controlling the entire hardware business in Stayner. They have two large stores and two warehouses, all of which are well stocked with a complete line of hardware. Their stock also comprises agricultural implements and they are demonstrating the fact that the farmers will deal in their own towns, if they get the right kind of store service.

Quebec.

Rosemount Hardware Co. have opened a hardware store in Montreal.

C. J. Lane & Son have entered the hardware business at Lennoxville.

The employes of the Jas. Walker Hardware Co., Limited, Montreal, had their first Saturday half holiday on June 3rd, and will enjoy this weekly rest during the summer months.

Western Provinces.

J. A. Gasson, Carlstadt, Alta., has sold his hardware store.

McInnis Bros. have acquired the hardware business of G. N. Coyle at Acme, Alta.

Wm. Elrick, late of Glasgow, Scotland, has accepted a position as foreman of Illsey Bros.' tinshop, at Castor, Alta.

W. H. Schuchard, hardware and implement dealer at Vanscoy, Sask., has sold his implement business to G. M. McCurdy.

Ad. Schoen, who was with W. G. Scott, in Mount Forest, a number of years ago, is now traveling for a Western wholesale hardware firm.

Fred Hamilton, formerly of Hamilton & Hocking, West Fort William, is now conducting a hardware store at Graham, where he is doing an extensive trade.

Bennett Bros., Newmarket, held a varnish demonstration at their store last Saturday. Handsome souvenirs were given away to women and children.

McCallum & Co. have sold their hardware business at Cranbrook, B.C., and have removed to Vancouver, where they expect to go into the same line, at a future date.

The baseball team of Wood, Vallance & Co., Hamilton, defeated the Stobarts, last year's winners, in a mercantile league game Friday night. The score was 8 to 0.

Frank Woodman, of the Merrick Anderson traveling staff, Winnipeg, is going to Regina, and will make that city his headquarters. He has been visiting in Portage La Prairie.

Henry B. Devine, Strassburg, Sask., whose store was recently destroyed by fire, has reopened in temporary quarters, and is advertising salvage from the fire, on sale at the customer's own price.

The Day Hardware Co., successors to F. H. Tallman, Red Deer, Alta., have added a plumbing department and have placed James C. Colvin, an experienced plumber from Edinburgh, Scotland, in charge.

John Lockerbie, who owns one of Edmonton's largest hardware and plumbing establishments, is among the delegates attending the National Association of Master Plumbers' Convention, at Port Arthur, this week.

The St. John, N.B. Globe says: Medicine Hat, Alberta, papers are publishing fanciful statements of the projected removal of the Gordon Nail Works from St. John to that city. No arrangements of the kind have been made.

Roelofson Bros., of Galt, will shortly commence operations in that town as the Galt Machine Screw Co. The firm will manufacture machine, cap, set and special screws and parts for bicycles, automobiles and electrical appliances.

M. Molstad and S. Lomness are taking over the hardware business formerly owned by J. A. Kirkpatrick & Co., Bawlf, Alta. The stock will be moved into Mr. Molstad's own building which is being enlarged by two annexes.

O. H. Hellekson & Co., pioneer hardware dealers of Halbrite, Sask., are advertising their stock of lightning arrester supplies. They warn the public against "glib tongue rovers" who are selling lightning rods through that section.

E. Williams & Co., of Ganton, Man., have sold their hardware business at Stonewall, to Patterson & Vincent. At Ganton, they recently purchased the business of Frank Cockerell, and they have erected a stone building, 40x60 feet, in which they are carrying a large stock of general merchandise. Writing to Hardware and Metal, Messrs. Williams & Co. say: "We look forward to receiving Hardware and Metal, as our clerks take great interest in it."

Maritime Provinces.

The hardware houses which inaugurated the Saturday half-holiday movement in St. John, N. B., several years ago will continue the custom this year. Other large stores will follow the example.

The New Brunswick Foundry, at Fredericton, N.B., was destroyed by fire this week, and the loss is estimated at $41,000. It was owned for many years by McFarlane, Thompson & Anderson, the chief partner of which firm was Senator F. P. Thompson. Some years ago the business was taken over by Smith Bros., and they have conducted it since.

The hardware store owned and occupied by the late M. S. Sutton, Andover, N.B., has recently been purchased by J. W. Niles, of Muniac, N.B., who intends starting a hardware and crockery business at once. This store is one of the best retail hardware establishments in the province.

COULD NOT GET ALONG WITHOUT IT.

Valley River, June 9, 1911.

Hardware and Metal,
Winnipeg,

Gentlemen:—

Herewith you will find enclosed money order to the amount of two dollars ($2.00) for subscription to Hardware and Metal. I have been accustomed to looking over each copy, and find that I cannot get along without it. Every success to you.

Yours truly,
H. Stevens.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 54

MARKETS IN BRIEF.

MONTREAL.

Turpentine—Down 5 cents.
Sheet Zinc—Decline in price.

TORONTO.

Solder—Now 24c for wiping and 26½c for half-and-half.
Tin—Dropped to 48-49 cents.

MONTREAL.

Montreal, June 16th.—In the metal markets pig iron is practically, and literally for that matter, unchanged; copper shows considerable improvement, and is apparently beginning to pick up, while tin has been surpassing figures that not so long ago would have been claimed impossible, or rather, highly improbable. It touched the £231 in the English market after which it began to show manifestations of receding. The following from a recent report should be of interest even though it deals more particularly with the general American situation: "For months the American consuming trade has been unsettled, feverish and excited, to say nothing of the speculative furore here and abroad. It is asserted that the present foreign syndicate has been forced to accumulate 10,000 tons of Straits pig tin to make the present corner effective, and it is with some feeling of relief tinged with doubt that the trade recently heard from London that powerful bear interests had set June 14th as the day upon which the present corner will break. It is estimated that about $10,000,000 is involved in the present deal, the success of which is measured in trade parlance by a 'backwardation' of £26 on future position, which means that spot tin is selling in London at about 6½c a pound above the price at which later shipments are available. Although tin is sadly needed in this country, the exigencies of the situation have caused the shipment of about 600 tons of tin from New York to London within the last few weeks, and exporting tin from the United States is like carrying coals to Newcastle."

Pig Iron.—In this market there is hardly anything worth while mentioning. The situation is unchanged, and is generally dull. The Canadian trade is satisfactory enough in comparison with conditions for instance like those across the border. The English market is quiet and featureless. The market in the United Statess has gained nothing, and is weak. The general opinion is that prices would be shaded and concessions given for anything approaching a fair order. Naturally there is an effect of this condition in the Canadian operations, but otherwise conditions are satisfactory. There is a good demand and business is quite general. Prices might be more to the liking of the furnace people but this will be remedied with the recovery of the market. Prices on dock Montreal are: No. 1 Summerlee, $20; select Summerlee, $19.50; soft Summerlee, $19; No. 3 Cleveland and Clarence, $16.50 to $17.

Tin.—As might be expected, the local tin market has been very much unsettled, and prices here followed the movement on the New York market. Purchases were made only where it was necessary, and where the consumer did not have the foresight to provide for the future, which in this case was rather a stiff touch. The local price is 50 cents.

Copper. — "Copper is beginning to pick up a bit," remarked a local metal authority this week, but whether this is anything more than a flash in the pan, it is hard to tell. Opinions apparently differ, but even the appearance of an improvement is welcome, with the hope that it will be material. Copper is quoted at $13.75

Other Metals.—Lead and spelter show nothing of an unusual feature. They are steady with a fair demand.

Old Material.—There is a good demand for old materials Prices quoted locally are: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 21½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $12.50; malleable, No. 1, $9; miscellaneous steel, $5; stove plate, $12.50.

TORONTO.

Toronto, June 16.—After having reached in the early part of the week the highest price ever recorded for the metal, tin dropped suddenly to-day, the latest advices being that New York is quoting 5 cents per pound lower than yesterday. The highest price of the week was the hitherto unheard of quotation of £233 in London. This is equivalent to 51¼ cents a pound in London. for big lots. The sudden falling down has brought Toronto quotations on moderate quantities to 48 and 49 cents.

A deplorable situation, so far as Canadian producers and jobbers are concerned, exists as regards pig iron. American furnaces have cut prices with no apparent consideration for producing cost, and are said to have sold thousands of tons of foundry iron to Canadian consumers. Domestic furnaces are unwilling to compete on a losing basis, with the result that they are booking practically no orders.

Other metals remain in about the same position as at last report.

Tin.—From the highest price in history, which was reached early in the week, tin has dropped to-day, so that local jobbers who follow the market most closely are now quoting 48 to 49 cents per pound. Whether or not this drop means that the syndicate have lost control of the situation, is difficult to say, but it would appear that they have simply overreached themselves. This view of the situation is borne out by the fact that futures are exceedingly strong. In fact on the London market, futures closed to-day £2 5s over yesterday in spite of the big decline in spot tin. It is fairly safe to say that, in view of the strong position of futures, spot tin cannot develop any decided weakness, especially when stocks seem to be very light in every quarter of the globe.

Antimony.—The market is quite lifeless.

Copper.—Additional strength is shown in this market. There is a very large consumption of brass in Europe, which, together with the expectation of a copper merger, helps to maintain the firm tone of the market. Prices are unchanged.

Aluminum.—We quote 20 cents per pound. There is an active demand for this metal.

Plates and Sheets.—"We have booked more sheets to-day," said a local metal man, "than at any other time this year." U. S. conditions are still reflected on this side, but prices are unchanged.

Pig Iron.—The U. S. furnaces who are indulging in a merry price-cutting war, appear to be getting all the business in this market. Domestic prices are as low as they can possibly go and keep above the profit line, so that quotations here are still nominally as follows: Canadian Foundry No. 1, $19 and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro' No. 3; and $20.25 for Clarence No. 3; Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

Lead.—There is not much lead on the market and no trouble is experienced in selling what is available. Prices are the same as at last report.

Spelter. — Primary markets show steady advances, but prices locally, though firm, are unchanged.

Old Materials.—We are still quoting: Heavy copper and wire, 10½c to 11c; heavy red brass, 7½c; heavy lead, $2.90; light copper and bottoms, 9¾c; tea lead, $2.40; machinery cast iron, No. 1, $14; No. 1 wrought, $10; malleable No. 1, $8 to $10; miscellaneous steel, $6 to $7; stove plate, $12.50.

HARDWARE MARKETS

MONTREAL.

Montreal, June 16.—The weather man has helped to change at least slightly the character of goods in demand just now. Recent rains have called a halt to the drouth which was largely responsible for the heavy inroads on the supplies of rubber hose. But then it is expected that lawn mowers will be given an impetus.

"You cannot expect to sell hose and lawn mowers together in the manner hose has been going of late," remarked the head of a local jobbing house. Tools and implements are also expected to be helped along considerably. General business seems a little better this week. Builders' supplies and allied lines are moving steadily and there is a fair sorting demand felt.

Lawn and Garden Tools.—In spite of the fact that there has already been a very good demand in implements connected with the lawn and garden, there is still quite an enquiry and some time remains yet to expect its maintenance. Lawn mowers are good for considerable business, the season in fact having only nicely gotten under way.

Some prices quoted are: Lawn rakes, $3.75 to $5 a doz.; garden sets, 25c to $1.50 per set; border knives, $4.80 doz., net; garden trowels, 60c to $1.50 a doz.; garden shears, plain, 8-in., 55c; with notch, 8-in., 60c; long-handle border shears, $1.15 each; long-handle surface shears, $1.05 each; lawn mowers, low wheels, 7-in. diameter, 12-in. width, $2.55; 14-in., $2.65; 16-in., $2.75 each; medium wheels, 9-in. diameter, 12-in. width, $3.30; 14-in., $3.55; 16-in., $3.80 each; high wheels, 12-in. width, $4.15; 14-in., $4.40; 16-in., $4.65; 18-in., $4.90 each; lawn rollers, 20-in. diameter, from $13 to $18 each; garden wheel barrows, small, $2.55; large, $3; garden spades, $6.25 a doz. upwards.

Household Utensils.—There is a fair demand for household utensils graniteware, tinware, etc., are moving well. Just now there is a new enquiry for spring scales, and articles used in the preparation of fruits for preserving.

Seasonable Lines.—The demand for rubber hose has begun to fall off to the normal again. Refrigerators have been moving steadily the total demand having mounted to a big figure. Other lines are also interesting.

Harvest Tools.—This department is receiving a good demand for the common harvest tools, the west contributing a large share of business. Manila rope used with hay carriers is also asked for more often. Some quotations and discounts are: Hay forks, manure forks, straw forks, barley forks, spading forks, potato forks, field, garden hoes, Dutch weeding hoes, garden rakes, 50 and 5 p.c.; hay rakes, $1.15 to $2.75 a doz.; scythes, $6 to $8 a doz.; sickles, $1.85 to $2.25 a doz.; grass hooks, $1.65 to $2.10 a doz.; scythe snaths, 40 p.c. discount.

Contractors' and Builders' Supplies.—The demand for contractors' and builders' supplies is well maintained. The various activities throughout the country are showing their effect by creating a heavy demand. For the best quality of shovels and spades, the discount off is 60 and 2½ per cent.; for second quality the same discount is allowed, and for third quality the discount is 50 and 2½ per cent.; picks are quoted at from $3.85 to $5 a doz.; crowbars are listed at $3.25 a cwt.; wheelbarrows, navvy common, $21 and up; navvy full-bolted, $22.50; drag scrapers, $5.75 and upward.

Sporting Goods.—There is quite a sorting demand for sporting goods, the different lines of sport being represented. Guns and ammunition are receiving more attention.

TORONTO.

Toronto, June 17th.—The improvement in weather came in time to develop a fine volume of business in the Toronto jobbing warehouses this week. Travelers are sending in a nice lot of orders, and there is a specially heavy run of letter orders, showing that the retail trade have experienced a heavier demand than they had expected, and require to sort up.

Collections have been moderately good and, on the whole, satisfactory. One supply house stated that they had been keeping an accurate record of returned drafts, and found that the situation, in this regard showed considerable improvement over that of a year ago.

Particularly good orders have been received from Northern Ontario this week, and manufacturers and jobbers are turning their attention more closely to this field.

Heavy Hardware.—Business is normal and quite satisfactory, with no price changes to report.

Seasonable Goods. — The trade in screen doors and windows is now falling off, as is natural to expect, in the advancing season. On the other hand, the recent rains have evidently started the grass growing in good style, for lawn mower orders are very heavy. The difficulty which was reported last week in regard to refrigerators and oil stoves still continues, and in fact is accentuated. There is not a manufacturer in the country who is in shape to deliver any of the cheaper grades of refrigerators. This line has been very much oversold, and jobbers find themselves in the position of having to turn down orders in consequence. There is still a fair supply of the moderate and high priced refrigerators, and the situation may result in selling a high class article in many cases where cheaper goods would ordinarily be sold. There will be no stock of the cheaper lines available until well into July, and of course that will be too late for most dealers.

Household Goods.—The demand shows no abatement and all the lines of household goods are moving well.

Builders' Hardware.—This is another line which shows improvement under the better weather conditions. The scarcity of brick is still a disturbing feature, however, as builders' hardware is rarely ordered long in advance of actual requirements.

Stoves and Heating Goods.—Summer specialties in the heating line are selling fast. A good many retailers are holding demonstrations to show the public the economy and safety of coal oil stoves, and the result is seen in the volume of orders coming to hand.

Sporting Goods.—Jobbers report a splendid business this week, especially in target rifles and ammunition. Camp supplies are not moving particularly well, as many people who had made up their minds to go out early to their summer homes, have been discouraged by the cool wet weather early this week. An improvement will no doubt take place, however, now that the weather appears to have settled.

WOODWORKING FOR AMATEUR CRAFTSMEN.

The book on the above subject, which has just come from the presses of the Popular Mechanics' Co., is one which will prove very interesting to amateur carpenters and cabinet makers, and to all who have anything to do with woodworking tools. It is designed to cover every essential step of woodworking, the chapters dealing with making special articles, bringing out every cut, joint and process used in this important trade. The proper use and care of tools, working up of materials, etc., are treated thoroughly and plainly.

This is a valuable book for either self-instruction or use in manual training courses. It contains 128 pages 5x7 inches, with 125 illustrations. The price is 25 cents, and the book may be obtained from the Technical Book Department of the MacLean Publishing Co., Toronto, Montreal and Winnipeg.

The Western Hardware Market Situation

Fine Weather Makes Crop Prospects Excellent — Builders' Hardware in Heavy Demand—Stoves Selling Steadily — Some Price Changes Reported.

Winnipeg, June 16.—"Never has the country looked as well," is the unanimous opinion of the business men of the city who have just returned from a special trip in a private train throughout the three prairie provinces. Good weather for the growing of the crops continues to prevail, and while reports from a few localities indicate that sufficient rain has fallen to last for a month or six weeks, no real acute damage has yet been done in any place. One of the large wholesale houses stated to-day that orders for binder twine to their establishment had already increased 50 per cent. over last year.

Ingot tin has been the dark horse of the trade this week. This line has been steadily strengthening for quite a period and has now reached the highest point for years.

With the advance of the summer the rush for harvesting and threshing lines is increasing daily. The large increase this year will be noticed mostly in metal goods, as an exceptionally strong demand is prevailing.

Building material of all description is also in active call. Roofing and siding, as well as tools, are in constant demand, to keep the enormous army of workmen who are scattered all over the West busy. When houses are built, stoves have to be bought, and this line is also extremely active. Owing to the large amount of restaurants and hotels that are being opened up all over the West, the demand for heavy army ranges heads the list. Orders for such are received mostly from the newer parts of Saskatchewan.

The tone of the whole market may be said to be decidedly firm, and a few changes will be noticed in the quotations.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. nickory, $3.50; No. 1, $2.00; 2, $1.60; p.g. oak, $2.75.

Auger Bits—"Irwin" bits, 47½; other lines 75 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3; small lots, 2½; stove bolts 77½.

Bar Iron—Bar Iron, $2.50; Swedish iron, $4.75; sleight shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs. $8.50; Jessop, $15

Blocks—Steel, 45; wood 60 per cent.

Cut Nails.—$3.15 per keg base.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron.—Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24 $4; 26, $4.20; 28, $4.60; 30 gauge or 10¾ oz., $4.80; Queen's Head, 20, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Iron Pipe.—⅜ in., $3.50; ½ in., $4; ¾ in., $5.20; 1 in., $7.00; 1¼ in., $10.25; 1½ in., $12.45; 2 in., $16.25.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2, and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel, No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $2.75; 6 $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $7.75; grass, $1.70.

Iron Washers — Full box, 40 p.c.; smaller lots, 35 p.c.

Iron Pipe, Black—⅛ in., $3; ¼ in., $2.45; ⅜ in., $2.50; ½ in., $3.25; ¾ in., $4; 1 in., $5.65; 1¼ in., $7.75; 1½ in., $9.25; 2 in., $12; 2½ in., $19.60; 3 in., $25.75; 3½ in., $33.50; 4 in., $38.35; 4½ in., $44.10; 5 in., $50.40; 6 in., $65.10; 7 in., $95.50; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.75.

Poultry netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.25.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8c; pure manila, 10¾c; British manila, 8¼c; lath yarn, 9¼c.

Sheet Zinc — Casks, $8.75; broken lots, $9.50.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 65 per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate—1. C., $9.75; I. X., $11.75.

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25; ½ box, $5.50; I. X., full box, $12.25; ½ box, $6.50; I. X. X., full box, $14.25; ½ box, $7.50; 20 x 39, I. C., full box, $15.50; ½ box, $8.25; I. X., full box, $17.50; ½ box, $9.25.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 35.

Wire.—Barbed wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3; annealed wire, base, $3; oiled, 10c extra; bright iron $3.20 base; brass spring wire, base 29c; plain galvanized wire, Nos. 6, 7 and 8, $3.40; No. 9, $2.90; 10, $3.50; No. 11, $3.55; No. 12, $3.10; No. 13, $3.25; No. 14, $3.95.

Wire Nails—$2.90 Winnipeg, and $2.45 Fort William.

Wringers — Royal Canadian, $39.25; New Easy, $42.50.

Paints and Oils.

A decling market continues to prevail in turpentine, and a further drop of 5 cents per gallon has taken place this week. Wholesalers attribute this to the fact that the supply is becoming greater with the arrival of warm weather. The high point in this line was $1.40, which was reached about the first of March. With the decline in prices the volume of trade is gradually increasing, but some large houses are holding off for further declines. Linseed oil and other lines are exactly the opposite, and are holding very firm. Quotations for linseed are $1.25 for raw and $1.28 for boiled. White lead is still at $6 to $6.75, according to brand.

Paris Green.—Some apprehension is being felt regarding the stocks of this line at present in the city. Present ones are getting low, owing to the heavy demand that has recently been prevailing, and the supply available is reported to be also on the small side. It is the opinion that should a dry spell arrive for any length of time there would in all probability be a shortage. One house is already reported to be out of stocks.

Petroleum and Gasolene.—Silver Star, in bbls., per gal., 15c; Sunlight, 18c; Family Safety, 22½c.; Searchlight, 20½c; Red Rose, 23½c; Keystone Special, 18c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c.; White Rock, in bulk, 22½c; National Light, in bulk, 21c.; Engine Gasolene, 24c.; White Lily, 26c.; Royal, 24c.

Turpentine—In barrels, $1.05; small lots, $1.10.

Methods of Retailing Paints and Varnishes

FAITH IN THEIR PAINT.

Whitehood, Sask.—Lamont's hardware store here are showing great faith in the line of paint they are carrying. They are advertising a sale of paint bearing the label of a well-known manufacturer, and are quoting very low prices. Their ad. says: "Remember, if you are one of those prejudiced ones as regards to whose and which is the best, just bring us a better paint with your proof and we will furnish you sufficient paint, free of charge, to paint your building, regardless of size. Are we fair ?"

MORE FACTS ABOUT THE PAINT AMALGAMATION.

In Hardware and Metal's report of the big paint amalgamation, appearing in last week's issue, some details of the transaction were incorrectly reported, and the facts of the case, together with further particulars have since been communicated to us.

The name of the new company is The Sherwin-Williams Co., of Canada, Limited. The capitalization is $8,000,000, which will be divided into $4,000,000 7 per cent. cumulative preferred stock of which $3,000,000 is to be issued now, and $4,000,000 of common. This company owns and controls all the shares and assets of the Sherwin-Williams Co., of Canada, The Canada Paint Co., and Lewis Berger & Sons, London, Eng. The purchasing of the Canada Paint Co. was a strictly cash transaction, while the Sherwin-Williams Co. of Canada, and Lewis Berger & Sons, were purchased from the Sherwin-Williams Co. of America for part cash and part stock.

The policy governing the three companies involved in the transaction, will be decided by W. H. Cottingham as president and managing director of the president, and general manager, together with the new board of directors of the Sherwin-Williams Co., of Canada.

A mechanical error in last week's Hardware and Metal made it appear that Robt. Munro who, up to the time of this important transaction was pretident and managing director of the Canada Paint Co., has been associated with W. H. Cottingham for twenty years. This paragraph was, of course, misplaced as it referred to C. C. Ballantyne, who has been closely identified with Mr. Cottingham's activities during that time. Mr. Munro had been managing director of the Canada Paint Co. ever since its organization, and assumed the presidency in January of this year upon the retirem nt of S. F. McKinnon.

The Board of Directors of the Sherwin-Williams Co., of Canada so far decided upon are W. H. Cottingham, C. C. Ballantyne, Jas. W. Garson, managing director Lewis Berger & Sons, Wm. McMaster, J. W. McConnell, Sir Trevor Dawson, managing director, Vickers Sons & Maxim, Limited, and W. J. White, K.C.

AN ERROR CORRECTED.

In last week's Hardware and Metal appeared an article descriptive of methods adopted by Aikenhead Hardware, of Toronto, to feature specialty lines, and the name of the clerk dressing the tool windows was given to Jas. Howe This should have been James A. Howie, and we regret the error in misspelling his name. Mr. Howie is responsible for some very attractive and trade-bringing tool displays at Aikenhead's.

ESTABLISHING TORONTO BRANCH

An office has been established in Toronto during the past week by the Southern States Turpentine Co., whose head office is in Cleveland, Ohio.

In charge of the Toronto branch is J T Hamilton, formerly Toronto manager of the Carolina Pine Products Co., who is therefore already well acquainted with the paint and oil trade in the Queen City.

The firm's office is at present located at No. 101 Victoria St., and they have engaged a warehouse on the Brock Ave. G. T. R. siding. As soon as this warehouse can be put into shape, the office will also be located there.

A BOOK OF PAINT SUGGESTIONS.

There has recently been a marked tendency in the paint trade to show prospective users how certain color combinations would appear on a building before they have actually used the paint. This tendency is further exemplified in a 24-page book of paint suggestions just published by Brandram-Henderson, Montreal. The book contains a number of fine-colored prints, some of which show color schemes for exteriors, while others suggest harmonies for interior decoration.

This booklet will help dealers to advise their customers as to the colors for home decoration which harmonize most effectively.

THE DEALER'S WOES.

Any hardwareman, who handles harvesting repairs in a small town, will remember some such incident as is here recorded in verse :

The farmer gazed with heavy frown
Upon his mower broken down,
Then hastened to the nearest town
To buy repairs.
He told the dealer of his woe,
And how much grass he had to mow,
But not a number did he know,
Nor seemed to care.

"The part I want," he wisely said,
"Is hollowed out and painted red,
I had the number in my head,
But I forgot.
It holds the thing-um-bob in place,
'Steen inches from that long, iron brace
That fastens to the big main base
And keeps it set.

"You surely know just what I mean,
It broke before on this machine,
That what-you-call-ums it's between,
And just behind
That thing which moves along like that,
About as big as this old hat
Would be if you should smash it flat,
I think you'll find."

The dealer sighed and shook his head,
"I don't know what you mean," he said;
"We'll have to search the extra shed,
So come along,
If you would only tax your brain,
So that the number you'd retain,
Or bring the old part in, 'tis plain
You'd not go wrong."

From end to end he searched the bins,
Crawled over castings, bolts and pins,
And skinned his fingers and his shins ;
It made him "cuss."
But still he searched with sinking heart,
(He'd seen two customers depart)
And in the last bin found the part.
"Twas ever thus."

"That's it," the farmer cried with glee;
"I thought 'twas number thirty-three,
Now, what's the price of that to me ?
Great Jumpin' Frogs !
Not forty cents ? An awful rate
For a thing that hasn't got no weight,
Oh, well, just put it on the slate
Till I thresh my hogs."

Developments in Paint and Varnish Manufacture

Presented Before the Congress of Technology at the Fiftieth Anniversary of the Granting of the Charter of the Massachusetts Institute of Technology.

By Edward C. Holton, Chief Chemist, The Sherwin-Williams Co., Cleveland, Ohio.

Fifty years ago the paint and varnish industry of this country was in its infancy and was under no scientific control whatsoever. Even twenty-five years ago the paint and varnish manufacturers who employed technical graduates as engineers or as chemists were the exception rather than the rule.

Conditions have greatly changed, and to-day some of the larger companies have so branched out, in their attempts to provide themselves with raw materials of more uniformly good qualities, that they now have geologists, mining engineers, electrical engineers, mechanical engineers, chemical engineers, metallurgists and chemists constantly employed in looking after the various branches of their business. Even the smaller companies must make occasional use of the mechanical engineer and the electrical engineer, and since the recent activity amongst the State and Federal law makers, the chemist has become well nigh indispensable.

The mining, milling and transportation of lead and zinc ores from the mines to the smelter calls for the employment af the various engineers, but the anlytical chemist or assayer must always be at hand. At the smelter the metallurgist or chemical engineer assumes charge of operations but he depends on his chemist.

The mining and milling of iron oxides, ochres, siennas, umbers, graphites, barytes, silicates, etc., are mechanical operations and are often carried on in a very crude manner, but somewhere and at some time before the product is sold it is examined and rated by a chemist.

In the manufacture of the so-called "chemical" and "lake" pigments, chemists and chemical engineers are indispensable. Many of the older and better known pigments have been made for so many years that they could be made without the aid of trained chemists but the margin of profit is so small and the opportunities for losses and waste so great that the manufacturer cannot afford to be without a chemist. The development of organic chemistry has been marvelous, and to it the paint manufacturer is greatly indebted.

Many of the fast to light analine, toluidine, anisidine naphthylamine and other lake pigments which were unknown, or if known, were laboratory curiosities twenty-five years ago, are to-day being made in American color plants to the extent of thousands of tons per annum. The intermediate organic compounds which enter into these lake pigments are still largely imported from Germany. The mineral bases on which they are built are mostly of American manufacture, and the diazotizing and combining of the organic compounds with each other and the mineral bases are generally under the direct supervision and control of chemists and chemical engineers trained in American schools.

Although much progress has been made in the manufacture of pigments, still more remains to be done. The field is a broad and interesting one and will offer opportunities for chemists for many years to come.

If the paint manufacturer of to-day were merely a mixer and grinder purchasing from others all pigments and vehicles which he uses, even under such conditions, he would be forced to maintain a chemical laboratory at his own plant or be in close touch with a commercial laboratory. If he did not do so he would not know the composition of his own manufactured products and would be liable to fine and imprisonment for unconscious violation of State and Federal laws.

The preparation and manufacture of paint vehicles is increasing enormously in kinds and in quantities, and presents an ever broadening field for the employment of chemists and chemical engineers. The lumbering of our Southern forests with attendant decrease of supplies of gum spirits of turpentine and consequent increase in price has brought about the recovery of wood spirits of turpentine from the waste logs, stumps and sawdust. It has also brought about the use in much larger quantities of coal tar distillates and petroleum distillates as as substitutes for spirits of turpentine. Here again chemists and engineers have worked out processes of distillation which furnish products far superior to that which were on the market some years ago.

About fifteen years ago China began supplying us in a small way with Tung oil, and to-day its use is enormous and we would hardly know how to get along without it.

Two very poor flax crops have recently brought about a world shortage in linseed oil and chemists in all countries have been busy in investigating more thoroughly oils hitherto but little known, in order that they may be used as substitutes for linseed oil if of value, and on the other hand may be detected and identified when so used.

A few years ago the art of varnish making was clouded in mystery. Varnish makers taught their sons or favorite helpers all they had learned from their predecessors and by their own experience. Little by little they absorbed information given to them directly or indirectly by chemists, and profited by it, but rarely did they give anything in return. To-day the varnish maker's attitude toward the chemist is rapidly changing. He recognizes the fact, which he is not always ready to admit, that if he would progress in his craft he must seek aid from the chemist. In many plants the chemist and varnish maker are working harmoniously together with the result that rapid advance is being made.

Of late years a great deal has been written and said about the chemical engineer. This is an engineering age, and the chemical engineer is beginning to come into his own, and his future is bright.

However, it should not be overlooked that if the chemical engineer is not first and foremost a chemist, he might better avoid the use of the term "chemical." A man well trained in general chemistry with some skill as an analyst and synthesist, and with an active imagination, is fully as well equipped to advance the cause as a chemical engineer who has little knowledge of chemistry. Some chemical engineers are needed, and they are greatly needed, but there is even greater need for many well trained, thorough analytical and synthetical chemists.

PAINT ECONOMY.

A fifteen page booklet of vest-pocket size, on the above subject, is being circulated among the trade by the Martin-Senour Co., of Montreal. The object of the booklet is to post paint dealers on the importance of the protection afforded by paint, and its consequent economy in conserving expensive lumber and metal. This is an argument seldom used with the purchaser, but it should be even more effective than the usual one of beautifying property by the use of paint.

While the Martin-Senour Co. have imprinted their name on the cover, the booklet itself does not refer to any particular make of paint and is simply intended to boost the paint business in general. The company are sending it to their own agents, but will also forward a copy to any paint dealer who is interested in posting himself on the subject of "Paint Economy."

MOTHS IN BRUSHES.

Take good care of the brushes you have in stock.

This is the advice given by a traveler for a leading firm of brush manufacturers, who says that he has come across a number of instances where hardwaremen have suffered through neglecting their brush stocks.

It is a good idea, at this season of the year, to carefully go over the stock of brushes and put in some moth balls or flake camphor, to protect the brushes against the ravages of moths. If preferred, it will be equally effective to use tarred building paper, cut into small pieces.

Even if the brushes appear to be in good condition, it is well to be on the safe side and to prevent the stock from being ruined, to put some flake camphor in each box and package of brushes. This operation should be renewed during August, and a little attention, in this line, will save the brushes from becoming practically unsalable.

W. H. Thorne & Co., St. John, N.B., were awarded a special prize of $10 for a window display of Philadelphia-made hardware.

Wouldn't You Like to Know How We Help Our Dealers Sell

M (MAPLE LEAF) **L** **Pure Paints**

Two coats of M-L equal three coats of the best of other brands. Made in 47 different colors and tints for every use of paint, inside or out.

M (MAPLE LEAF) **L** **Floorglaze**

sells best of all wood-finishes because it has so many points of superiority. Best-advertised and easiest-selling brand in Canada.

M (MAPLE LEAF) **L** **Elastilite Varnish**

No varnish like it. Good for good jobs—not bad for the other kind. Flows free, brushes easily, dries well. Just what you want for people who want varnish in a hurry.

Write for Price Lists, Sample Tins, Color Cards and our Attractive Proposition to Wide-awake Dealers. Address nearest place.

You Can't Overlook Facts

Mr. Dealer:—Here are a few statements that you can't afford to overlook.

Minerva Paints and Varnishes were first manufactured in England 76 years ago—their growth was spontaneous and steadily increased until the London house was supplying *Minerva Brands* to the markets of the world. Canada was recently recognized as a market which could produce a large demand, and although the competition was strong, it was decided to build a Canadian factory and manufacture identically the same brands as were made in England. About six months ago the large Toronto factory started to fill the already waiting orders. Since the first day the success of *Minerva Paints and Varnishes* has surpassed all expectations. The demand has been such that the extreme possible output has been taxed. The success of *Minerva brands* has been assured in Canada. There are reasons for such growth.

Minerva Paints and Varnishes give honest value—they contain absolutely the very highest grade ingredients possible to procure.

The Manufacturers co-operate in every possible way with the dealer.

Extensive consumer advertising is used.

A good fair margin of profit and an attractive proposition is offered.

This is why Minerva Brands mean your reputation and profit.

Write us for information—be a part of this big selling organization and get your fair share of the waiting profits.

PAINT AND OIL MARKETS

MONTREAL.

Montreal, June 16.—The paint and oil market retains all the strength that has characterized it of late, and from present indications it would seem that it is likely to hold its firmness. The demand from the country makes it apparent that there is likely to be a great deal of paint and allied materials used during the next few months. It is also evident that there has been quite a lot of painting left untouched, possibly from an idea that prices were going to be high. During the past week linseed oil has remained steady at the figures quoted a week ago, while turpentine has been quoted down five cents.

Linseed Oil.—Linseed oil has been unchanged during the week, and it is difficult to tell what the succeeding action will be. The prices quoted are $1.04 for raw and $1.07 for boiled. The demand is improved and according to those in close touch with the market, there is more than one reason to consider it rather firm.

Turpentine.—Quite a decrease in price is noticeable this week. Last week it was quoted at 85 cents a gallon, now it is down to 80. The receipts of supplies from the south have been very liberal, and to such an extent that prices have had to shrink as the supplies increased.

Arsenate of Lead.—The demand for arsenate of lead does not let up and a good tone is still noted. Supplies here are still none too abundant. Prices are: In bbls., about 800 lbs., 9c; in half-bbls., about 400 lbs., 9½c; in 25-lb. wooden kegs, 10c; 5-lb. bottles, 12c; in 2-lb. bottles, 13c; in 1-lb. bottles, 14c.

Paris Green.—As the "bug" season approaches, those who have delayed ordering are sending in their demands. It has been stated previously that stocks of Paris green are not heavy, and naturally that state of affairs has not changed during the week, except that stocks have become lighter.

Prices are as follows: — In barrels, about 600 lbs., 17c per lb.; arsenic kegs, 250 lbs., 17¼c.; 50-lb. and 100-lb. drums, 18¼c; 25-lb. and 100-lb. drums, 18⅜c; 1-lb. packets, 100 lbs. in case, 20¼c per lb.; 1-lb. packets. 50 lbs. in case, 20¾c per lb.; ½-lb. packets, 100 lbs. in case, 22¼c per lb.; 1-lb. tins, 100 lbs. in case, 21½c per lb.

Putty.—Putty is in good demand. Enquiry is steady, but there is nothing unusual in the extent of the orders received just now.

Existing prices of putty are: Bulk, bbls., $.2.20; bulk, cwts., $2.45; bladder, bbls., $2.70; bladder, cwts., $2.80; 25's, loose, $2.25; 25's, cased, $2.70; 12½'s, cased, $2.90.

White Lead.—This article is going out steadily with every prospect of the demand being well maintained. Prices of white lead are: In bbls., 800 lbs., 9c; in half bbls., about 400 lbs., 9½c; in 25-lb. wooden kegs, 10c; 5 lb. bottles, 12c; in 2 lb. bottles, 13c; in one lb. bottles, 14c.

Prepared Paints.—Orders for prepared paints have been of the sorting up kind, and generous. Judging from the trade that should have been felt earlier in the year, and from the new work still to be done, there is the likelihood of continued business during the rest of the summer.

TORONTO.

Toronto, June 16, 1911.—This has been the busiest week in the season, so far as the paint, oil and varnish trades are concerned. The more settled weather has resulted in exterior work being vigorously resumed, and manufacturers and jobbers have consequently felt a very heavy demand for materials.

The most noticeable feature of this week's trade has been the heavy shipments made to Owen Sound, where the tornado caused a great deal of damage to buildings. This increased business was especially noticeable in glass and putty. Many of the business buildings in Owen Sound suffered severely from breakage of glass, and it has taken some heavy consignments from Toronto warehouses to repair the damage.

It really looks as if turpentine had reached rock bottom price. Quotations made here vary, depending upon the quantity purchased, but the usual price asked is the same as last week.

Linseed oil is another commodity which seems destined to maintain a steady price level for some few weeks to come. No change has been made since our last report.

Linseed Oil.—The local price is still $1.09 for raw, and $1.12 for boiled, the same as last week. It is thought that the price should remain stationary for some little time, or at least for the next thirty days. There is no chance of any new flaxseed reaching this market until some time next month, and this seed must come from India. There is none harvested at any other point, at this season of the year.

Turpentine.—As has been outlined above, local authorities are of the opinion that turpentine has reached its lowest price. The price at Savannah and Jacksonville is now much lower than had been anticipated, and it is expected that large contracts will now be made, and supplies very much reduced in the near future. If this takes place, it is likely that the market will be sustained pretty well at present rates, so that those who follow the market most closely are inclined to think that buyers would be safe in purchasing any turpentine that they require for the season.

Rosin.—There has not been the same proportionate reduction in rosin as has taken place in turpentine. The explanation, no doubt, is that rosin can be stored at such little expense, because there is no danger of leakage or waste of any kind. Speculators, therefore, are simply "standing pat" and holding up the price. Under these conditions, it is unlikely that there will be any further reduction in rosin before September.

Putty|—This week's business has been very large. Prices are unchanged, as follows:

Standard putty is quoted at: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same; bulk in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

White Lead.—A strong demand has been experienced this week, and prices are unchanged. The lower price of linseed oil and turpentine is encouraging a large consumption of lead.

Prepared Paints.—Retailers have evidently sold large quantities of prepared paints, judging from the good sized sorting and repeat orders which are coming to hand. Prospects are bright for a continuance of this demand throughout the painting season.

Varnishes and Japans.—This business is in a very healthy condition. All branches of the trade are busy, being well filled with orders.

Glass.—The feature of this week's transactions was the stream of orders from the Owen Sound district. The severe tornado which visited that locality at the beginning of the week smashed a great deal of glass, and rush orders were immediately despatched to Toronto jobbers to repair the damage.

Reports from Belgium indicate that glass is firmer in primary markets, and prices are likely to go higher before long.

Specialties.—Paint specialties are enjoying a remarkably good demand this season. Floor finishes and flat paints for interior decoration are well to the front.

A HELP IN COLOR COMBINATION.

Too often the selection of the colors for house painting is made almost at random.

THE MISSION OF THE "SUGGESTION BOOK"

is the same as that of the architect's plans. It gives the customer a complete idea of the correct combination to be used, at the same time giving the number of the

B-H "English" Paint

that will give the desired effect.

You can help your customers to secure absolute satisfaction.

Our street car advertising campaign covers the majority of street cars in Canada.

The object is to help you sell.

BOECKH'S BRUSHES and BROOMS

These cards will be supplied free to dealers upon request.

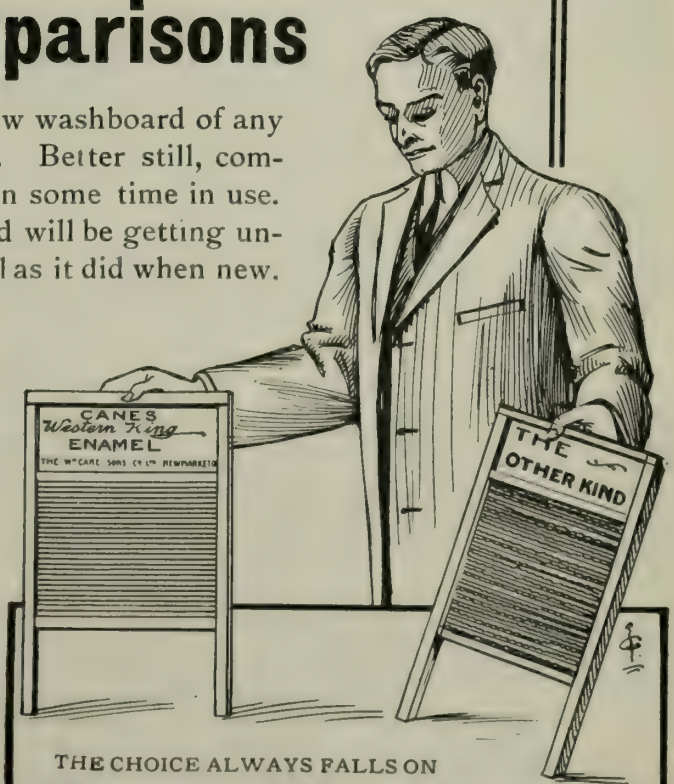
Manufactured by

The Boeckh Bros. Company, Ltd.
TORONTO, - - CANADA

They Profit By Comparisons

Compare a new Cane Washboard with a new washboard of any other make and you will realize its superiority. Better still, compare the two washboards when they have been some time in use. The other kind will show many signs of wear and will be getting unpleasant to use, the Cane will look and serve as well as it did when new.

CANE'S WESTERN KING



WASHBOARD IS FITTED WITH AN

ENAMEL RUBBING PLATE

and, like the other Cane Washboards, is better than other makes in material, workmanship and finish.

Send for our catalogue giving particulars of **CANE'S WASHDAY WOODENWARE.**

A Real Surety Bond

CONGO ROOFING

THE owner of a building covered with Congo has the satisfaction of knowing that his roof is *guaranteed for ten years.*

In each roll of Congo 2 ply and 3 ply is a *genuine legally binding Surety Bond* issued by the National Surety Company of New York.

This year we will guarantee thousands of roofs to *last till 1921.*

Guaranteed Until 1921

Of course we are not going to lose—we are offering a sure thing. We know Congo will last *more* than ten years. One thing the guarantee forces upon us: it makes us extremely careful in manufacturing.

We provide, free of charge, *galvanized* iron caps which are rust proof and will last as long as the roofing.

Send for free copy of our Guarantee Bond, a sample of Congo Roofing and further information.

UNITED ROOFING AND MFG. CO., Philadelphia, Pa.

Stark, Seybold, Limited, Montreal; Mechanics' Supply Co., Quebec; S. Hayward & Co., St. John, N.B.; Miller-Morse Hardware Co., Winnipeg; E. G. Prior & Co., Limited, Victoria, B.C.; Hobbs Hardware Co., London, Ont.; Fife Hardware Co., Fort William, Ont.

They Stand The Weather Test!

Ability to withstand wide variations of temperature is a first consideration with the building papers and roofings you handle. In this respect our

"Ready" Roofing and "Black Diamond" Tarred Felt and "Cyclone" and "Joliette" Building Papers

are well worthy of your recommendation, and they are, moreover, profitable lines to handle. They can be laid by any ordinary workman, and never fail to give the fullest satisfaction to your customer. We also make a full line of Wrapping Papers.

When The Farmer

comes to a little lull in his spring sowing why not turn his thoughts gently to a money-making line for yourself, and a barn protecting line for him? Look at the cards of

RAMSAY'S BARN PAINTS

See what fine colors they are, how low in price, how pleasing for all kinds of painting on roofs, barns, bridges, fences and all outhouses. Nobody else offers you such a good line or such attractive display for your store. You sell it to the farmer at $1.25 a gallon and make your profit.

"No Lost Motion. Gets ALL the Dust."

Regina Vacuum Cleaner

There is much honor and profit in hitching up with the right Vacuum Cleaner. When you handle the Regina, you are selling a guaranteed success—not an experiment.

Electrically Operated

Embodies the excellent principle of the double pump, which has made the Regina famous. Operated by an easy-running electric motor, each pump works at 1,200 impulses per minute. The two pumps work alternately, each pumping air on the upward stroke. The action of the one follows instantly the action of the other. The result is a continuous suction of great power that simply gets all the dust.

Hand Operated

A child really can run this cleaner. Two pumps are at work, forming a continuous suction of great strength. Dust can be emptied without fussing with nuts or bolts or turning the machine upside down. Compact, strong, serviceable, the Regina Hand Cleaner pleases fastidious people at sight. No complicated mechanism to get out of order. Easiest and simplest cleaner to handle you have ever seen.

Nothing to touch the simplicity and dust-getting qualities of the Regina Vacuum Cleaner has yet been placed on the market.

Address P.O. Box 549, Edmonton, Alberta. (25)

PATTERN DRAWING

A CHEAP, PRACTICAL and Complete Home Study Course on Sheet Metal Pattern Drafting, Estimating and Construction. Send for particulars to THE SHEET METAL SCHOOL, Box 419, Galt, Ont. (21tf)

MISCELLANEOUS

ACCURATE COST KEEPING IS EASY if you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto.

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COPELAND-CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

COUNTER Check Books—Especially made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for Binders and Monthly Account Systems. Business Systems, Limted. Manufacturing Stationers, Toronto. (tf)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited. Room 314, Stair Building, Toronto.

BUSINESS GETTING Typewritten Letters and Real Printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms—real printing for stationery and advertising, saving 25 % to 75 % of average annual printing cost. American Multigraph Sales Company, Ltd., 129 Bay Street, Toronto.

DOUBLE YOUR FLOOR SPACE — By installing an Otis-Fensom handpower elevator you can use upper floor as stock room or extra selling space and increase space on ground floor. Costs only $70. Write catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS are devised to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE. INSURE IN THE HARTFORD. Agencies everywhere in Canada.

HUNDREDS OF TYPEWRITERS of every make and condition are being traded in as part payment on the famous Monarch. Price and quality are the levers we use to prevent over stock. We believe we can give the best bargains in rebuilt typewriters in Canada. A postal will bring our catalogue and full information. The Monarch Typewriter Co., Limited, 46 Adelaide Street West, Toronto.

KAY'S FURNITURE CATALOGUE No. 306 contains 160 pages of fine half-tone engravings of newest designs in carpets, rugs, furniture, draperies, wall papers and pottery, with cash prices. Write for a copy—it's free. John Kay Co., Ltd., 36 King St. West, Toronto.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost. "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN PENS. If you have Fountain Pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. GAGE & CO., Limited, Toronto, sole agents for Canada.

PENS—The very best pens made are those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find the pen to suit you.

THE NATIONAL CASH REGISTER CO. guarantee to sell a better Register for less money than any other house on earth. We can prove it. Make us. The National Cash Register Co., 285 Yonge St., Toronto.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto (tf)

WAREHOUSE AND FACTORY HEATING SYSTEMS. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

SITUATIONS VACANT

WANTED—Salesmen to handle A-1 side line, paying liberal commission; also paying A-1 salary as soon as you have shown your ability. Wanted only A-1 representatives to answer this advertisement. Box 517, HARDWARE AND METAL, Toronto (24tf)

Keep in mind the dominant fact that mankind from its first appearance on the earth has been schooled by nature to look for signs; for invitations to taste; for suggestions as to what to wear. Tell your story briefly, forcibly, truthfully, and address it through the proper media and you can successfully apply advertising as a means to increased distribution.

TRY A CONDENSED AD.

IN THIS PAPER.

NEU-TONE

A PAYING PROPOSITION

It pays, brother, when you can make a friend of everybody that comes into your store. And it is not so hard to do, either.

Take for instance, the paint proposition. If a man comes into your store, and you make a lot of promises that the paint doesn't fulfill — that man will not remain your friend many days.

When you lose him — well — you will lose many more. But on the contrary, if the paint "*makes good*" you make a fast friend and gain a lot of more customers.

NEU-TONE COLORS

(Washable — Sanitary)

Please Everybody — Dealer, Decorator and House-Owner

It pleases the dealer because it is a paying proposition — carrying with each sale the twang of a come-back order. It pleases the decorator because it enables him to give his work a "*style*" that triumphantly asserts itself.

It pleases the house-owner because with it, the house can be finished in the soft, restful, "flat" tints and rich colors of kalsomine. Dust, grease and smoke stains easily removed with a damp cloth. Think of it. It pays to sell this kind of paint, Mr. Dealer. Drop us a postal and we will tell you a few more things you will be glad to hear about this *paying proposition.*

THE MARTIN-SENOUR CO., Limited

Montreal Chicago Halifax Toronto Winnipeg

HOW ABOUT VARNISHES?

Are you carrying a stock of Varnishes which you can honestly recommend to your customers?

If you are carrying DOUGALL VARNISHES, "nuf said,' but if not we would like to interest you in our Goods.

'The Varnish that lasts longest,' that is our slogan, and we live up to it. Every gallon is the same —Quality—every drop of it.

You will put your business on a firmer basis and will please your customers by recommending and selling DOUGALL VARNISHES.

Our booklet on Varnishes will be sent you if you let us have your name and address. Write to-day—it's worth while.

A Dollar Talk

On Paint Oil Storage.

Cut No. 115.

How much oil is:

Soaked up in the floor?

Smeared over the measures and funnels?

Absorbed by the barrel?

Wasted by over-measure and spillage?

Spoiled by evaporation?

How much is your fire hazard increased?

The answer to these questions shows why it is profitable to buy a

BOWSER STORAGE SYSTEM

The pump measures the oil accurately, counts the gallons and computes the charge.
No Measures nor Funnels.
The steel tanks are air-tight and fire-proof.
No danger from fire. No loss from waste.

The Bowser Buys Itself
Ask for Book No. 1N.

S. F. Bowser & Company, Limited

Satinette

(White Enamel)

should be on every dealer's shelves if for no other reason than that it is one of the famous International Varnish Products.

But—it has plenty of intrinsically superior qualities to recommend it besides that.

Satinette is suited for decorative work of every description Gloss Interior and Flat Interior for interior work and Gloss Exterior for exterior work.

Satinette is known all over the world as the white Enamel that stays white—it cannot become yellow.

Architects, painters and decorators always think of Satinette now when they think of enamel.

Satinette is the most perfect and durable white enamel ever made.

It has great covering capacity and **CANNOT TURN YELLOW.**

Like all International Products, Satinette is sold only in full Imperial Measure Cans.

INTERNATIONAL VARNISH CO. LIMITED

Moore's Muresco

The steadily increasing demand for this favorite Wall Finish during the 18 years it has been on the Canadian market affords ample evidence of its reliability and quality.

During 1910, in Canada alone, the sales of "MURESCO" increased no less than 35%, but we are not content to stand still! Hundreds of dealers are now stocking and recommending "MURESCO," because of the subdued, velvety appearance it produces, but hundreds more are not yet handling it! Are YOU one of these dealers?

MURESCO is a quality preparation right through. It will not peel, crack or rub off, is very economical in use, artistic in appearance, durable and sanitary.

A real good profit-producer for the Retailer! Made in White, 16 Tints and 16 Colors.

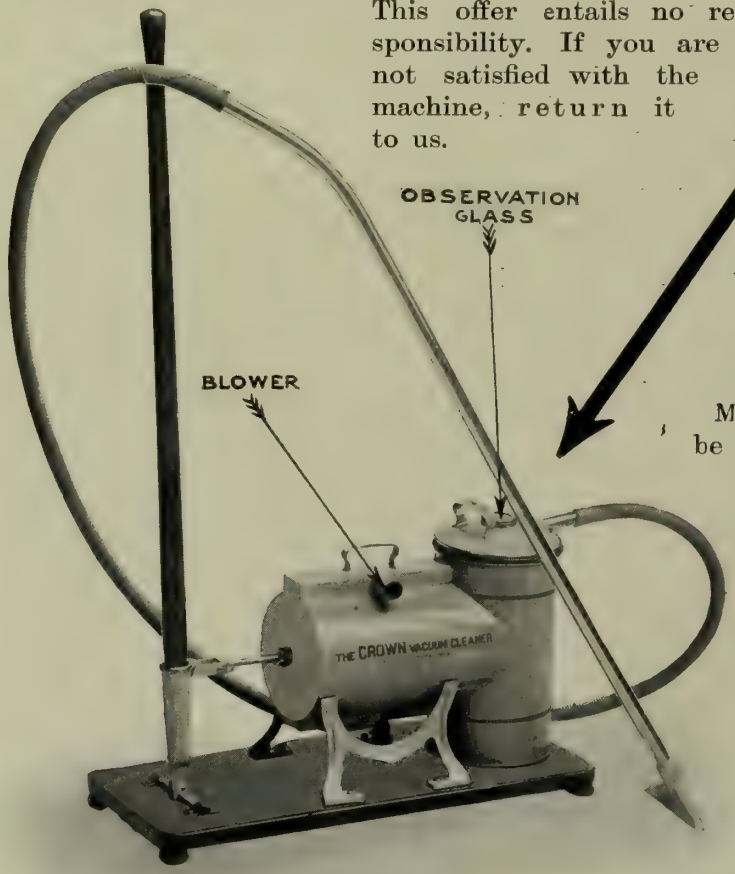
Our Special 30 Day
Free Trial Offer

To further advertise our high-grade **CROWN VACUUM CLEANERS,** we will send to any responsible dealer one machine on 30 days' trial.

A SUMMER PROFIT BOOSTER

During the summer months more dust and dirt accumulate in the dwelling than at any other season of the year. Our **"CROWN" VACUUM CLEANER** will be a ready seller and will be the means of boosting your profits in the dull season.



One Hardwareman made $50 in two months by renting one machine to his customers.

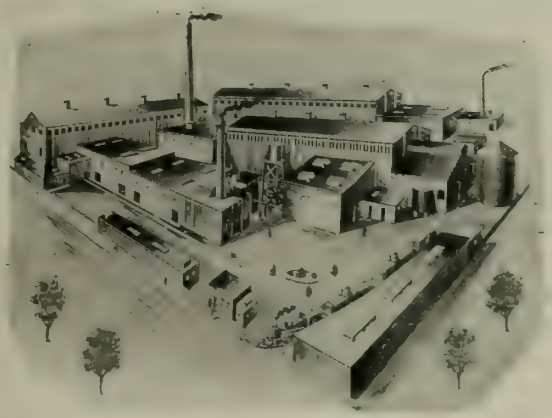
This offer entails no responsibility. If you are not satisfied with the machine, return it to us.

The cost is $15 f.o.b. Toronto, the selling price $20, leaving a generous profit for the dealer.

A New Feature:

An OBSERVATION GLASS in the dust catcher enables the operator to see exactly when the fabric under treatment is clean. **No guess work in operation.**

THE BLOWER makes it easy to clean inaccessible corners, and the effective oil system insures ease of operation.



Machine weighs only 16 lbs. and can be operated by a child.

THE DUST COLLECTOR can be emptied in three seconds. The hands do not come in contact with the dirt.

All parts are metal and are enameled in gray and gold.

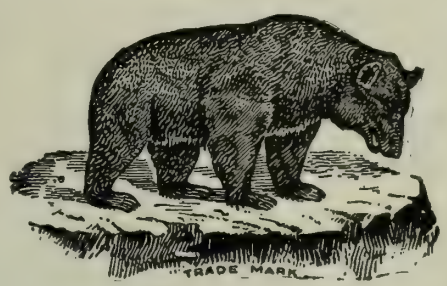
This Advertisement will not appear again. Write before you forget.

Edward L. Dyer
47 E. Wellington, Toronto

The above cut illustrates our complete plant, showing the new addition just finished.

WE LEAD THE WORLD

The ever-increasing demand for



BEAR BRAND LAMP BLACKS

has necessitated this increase in our manufacturing facilities, as shown in the figures below:

	CAPACITY
1902 - - -	3,000,000 pounds
1905 - - - -	6,000,000 "
1911 - - -	10,000,000 "

Our growth is entirely due to the consistent high quality and absolute uniformity and purity of our products, together with the courteous treatment always extended to our customers.

If you are not using OUR BLACKS, write us and we will submit samples and prices which will save you money and secure your orders.

Nature has solved the problem of distribution. It uses a multitude of agents to effect the distribution of its products.

Nature does not expect every seed to fall upon fallow ground and to take root. But, it achieves a profitable percentage upon its distribution. This is all that an advertiser has to do to reap a profitable harvest on his outlay.

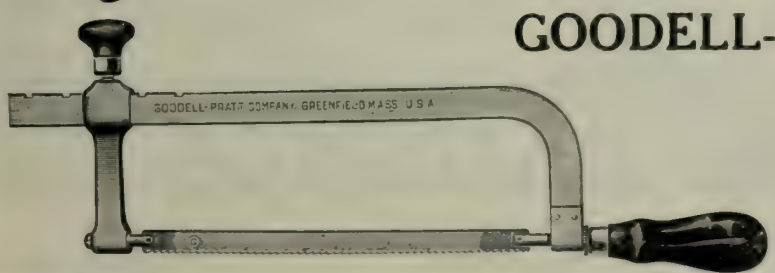
Best Files for Every Purpose

are Nicholson-Made Files. We have the machinery, the methods and the steel that a specialized file-making experience of nearly fifty years proves to be the best. Nicholson-Made Files have come to be the standard of file quality all the world over. These are the well-known factory brands made by the Nicholson File Co. in Canada:—

"AMERICAN" "ARCADE" "GREAT WESTERN" "GLOBE"
"EAGLE" "McLELLAN" "KEARNEY & FOOT" "J. B. SMITH"

Live Hardwaremen throughout Canada find it very profitable to push some or all of these lines as their specialties in files. Try it. Your jobber can supply you.

Nicholson File Co., (DOMINION WORKS) **Port Hope, Ont.**



STRENGTH AND RIGIDITY

Just notice the shape of the Adjustable Arm where the Frame passes through it; there is just a free sliding fit and a turn of the Knob locks it tight.

It is absolutely rigid and there is NO BUCKLING OF THE BACK ON A GOODELL-PRATT HEAVY HACK SAW FRAME, for it is made with sufficient strength to stand up to the work.

All the 34 styles of Goodell-Pratt Saw Frames are just as well made and give just as good service.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

THE CONNOR BALL-BEARING WASHER

With the hinged cover now used on this Washer it is no longer necessary for the operator to place the cover and rubbing board dripping wet onto the kitchen floor. With this hinged rubber and cover the water drips back into the machine. It is easily handled. And other features of this machine are a detachable tub; no iron running through the bottom of the tub; Cypress Tubs: nicely finished Ball - Bearings and Motor Springs do most of the work.

Have you the agency for this washer? If not, write at once for sample, prices, terms, etc. You will find it the most satisfactory machine you ever handled.

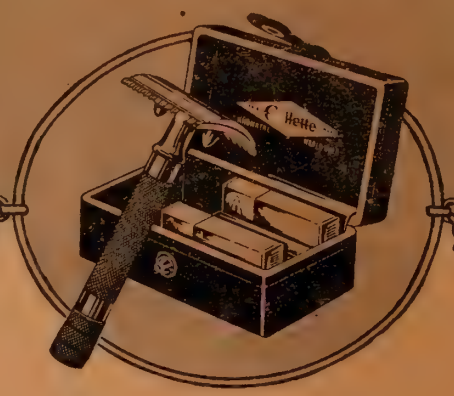
"Long Live The King"

Though uncrowned, King C. Gillette's invention, the Gillette Razor, reigns to-day over an Empire even wider than that which acclaims His Most Excellent Majesty George the Fifth, by the Grace of God, of the United Kingdom of Great Britain and Ireland, and of all the British Dominions beyond the seas, King, Defender of the Faith, Emperor of India.

King Gillette's humble and most hearty thanks are extended to the five million men whose loyalty and allegiance have made such a magnificent success of the G. R., "The Razor of To-day."



The princely motto, "Ich Dien" (I serve), could have no better exponent than the Gillette Razor. It rules supreme because it serves best every man who uses it.

The Gillette is the only razor adjustable for a light or close shave, a soft or wiry beard, a firm or tender skin. The three-minute Gillette shave, clean, cool and comfortable, is known and appreciated the world over.

The subjects of King C. Gillette enjoy a freedom from the annoying delays and constant expense of the barber shop, and from the discomforts of shaving at home with the old-style razor or a make-shift safety, which more than justifies their oath of allegiance.

Buy a GILLETTE and enjoy it.

At your Druggist's,
Jeweler's or
Hardware Dealer's.
Standard Sets $5.00

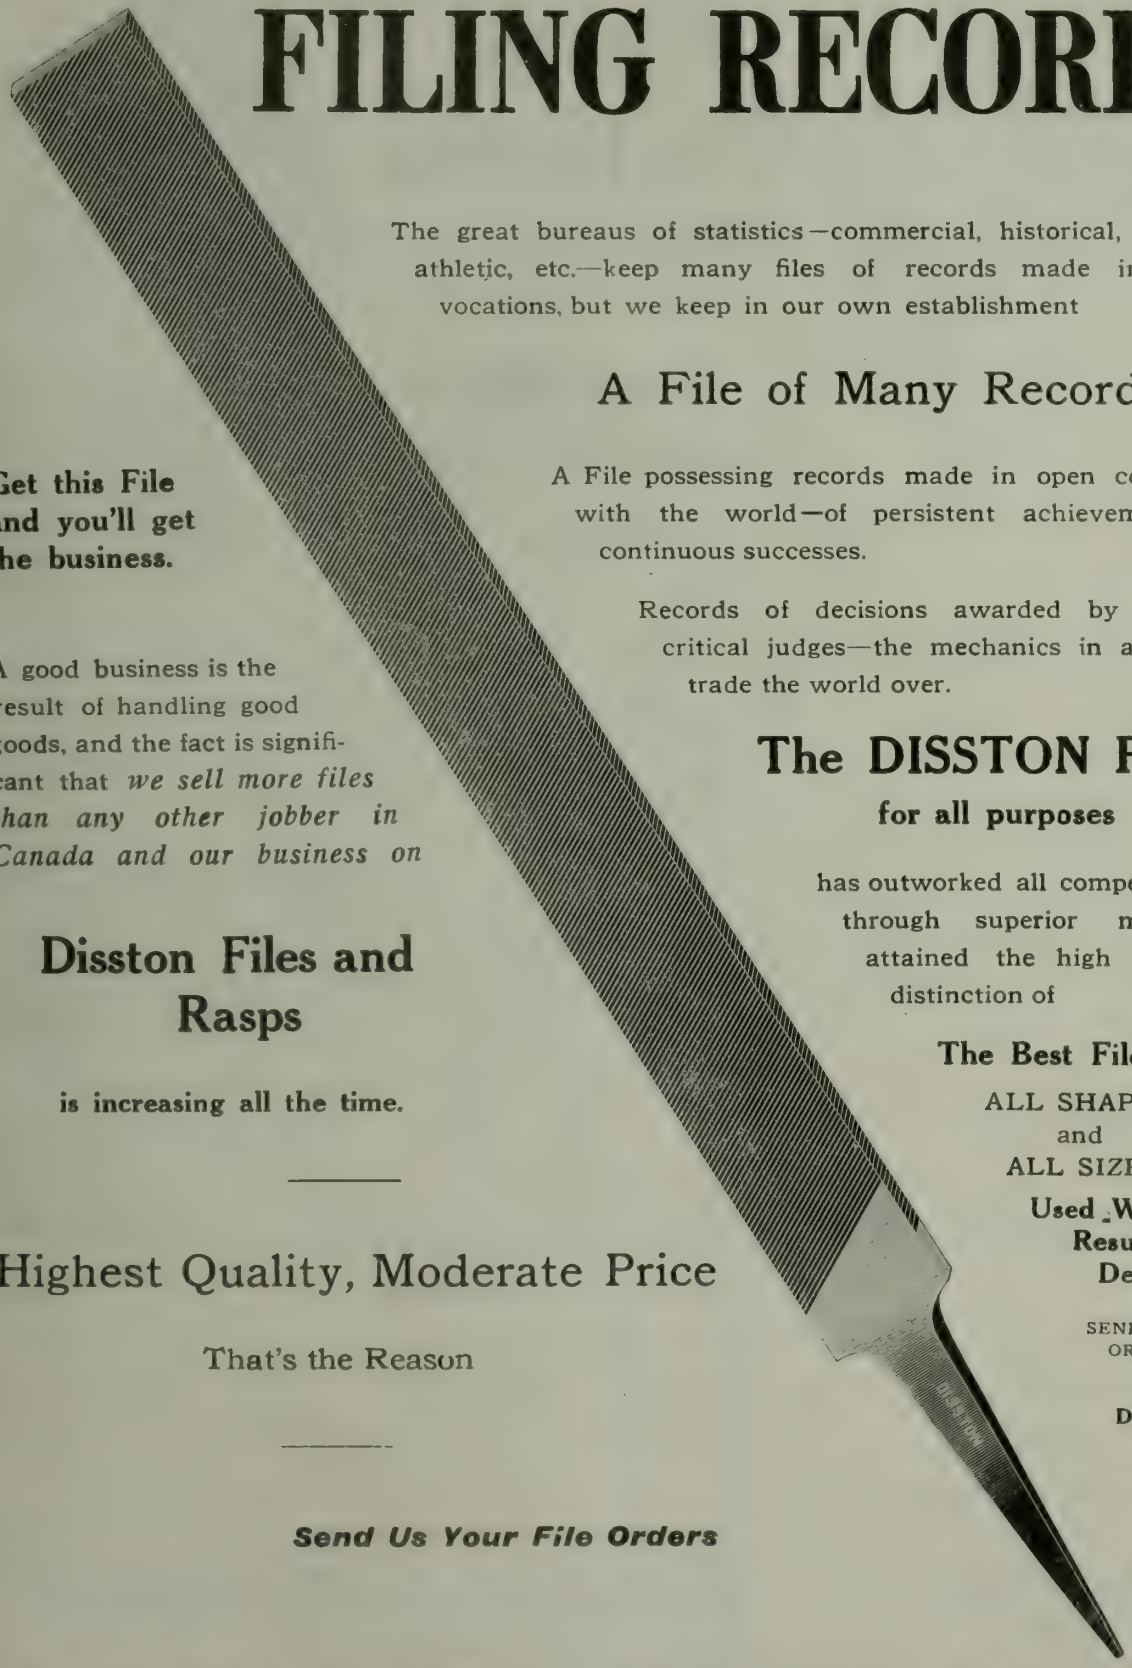
Nicholson-Made Files are the Standard of File Quality

The entire output of the Nicholson File Company in 1864 was 100 dozen per day. At the present time 16,000 dozen Nicholson-made Files are sold every day and shipped to all parts of the civilized world. Unvarying good quality, coupled with progressive methods and strict specialization, is the cause.

In Canada these are the well-known factory brands made by the Nicholson File Company:—



"AMERICAN" "ARCADE" "GREAT WESTERN" "GLOBE"
"EAGLE" "McLELLAN" "KEARNEY & FOOT" "J. B. SMITH"

Nearly every file user in Canada has a preference for one or more of these lines above all others. You can stake your reputation upon their absolutely uniform and satisfactory quality.

YOUR JOBBER KNOWS!

STARRETT TOOL CATALOGUE

This Is BAD Advertising!

YET thousands of merchants are doing this very thing every day. Not by sticking signs in the window—but by their methods, by their neglect to adopt modern store system. Actions speak louder than words, remember. You don't have to tell people how you do business. You are showing them, every day.

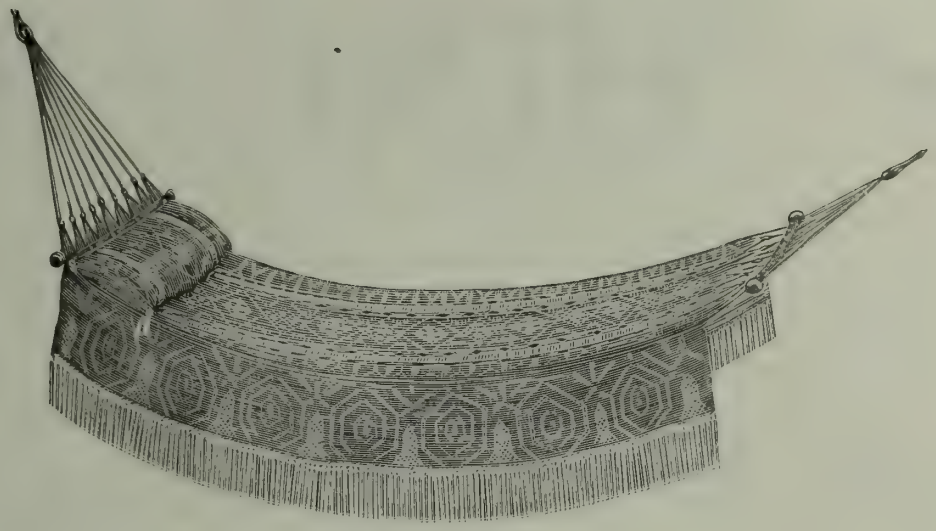
Is this the kind of advertising YOUR store is getting? This is a very serious question that every merchant should carefully consider.

If unsatisfactory conditions exist in your store lose no time in remedying them. Prevent mistakes, avoid disputes, stop all losses and insure absolute accuracy in all money dealings—as a million other successful merchants have done—by getting a National Cash Register. Then "put a receipt in every parcel."

You cannot succeed without a good system—and the better your system the better you will succeed. No store system ever invented has done so much for so many merchants at so little cost, as the National Cash Register.

Customers like to deal in stores that have a National Cash Register. They know it guarantees absolute accuracy, promotes efficiency, and stands for up-to-date methods and good management. And they realize that good management means better values.

There's a National Cash Register built for you, and the money it will save you will pay for it.



WRITE FOR FURTHER INFORMATION TO

NATIONAL CASH REGISTER CO.

DISSTON

INSULATE SCREW DRIVER

This tool is designed expressly for Electricians' use. The blade of crucible steel, hardened and tempered, is embedded in a handle of hard rubber of a texture that eliminates brittleness. It WILL NOT work loose. The rubber handle is milled grip, with projecting rings which prevent the hands from slipping down on to the blade. The hard rubber handle acts as insulation.

The Disston Insulate Screw Driver is something new. Most practical Electricians' screw driver ever made.

REMOVING THE APPENDIX

Would you have this operation performed by some doctor who offered to do it cheap or by an experienced successful specialist ? We know the answer.

The same principle applies in many other directions. There has been a wonderful change in the intellectual broadening of operative Engineers and Mechanics. They are no longer satisfied with merely keeping the machinery in good running order. They start in at the coal pile and study the califoric power of fuels in thermal units, the firemen are put through a school of instructions, and they study economies and scientific problems in many other directions,

BUT How many Engineers and Mechanics figure on the loss from frictional resistance in transferring the power from the boiler to the points where it is needed ?

More than half of the power is often absorbed in that way and yet many up-to-date men use or permit to be used the most ordinary grades of babbitts because of the slight initial saving in the cost price.

It is Plain as an Open Book

that the value of a genuinely good and economical bearing metal is summed up in and expressed by a low co-efficient of friction.

A low co-efficient of friction means less frictional resistance, less wear, less heating, less oil, less fuel, less liability of shut downs, less rebabbitting, less consumption of metal, less squashing, less worry, less work. You can secure all of these economies and other advantages by the use of

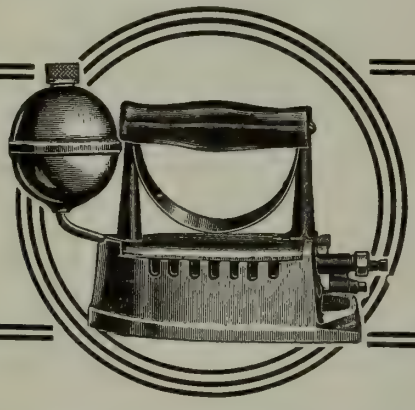
Magnolia Metal

and we recommend its uses on shafting as well as all other bearings. We represent the specialist who does one thing and does it well.

Special Offer

PRACTICAL ENGINEER POCKET BOOK, 680 pages, over 2,000 subjects. We do not aim to make a profit on this book and therefore offer it at the very low price of 40c. postpaid. Many Engineers write to us that they find it invaluable. Address Montreal Office.

Sold by Leading Dealers Everywhere or by



Magnolia Metal Co.

307 Coristine Building, - Montreal

Trinidad Lake—the never failing source of asphalt-supply for Genasco Roofing.

Do you realize what a large field Genasco has cultivated for its use?

Because it is made of Nature's everlasting waterproofer—Trinidad Lake asphalt—its use is not confined to the limits of ordinary ready roofing. Genasco is successfully used not only in dwellings and other small buildings, but on the large roof surfaces of factories, foundries, train-sheds, warehouses, public buildings, etc.

Genasco

the Trinidad-Lake-Asphalt Roofing

appeals to builders because of its real economy combined with lasting quality.

See what a chance there is for you to make big sales!

Think what profits you can have by being prepared to supply this ever-increasing demand!

The Kant-leak Kleet makes the ease of applying Genasco to large surfaces an additional selling point. Does away with cement. Makes seams absolutely water-tight and prevents nail-leaks.

Ask your jobber for Genasco with Kant-leak Kleets packed in the roll. Stock up and push this money-maker now.

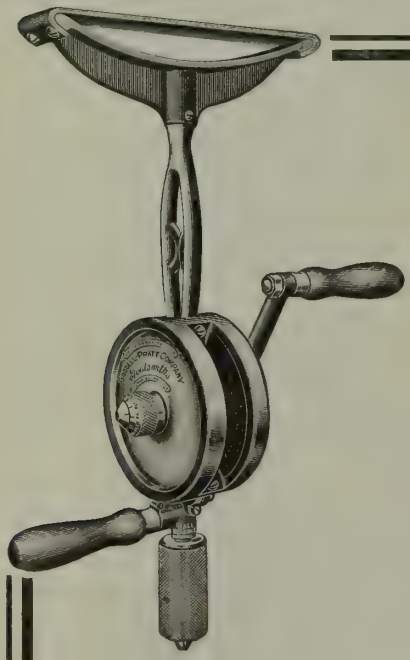
"THE NAME'S THE GUARANTEE"

EVERY Saw **FULLY Guaranteed**

171-A VANADIUM Alloy Steel (also in Straight Back)

S. & J.'s "Double Mermaid" Brand, Improved Temper, MIRROR Polish, Blade Breasted on Tooth.

In this saw we introduce to our customers the BEST we can possibly make **regardless of price,** and the **finest saw produced.** The blade is made of the most expensive steel yet used for saws (being a secret alloy made in our own works.) This steel is of great toughness and the saws **will work longer than any other without sharpening,** being at the same time more difficult to buckle in use.



They will usually CUT THROUGH NAILS or other hard materials in wood without damage, but are not guaranteed in this respect.

Why pay more money for inferior goods?

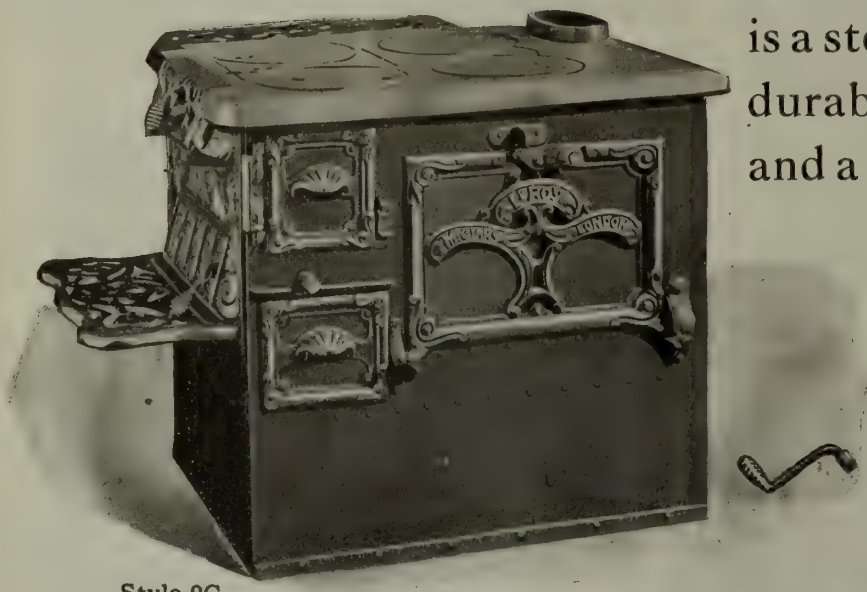
Do You Stock These Two Lines?

Cullenders

This time of the year, the commencement of the preserving season, great demand is made for a first-class Cullender, as you can see by the illustration. This is what is wanted. Finished in both Canada and Imperial Enamelled Ware.



Fruit Funnels

This is another preserving specialty---a good seller. Do you stock it? It is made in two sizes and finished in both Canada and Imperial ware.

THE SUMMER COOKING STOVE

The "LeRoy"

Style 9C

is a steel range, light, durable construction and a first-class cook.

The "LeRoy" is the best range that you could suggest for summer cottages and camps. A small fire will instantly heat it and it will not retain the heat when the fire is out like a cast range.

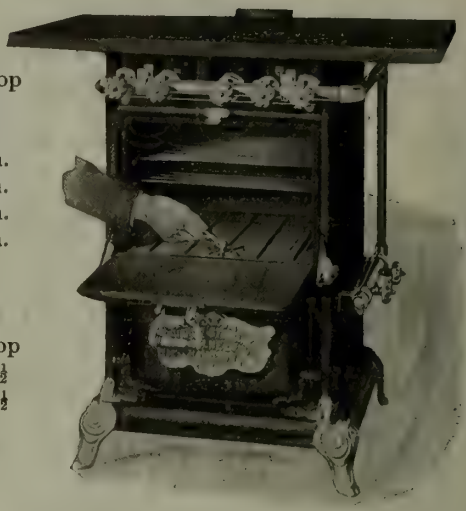
MACLEAN PUBLISHING COMPANY,
143-149 University Ave., Toronto, Ont.

Hamilton Jewel Gas Ranges

for MANUFACTURED or NATURAL GAS are made in over 125 VARIETIES and Every Requirement can be Supplied.



Single Oven

No.	Size of Oven	Size of Top
15	17x12x12 in.	22x19 in.
20	17x12x12 in.	32x19 in.
30	16x16x11¾ in.	35½x22¼ in.
40	15¼x16½x11 in.	35½x22¼ in.
50	16½x16½x11 in.	36¾x22¼ in.
60	18x16½x11 in.	38½x22¼ in.
65	19x18½x12 in.	39x24¼ in.

Double Oven

No.	Size of Oven	Size of Top
70	15¼x16½x11	15¼x16x8½
80	16½x16½x11	16½x16x8½
90	18x16½x11	18x16x8½
95	19x18½x12	19x18½x8

The Ovens have Spring Balanced Drop Doors. The Valves, Airmixers and other trimmings are all nickel plated. Galvanized Dust Tray under Top Burners. The body of Range is Asbestos Lined. All these Ranges are equipped with **Grave's Patent Safety Lighters** —see cut above. This lighter is far superior to the old style Pilot Light. It is **absolutely safe** because the oven door **must be opened** before the Oven Burners can be lighted, and thus all possibility of explosion through accidental accumulation of gas in the oven is avoided.

A **Thermometer** for registering the heat of Oven can be attached to the Oven door of any Hamilton Jewel Gas Range.

These Ranges can be fitted with **Hot Water Heating** attachments, or with Reservoirs or Side Broilers, and Top can be extended if desired.

Large Hotel Ranges

are supplied in every style.

Elevated Oven

Ranges are made in many different styles which are fully described in our **Catalogue No. 69.**

We also make various styles of

Side Oven

Ranges, which we have not room to illustrate here.

If you have not got our catalogue, write us for one.

All Ranges are thoroughly tested before leaving factory.

Each Range is fitted with

Jewel Adjustable Needle Valve

which gives perfect control of gas supply. For accurate mechanical construction and satisfactory working, no other valve equals it.

MANUFACTURED BY

The Burrow, Stewart & Milne Co., Limited

Head Office and Factory at HAMILTON **Winnipeg Branch, 130 James Ave.**

Agencies at Toronto, Montreal, Vancouver.

THE PERFECT PATTERN MADE WITH A

GREENER GUN

Shooting

No other gun can equal the Greener for regularity of pattern (i.e., even distribution of the shot) combined with efficient penetration, "the force that kills." W. W. Greener was the first gunmaker in the world to "harness" the shooting of a gun. Prior to the introduction of his world-famed system of choke boring, "pattern" had been the gunmaker's "will o' the wisp." W. W. Greener made it his servant, and all the world's greatest honors have been won with Greener guns.

Strength

The strength of the Greener action is phenomenal. The Greener treble wedge fast holding down bolt is the strongest breech fastening extant and has been imitated by gunmakers all over the world.

Full Choke Pattern, made with a Greener Gun in 30 inch circle at 40 yards

Simplicity

The Greener "Facile princeps" action is without a rival for strength, reliability and simplicity. It works easily and smoothly, and the striker is a fraction of a second quicker in its blow than any other type of mechanism.

Let us advertise the fact that you stock Greener Guns and every shooter in the district will visit your store.

The Empire Chinook

Highest Efficiency—Absolute Safety—Reliability.

What Women Want You Can Best Sell.

Above are three of the many features that make them want the "Empire Chinook."

The "Empire Chinook" is made to meet the demands for a cheap and serviceable range. The good material, clean, smooth castings, careful mounting and guaranteed operating qualities are the same as on our more expensive ranges.

The bodies are made of the highest grade polished and dead flat steel. All parts coming in contact with the fire are made of heavy-gauge steel, protected with asbestos millboard, strongly riveted.

Great care has been taken to have the firepot correctly proportioned. The linings are cast extra heavy and well ventilated.

The tops are made in sections, which insures against breaking or cracking. The centres and covers are heavy. One reducing cover goes with each range.

The ovens are made so that heating and cooking can be done at the same time. They will always bring perfect results.

The reservoir is so constructed that water can be heated to a boiling point in a few minutes.

The high closet is large and roomy with roll-front door. It has folding teapot shelves and is nicely nickelled. Remember this range is guaranteed. Write for prices and discounts.

Thousands of Woodworkers Use Ford Auger Bits

and declare them to be superior to all others.

Many of these men have tested the FORD side by side with other bits, and, without exception, the FORD has proved faster, easier boring, more accurate, and produced smoother work.

Furthermore, it showed greater power and strength under severe strain, for, when other bits snapped off, the FORD not only did the work perfectly, but it came through sound and unimpaired.

It's always the same RELIABLE FORD—never fails, always satisfies. Sold with a solid guarantee.

A Word to Dealers

If you're not handling FORD Bits, we urge you to write us for prices, terms, and name of your nearest jobber. You'll find FORD Bits easy to sell and profitable to handle, not only because of their superior working qualities, but because they give lasting satisfaction to the purchaser. The Associated Boards of Trade Meet

Western Canadian Body Holds Annual Convention in Albertan City—Fort William Accepted to Membership—Bumper Crop Predicted for This Year—Assisted Immigration and Its Problems—Discussion on Dry Farming—The Bulk Sales Act Endorsed for Adoption in Alberta — A Uniform Fire Insurance Policy.

(Staff Correspondence.)

Lethbridge, Alta., June 22.—Notwithstanding the great distance which separates the city of Lethbridge from the other leading centres of the West, and also the fact that it occupies an extreme point in the territory covered by the Associated Board of Trade of Western Canada, a very satisfactory number of delegates gathered at the eighth annual convention, which began June 14th and concluded the following day. After the delegates had spent a few hours in the city they were well satisfied that the Boards of Trade had made this city their choice for convention centre. The railway facilities proved adequate, the weather was ideal and the city itself presented such an attractive appearance that all the delegates expressed delight as they greeted one another at their respective hotels.

Planned in Advance.

It was evident that the Board of Trade at Lethbridge had planned considerably in advance to make the convention a great success and also to entertain in a most gratifying manner the delegates assembled.

Representatives from the local board met the trains and accompanied the delegates into the city. They lost no time in making the delegates acquainted with local board men and with the leading citizens.

The fact that the splendid auditorium in the fine new Y.M.C.A. edifice had been reserved for the convention at some inconvenience of the directors of that institution demonstrated also that the greatest possible efforts had been put forth to make the convention, in every way, entirely satisfactory.

Application From Fort William.

A feature of the growth of the work of the Associated Board of Trade of Western Canada was the fact that a representative was present from Fort William in Western Ontario to make application on behalf of the Fort William Board of Trade for affiliation with the Associated Boards.

By ten o'clock on the morning of June the fourteenth some twenty delegates had registered at the secretary's desk and among the names there were nearly all the directors of the Board of Western Canada.

President E. M. Saunders, manager of the Bank of Commerce, at Calgary, late of Moose Jaw, called the meeting to order shortly after ten o'clock and gave an opportunity to E. A. Cunningham, vice-president of the Lethbridge Board, to welcome the delegates on behalf of the mayor and council and the local Board. Mr. Cunningham spoke briefly of the importance of a convention of such an influential body and welcomed the guests in cordial fashion.

The President's Address.

President Saunders replied stating that in his estimation the large number present at the opening session indicated

WILLIAM GEORGESON,
Who Was Elected President of the Associated Board.

that the delegates appreciated a visit to the city of Lethbridge.

President Saunders then delivered the annual address as follows :

"During the session at Brandon last June, it was suggested that the secretary should issue bulletins at regular intervals throughout the year, giving a detailed report of the follow-up work of the Executive in connection with the resolutions passed. Acting on this suggestion, bulletin No. 1 was issued along with the annual report. This bulletin contained copies of letters forwarding resolutions to their different destinations, and acknowledgments of the same, together with a copy of an address of welcome presented on behalf of the Association to the Right Honorable Sir Wilfrid Laurier on the occasion of his tour through Western Canada last summer. No definite results appeared in this bulletin in connection with resolutions dealt with, except in the case of the one recommending the adoption of a uniform fire insurance policy for the three Western Provinces. Mr. Fitzgerald, Superintendent of Insurance at Ottawa, replied in connection with this resolution that while he approved of the adoption of a uniform fire insurance policy, he did not think that there would be any special advantage in the adoption of this uniform policy, unless it covered the whole Dominion, as most of the insurance companies were doing business from coast to coast.

Manitoba Government Aloof.

Bulletin No. 2 was issued about the first of this year covering a period from the 1st October, 1910, to about the first January, 1911. In this bulletin, resolution No. 1, re protection of the cattle industry in Western Canada," resolution No. 6, re "Increased Facilities in Customs Department," resolution No. 7, re "Adjustment of Duty on Imported Fresh Fruits and Vegetables," resolution No. 16, re "Telegraph Rates," resolution No. 12, re "Distribution of Harvest Hands," resolution No. 27, re "Navigation of the Saskatchewan River," were dealt with. We regret to note from this bulletin that, although persistent and repeated efforts had been made by our secretary to the Manitoba Government to consider our resolutions sent in to them, no results had been secured up to the time of the closing of the period covered by this bulletin, ending the 1st January, 1911.

Bulletin No. 3, which was distributed in the month of May of this year, covered a period from the 1st January, 1911, to the 1st May, 1911. This bulletin contained letters in connection with the follow-up work, and results of interviews with the representatives of the different provincial governments.

To Secure Better Results.

As all the correspondence in connection with the following up of last year's resolutions is brought out in detail in the bulletins already referred to, it seems unnecessary for me to deal further with them. While it might be con-

ceded that our work in this connection this past year has brought better results than in previous years, still, I think that at this convention some action should be taken that would bring better recognition of our resolutions by the provincial governments of Western Canada.

Since we last met in convention at Brandon, this western country has seen many changes, most of which I feel quite safe in stating have been along the lines of progression.

Last Year's Crop.

Another crop has been harvested, and while results were not as satisfactory in some districts as in previous years, still the following figures secured from a bulletin issued by the Northwest Grain Dealers' Association, Winnipeg, on the 28th February last, would indicate that the crop results were much better than many predicted they would be.

Wheat Situation, February 25th, 1911. Manitoba, Saskatchewan and Alberta.

	Bushels
Inspected to date	57,953,250
In transit—not inspected	650,000
In store at country points	11,500,000
Marketed at Winnipeg	150,000
Allow for country mills, seed and feed	26,000,000
Total	96,253,250
In farmers' hands to market	8,300,000
Total crop	104,553,250

	Bushels
Oats inspected to date	11,588,100
Oats in store at country points	3,725,000
Oats in farmers' hands to market	8,350,000
Total	23,663,100

	Bushels
Barley inspected to date	1,543,200
Barley in farmers' hands to market	460,000
Total	2,003,200

	Bushels
Flax inspected to date	2,875,000
Flax in farmers' hands to market	150,000
Total	3,025,000

On the 1st May, the following figures were secured:

	Bushels
Wheat inspected to date	71,000,000
Oats inspected to date	17,000,000
Flax inspected to date	3,000,000
Barley inspected to date	2,100,000
Rye inspected to date	35,000

A Comparison.

A comparison between these and the foregoing figures would indicate that estimates of stocks at country points and in farmers' hands, were not exaggerated. These figures to date compare most favorably with the final crop report issued by the same association on the 2nd November last, which showed the following figures for the crop of 1909:

Total wheat crop	119,744,655
Total oats inspected	33,105,600
Total flax inspected	3,571,000

This year crops all over Western Canada have been put in under most favorable conditions, and up to the present, there is every evidence of a strong and healthy growth of all grains. Should the present favorable crop conditions continue until harvesting, it would, I think, be quite safe to predict that our wheat crop this season for the Canadian West, with the large increase in acreage, should exceed 150,000,000 bushels.

Railway Mileage.

The annual report of the comptroller of railways shows that the mileage for Canada increased from 24,104 in 1909 to 24,731 in 1910, an addition of 627 miles. The larger portion of this increase, or 519 miles, was in the four Western provinces. These figures do not include any mileage attaching to the Grand Trunk Pacific, which is officially regarded as "under construction," although over 1,000 miles were in actual operation during 1910. It is estimated that 4,500 miles of railway were under construction on June 30th last. Judging from the announcements that have been made by the railway companies, it would appear that, if the work planned for this season is carried out, last year's figures for the increase in mileage will look small beside those for 1911.

Real Estate Speculation.

With the large amount of railway development, increase in expendtiures by municipalities, and in the figures for building permits which are published from time to time, etc., it is not hard to realize that a great tax is being made upon capital available for these purposes. In view of this fact, we think it well to caution the business men of the West against locking up their capital in real estate speculation, more especially where it is non-productive, and we think it important that they should keep themselves prepared to handle the natural increase they would look for in their businesses next fall, should the crop conditions continue favorable through the summer months.

A Greater Immigration.

It will be seen that the immigration figures for 1910 show an increase over those of 1909 by about 60 per cent. From present indications it would appear that this percentage will not only be kept up this year, but will break all previous records. We have with us as a guest of this convention, J. S. Dennis, in charge of the Irrigated Lands of the Canadian Pacific Railway. He has kindly consented to address this convention on the "Development of Western Canada." There is no one in the West that is better fitted to handle such a subject, and I feel sure that in his address Mr. Dennis will bring out some

E. D. MARTIN,
Second Vice-President of the Associated Boards.

very interesting facts in connection with the immigration into Western Canada.

That trade conditions generally in the Dominion have been good is indicated by the following figures taken from the budget statement of the Minister of Finance, submitted in April last.

Total trade for 11 months, ending Feb. 28, '11	$687,500,000
Total trade for 11 months, ending Feb. 28, '10	610,000,000
Increase over previous year	$ 77,500,000

and also by a comparison between the total bank clearings for 1909 and 1910.

Total Clearings for 1910	$6,114,039,804
Total Clearings for 1909	5,203,269,249
Increase for the 12 months	$ 911,770,555

Fort William Application.

Last fall it was my privilege to visit some of the important centres in British Columbia, and when meeting the executive officers of the different boards of trade, I endeavored to interest them in the work of this association, and received a promise from some of them that they would try and send representatives to our convention this year. When a name was being discussed for this association, I think it was decided to select one that would be general enough to take in, if thought advisable, not only the three prairie provinces, but also the province of British Columbia, lying to the west of us.

That the influence and strength of this association is recognized outside the territory which it at present covers is evidenced by the application from Western Ontario of the Fort William board of trade for affiliation, which board is represented at this convention.

I wish, gentlemen to thank you.

Board's Qualifications.

In moving the adoption of the president's address, vice-president W. Georgeson, wholesale grocer, Calgary, congratulated the president on the thoroughness and scope of his address. In referring to some of the points Mr. Georgeson stated that he believed the only way to get recognition from the government was by constant reiteration and he stated that the Minister of the Interior had expressed a desire to him personally, to consider all resolutions forwarded by the Associated Boards of Trade as the Minister believed that the boards of trade were in a position to deal with questions of vital importance to the country as a whole, and they were capable of framing up such suggestions as the government would be glad to receive. The speaker mildly criticised the president in his conservative estimation of the crop prospects for this year and thought that the president should use the figures 200,000,000 bushels rather than 150,000,000, as it is believed by high officials in government and railway circles that such a large crop will be harvested this year.

The president's address was seconded by G. H. Bradbrook, Yorkton, Sask.

Fire Insurance.

S. McAra, Regina, spoke of the question of fire insurance which was referred to in the president's address. Mr. McAra thought that the provincial governments should be persuaded to adopt some standardized policy, as it was necessary to have something more definite in the control of fire insurance than prevails at the present time and he further suggested that committees should be formed to press action from the government. M. Isbister, Saskatoon, took the chair and called for a vote on the president's address and it passed unanimously.

E. M. SAUNDERS,
Retiring President of the Associated Board of Trade.

Fort William Admitted.

The secretary than read an application from the Fort William Board of Trade, applying for membership in the Associated Boards of Trade of Western Canada. In discussing the matter Messrs. Georgeson, Isbister and Webster spoke favorably of receiving the Fort William Board on the grounds that the interest of the Fort William Board was in harmony with the interests of the other boards of the West. One objection was raised by Mr. McAra that it was possible that the Associated Boards of Trade would get itself into an unwieldy condition should extreme points in outside provinces be taken in. The motion to accept the application of Fort William was carried.

President Saunders welcomed J. S. Dennis, Immigration Superintendent, C.P.R. Calgary, and J. T. Sweeting, Industrial Superintendent, C.P.R., Winnipeg, and asked that they be given delegates' rights at the convention.

The minutes of last year's meeting as published in pamphlet form, were taken as read and carried.

The secretary's report was read giving detailed items of expense and receipts, which showed that the finances were in a very satisfactory condition. The report was adopted.

President Saunders then announced that the election of officers would be the next item of business. The voting, which was all informal, resulted as follows :—

Calgary Man President.

President for the year 1911 and 1912, W. Georgeson, Calgary, by acclamation ; first vice-president, M. Isbister, Saskatoon, by acclamation ; second vice-president, E. D. Martin, Winnipeg, by acclamation ; third vice-president, Richard Loney, Moose Jaw, by acclamation ; fourth vice-president, A. A. Wilson, Fort William, by acclamation.

A new office was created as it was thought advisable to have an auditor appointed each year, and H. J. H. Skeith, Lethbridge, was elected by acclamation.

Chairman's Address.

Mr. Georgeson in taking the chair said that it was something to remember to have been elected to the highest office which the Board of Trade of Western Canada could give. The work before the Board was never more important than at present, owing to the fact that the country was new and just beginning on a great era of development. What was needed more than anything was to bring improvements as quickly as possible to as large a number of centres as possible. He pointed a warning that all questions considered by the Board should be on fair lines and non-political. It depended on the members of the Board, what the Board would do and be in the opinion of outsiders. It was necessary to get recognition from the governments on questions already raised in order to continue to have prestige, in dealing with Board of Trade matters.

WEDNESDAY AFTERNOON.

The chairman at once took up the resolutions for discussions and referred to a few resolutions which had been left over and struck out by the committee on resolutions which had convened the previous evening.

Legislation Against Noxious Weeds.

President Saunders in dealing with this question said that it was an urgent matter and believed that the country suffered a great deal at the present time on account of noxious weeds. E. E. Spackman, Gull Lake, Sask., in seconding the resolution stated that the Minister of Agriculture for the province had

sent out circulars to different agricultural societies to appoint weed inspectors, but it was necessary that something more should be done as these inspectors were often friends of farmers who were guilty, and so had proved unsatisfactory. It was also brought out that in some territories there were not enough inspectors to cover the territory and that it was a mistake for local men to be appointed. A. T. Hunter, Regina, opposed the measure on the grounds that it was an agricultural question and should be left to the farmers to take up, but his objection was overruled by Mr. Saunders who pointed out that it was a serious and general question as the banks and business houses needed good crops and noxious weeds was the chief factor in destroying those crops.

Townsite Planning.

A resolution to expropriate Indian reservations in order that towns and cities continguous to those reserves might expand, was introduced. In view of the fact that there was plenty of room in certain sections for Indian reservations, the resolution was carried to the effect that all towns having a population of 1,500 or over should have power to use certain Indian reservations that lay next their borders.

WHEREAS, in the laying out of townsites and sub-divisions in Western Canada proper attention is not given to uniformity and convenience in connection with same, more especially in regard to regulation width of streets and proper consideration for supplying said townsites and sub-divisions with sewerage and drainage facilities; AND WHEREAS, the present city act does not empower city or town councils to supervise subdivisions in their localities; THEREFORE BE IT RESOLVED, that the Provincial Governments be requested to provide that no townsite or subdivision should hereafter be registered until the location and general plan has been approved by the Lieutenant Governor in Council and until a proper plan has been submitted and approved, such plans submitted complying with a general plan adopted in connection with the laying out of townsites and sub-divisions.

Moose Jaw Again.

This important resolution was brought in by the Moose Jaw representatives, and provoked some discussion, in which J. S. Dennis took part. He stated that it was necessary that the government should have the right to determine the width of the streets and lanes and to prevent land owners from forming uniform strips in the townsite. Mr. Dennis further suggested that he would like to see the government have some say in the lay-out of a town, forming definite places for parks, business streets and stores. Mr. Dennis' remarks were appreciated. The resolution carried.

Land Titles Act.

A resolution was brought forward by Moose Jaw with reference to providing for the relief of homesteaders from the Land Titles Act, where homesteaders are not notified by the Registrar, that his patent had been passed by the Department of the Interior. In discussing this question, it was stated that the Registrars in many cases did not receive remuneration for asistance given to homesteaders, and as a result they did not act promptly, much to the inconvenience of the homesteader.

Freight Rates on Coal.

"In the opinion of the Associated Boards of Trade of Western Canada

M. ISBISTER,
The First Vice-President for Ensuing Year.

in session, the coal rates at present in effect in Western Canada are unreasonably high, and as such is partially responsible for the present high cost of living, further that the consumption of coal in Western Canada is today considerably larger than was the case a few years ago, resulting in greater tonnage, which in itself should warrant a voluntary reduction in the coal rates by the Railway Companies, that the question is one of vital importance and of such magnitude that no individual or committee that we may appoint can handle the question as intelligently as the Board of Railway Commission and its Chief Traffic Officer.

BE IT THEREFORE RESOLVED that this convention of Associated Boards of Trade of Western Canada urge upon the Board of Railway Commissioners the necessity of conducting a thorough investigation into the coal rates at present in effect in the Provinces of Manitoba, Saskatchewan, and Alberta, with the object of ascertaining the reasonableness of such rates; AND FURTHER that if such rates or any coal rate is found to be excessive, that the Board order the Railway Companies to make such reductions as in their judgment may be deemed advisable. That a copy of this resolution be forwarded to the Secretary of the Railway Commission."

This is an old question, and was therefore discussed with considerable intelligence by some members present. Mr. Hunter, Regina, who moved the resolution, made the startling statement that 50 per cent. of the profits on coal goes to the railway companies for transportation, and gave some comparisons of freight rate discrepancies, taking points in the United States and comparing them with certain points in the West, at the same mileage.

Railways Inconsistent.

The mover of the resolution stated that it was his object to ascertain the reason for the existing rates and was not prepared to say that the rates were really excessive. He pointed out that wheat, which is in the same freight classification as coal, was handled much cheaper than coal by the railways, which he thought was inconsistent.

Mr. Belcher, Winnipeg, stated that unless the Boards of Trade were prepared to follow up the freight rates on coal investigation, it would be better to drop it at once. He said it required able men and money and trained solicitors to follow up the railway commissioners, in order to get satisfactory results. Mr. McAra, Regina, replied that if the Boards of Trade were to amount to anything they surely could handle this question, and it was their plain duty to deal with this existing evil. The resolution was carried.

Hudson's Bay Railway.

There was little discussion over this resolution, which was brought in by Mr. Belcher, Winnipeg, and it was carried unanimously.

"WHEREAS the Dominion Government has by legislation provided for the sale by way of pre-emption, and otherwise, of lands, the proceeds of which were to be set aside for the purpose of construction of a railroad to Hudson's Bay.

AND WHEREAS the Minister of the Interior in introducing the Bill providing such legislation stated it was as a means of insuring the early completion of the railway to Hudson's

Bay, and the Prime Minister and the Minister of Railways have since stated that it is the intention of the Government to provide for the immediate construction of such railway.

AND WHEREAS under that provision land has now been disposed of representing an amount of over Twenty-One Million Dollars, exclusive of interest.

THEREFORE BE IT RESOLVED that this Board desires to place on record its gratification that the wishes of the Western Provinces, in the opening out of the Hudson's Bay Route, are now to have effect. And further, to place on record its opinion that the full benefits to Canada of the opening of this alternative route to the world's markets will be secured only if the Government builds this railway as a National work, and retains its ownership in perpetuity, and that such railway be operated by the Government itself under an independent Commission, and that the Government effect such arrangements as will make the highway equally available by all Canadian railways under regulations which will provide reasonable and satisfactory rates from the point of shipment to tide-water on the Bay, such conditions to be subject to the immediate control of the Government."

The resolution was carried.

Re Telegraph Tolls.

RESOLVED, that the Associated Boards of Trade of Western Canada record their satisfaction that the Board of Railway Commissioners having granted the application of the Winnipeg Board of Trade for a public investigation into the telegraph companies tolls, that public counsel, whose services are at the disposal of any individual or Association desiring to present matters before the Railway Commission in connection with telegraph tolls, have been appointed by the Dominion Government, and that the investigation is already proceeding.

FURTHER BE IT RESOLVED, that all Boards of Trade are strongly recommended to examine into the telegraph tolls applying from their several places, and present to the Board of Railway Commissioners such facts as they deem essential in order that fair and reasonable tolls will be enforced in Western Canada.

This resolution which came from Winnipeg had been discussed by the Board of Trade at Winnipeg and the Grain Exchange and it was a huge subject. In their endeavor to get reduced tolls in other lines the whole schedule of tolls, it was found, was greatly in need of revision. G. E. Carpenter, shipper section Board of Trade, Winnipeg, stated that the work which was started in Winnipeg will affect the whole West and the Winnipeg Board should receive encouragement from other Boards and have the investigation thorough in order that the tolls may be more reasonable. The resolution was carried.

Customs Regulations.

WHEREAS large numbers of new settlers are daily coming to Canada from other countries.

AND WHEREAS in a great many instances they are bringing with them goods commonly known as effects.

AND WHEREAS certain laws govern the admission of said goods and these laws are for the most part entirely unknown to the said immigrants.

J. T. HALL,
The Busy Secretary of the Convention.

THEREFORE this convention of the Associated Boards of Trade of Western Canada hereby respectfully points out to the Dominion Government that the printing of the Canadian Customs Regulations in the daily newspapers of the Dominion, similar to the manner followed by the Department of the Interior, would be found very beneficial not only to the said immigrants but to the Customs Department.

This resolution was carried without much discussion, owing to the fact that it was generally known that there was not enough publicity given on the Canadian Customs Regulations. In the discussion J. S. Dennis, Immigration Superintendent, C. P. R., stated that publicity was given to a great extent by circulars and posters and other literature circulated in other countries, which we as Canadians did not see. It was deemed advisable, however, to have more publicity in Canadian publications regarding such regulations. The resolution was carried.

Bulk Sales Act.

WHEREAS a resolution having reference to certain Legislation known as the Bulk Sales Act has been endorsed by this Association and forwarded to the Governments of Saskatchewan and Alberta.

AND WHEREAS the Government of Saskatchewan has acceded to the request of the Association by passing such a law.

AND WHEREAS similar Legislation is in existence in Manitoba and British Columbia.

THEREFORE this Association of the Boards of Trade of Western Canada hereby request the Alberta Government to take immediate steps to grant our former request and pass the bill that is before them known as the Bulk Sales Act.

Retailers Annoyed?

It will be seen from the resolution that it aimed at having the Act in force in Alberta and the mover R. J. Hutchings, Calgary, referred to the satisfactory manner in which the Act was operated in the other provinces. He stated that the government was obliged to see that debts are paid and the wholesalers did not wish to bring a hardship on any one and it was only an attempt to safeguard against dishonest men. It was evident that there were no retailers present who were familiar with the Act as it received no opposition whatever, and it is to be regretted that the other side of the question was not discussed, as it is only reasonable to suppose that many retailers will be annoyed by wholesalers under the operation of the Act. The motion was carried.

Insurance Commissioners.

THEREFORE this Associated Boards of Trade of Western Canada respectfully request the Governments of Manitoba, Saskatchewan and Alberta to each appoint a commissioner who shall investigate the cause of fires in each of the provinces aforesaid with a view of placing the responsibility. Further, that the said commissioner be available for the purpose of advising the public regarding the protection afforded by the different Fire Insurance policies.

This question proved to be interesting and provoked some discussion, which was almost all favorable. No reference was made, however, to the Canadian Credit Men's Association with head office in Winnipeg, who recently appointed a commissioner to investigate fires in order that more satisfactory adjustments might be made. It is believed

that this resolution is more thorough and will eventually take the place of the Credit Men's Commissioner. The resolution was carried.

Wednesday Evening.

The entire evening was taken up by an address by J. S. Dennis, head of the Colonization Department of the C.P.R. He said in part:

"It affords me much pleasure to be in a position to state this evening that the C.P.R. company has signified its willingness to appropriate the sum of $5,000 for the purpose of defraying the expense of the Dry Farming Congress if held in Lethbridge in 1912."

This announcement was received very enthusiastically by the convention, as it was considered a question of vital importance to Canada, as a whole.

American Invasion.

Referring to western development the speaker continued:

"The real start in the development of the West, while not depreciating the vast amount of work done by the people of the eastern provinces, was when the people of the Middle and Western States began to come to Canada, when the free land across the border was nearly all taken up. Many of these were expatriated Canadians who took advantage of the splendid opportunities this vast new country afforded for expansion, and during the past few years the rush for land in Western Canada by the people of the States has been unprecedented. Their coming has convinced others to try the new country and as a result the West has filled up with the best class of citizens of any country under the sun."

Basing his predictions on the development of the West during the past fifteen years Mr. Dennis painted an alluring picture of what Western Canada will be five years from now. At the present rate of immigration he said that he saw no reason why the Western provinces should not have before 1916 a population numbering over five million souls with a grain production alone of more than five hundred million bushels yearly. This was touching only on the development on the land and made no mention of what might be done in the way of manufacturing, and mining development, bound to follow on the increase of population and the settling of the agricultural communities.

THURSDAY MORNING.

"Be it resolved by this convention of the Associated Boards of Trade of Western Canada that all new town sites located in Western Canada be subject to government supervision so as to secure proper drainage, and have provision made for parks, play-grounds and school sites."

In discussing this resolution it was first thought that it was a municipal question which should be dealt with by the Union of Municipalities, but the evil of establishing town sites without proper supervision was apparent, and the resolution was passed.

Small Debt Collection.

THAT WHEREAS the present exemption ordinances of Alberta and Saskatchewan are in their provisions so wide and comprehensive that they offer equal immunity to all classes as regards goods and land that are only necessities of life to a particular class, and,

WHEREAS, under the existing conditions, and owing to the delays, leniency and costly procedure of the present law, many business men suffer losses and, being unable to collect accounts, are thereby discriminated against, and,

WHEREAS, under the present law an unwilling debtor may be drawing sufficient salary over and above his living expenses to meet his obligations, and yet if such salary is paid at intervals when not more than $25 has accrued due, or in the case of a collusion between the debtor and employer, it cannot be attached by any process of court

THEREFORE, be it resolved that this convention heartily endorses the move of the Lethbridge Business Men's Protective Association, and any other association that has undertaken or is about to undertake any move that will tend to the enactment of such laws as will be more in accord with the interests of the business men as a whole, and also commends the Lethbridge Business Men's Protective Association on having circulated petitions all over the Province of Alberta for signatures of petitioners asking for the enactment of such laws for the said Province of Alberta.

This resolution which came from the Lethbridge representatives was one of the most important of the convention. E. A. Cunningham in moving the resolution said that those who suffered most under the present lenient system were the merchants, and he thought that the merchants should get the same consideration as the wholesalers get in the Bulk Sales Act.

In discussing this resolution, it was unfortunate that there were no delegates from Winnipeg who were familiar with the attempts of the executive of Western Retail Merchants' Association to have the small debt court established in Manitoba.

Difficulties in U. S. A.

President Georgeson, enlightened some of the delegates by referring to the difficulty and the solution in the United States. In some of the States they have a simple chattel mortgage act whereby the merchants can take a mortgage against any article owned by the debtor, in that way the merchant gets security for goods they sell if they apply for it. It was apparent that some system should be inaugurated to protect the merchants, and the resolution was carried.

Moose Jaw Wins.

The place of convention was then called for discussion by Chairman Georgeson. A. A. Wilson, Fort William was at once on his feet and gave a strong invitation on behalf of the Fort William Council and Board of Trade. It was moved and seconded that Fort William be considered by the convention.

Richard Loney presented an invitation on behalf of Moose Jaw Council and Board of Trade. In the vote that followed, Moose Jaw was chosen as the next place of convention.

The president stated that the business of the convention had come to an end and a vote of thanks was tendered to the Board of Trade, Lethbridge, the Chinook Club, the Y.M.C.A. directors and the City Council for the reception and entertainment provided in the city.

G. L. Challenor, Grand View, Man., has sold his hardware business.

W. A. Miller is commencing a hardware business at Edson, Alta.

G. R. Farmer has sold his hardware store at Stettler to K. Holtan.

T. Rasmussen has started in the hardware and implement business at Liberty, Sask.

G. N. Coyne, Acme, Alta., has sold his hardware store at Stettler, to K. Holtan, now of Stewartwyn.

The prize given by the Connely-Fairweather Hardware Company, Sussex, N. B., for the best half dozen trout brought to their store was won by Carl Nelson, who caught his string in the river. Mr. Nelson was presented with one of the firm's celebrated bamboo rods.

McLennan, McFeely & Co., wholesale hardware merchants, Vancouver, have concluded a deal with the C.P.R. for the purchase of a wedge-shaped block of land fronting on the main line tracks of the railway between Heatly and Carl Avenues. It is the intention of the purchasers to erect a large warehouse on the property but plans for the structure have not yet been completed. Work will be started first on the erection of a warehouse for iron.

Getting After the Leather Belting Trade

Slack Season Affords Opportunity for Personal Work — Valuable Business in Factory Supplies—These Orders Go to the People Who Solicit Them — Good Field in Rural Districts for Belting Sales.

The fact that many retailers slacken their efforts during July and August gives all the more opportunity to the energetic ones who put on a little extra steam, during the hot weather, in an endeavor to corral more business. This is the time of the proverbial "midsummer dullness," when the business which has been literally swooping down upon the hardware store since the first awakening of spring, drops off quite noticeably, and gives the hardwareman a chance for outside work which he has not enjoyed during the heavy weeks in which the business of the rush season has kept him tied down to the store.

What most of these energetic dealers want is some definite idea to work upon, for, of course, good as is the determination to "go after business," it will help a great deal to have some particular object in view when carrying on a personal canvass.

For a large and very important constituency, leather belting offers a splendid opportunity for the dealer to secure immediate orders, and introduce himself to a nice prospective trade.

Good Business in Factory Supplies.

The most obvious prospects for this class of business are the manufacturers, and there is scarcely a town or village, especially in Central and Eastern Canada, which does not boast of some manufacturing industries. Their machines would be valueless if it were not for the leather belting which transfers to them, the motion of the pulleys and shafting. Belting is an absolute necessity in every manufacturing plant.

Where do manufacturers purchase their belting, of which they use such considerable quantities? A little investigation will show that they buy from the people who solicit their orders. The manufacturer is a busy man who, as a rule, is averse to expending much effort in searching out sources of supply. The sources of supply are in the habit of searching him out. And so it happens that, in towns where the hardwaremen are not aggressive enough to get after this business the manufacturer simply places his orders with the traveler for some mill supply house who calls on him regularly, or, in case of emergency, he mails his order to that house. He does not stop to think that he could procure the same goods from his local hardwareman at just as good a price to say the least. His hardwareman has never told him so.

There is, therefore, an undoubted field for the sale of leather belting in every factory town. If mill supply houses in the large cities find it profitable to send out expensive traveling salesmen to get this trade, why should not the local hardwareman find it doubly to his advantage to make regular calls upon the local manufacturers to present his claim for this business?

How to Handle Belting Business.

A large and expensive stock is not necessary to enter upon the belting business. The first thing to do is to ascertain what sizes are chiefly used in the factories of the town or district; and then buy a small stock of each of these sizes. As a matter of fact, a stock need not be carried at all, except to provide for emergency orders. When a belt goes out of commission, it must be replaced in a hurry, and, if the hardwareman is able to supply it from stock, he will have a great advantage over the far away supply house who could not get it on the ground in less than two or three days. To lose the services of an expensive machine and its operators for three days, would be a costly proposition for the manufacturer. It would be a great boon to him to be able to secure that belt locally without losing any time.

Aside from a small stock of standard sizes, the most essential thing in going after belting trade, is the energy which will ensure a regular canvass of the factories, in the pursuit of orders. Everything being equal, the manufacturer is sure to give preference in his orders to a local firm for he is just as anxious as the hardwareman to build up his town. In most cases, he is a fellow member of the Board of Trade, much easier of access to the hardwareman than to the traveling salesman.

Most manufacturers keep a certain amount of belting on hand at all times, so that, with the exception of emergency orders, they do not require immediate delivery of their specifications. This is the reason that the hardwareman who aims to supply their belting requirements will not need to keep a large stock. It will be his duty to see that the manufacturer does not run short, and most of the orders he receives may be simply passed to the manufacturer and the hardwareman need not even handle it but have it addressed to the manufacturer. Thus, it will cost him practically nothing to carry the requisite stock.

Business in Sundry Supplies.

A pleasing feature of the hardwareman's canvass for leather belting, will be the orders he will naturally secure for sundry supplies. Factories consume large quantities of hardware in making the numerous repairs and extensions which are characteristic of every well regulated plant. These orders will follow the line of least resistance—they will go through the easiest channel. The hardwareman who keeps in touch with the manufacturer in going after belting orders will get these orders for supplies and they will form no mean proportion of his annual turnover.

Prospects in Agricultural Communities.

Let not the dealer who has no factories in his town conclude that he cannot get any business in leather belting. There is a large and increasing consumption of leather belting in the farming communities.

Farmers are now users of gasoline engines to a surprising extent. They utilize these engines for pumping water, sawing wood, operating fanning mills, and for dozens of other uses around the farm each of which requires the employment of leather belting. The near approach of the threshing season should give a decided impetus to the belting trade. Right at this time, threshermen commence looking over the outfits and getting them into shape for the season's campaign. In many cases, new belts must be ordered, as well as numerous other supplies which could be furnished by the hardware store.

So it is that hardwaremen will find leather belting a splendid basis upon which to build up a trade in factory and farm supplies. Although the present is an exceedingly good time to get after this business, it is a trade which is not confined to any particular season. Leather belting is used at all times of the year and new belts are constantly in demand.

A. E. Dickson, for the last four years a clerk in the M. S. Sutton store at Andover, has accepted an offer to enter the employ of W. H. Thorne & Co., of St. John. Mr. Dickson will be in the sporting goods department and will leave for his new field of labor about the middle of next month when the affairs of the estate of the late M. S. Sutton will have been wound up.

TEAM WORK IN THE STORE STAFF.

In the professional baseball leagues, a winning team is often created, not because of its brilliant individual stars, but because of its manager's organizing ability. The introduction of mutual confidence among the players, and loyalty to the club, develops team work which makes all the players work as a unit, and carries them on to success.

In the same way, team work in the store staff will do much to increase business, and make things run more smoothly. See that the clerks are imbued with the spirit of the proprietor, that they are all working whole-heartedly in the interests of the store, and the store will commence making new friends at once.

The responsibility for team work in the store staff rests almost entirely on the proprietor or manager. If he possesses and exercises real executive ability, the business of the store will go along harmoniously. If he has not executive ability, or at any rate does not exercise it, the successful running of the store will depend upon the manager's luck in securing clerks.

As soon as a new clerk is employed, the manager should take him in hand and endeavor to inspire him with his own ideas of merchandising, and especially with his enthusiams for the store. Every member of the staff from the delivery boy up should reflect the personality of the management; he should be a real part of the store, and not a mere employe.

When customers of a store get into the habit of dealing with one clerk only, there is something wrong with the system of that store. It may often happen that the clerk in question is very busy when some of his special customers come in, while other clerks are doing nothing. Yet, the customers either wait around for some time, or leave the store, because they do not like to deal with the other clerks.

Contrast with this establishment the store where customers are treated alike by all the clerks. It does not matter who waits upon them, for each member of the staff has the same cheery greeting, the same knowledge of his goods, and gives the same courteous attention to the purchaser. It is the store where team work has been developed to a high degree, and where every clerk fits perfectly into his special duties.

This result can be accomplished in any store where the manager takes the trouble to train each new recruit on his staff, and to develop that team work by which the entire organization radiates his own personality. Every customer should feel that he is dealing with the proprietor, no matter what clerk makes the sale.

KEEPING THE SIDEWALKS CLEAR.

A great difference of opinion exists among retail merchants, as to whether or not it is advisable to use any portion of the sidewalk in front of the store for displaying goods. In the early days of hardware retailing, this was the favorite method of showing seasonable lines, and the selling value of the window was entirely overlooked. Indiscriminate heaps of merchandise littered the sidewalk and even the doorway, so that customers occasionally found difficulty in picking their way into the store.

Of late years, however, there has been a noticeable change of opinion in this matter, and even of those who still contend that the sidewalk offers good opportunities for display, the majority use it for showing only such goods as will come underneath the sills, and will thus not hide any portion of the window proper.

In Orillia, where there is a yearly influx of summer visitors, the civic authorities, in their anxiety to keep the town looking at its best, have passed a by-law prohibiting the use of the sidewalks for display purposes. At first, the merchants did not fully appreciate this effort to beautify the town. They foresaw the loss of business through the limiting of their facilities for exhibiting what they had to sell. Now, however, after giving the innovation a fair trial, the merchants are heartily in favor of it. They have directed their energies to improving their window displays, and they find that people who formerly passed by the stores altogether, now stop regularly to look in the windows and are frequently reminded of some article which they require. In this particular instance, besides improving the appearance of the business street, the by-law has worked an improvement in the merchants' sales.

FIELD CROPS IN EXCELLENT CONDITION.

The business world has been closely watching the developments of Canada's field crops during the past weeks, and no one trade has shown a keener interest in this subject than the hardwaremen whose prosperity is so closely linked to that of the farming population.

The bulletin issued this week by the Census and Statistics Office, discloses a most satisfactory state of affairs throughout Canada, as regards the principal field crops. The areas in fall wheat are greater than last year by 4.50 per cent., and in spring wheat by 13.70 per cent. The lowest percentage of condition is made for fall wheat, which suffered from inadequate protection in the winter months and also, to some extent, from spring frosts.

The per cent. condition of fall wheat at the end of May was 80.63, and of spring wheat, 96.69. The condition of oats is noted as 94.76 per cent., and of hay and clover, 91.45. Barley and rye each show a small decrease in area, but the condition is higher than at the same period last year.

Reports from the West are particularly gratifying, showing not only a greatly increased acreage in the various crops, but also much better condition than at this period last year. The rains of the past two weeks will do a great deal of good, and, if conditions are normal from now until harvest, the country's crops will, this year, be the most bountiful we have ever known, thus ensuring a continuance of prosperity.

PLUMBERS CHANGE THEIR NAME.

At the Sixteenth Convention of the National Association of Master Plumbers of Canada, held last week at Port Arthur and Fort William, a momentous question, relating to the name of the trade, was settled. It was

decided to go in future under the name of the Canadian Society of Sanitary and Heating Engineers. For many years it has been felt that the name "plumber" did not describe the craft as it stands to-day. "Plumber" means a worker in lead, but nowadays the man bearing that name has to be an expert in all matters relating to sanitation, drainage, heating and ventilation. He has to master hydrostatics, physics, mechanical drawing and general engineering principles. He is, in fact, compelled, by the complex nature of his work, to combine technical knowledge with practical and mechanical skill. The new name expresses fully what the so-called plumber is to-day —a sanitary and heating engineer.

Another important step taken was the decision to appoint a permanent salaried secretary. For years past, organization work has languished, owing to the inability of the officers to give the time necessary to keep things moving. With a capable man, giving his full time to the work, the coming year should be one of unwonted activity. Ultimately, provincial associations will be formed in each province and provincial organizers will be appointed.

The convention was the most successful on record. More business was done than at any gathering held in the pastan d it is felt that the changes made should result in raising the trade to a higher plane and in effecting improvements in trade conditions.

PAPER BAG COOKERY.

A great deal has been heard of late of the results obtained by a new method of cooking invented by one M. Soyer. Everything is cooked in paper bags and the inventor claims that it is possible to roast, bake, stew or boil with equal facility and with 40 per cent. less gas than would be required in cooking the usual way. Everything done by paper-bag cookery is prepared to suit the most fastidious taste and the process takes a remarkably short time.

If paper-bag cookery comes into popular favor—and all who have seen it demonstrated claim that it is bound to—a new avenue of activity will be opened for the hardware dealer. To support the bags in which the food is cooked, it is necessary to use a peculiar form of wire grid which is so designed that it allows the heat to penetrate the paper at all points equally. There will be a heavy demand for bags and grids, if the new fashion comes into vogue and the trade will naturally revert to the hardware dealer. It would be wise for members of the trade to keep an eye on developments in paper-bag cookery. It may prove to be more than a fad.

THE TINSHOP PAYS WELL.

In Ontario, if opinions expressed at the Peterboro' Convention can be accepted as any criterion, the tinshop is not generally found to be lucrative when handled as a department of the hardware store. In the West, many dealers declare that the tinshop is where they make the most money. This condition does not apply solely to the West, however. In many parts of Ontario, dealers can be found who have worked up a highly lucrative business in the tinning line.

Losses in the tinshop arise from various causes. Lack of system in looking after stock is one of the main contributing factors. Many systems for checking up stock have been devised but the best for small and large shops alike is to use the requisition slip plan. Have the stock kept where only the stock clerk, or someone delegated to look after this work, can get at it. Before starting work in the morning, each man puts in a slip for the material he requires. At night he returns what is left over and is credited with it. The material used is charged to the work on which he has been engaged during the day. In this way, nothing is lost sight of. The system is simple and thorough and well worth adopting.

When you hear dealers say: "I cleared eight hundred on my tinshop last year," the conclusion is forced upon you that here is a department well worth the attention of every hardware dealer. But if the tinshop presents great possibilities, it also presents grave difficulties. To make it pay, close attention and careful management is required. The dealer who thinks that he can let his tinshop run itself, soon discovers the folly of the idea. Unfortunately, he then concludes that the fault lies in the trade itself, not recognizing that it lay in his own slackness and carelessness.

POINTED EDITORIALS.

The tinshop can be made a paying department.

* * *

The name "plumber," having become obsolete, has been cast into the discard.

* * *

This is the time to lay plans for the winter dollar harvest. There'll be no lawn mower sales then.

* * *

There is a dignity to the term, sanitary engineer, which the old name lacked. The change was, in every respect, a wise one.

* * *

A perusal of building permit statistics for May emphasizes the statement that Canada is to-day the most prosperous country in the world.

* * *

Reports still come to hand of disastrous fires in hardware stores. Are your policies such as you could realize upon should fire visit your premises?

* * *

Serious fires in western hardware stores are occurring with regrettable regularity. The necessity for watchfulness with reference to fire insurance has been most strikingly demonstrated.

* * *

"The difference between the clerk who spends all of his salary and the clerk who saves part of it is the difference—in ten years—between the owner of a business and the man out of a job."—John Wanamaker.

* * *

Hardwaremen who think they know all about running a hardware store because they have been at it twenty-five years, would be surprised to see how many young shavers are outdistancing them, simply because they are wide awake to the advantages of up-to-date methods.

* * *

An English contemporary comments as follows:—"In the United States Rosin market each grade, except WW and WG, has for some time been given a name, the initials of which correspond to the official title of the grade. Thus N is known as "Nancy," M as "Mary," K as "Kate," and so on. Now, what would a broker's wife say if she found in his pocket book such notes as "Nancy dull to-day," or "Mary very dear," or "Kate is costing me a lot, but I can't let her go yet"?

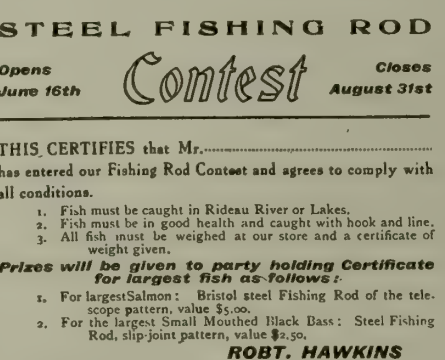
News and Methods of Canadian Hardwaremen

Scheme for Increasing Sale of Fishing Tackle—Meeting Mail Order Competition Squarely—Takin Advantage of Local Enthusiasm to Sell Baseball Goods.

BASEBALL GOODS SELLING WELL.

St. John, N.B., June 22.—Considerable impetus has been given this spring to the sale of sporting goods in St. John by reason of the fact that the city is deeply interested in baseball, and because there are a great number of teams of varied degrees of importance, but all tending to promote the sale of sporting goods, directly or indirectly. Local dealers in hardware, in their sporting departments, have featured the various lines of baseball accoutrement, in bats, gloves, balls, etc., and attractive displays have been made to still further increase the sales.

Under the direction of Architect F. N. Brodie, important additions are to be made to the plant of James Pender, Co. nail works, Charlotte street. An addition is to be made to the office building, and in order to arrange for this, the present lower story is to be converted into a shipping room. Another story is to be added, and a separate brick building is to be constructed with concrete foundation for the accomodation of the galvanizing plant, and the space now in use for the latter will be used for new nail machines.



No settlement has as yet been reached in regard to the matter of early closing in the stores each evening at 7 o'clock, and the opposition to the movement is meeting with considerable support. The maiority of the dealers, however, are in favor of the movement, but at a meeting held this week, open defiance to the law was ordered by those who do not take kindly to the idea. As a result of their resolution on this matter, several dealers have been reported to court, and their cases are now pending.

In Fredericton success has greeted the efforts of those interested in the closing of places of business on Thursday of each week during the months of July and August, and an agreement has been signed among the merchants of standing whereby they will close their stores on Thursday afternoons during that time, giving themselves and their clerks a respite from work.

ENCOURAGING SALES OF FISHING TACKLE.

Smith's Falls, Ont.—Robt. Hawkins of this place, has hit upon a fine idea for boosting his sporting goods department. Situated in the midst of the Rideau system, there is a great deal of splendid fishing all around the Smith's Falls district, and there are big possibilities for business in fishing tackle

During the season from 16th June to 31st August, Mr. Hawkins is giving to every person buying fishing tackle in his store, a coupon, showing that he has entered the Steel Fishing Rod Contest, which is open to the residents of

STEEL FISHING ROD

Opens June 16th — Contest — Closes August 31st

THIS CERTIFIES that Mr.....
has entered our Fishing Rod Contest and agrees to comply with all conditions.

1. Fish must be caught in Rideau River or Lakes.
2. Fish must be in good health and caught with hook and line.
3. All fish must be weighed at our store and a certificate of weight given.

Prizes will be given to party holding Certificate for largest fish as follows:

1. For largestSalmon: Bristol steel Fishing Rod of the telescope pattern, value $5.00.
2. For the largest Small Mouthed Black Bass: Steel Fishing Rod, slip-joint pattern, value $2.50.

ROBT. HAWKINS

P. S.—We reserve the right to examine any or all fish.

Coupon Used in Business Promotiug Contest in Smith's Falls.

Smith's Falls and surrounding country. Each contestant is then in the running for two prizes, one of which, valued at $5, Mr. Hawkins is giving for the largest salmon caught in Rideau waters, and the other, valued at $2.50, for the largest small-mouthed black bass.

This contest was first announced as part of a full page advertisement in the Smith's Falls News, June 7th, and the public were asked to watch the advertisement from week to week for results. The coupon used by Mr. Hawkins in this contest is reproduced on this page.

HEAVY DAMAGE IN FIRE.

Swift Current, Sask.—Fire started in the hardware store of the Great Northern Co. at 2.15 on Friday afternoon last and destroyed the building and contents completely. It is understood that a few books and papers only were saved.

For a time cartridges exploded in an almost continuous roar with several large powder explosions. Fortunately the gasoline tanks were buried so deep in the ground that they were not reached.

It is estimated that the loss to the Great Northern Co., will be about $100,000 with half that amount covered by insurance.

The International Lumber Company's yard at the rear also caught fire and damage was done there to the extent of $10,000.

COMPARISON WITH MAIL ORDER PRICES.

West Lorne, Ont.—McKillop & Ferguson, the hardware merchants here, are making a bold stand against the encroachment of the mail order business in their district. They always keep on hand the catalogues of prominent mail order houses, and when customers refer to the low prices at which they can buy by mail, McKillop & Ferguson bring out the catalogue and meet the customer fairly. By following this plan they are generally able to convince prospective buyers that their prices are as good as those of the mail order house, if not better.

In April, after long deliberation, they decided to use their newspaper advertising space to demonstrate the superiority of their values over Eaton's, and, from the number of people who have been convinced by this ad., they are of the opinion that by meeting the mail order question fairly and squarely, confidence in catalogue values would soon be shaken.

The advertisement which put up a strong logical plea for home buying, read as follows:

"IDEAL" WIRE FENCE.

Eaton's prices compared with ours

In the 1911 catalogue issued by the T. Eaton Co., the following prices on woven fence are quoted:

9 wire, 48 ins. high, weight 11 lbs. to rod, 22 ins. stay, price 37c.

9 wire, 48 ins. high, weight 12 lbs. to rod, 16 ins. stay, price 41c.

Our prices on Ideal fence are

9 wire, 51 ins. high, 12 lbs. to rod, 22 ins, stay, price 37c.

9 wire, 51 ins. high, 13.1 lbs. to rod, 16 ins. stay, price 40c.

You should buy from us because

1. We are here to correct any mistakes.
2. We will give you credit for note with interest.
3. Every dollar spent at home helps the town and consequently increases the value of your property,
4. We give a fence 3 ins. higher.
5. We give a fence 1 lb. to the rod heavier.
6. We give you better value for your money.
7. And lastly we give you Ideal fencing, tried and proven to be of good quality. It is made of, (a) No. 9 hard steel wire throughout, (b) of properly galvanized wire, (c) with a lock which has 5 gripping points on the wires, (d) with a lock that will not slip.

McKILLOP & FERGUSON,

Agents for Wagons, Ploughs, Rollers, Buggies, Pumps, Hay-fork Goods, Washing Machines, Ideal Wire Fence, Etc.

Graham Street. West Lorne.

Part of Rice Lewis Building, Toronto, Sold

Company Follow Out Policy Announced in 1908—Old Interests are Paid Out and the Company Now Being Reorganized.

Toronto, June 20.—A deal was closed to-day whereby Rice Lewis & Son sell the leasehold property now occupied by themselves, facing on King street east to Elias Rogers. The property sold is only that portion of the Rice Lewis building at present occupied by the retail store, having a frontage of 40 feet on King Street, and a flankage of 104 feet on Victoria St. In selling this property, Rice Lewis & Son are simply following out the policy adopted after the fire, in the fall of 1908. In Hardware and Metal of December 5th, 1908, this policy was outlined as follows:

"The five storey building (40 x 104 feet) on the corner of King and Victoria Streets, will be sold and the business concentrated in the large building (60 x 150 feet) on Victoria Street, the ground floor of which will be made a retail hardware and sporting goods store with about 160 feet of plate glass window display. Above this will be four floors for offices and wholesale warehouse, with a stock of metals and a storehouse for other goods on Atlantic Avenue, with railway siding connection."

This plan will be followed out implicitly. The company will retain possession of the King street building for a sufficient length of time to enable them to fit up the Victoria street building, and to transfer their retail business.

The new retail store will have fifty per cent. more floor space than the old one. The frontage will be 160 feet.

Company Reorganized.

Another important deal was closed today, by which Messrs. A. E. Gilverson and R. C. Fisher become sole owners of the capital stock of Rice Lewis & Son Co. The old interests have been paid off entirely, and now the entire paid up capital stock of $310,000 is held by the above mentioned gentlemen. The old interests were paid out without creating any company liability or encroaching on the capital stock.

In a few days' time the reorganization of the company will be completed, and the list of new officers will then be announced.

ANNUAL MEETING OF MONTREAL ASSOCIATION.

The annual election of officers of the hardware section. Montreal branch, of the Retail Merchants' Association, took place last week at a meeting which was marked by good feeling and a spirit of unity. The officers for the coming year are as follows:—

Arthur Leger—President.
J. A. Pilon—Vice-president.
Omer Desserre—Second vice-pres.
J. A. Rochette—Treasurer.
A. Raymond—Secretary.
D. Deschamps—Auditor.

Thus, practically all of last year's officers were re-elected, an evidence of the confidence in which they are held by their fellow members, and which they did not fail to acknowledge. A motion of condolence was passed on the proposal of Mr. Raymond in regard to the demise of the late Francois Martineau. The president, Mr. Leger, speaking of what had been accomplished during the past year stated that the membership had been doubled, and that there are now enrolled about 110 members. The wholesale hardware dealers, he said, had replied for the first time to the retailers, and had given their promise not to enter into retail business.

J. A. Beaudry explained the system of receiving news of what wholesalers might do. The informant's name is not divulged, and the infraction of the wholesaler would be looked into when a complaint is registered in good faith. This system has proved successful to the dry goods merchants.

E. N. Cavanagh declared himself in favor of a question box. Mr. Beaudry proposed that the members be asked to study two or three general questions before each meeting. The topics would be mentioned in the letters announcing the meetings. This proposal was adopted and the officers were deputed to select the questions.

Among those present were: A. Leger, A. Raymond, J. H. Gagne, Armand Gravel, Alf. Goyette, Omer Desserre, J. E. Bissonnette, E. N. Cavanagh, Emile Daoust, J. A. Durand, D. Michon and George Reed.

NEW GILLETTE BUILDING.

Montreal, Que.—The Gillette Safety Razor Co., are to build a factory to cost between $150,000 and $200,000, next to their present premises at 63 St. Alexander street. Construction work will be started immediately and it is expected that the new building will be occupied by the first of the year.

The new building will be constructed of reinforced concrete. It will be five storeys in height, with a frontage of 105 feet and a depth of 80 feet. An extension will be built behind, 27 by 40 feet and two storeys high. The exterior will be decorated with trimmings of Missisquoi marble. The doorways and window sash will be metal.

There will be two passenger elevators and two marble and slate stairways. The interior decorations and finishings will be on a very high scale.

CANADIAN VICKERS INCORPORATED.

The formal incorporation of Canadian Vickers, Limited, which is just announced with headquarters in Montreal, follows as a result of the contract being concluded with the Dominion Government for the dry dock at Montreal, while the same concern is a bidder for the construction of the ships of the Canadian navy.

The capitalization is placed at $5,000,000, and the incorporators are Albert Vickers, chairman of Vickers, Limited; Sir Arthur Trevor Dawson, K.B., and Sir Vincent Penlaver Callard, K.B., directors of Vickers, Limited, all of London; Frederick Orr Lewis and James G. Lewis, merchants; Sir Hugh Montagu Allan, K.B., ship owner, and Preble MacIntosh, accountant, of Montreal.

The charter gives the firm the right to carry on steel manufacture in all its branches; to manufacture railway equipment, and carry on a general business as shipbuilders and repairers.

GOES TO SLOCOMB CO.

Edward Blake, jr., manager of the Canadian Tap and Die Co., Galt, Ont., has been made general manager of the J. T. Slocomb Co., Providence, R. I., manufacturers of machinists' tools. He was formerly salesmanager with the Wells Bros. Co., Greenfield, Mass., and had been connected with the Canadian Company for a few months only.

MOVING TO CALGARY.

St. John, N.B.—Definite announcement has been made that the Gordon Nail Works will be moved to Calgary. The machinery will be transferred to the Western city and the construction of the plant there will be commenced at once.

UNIQUE ADVERTISING SOUVENIRS

The Simonds Canada Saw Co., Montreal, are distributing souvenirs which are so unique as to cause plenty of amusement where they are presented. They consist of cigar fans, each of which, is made to look just like a cigar, and they are packed in an attractive cardboard box which is held out to the unsuspecting with the request "Have a Cigar?" The recipient soon discovers that, by pulling out the end of the "cigar," a neat little fan is evolved, and, if he is a baseball enthusiast, he takes it to the bleachers next day, and whiles away the long wait before the game begins.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 52.

MARKETS IN BRIEF.

Montreal.

Linseed Oil—Decrease of 1c.
Tin—Drop of 1 cent to 49.

Toronto.

Turpentine.—Declined 2 cents.
Linseed Oil.—Declined 2 cents.

MONTREAL.

Montreal, June 23rd.—"Conditions are excellent" said a prominent metal man this week, and while his own house may be experiencing a better run of business than the others the fact remains that the metal market is apparently on a sound basis as far as the present is concerned. Tin has dropped back to £189 and locally is marked back from 50 to 49 cents. It is not held here that tin is weak, in fact it is rather regarded as firm at the lower price. One thing remains and that is the uncertainty of the future of this metal and what it is likely to do. There is nothing of a feeling that the syndicate have lost the controlling hand although it was expected that such might be the case a short time ago, or at least there was the possibility. Copper is becoming stronger in price and is held more firmly here. Lead also is moving up but at a slower rate. Spelter is holding its own without any excitement.

Pig Iron.—The market conditions mentioned last week still obtain. The break in the clouds over this market has not appeared yet. There is the suggestion of better feeling in the United States but it has not yet reached the material stage. The satisfactory conditions continue in Canada, but the United States competition is still felt. Prices on dock Montreal are:—No. 1 Summerlee, $20.00; Select Summerlee, $19.50; Soft Summerlee, $19.00; No. 3 Cleveland and Clarence $16.50 to $17.00.

Tin.—The local price of tin is down to 49c. following the recession of the primary market. The situation is regarded as being still unsettled and business retains practically the same character as last week.

Copper.—The copper market has been gathering strength of late but it is yet a question to what extent the movement is stable. Prices have advanced in the primary market and while the metal is firmer from a local standpoint the quotation here is unchanged.

Other Metals.—Lead shows a little improvement but is yet rather quiet. Spelter remains unchanged in price and in its market position.

Old Materials.—Old materials are in fair demand but business is featureless. Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 21½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $12.50; malleable, No. 1, $9; miscellaneous steel, $5; stove plate, $12.50.

TORONTO.

Toronto, June 23.—A brisk business in nearly all metals on the list is reported by Toronto metal merchants this week. Some firms report that they are busier than at any other time this season. Prices are well maintained, and prospects are for continued firmness.

The tin market during the week has not justified the predictions of some metal experts who thought that the lower prices reported last week indicated that the bottom was falling out of the market. Conditions have so adjusted themselves as to create a "contango" in place of the "backwardation." which has ruled for many weeks past. That is to say, spot tin is now about 10 shillings lower than futures, on the London exchange.

This fact is very significant as showing that prices are not likely to reach any considerably lower plane for some little time to come. The present syndicate have manipulated the market with rare judgment, and have kept things well in hand. Tin is in a remarkably strong position.

The pig iron situation is about the same as at our last report. American furnaces are still unloading foundry iron at ridiculously low prices, and much of it is being taken by Canadian consumers. This naturally has a tendency to retard general buying in decent quantities, and the domestic furnaces and Canadian distributors of Old Country iron, consider themselves lucky to secure orders for such comparatively small lots as two or three hundred tons, where thousand ton lots would be normally specified.

Tin.—From the remarkably strong position occupied by tin throughout the week it is evident that the break in price chronicled in our last report took place simply because the controlling syndicate permitted it, and not because it was forced upon them. Futures still show great strength, and it looks as if high prices would rule on this market for some time to come. The syndicate who engineers the corner in tin have held the situation well in hand, and are now taking their profits on one of the most successful deals in the history of the metal. Both spot and future are strong, and local merchants quote the same prices as last week, 48 to 49 cents per pound.

Antimony.—The sales in this metal are practically negligible. Prices remain stationary.

Copper.—The remarkable activity in the European brass industry helps to maintain a large consumption of copper. Furthermore, there is certainly a feeling among metal men that copper is at present the cheapest metal on the list and is bound to go higher. When it is considered that copper is now only about half the price that it was five years ago, it must be admitted that there is some ground for the present sentiment. The Canadian copper consumers are all taking large quantities of the metal, and the price is firm at the same figures as quoted last week.

Aluminum.—A good business is being done, the ruling price being 19 cents per pound.

Plates and Sheets.—Orders are about normal. The market is somewhat unsteady, on account of the conditions in U.S. Prices, however, are nominally unchanged.

Pig Iron.—The unloading of American foundry iron continues to be a feature of the market. Orders for domestic and British iron are for small quantities only. Prices remain as follows: Canadian Foundry No. 1, $19 and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro' No. 3; and $20.25 for Clarence No. 3; Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

Lead.—Business is very active in imported lead, as the scarcity of domestic lead continues. There has been no change in prices.

Spelter.—In common with copper this metal is feeling the prosperity of the European brass trade. The galvanized sheet manufacturers are also taking the usual quantities, so that the market is very firm at unchanged prices.

Old Materials.—We are still quoting Heavy copper and wire, 10½c to 11c; heavy red brass, 7½c; heavy lead, $2.90; ight copper and bottoms, 9¾c; tea lead, $2.40; machinery cast iron, No. 1, $14; No. 1 wrought, $10; malleable No. 1, $8 to $10; miscellaneous steel, $6 to $7; stove plate, $12.50.

Geo. H. Powell, New York, is in Ottawa. He is the inventor of a double-lever nut-sheller and a number of wrenches, tweezers, etc. He is looking for capital to assist him in establishing a Canadian branch factory.

HARDWARE MARKETS

MONTREAL.

Montreal, June 23.—Trade has been rather quiet this week compared with the rush that was so prominent a short while ago. The holiday broke up the week to a certain extent but the trade realized that historians are always kept busy and the coronation of a British King must be given a prominence worthy of such an event. Hence the hardware trade joined in the festivities which marked the enthronement of King George the 5th and Queen Mary. Montreal's hardware firms were fairly well represented by F. Orr Lewis of Lewis Bros., Wm. Starke of the Starke, Seybold Company, and Frank Ross Newman who were eyewitnesses of the celebration of perhaps the foremost event in 1911.

Referring to business conditions during the week there was a sort of quietness apparent. Contractors' and builders' supplies, harvest tools and one or two other lines are holding their positions firmly but in seasonable lines and several other departments there is not the same briskness that was apparent a short time ago. However, there is confidence that the summer is going to be a good one even though the "dog" days are due about the same time.

Seasonable Lines—Orders for seasonable lines are of the sorting variety, including a great many articles that have been moving well of late. Screen doors, hammocks, verandah sets, and so on comprise the orders now received.

Harvest Tools.—A good demand is felt for harvest tools although there are signs that the most of the trade are fairly well supplied. Orders are coming in freely for tools and parts, with rope quite a feature. Some quotations and discounts are: Hay forks, manure forks, straw forks, barley forks, spading forks, potato forks, field, garden hoes, Dutch weeding hoes, garden rakes, 50 and 5 p.c.; hay rakes, $1.15 to $2.75 a doz.; scythes, $6 to $8 a doz.; sickles, $1.85 to $2.25 a doz.; grass hooks, $1.65 to 82.10 a doz.; scythe snaths, 40 p.c. discount.

Contractors'and Builders' Supplies.—Business in this department shows no abatement and from general reports this end of the hardware demand is well maintained. Building operations are under way with new work being commenced throughout the country. For the best quality of shovels and spades, the discount off is 60 and 2½ per cent.; for second quality the same discount is allowed, and for third quality the discount is 50 and 2½ per cent.; picks are quoted at from $3.85 to $5 a doz.; crowbars are listed at $3.25 a cwt.; wheelbarrows, navvy common, $21 and up; navvy full-bolted, $22.50; drag scrapers, $5.75 and upward.

Household Utensils.—There is a fair sorting demand for household goods. Ice cream freezers have not backed out of limelight yet, and should be good for a certain amount of business through the rest of the summer. Some of the prices quoted are: Food choppers, from $9 to $15 a doz.; ice cream freezers, 1-qt. $1.50; 2-qt., $1.65; 3-qt., $2.05; 4-qt., $2.50; 6-qt., $3.15; 8-qt., $4; coffee percolators, $1.75 to $3.50; washing machines from $3.50 up; wringers, Royal Canadian, $47.75 per doz.; Universal, $37.75 per doz.; Safety, $56.25 less 20 per cent. per doz.; Mrs. Potts' irons, plain, 82½c. per set; nickel-plated, 87½c. per set; common sad irons, 4 to 7 lbs., $5 per cwt.

Lawn and Garden Tools.—Business has not been as brisk in this department as during the past weeks, but there is still a considerable demand. Lawn mowers have not yet ceased to be prominent and are likely to be more or less active throughout the summer. Other lawn necessities are moving freely. Discounts in garden hose range from 50 per cent. off to 70 and 10 and 10, according to quality. We quote hose clamp, ½ to ¾-in., 25c a doz.; hose couplings, ½ to ¾-in., $1 a doz.; hose sprinklers, ring patterns, $5.75 a doz.; revolving pattern, 12-in., $13 a doz.; 24-in., $34 a doz.; and 36-in., at $39 a doz.; hose nozzles, Gem, $3.50 a doz.; reels. 75c each and upwards. The discount offered is 50 and 50 per cent.

TORONTO.

Toronto, June 23.—The past week has been marked by an active demand for all lines of hardware. The records set up during the month of May are being exceeded very considerably in some lines this month.

The shortage in refrigerators continues, and it is reported that it is now impossible to secure any of the cheaper grades. The demand this year for refrigerators has been larger by far in any previous year.

Seasonable Goods.—There has been a heavy call for preserving goods. Preserving kettles, utensils for pitting cherries, jars and sealers have been very much in demand. Other summer lines such as screen doors, awnings, window netting, verandah shades, hammocks, ice cream freezers, garden hose, clamps, couplings, sprinklers, nozzles, lawn mowers, rakes, shears, spades, wheelbarrows, etc., are moving well.

Household Goods.—Everything in this department sells well at this season.

Builders' Hardware.—Building operations are now proceeding briskly and there is, as a result a steady call for builders'hardware and contractors' supplies. It is felt that the present summer will break all records in this respect and all reports indicate that the manufacturers are unusually busy. No price changes are noted.

Heavy Hardware.—The heavier varieties of goods are in strong demand at present. Nails are moving steadily and there is a corresponding call for bolts, nuts and screws. Barb wire, fencing, chain, rope and pulleys are used largely. No price changes are noted. Present quotations are: Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Stoves and Heating Goods.—The call for gas stoves continues as brisk as ever and some difficulty is experienced in filling orders. The furnace trade is also opening up strong. Building operations have now reached the stage where the installation of heating systems can be started and, as a result, there is a strong movement in the furnace line.

Sporting Goods.—The demand for all lines is now heavy. Baseball and lacrosse supplies are particularly in demand. Canoes, paddles, fishing supplies and other goods used in aquatic sports are also selling briskly now.

John Stark & Co., brokers, have sold the property at No. 62 King Street East, Toronto, belonging to the Toronto Furnace Co., to an English investor, for $45,000. The property has a frontage of 27 feet and was five years ago bought by the Furnace Co. for $18,000.

McMillan Bros., Guelph, have sold their hardware business to Duncan L. Myers, Stratford. The firm henceforth will be known as the Guelph Hardware Co.

It is reported in Smith's Falls that a big merger is on the way, one of the firms concerned being the Perrin Plow and Stove Co., of that place. When Mr. Oliver, the general manager of that company was seen, he admitted that negotiations have been under way but refused to make any definite statement.

Beattie & Frankfurth, Comber, Ont., have considerably enlarged their premises and added furniture and tinsmithing departments.

The tender of W. C. Anthony has been accepted by the Public School Board of Georgetown, for heating and ventilating the school building. A steamheating plant will be installed.

The Western Hardware Market Situation

Extremely Hot Weather Which May Affect Crops—Business in Hardware Still Heavy—Decline in Turpentine and Linseed Oil—Mixed Paints in Good Demand.

Winnipeg, June 23.—The heavy rains of the last two months have been followed during the last week by extremely warm weather with the thermometer registering 90 to 95 degrees in the shade. This is regarded by some to be ideal weather for the growing crop, but at the same time some experts and older business men are sounding a note of warning regarding the reports of bountious crops that are being prophesied. It is understood that the roots of the late sown crops have not taken root as deeply as many would like, and should a severe dry spell visit the west at the present time, it is quite likely that after a while some effect will be noticed in the conditions of the crop.

In spite of the above opinion, however, many well known business firms hold their estimates for the present year at over two hundred million bushels. This will be double the yield of last year. Trade has not been affected, however, in the least, and wholesalers are just as busy as they were a month ago. All summer lines are being called for, and the summer rush may be counted as being at its height. The predicted advance in solder has not taken place, but the market continues strong, and it is expected that the price will go higher in the near future. Seasonable goods, such as lawn mowers, spray and garden-hose are in great demand, and orders are still being received from all parts of the provinces. Threshermen's supplies are also being called for at increasing rate. The holding of a two months' course at the agricultural college bringing in a lot of practical men, some of whom are ordering direct. The demand for screen doors and windows shows no abatement whatever, and they are being used throughout the entire West. Campers are now going out in large numbers, and as a result jobbers report a flourishing business during the week. The market is strong, and no changes have taken place during the week.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.00; 2, $1.60; p.g. oak, $2.75.

Auger Bits—"Irwin" bits, 47½; other lines 75 per cent.

Bolts—Carriage, ½ and smaller, 65; 7-16 and larger, 55; machine, ½ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3; small lots, 2½; stove bolts 77½.

Bar Iron—Bar Iron, $2.50; Swedish iron, $4.75; sleight shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs. $8.50; Jessop, $15

Blocks—Steel, 45; wood 60 per cent.

Cut Nails.—$3.15 per keg base.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron.—Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24 $4; 26, $4.20; 28, $4.60; 30 gauge or 10¾ oz., $4.80; Queen's Head, 20, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Iron Pipe.—⅜ in., $3.50; ½ in., $4; ¾ in., $5.20; 1 in., $7.00; 1¼ in., $10.25; 1½ in., $12.45; 2 in., $16.25.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2, and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel, No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $2.75; 6 $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light, T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $7.75; grass, $1.70.

Iron Washers — Full box, 40 p.c.; smaller lots, 35 p.c.

Iron Pipe, Black—⅛ in., $3; ¼ in., $2.45; ⅜ in., $2.50; ½ in., $3.25; ¾ in., $4; 1 in., $5.65; 1¼ in., $7.75; 1½ in., $9.25; 2 in., $12; 2½ in., $19.60; 3 in., $25.75; 3½ in., $33.50; 4 in., $38.35; 4½ in., $44.10; 5 in., $50.40; 6 in., $65.10; 7 in., $95.50; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.75.

Poultry netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.25.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8c; pure manila, 10¾c; British manila, 8¼c; lath yarn, 9½c.

Sheet Zinc — Casks, $8.75; broken lots, $9.50.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head iron, 80, 10; 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 65 per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate—I. C., $9.75; I. X., $11.75.

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25; ½ box, $5.50; I. X., full box, $12.25; ½ box, $6.50; I. X. X., full box, $14.25; ½ box, $7.50; 20 x 39, I. C., full box, $15.50; ½ box, $8.25; I. X., full box, $17.50; ½ box, $9.25.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 35.

Wire.—Barbed wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3; annealed wire, base, $3; oiled, 10c extra; bright iron $3.20 base; brass spring wire, base 29c; plain galvanized wire, Nos. 6, 7 and 8, $3.40; No. 9, $2.90; 10, $3.50; No. 11, $3.55; No. 12, $3.10; No. 13, $3.25; No. 14, $3.95.

Wire Nails—$2.90 Winnipeg, and $2.45 Fort William.

Wringers — Royal Canadian, $39.25; New Easy, $42.50.

Paints and Oils.

The long predicted decline in the price of linseed oil has taken place, and a drop of 5c per gal. is reported to-day. This line has been very strong during the spring, in fact this is the first break in five months. Stocks are all of good size, and the demand is still strong. Present quotations are $1.20 for raw linseed, and $1.23 for boiled.

Turpentine.—New prices show considerable reduction, the present quotations being .85 per gal. in wooden barrels f.o.b. Winnipeg. This shows a reduction of .20 cents from the price quoted last week. Some difference prevails in quotations among the different houses, but it is expected that they will all be down to this price before the week is out.

Mixed Paints.—Ready mixed paints for houses and barns, of all colors, appear to be more popular than ever this year, and wholesalers report that an increasing trade is taking place in this line all the time. The demand is general from all over the west, with the exception, perhaps, of Southern Manitoba, where on account of continuous bad crops for the last few years orders have not been as frequent or as large as from the newer provinces. The benefit of using paints is being realized by the farmers who are putting their homesteads into shape.

Paris Green.—There is little new in this line except that the demand still continues active, and stocks are about in the same condition as last week. Quotations are 23c per 1 lb. carton.

Turpentine—In barrels, $1.05; small lots, $1.10.

Methods of Retailing Paints and Varnishes

Stenciling Opens New Fields for Sales

Curtains and Sofa Cushions Improved by Neat Stencil Designs —Stenciling Inside Walls Give Highly Decorative Effects— Dealers Should Encourage Use of Stencils.

Among the many developments which have taken place in the paint industry during the past few years, none is likely to open a wider field for the retail paint dealer than the popularity of stenciling, which has been produced by the widespread advertising of paint manufacturers.

For decorating and beautifying the home, stenciling has almost unlimited possibilities. It is some little time since the stenciling of sofa pillows and curtains first became a fad. It took hold instantly, not only because of the beautiful yet simple decorative effects it made possible, but also because it required some little exercise of ingenuity to produce the effects. The women who took pride in the decoration of their homes began to plume themselves upon their success in stenciling, and, naturally, to awaken the ambition of their neighbors to excel in the same work. The result was an active demand for stencils and stencil materials, which offerred to paint manufacturers another outlet for their products.

Senciling on Inside Walls.

The stenciling idea was so simple and sensible that it spread very rapidly, and out of the stenciling of fabrics developed the stenciling of walls. This made it possible to produce very handsome effects in wall decoration, and, aided by the introduction of various water colors and flat oil paints, to give impetus to the present vogue of dainty and sanitary interior finish produced by flat toned paint with stenciled decorations. By using this style of finish even the ordinary householder can secure interior decorative effects which he could not get in any other way without considerable expense.

It is strange that more dealers do not carry these flat finishes in stock, and thoroughly familiarize themselves with their uses and advantages A dealer who could advise his customers regarding proper color combinations and suitable stencil decorations would soon work up a large and profitable trade, which would spread itself over the whole year. One of the chief advantages of this trade is that it should not be confined to any particular season. House interiors may be decorated at any time of the year.

Still another form of interior painting has been rendered more artistic and interesting by the employment of stencil work. This is the hitherto prosaic drudgery of floor painting.

There is no better way of freshening an old floor than by treating it to a coat of good floor paint, but it cannot be said that the old time method of painting floors offered any great scope for producing artistic effects. Now, however, the stencil has come to its rescue, and has put floor painting among the decorative arts.

It is a very simple matter to tone up a painted floor by the addition of a stenciled border. Many stock designs of stencils would be very suitable for the purpose, and, by protecting the color with a coat of floor varnish, a permanent effect is secured.

The Idea is Contagious.

Once the stenciled floor idea is introduced in a locality it is bound to spread rapidly. Every floor that is finished in this way is seen and admired by many ambitious housewives, who determine to do some of that work themselves. Floor paints and stencil colors will soon be asked for in large quantities.

Some people who possess a certain amount of ingenuity prefer to cut their own stencils from original designs. The great majority, however, are incapable of producing anything that would be at all ornamental, and they must depend upon stock designs for their work.

(Continued on Page 48.)

A BERLIN PAINT WINDOW.

John Fennell & Son, of Berlin, had a paint display in their window a couple of weeks ago which attracted people into the store and produced some good business.

The idea behind the window was to show the different ingredients which compose the line of ready mixed paints carried by this firm. This was accomplished by placing receptacles along the front of the window containing white lead, white zinc, linseed oil, turpentine and japan. A ribbon ran from each of these receptacles to a large tin in the back of the window, which contained prepared paint, this arrangement conveying the idea of the purity of the materials.

The background was a large Union Jack which fitted nicely into the rear of the window. Advertising posters supplied by the manufacturers were utilized around the edges of the window, forming a kind of frame for the display.

A good many hardwaremen are pushing the sale of paints for interior decoration by keeping a supply of stencils on hand, and loaning them to paint buyers. When sending them out, they make a charge for the stencils, but this charge is cancelled, if the stencils are returned in good order. Still others make the sale of stencils a side line, and manage to work up quite a little trade in them.

There is no question that the introduction of stenciling as an aid to interior decoration has given a decided impetus to the paint business, and greatly increased its attractiveness as a proposition for the retail hardwareman. Moreover, it has also increased his opportunities of practically advising his customers once he has himself acquired a knowledge of his goods and become fairly proficient in the theory of color harmonies.

Do Not Allow Paint Stock to Depreciate

The Experience of a New Dealer — Found Old Stock on His Shelves Unsalable — How an Owen Sound Dealer has Worked Up a Good Trade.

The paint department cannot at any season of the year be neglected. It must be watched closely to prevent depreciation of stock. If left on the shelves for indefinite periods, the best of paint will often become thick. In addition, the labels become faded and torn and, as every dealer knows, it is extremely difficult to sell shop worn goods.

A few months ago, a hardware store in Ontario changed hands. The new proprietor took stock, of course, but he did not have the time to do it thoroughly. He looked over the paint stock, which by the way was piled up on an obscure shelf in a dingy rear corner of the store, and valued it according to the amount in hand. That was in March.

When the spring season opened and the demand for paint began, the new proprietor looked his goods over again and found that he had a sorry looking supply on hand. The former owner had neglected the paint department sadly. During the winter months he had kept the tins in a cold spot and had allowed them to become dingy and dusty. The torn and faded labels detracted appreciably from the selling value of the goods. But the new proprietor found this to be the least of his troubles. People who bought paint from him promptly brought the tins back. The paint had thickened at the bottom of the cans and it was practically unusable. In some instances he had to refund the money. After a number of such complaints had been registered, he came to the conclusion that he could not afford to go on selling the paint if he desired to hold any trade at all. Accordingly, he cleaned out the entire paint stock and put in a new supply. He changed his tactics entirely, placing the paint in a prominent position at the front of the store and advertising liberally. The results soon justified him in his change of front, for he worked up a good business and, what was more important at that juncture, satisfied his customers.

The fault originated with the previous owner of the store. By neglecting his goods, he had allowed the paint stock to depreciate to such an extent as to become unsalable. It was not the fault of the manufacturer; for the stock carried was high-class paint. It had probably been carried for years, however, and had been left in extremes of temperature, exposed indifferently to heat and cold.

Care should be taken at all seasons to make sure that the paints are properly stored. It does not do to pile the goods up during the winter in a rear portion of the store where the temperature frequently hovers around the zero mark. It is much wiser in the fall to clear out the stock, at a reduced price if necessary, than to carry a large supply over the winter months and find in the spring that it is impossible to sell any of it.

Progressive Methods.

Aggressive methods were adopted this spring by John A. Thompson, Owen Sound, in working up a business in paints. Formerly a member of the hardware firm of Thompson Bros., Port Elgin, he had spent some time in the West, finally deciding to locate in Owen Sound, where his brother T. I. Thompson is also in business. He bought out the store and stock of Moran and Son., who were leaving for the West.

Mr. Thompson made many changes in the arrangement of the store, introducing new fixtures and generally altering the stock. The paint stock had formerly been displayed on a series of shelves in a rear position. He altered this by moving an assortment to a counter at the very front of the store where it could be seen by everyone entering. Not being satisfied with the size of the stock, Mr. Thompson laid in a larger and more complete assortment, introducing a number of specialties, which found ready sales. These new lines, he pushed aggressively to the front, not wasting a single opportunity to "talk them" to customers.

His efforts were devoted equally, however, to the necessary task of selling off the old stock. This was accomplished by putting the newer stock on the rear of the shelves and working back.

Accumulations of old stock are brought about by the habit so many dealers have of selling the new supplies ahead of the old. This policy will inevitably result in the gradual collection of odds and ends, which become in time quite unpresentable and, consequently, a dead loss. By selling the older stock first, the dealer makes sure that the goods on his shelves are comparatively new and, therefore, bound to give satisfaction.

Mr. Thompson has now cleared out his old stock and has esstablished a splendid paint connection

Regular Inventories.

An annual inventory does for the hardware store, insomuch as little of the stock carried is of a perishable nature. But in the paint department, conditions are different. It is a wise policy to go over the goods regularly. If any damaged tins are found weed them out by holding a clearing sale. It is still more necessary to see that the stock is properly housed to suit weather conditions.

HOLIDAYS A MIXED BLESSING.

The annual holiday season is about to announce itself and as might be expected of a big hearted trade, hardware employes will not be overlooked. But there is one rather disagreeable feature even of holidays which may be expressed in the words of him who believes that you pay the price for everything you get in this world. The employe receives his two weeks and hies himself to the woods or the watering place feeling that it should be two months rather than two weeks. He tries to forget the work at which he has been engaged for the past fifty weeks and which brought him the money he is now "blowing" if he has condescended to favor some fashionable resort with his presence. But when he returns, and, probably before his departure, he is doing the work or part of that which arises from the absence of some other clerk who is at that time on pleasure bent. If this feature could be remedied the summer vacation would be unmarred by thoughts of what is to follow on the return. As it is, this getting back after your two weeks resembles somewhat that which is termed a brown murky taste and an aching head following a night's indulgence in that which should be labelled "handle with care."

PAINT AND OIL MARKETS

MONTREAL.

Montreal, June 23.—Steadiness has been perhaps the principal feature of the paint and oil markets this week. There has been little or no changes. Turpentine is steady and linseed oil is down only one cent a gallon. The former appears to be rather firm or at least shows a tendency to resist a further reduction although this apparent resistance may not accomplish much. The demand that was mentioned of late is pretty well maintained and if there was not as heavy a demand as desired a month or so ago, the balance may be made up by a longer and steadier trade.

Linseed Oil.—Oil has been rather steady during the week. The present price is but a cent under the figures that held last week. It is not expected that there will be any material change in the price of this commodity for the present.

Turpentine.—There has been no price change during the week and the opinion prevails that the price has reached such a level that it might be expected to remain there. The present quotation is 80 cents a gallon in barrel lots. Supplies have been liberal and with the price down to its present mark there has been quite a hole cut in the stocks.

Arsenate of Lead.—There is nothing new to refer to in this market. Prices are steady and there is still a fair demand. Prices are: In bbls., about 800 lbs., 9c; in half-bbls., about 400 lbs., 9½c; in 25-lb. wooden kegs, 10c; 5-lb. bottles, 12c; in 2-lb. bottles, 13c; in 1-lb. bottles, 14c.

Paris Green.—This article is also being asked for even yet. Stocks are becoming light and the demand which has been heavy at times still shows some life.

Prices are as follows:—In barrels, about 600 lbs., 17c per lb.; arsenic kegs, 250 lbs., 17½c.; 50-lb. and 100-lb. drums, 18½c.; 25-lb. and 100-lb. drums, 18½c; 1-lb. packets, 100 lbs. in case, 20½c per lb.; 1-lb. packets, 50 lbs. in case, 20½c per lb.; ½-lb. packets, 100 lbs. in case, 22½c per lb.; 1-lb. tins, 100 lbs. in case, 21½c per lb.

Putty.—The trade in putty is extensive and is prominent apart from the general orders in which it is usually included.

Existing prices of putty are: Bulk, bbls., $2.20; bulk, cwts., $2.45; bladder, bbls., $2.70; bladder, cwts., $2.80; 25's, loose, $2.25; 25's, cased, $2.70; 12½'s, cased, $2.90.

White Lead.—There is no feature to the white lead market excepting a steady tone. White lead is benefiting by reduced prices of turps and oil together with the building activities now in progress.

Prepared Paints.—Orders for prepared paints are not lacking, showing that reorders are coming in from the trade. Delayed work has carried the demand well into the present and there are signs that it is not yet completed.

TORONTO.

Toronto, June 23.—The market still shows an active tone. All lines are moving well, partly as a result of the settled weather conditions and partly due to the low prices now asked for oil and turpentine. Since the downward trend in these commodities began, there has been a gradual improvement in trade conditions.

The feature of the market during the past week has been the decrease in turpentine. The price is 2 cents less than last week, when it was thought that the rock bottom price had been reached. Linseed oil has also shown a decrease of 2 cents.

Linseed Oil.—The price now asked is $1.07 for raw and $1.10 for boiled. The decline is not accepted as any indication of a weakening market. As trade generally falls off some in the warm season during July and August, it is likely that the demand will not be so great and it is, therefore, quite possible that there may be some decline in price during that period. This is rendered doubly probable by the reports of a good crop of flaxseed in the provinces of Manitoba and Saskatchewan. It should be remembered, however, that the harvest in these two provinces will not come before the latter part of September and flaxseed from that source will not be used by the crushers until well on in October.

Turpentine.—The price quoted here this week is 78 cents, the reduction of 2 cents having been put into effect on Saturday. The best information from the Southern States is to the effect that the market seems now to have touched the lowest possible point. The reduction in price brought about during the past month is fully 10 cents per gallon more than was anticipated early in the season. Reports indicate that they are now suffering in the turpentine belt from lack of rain, and this may possibly interfere with the amount of gum secured. Of course, there is a very considerable accumulation of turpentine at the points of shipment. The demand that has sprung up within the last month, however, indicates that the various consumers have now made up their minds that this is a good time to purchase their supplies for fall and winter.

Rosin.—All grades are showing sympathy with the downward trend in turpentine but none have yet come down to the normal price set in past years.

Putty.—The demand is larger than for some time past. Last week established a record for putty sales for this season and orders are still coming in briskly. Prices are unchanged as follows: Standard putty is quoted at: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same; bulk in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90: bladder, in barrels, $3.

White Lead.—The consumption continues heavy. Outside painting is now in full swing and as a result the call for lead is attaining to highest proportions, this tendency being encouraged by the low quotations for oil and turpentine. Prices remain the same.

Prepared Paints.—Satisfactory demand is reported on all sides. There seems to have been no diminuition in the volume of business since the heaviest part of the spring season. Prices are remaining firm.

Specialties.—All lines are busy. Boating supplies are now in strong demand.

Glass.—There is a large demand for glass at present. Building operations are now reaching the stage where glass is needed. Prices locally remain steady but a firmer tendency is reported on the European markets.

Petroleum.—The demand continues heavy. Prices remain at: Canadian prime white, 12c; United States water white, 13½c; Pratt's Astral, 15½c.

SELECTING SITE FOR PAINT FACTORY.

Following upon the announcement made in Hardware and Metal last week, that Lowe Bros., of Dayton, Ohio, were making arrangements to enter the Canadian field many rumors have been heard regarding the site which would be chosen for their factory.

One rumor which is probably correct but which Hardware and Metal has been unable to verify up to the time of going to press is to the effect that a location on the east side of Sorauren avenue, a couple of blocks south of the Dundas bridges, is now secured by option, but as this is in a high-class residential neighborhood, opposition may develop that would not permit of the plans being carried out, in which case the firm would most likely locate near the waterfront, east of the Don.

The Sorauren avenue site is well equipped with a C.P.R. siding and would be a good situation. The firm claims that the factory would give no offence in the way of unpleasant odors, in that varnishes, paints and colors can now be manufactured without these undesirable elements, sometimes associated with factories of this kind.

Dependon——Light Hard Oil Finish.

Everlastic——Quick-drying Floor Varnish.

Gold Medal——Inside and Outside Varnish.

—These three varnishes meet all the regular demands of your trade—simplify your varnish stock—increase your varnish profit.

If any part of your house or your customer's house is in need of varnishing, the requirement is met by one of these three B-H Varnish Specialties—Gold Medal, Everlastic, Dependon.

GOLD MEDAL—If the front door, porch, ceiling or bathroom wants brightening, Gold Medal, Inside and Outside Varnish, gives pleasing results with its easy flowing action, and will protect the exposed surface with a durable coating, which will fight the effects of moisture and changing temperature.

DEPENDON—If the furniture, wall, inside door, or any interior work, of either hard or soft wood, is in need of finishing or renovating, Dependon dries free from tack in a few hours, and can be polished, if desired, in twelve, stands hard wear and dries with a brilliant lustre.

EVERLASTIC Quick Drying Floor Varnish has these special qualities. It dries hard and makes a very durable coating. It is elastic and tough. It does not show heel marks nor scratches easily. It dries quickly. Has a fine lustre, and can be walked on the day after application.

These varnishes are sold in beautiful, lithographed gallon, half-gallon, quart, pint, and half-pint cans, imperial measure. The packages make a most attractive store display. Handsome lithographed illustrated signs will accompany your order.

BOECKH'S BROOMS

ARE IN DEMAND

The demand all over Canada for them is a result—not an accident. It is the result of a persistent policy of high-class materials and expert workmanship. We use only selected corn in our Brooms. The Brooms are put together in a finished and workmanlike manner. Write for full particulars and prices.

Amatite ROOFING

A Word to the Dealer!

Are you selling the old-fashioned "paint-me-oftenoid" roofing, or are you selling the modern "no-paint" kind called Amatite Roofing? We are spending thousands of dollars every month in advertising to tell the consumers that the day of painted roofings is past and that they can secure at the same price Amatite Roofing *which needs no painting.* ¶ Amatite has a practical, durable mineral surface. Lay it on the roof and it needs no further care. ¶ Every practical user of ready roofings sees the point in a minute. He knows that painting roofs every two or three years is a nuisance and that it costs him money. He knows that he is liable to neglect it, or find when the time comes round that he cannot afford to buy the paint just then, or hasn't the time, and so the roof gets neglected and wears out. ¶ Show him that you have a "no-paint" roofing which costs no more than the old-fashioned kinds and you will get his order. ¶ Amatite is easy to lay, requiring no skilled labor. Nails and cement are supplied free, packed in the centre of the roll. Booklets, samples and other information on request. Address our nearest office.

THE PATERSON MANUFACTURING COMPANY, Limited

MONTREAL TORONTO WINNIPEG VANCOUVER ST. JOHN, N.B. HALIFAX, N.S.

They Stand The Weather Test!

Ability to withstand wide variations of temperature is a first consideration with the building papers and roofings you handle. In this respect our

"Ready" Roofing and "Black Diamond" Tarred Felt and "Cyclone" and "Joliette" Building Papers

are well worthy of your recommendation, and they are, moreover, profitable lines to handle. They can be laid by any ordinary workman, and never fail to give the fullest satisfaction to your customer. We also make a full line of Wrapping Papers.

When The Farmer

comes to a little lull in his spring sowing why not turn his thoughts gently to a money-making line for yourself, and a barn protecting line for him? Look at the cards of

RAMSAY'S BARN PAINTS

See what fine colors they are, how low in price, how pleasing for all kinds of painting on roofs, barns, bridges, fences and all outhouses. Nobody else offers you such a good line or such attractive display for your store. You sell it to the farmer at $1.25 a gallon and make your profit.

Drawing Trade to the Store

Attractive window displays are the best advertisement for your store. Observation has proved to us that merchants who give closest attention to keeping their windows attractive are the real business-getters. They are the ones who are constantly adding new departments and making their stores the live shopping centres.

Strong window displays have always been made one of the most important features of the Sherwin-Williams spring and fall campaigns. These displays are carefully designed by experts who make this work their special study. Force, simplicity and attractiveness must characterize each display. The result is that by making proper use of them the S-W Agent quickly establishes himself as the leading paint and varnish dealer of the town. His windows arrest attention and people do not easily forget that store as the place where Sherwin-Williams Paints, Varnishes and Brighten Up Finishes are sold.

An exclusive Agency for a well-known, high-grade brand of merchandise is invaluable. Sherwin-Williams Paints and Varnishes are known to every one and their reputation for excellence is universal. This combination of undisputed quality, good advertising and intimate co-operation with each S-W Agency is a substantial, profitable business proposition. If there is yet no S-W Agency in your town, better apply for it before someone else does.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS

ARTICLES FOR SALE

FOR Sale, set of tin shop tools in good condition, at low price, McCAGUE & WATSON, Stayner, Ontario. (27)

PATTERN DRAWING

A CHEAP, PRACTICAL and Complete Home Study Course on Sheet Metal Pattern Drafting, Estimating and Construction. Send for particulars to THE SHEET METAL SCHOOL, Box 419, Galt, Ont. (21tf)

MISCELLANEOUS

ACCURATE COST KEEPING IS EASY If you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto.

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COPELAND-CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

COUNTER Check Books—Especially made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for Binders and Monthly Account Systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

BUSINESS GETTING Typewritten Letters and Real Printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms—real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Company, Ltd., 129 Bay Street, Toronto.

DOUBLE YOUR FLOOR SPACE — By installing an Otis-Fensom handpower elevator you can use upper floor as stock room or extra selling space and increase space on ground floor. Costs only $70. Write catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS are devised to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE. INSURE IN THE HARTFORD. Agencies everywhere in Canada.

HUNDREDS OF TYPEWRITERS of every make and condition are being traded in as part payment on the famous Monarch. Price and quality are the levers we use to prevent over stock. We believe we can give the best bargains in rebuilt typewriters in Canada. A postal will bring our catalogue and full information. The Monarch Typewriter Co., Limited, 46 Adelaide Street West, Toronto.

KAY'S FURNITURE CATALOGUE No. 306 contains 160 pages of fine half-tone engravings of newest designs in carpets, rugs, furniture, draperies, wall papers and pottery, with cash prices. Write for a copy—it's free. John Kay Co., Ltd., 36 King St. West, Toronto.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost. "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN PENS. If you have Fountain Pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. GAGE & CO., Limited, Toronto, sole agents for Canada.

PENS—The very best pens made are those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find the pen to suit you.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto (tf)

WAREHOUSE AND FACTORY HEATING SYSTEMS. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

725,000 MERCHANTS use National Cash Registers. We couldn't sell them unless they saved people money. The National will guard your money too. Write us for proof. National Cash Register Co., 285 Yonge St., Toronto

SITUATIONS VACANT

WANTED—Salesmen to handle A-1 side line, paying liberal commission; also paying A-1 salary as soon as you have shown your ability. Wanted only A-1 representatives to answer this advertisement. Box 517, HARDWARE AND METAL, Toronto (24tf)

TRY A CONDENSED AD.

IN THIS PAPER.

NEU-TONE

A PAYING PROPOSITION

It pays, brother, when you can make a friend of everybody that comes into your store. And it is not so hard to do, either.

Take for instance, the paint proposition. If a man comes into your store, and you make a lot of promises that the paint doesn't fulfill — that man will not remain your friend many days.

When you lose him — well — you will lose many more. But on the contrary, if the paint "*makes good*" you make a fast friend and gain a lot of more customers.

NEU-TONE COLORS

(Washable — Sanitary)

Please Everybody — Dealer, Decorator and House-Owner

It pleases the dealer because it is a paying proposition — carrying with each sale the twang of a come-back order. It pleases the decorator because it enables him to give his work a "*style*" that triumphantly asserts itself.

It pleases the house-owner because with it, the house can be finished in the soft, restful, "flat" tints and rich colors of kalsomine. Dust, grease and smoke stains easily removed with a damp cloth. Think of it. It pays to sell this kind of paint, Mr. Dealer. Drop us a postal and we will tell you a few more things you will be glad to hear about this *paying proposition.*

THE MARTIN-SENOUR CO., Limited

Montreal Chicago Halifax Toronto Winnipeg

ROME WAS NOT BUILT IN A DAY

Neither are DOUGALL VARNISHES made in such a short space of time. Each process is carefully watched and nothing is spared in producing a varnish which is well nigh perfect.

QUALITY COUNTS

You know it, your customers know it and WE KNOW IT.

There are many varnishes on the market, some of them are more or less good; some are indifferent; some are distinctly bad.

With DOUGALL VARNISHES you take no chances. There is no varnish made which can compare with it in quality, appearance and durability.

On receipt of a card we will send you a booklet on varnishes which every Hardware Dealer should possess—It's free.

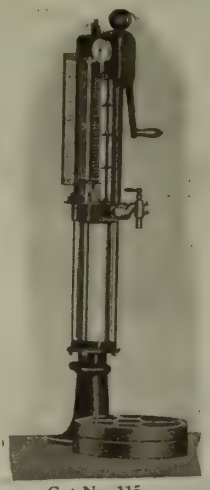
A Dollar Talk

On Paint Oil Storage.

How much oil is:

Soaked up in the floor?

Smeared over the measures and funnels?



Absorbed by the barrel?

Wasted by over-measure and spillage?

Spoiled by evaporation?

How much is your fire hazard increased?

The answer to these questions shows why it is profitable to buy a

Cut No. 115.

BOWSER STORAGE SYSTEM

The pump measures the oil accurately, counts the gallons and computes the charge.
No Measures nor Funnels.
The steel tanks are air-tight and fire-proof.
No danger from fire. No loss from waste.

The Bowser Buys Itself

Do You Know the Main Facts About Our Two-Coat Combination Standard Turpentine Shellac and G. P. Hard Oil Finish?

Send for our sample on wood and judge for yourself.

Note particularly the remarkable *surfacing* and *holding up* or supporting properties of *Standard Turpentine Shellac.* It dries semi-flat, does not raise the grain of the wood and requires little or no sandpapering.

A single coat of our *G. P. Hard Oil Finish,* on account of its intrinsic body, produces over *Standard Turpentine Shellac* a really remarkable finish, as demonstrated in our *Two-Coat Combination.*

For first coating open grained woods, also paste filled woods, nothing equals *Standard Turpentine Shellac.*

All Standard Varnish Products are manufactured by International Varnish Co., and sold only in Full Imperial Measure Cans.

The best varnish advertising you can put inside your store is this Berry Label.

It is the one label that the buying public KNOWS at sight.

It is the one that looms large in the pages of the leading magazines.

Wherever we advertise the varnish we show the label.

It has a trade-mark value that makes every Berry Can on any dealer's shelves a quick index to the high-quality standard of the store.

You can't put any better advertising than that in your store.

Berry Brothers' Business Builders

Paint and Varnish Removers

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "'LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	Name of Brand.
The Sherwin-Williams Co., Montreal, Canada.	"Taxite"
International Varnish Co., Ltd., Toronto, Canada	"Klensa"
Pratt & Lambert, Inc., Bridgebury, Ontario, Canada	"Expedite"
British American Paint Co., Victoria, B.C.	"Bapoo"
Mount Royal Color and Varnish Co., Montreal, Canada	"Scrape-off"
James Robertson Co., Ltd., Toronto, Canada	"Robertson's Paint and Varnish Remover"
Sanderson Pearcy Co., Ltd., Toronto, Canada	"Devolite"
Stewart & Wood, Toronto, Canada.	"Solvo"
Martin-Senour Company, Ltd., Montreal, Canada.	"Martin-Senour Paint and Varnish Remover"

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

A CONVENIENT CLOTHES RACK

This High-grade rack can be fastened to the wall near a stove or range.

When closed it projects only 1 1-2 in. When extended, and all the bails are down, it stands out only 14 ins. from the wall and has a drying space of 19 feet.

Each bail can be lowered separately without interfering with the others.

The sides of the rack a e made of hardwood—the bails of galvanized steel, bent so as to be self supporting when in use.

The price of the rack is $1.25 retail, manufacturers' price $9.00 per doz.

This is a sure seller. Order from your wholesaler or direct from us.

THE CONNOR BALL-BEARING WASHER

With the hinged cover now used on this Washer it is no longer necessary for the operator to place the cover and rubbing board dripping wet onto the kitchen floor. With this hinged rubber and cover the water drips back into the machine. It is easily handled And other features of this machine are a detachable tub; no iron running through the bottom of the tub; Cypress Tubs: nicely finished Ball - Bearings and Motor Springs do most of the work.

Have you the agency for this washer? If not, write at once for sample, prices, terms, etc. You will find it the most satisfactory machine you ever handled.

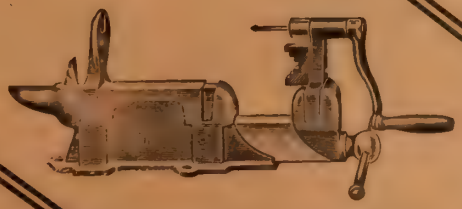
COMBINATION ANVIL AND VISE

All parts are made from selected materials, specially tempered.



The extra parts are easily put on and taken off. There are no bolts or screws to get lost or become rusty.

This combination cannot be equalled for quick sales and reasonably large profits. It needs but a display to make sales.

Write for Price List

No workshop is complete without a TAYLOR-FORBES No. 20 Vise. It combines all the advantages of Five Tools for the price of one and is a great time and labor saver of unexcelled quality.

By the use of its different combinations you have an anvil, a combination anvil and vise, a drill press, a saw clamp and a pipe vise—a repair shop in itself.

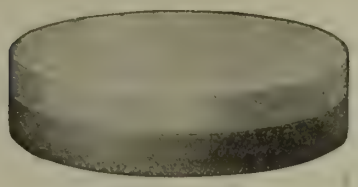
The IRONCLAD *Alarm*

"It Rings to Beat the Band."

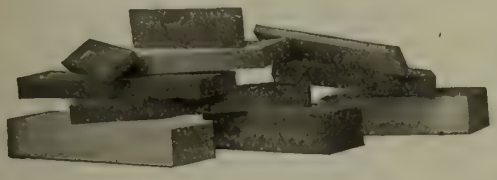
IF we placed our IRONCLAD movement in an ordinary alarm case, the chances are it would *turn turtle* within a year. And if it lived to tell the tale, it would be to *tell a tale*—for it would get so *clogged* with dust, it could not tell the *truth.*



But it's CLAD in heavy IRON armor and it can't *keel over.*—It's stocky, sturdy, steady.—If it's *cleaned* every other year, there's *no telling* how long it'll last.

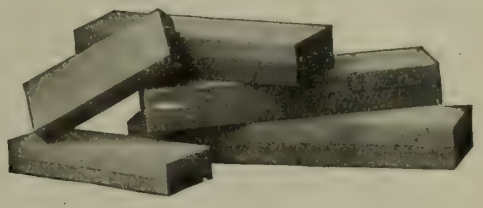
Packed 12 in a box with advertising matter. Dealers' names printed free on dials in lots of 24. Height 5 inches. Dial 2¾ inches. Weight 2½ lbs. Rings 35 seconds; can be shut off at will.

Stocked by 28 Canadian Wholesalers.



The Western Clock Mfg. Co.,

La Salle, Illinois.



Carborundum Sharpening Stones

Never stay long on the shelves—they sell too fast—the demand is too great. Every dealer wants a stock that keeps moving. Carborundum Sharpening Stones are made to meet every sharpening need from the kitchen to the work bench – from the factory to the farm —they all give a tool a better edge in less time, last longer and do not glaze over. Made from Carborundum—and there isn't anything that is so hard, so sharpening or fast cutting.

The complete Carborundum line, including stones, hones, strops, scythe stones, knife sharpeners and Carborundum paper and cloth, etc., is described in the special catalog. Ask about our free display case offer, discounts, window displays and other trade helps.

THE CARBORUNDUM COMPANY

Cable Address: Carborundum. Lieber's Code Preferred.

Have You Seen These

New "Yankee" Tools?

No. 1530 Hand Drill for holes up to 3-16 in.

Takes round shank drills. Has the famous Automatic Double Ratchet movement the same as our other "Yankee" geared Drills, so helpful in many ways especially at close quarters where only part turn of crank can be obtained. The wood Handle has magazine for drill points. A fine tool for metal workers, amateur mechanics, etc.

No. 130 Quick Return

Same tool as the No. 30 but with a Spring inserted in the Handle to drive the spindle back quickly, ready for the next push. A great advantage for overhead work or where only one hand can be used. Takes all the Attachments used in the No. 30.

No. 75 Push Brace

Bores holes up to ⅜ inches in hard woods and ⅝ inches in white pine, quicker and easier than a Bit Brace. Drives and draws screws—takes all the small tools and works in close quarters where a Bit Brace cannot be used. Bearing down on the Handle drives it with that quick and easy motion of the "Yankee" Spiral Driver.

They are catching the Mechanics.

Disston

SAWS—TOOLS—FILES

The tool that is "cheapest in the end" is usually the one that is a little more expensive "in the beginning."

The initial cost of Disston Saws, Tools and Files may be slightly higher than that of the ordinary kind, but Disston lasts longer, and is more easily kept in condition, permits faster, more efficient work, and after all, is more economical.

Disston Crucible Steel is exceptionally adapted to making high-grade Saws, Tools and Files. Its uniformity and durability, in conjunction with expert shop treatments, have made Disston Tools the *best* on the market.

Many of the most widely favored types of saws, tools and files have been designed and invented in the Disston Works. Disston improvements and innovations have always set the pace, have always led the industry.

Canadian Works—Fraser Avenue, Toronto

TRANSPAROL

Transparol is the finish that makes every surface a mirror, and is the leading finish for railroad cars, automobiles, and all other vehicles, also for leather.

Transparol is a particularly choice finish, and one that is positively indifferent to all effects of

Atmosphere
Acids
Oils
Gasoline
Salt Water, etc.

Transparol is the best preservative of wood known, and is equally as good a preventative of rust and corrosion of metals.

The gloss finish given a surface by an application of Transparol is so great that Transparol is the wonder of the paint and varnish experts.

Transparol comprises the following universal qualities:—

Flexibility
Elasticity and
Durability

History records that in Egypt they had a fluid which resisted the atmosphere for ages, and which modern civilization up to date has never been able to produce.. THE OLD EGYPTIAN PRESERVATIVE HAS BEEN RE-DISCOVERED.

Transparol stands alone among the multitude of paints, varnishes and shellac products like the pyramid amidst the ruins of Old Egypt.

Transparol is indestructible; and when all other products have worn away, Transparol will still be there.

Transparol is sold on a guarantee to be satisfactory.

For Exterior and Interior Use

Explain the Advantages of A "Tobin Gun" to Him

If you are a dealer and have been selling shot-guns for some time, you will know that the gun with the simplest mechanism, the one with the fewest parts to go wrong, is the gun that appeals to the sportsman. If, then, you can offer your customers Tobin Guns you place yourself in a position to supply the demand for reliable shot-guns in your locality. The Tobin Simplex Gun

Tobin
Simplex Guns

is built for service. It will please the "Old-timer" who will recognize it as a thoroughly reliable gun, and the veriest novice will appreciate the simple, strong construction of the working parts and the ease with which it can be taken apart and cleaned. Here is the gun with the selling power behind it. In every district we want to be represented by some energetic dealer, one who will show the Tobin Gun to his customers. and to such a dealer we offer terms that make it decidedly profitable for him.

Tobin Guns are going to be extensively advertised this year, and we wish to make our facilities for distribution equal to the demand we will create. Why not take advantage of this publicity and get the benefit that will accrue from it? Dealers will profit equally with ourselves and in selling Tobin Guns you have the double advantage of handling a well-advertised article and one that has only to be shown to convince the buyer of its superiority.

Whether you are now handling shot-guns or not,—write to us. We would like to place in your hands the complete facts about Tobin Guns, show you how profitable a part of your business you could make them, and explain to you how we co-operate with the dealer in bringing this Canadian-made Gun before the public.

Write to-day. There are several districts where we lack dealer representation; districts where there is a growing demand for Tobin Guns, which we are forced to supply direct The dealer who represents us will get the benefit of this trade.

Remember a guarantee of quality and satisfaction goes out with every Lubricator.

We make two lines of Sight Feed Lubricators, as follows:

THE K-I-N-G is a medium-priced Lubricator, put on the market for the benefit of those who do not want to pay too much and still get a good serviceable cup. It is specially designed for threshers' use, for mining and lumbering plants, etc., where cups get more or less hard usage. It has an excellent sight feed glass compared with most of the ordinary lubricators. In all it is a very popular and thoroughly reliable lubricator, and has an extensive sale everywhere in Canada.

THE Peerless is strictly high-grade and used by stationary engineers or where the better class of engines are run. It is heavy in construction and very strong and durable. Gives a steady positive feed. Special filler that enables one to use a large spouted oil can without wasting any oil. Special drain valves that do not jar off and get lost.

Spoons Forks and other pieces stamped

1847 ROGERS BROS. MERIDEN BRITANNIA COMPANY X S TRIPLE

Are the Original and Genuine "Rogers" Goods

"Silver Plate That Wears."

ACTUAL SIZE TEA SPOONS.

Although there are several makes of Rogers goods, there is but one **1847 Rogers Bros.**

DESIGNS IN

1847 ROGERS BROS.

Every piece of **1847 Rogers Bros.** ware has back of it an absolute guarantee.

brand are the equal of the best sterling silver, in pattern, finish and general excellence of making—the result of over sixty years' experience, combined with the determination to produce the best at whatever cost. The "silvery" effect so pleasing to the eye and so often lacking is exemplified in these designs in all its beauty.

IT IS SILVER PLATE THAT WEARS

The most widely known brand of silver plate. It has the confidence of the public.
It is the standard to which other silverware is compared. The Trade Mark has been a household word through three generations.

MERIDEN BRITANNIA CO., HAMILTON, CANADA

The Faneuil Pattern

"Silver Plate That Wears"

The Faneuil Pattern is one of dignity and grace—its lines suggestive of the Colonial—from which period it has taken the name of Faneuil.

In quality and Workmanship it is upon the same high plane as all goods bearing the stamp

1847 ROGERS BROS. X S TRIPLE

There is every indication that the new design will soon establish itself as one of the most popular of this well-known brand.

MERIDEN BRITANNIA CO., HAMILTON, CANADA

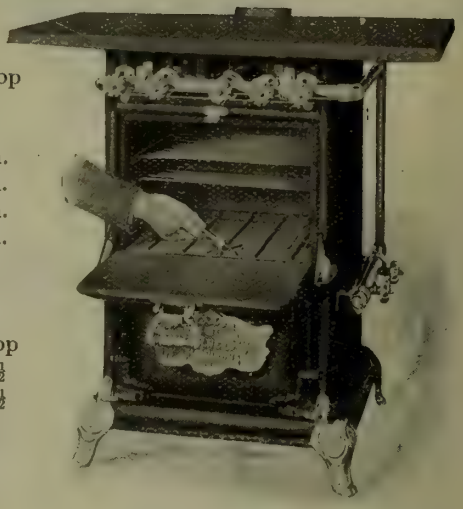
Hamilton Jewel Gas Ranges

for MANUFACTURED or NATURAL GAS are made in over 125 VARIETIES and Every Requirement can be Supplied.

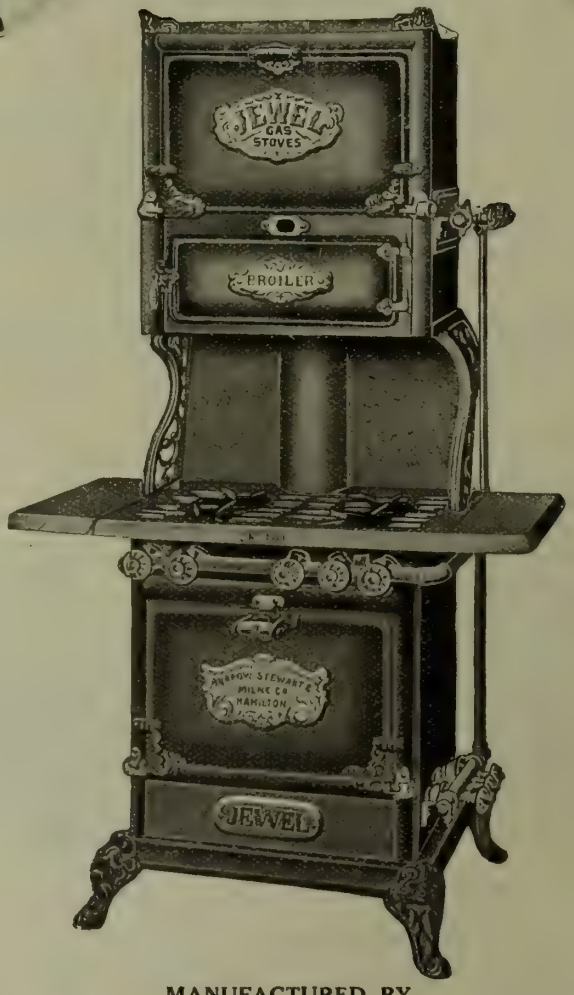


Single Oven

No.	Size of Oven	Size of Top
15	17x12x12 in.	22x19 in.
20	17x12x12 in.	32x19 in.
30	16x16x11¾ in.	35½x22¼ in.
40	15¼x16½x11 in.	35½x22¼ in.
50	16½x16½x11 in.	36¾x22¼ in.
60	18x16½x11 in.	38½x22¼ in.
65	19x18½x12 in.	39x24¼ in.

Double Oven

No.	Size of Oven	Size of Top
70	15¼x16½x11	15 x16x8½
80	16½x16½x11	16¼x16x8½
90	18x16½x11	18x16x8½
95	19x18½x12	19x18½x8



The Ovens have Spring Balanced Drop Doors. The Valves, Airmixers and other trimmings are all nickel plated Galvanized Dust Tray under Top Burners. The body of Range is Asbestos Lined. All these Ranges are equipped with **Grave's Patent Safety Lighters** —see cut above. This lighter is far superior to the old style Pilot Light. It is **absolutely safe** because the oven door **must be opened** before the Oven Burners can be lighted, and thus all possibility of explosion through accidental accumulation of gas in the oven is avoided.

A **Thermometer** for registering the heat of Oven can be attached to the Oven door of any Hamilton Jewel Gas Range.

These Ranges can be fitted with **Hot Water Heating** attachments, or with Reservoirs or Side Broilers, and Top can be extended if desired.

Large Hotel Ranges

are supplied in every style.

Elevated Oven

Ranges are made in many different styles which are fully described in our **Catalogue No. 69.**

We also make various styles of

Side Oven

Ranges, which we have not room to illustrate here.

If you have not got our catalogue, write us for one.

All Ranges are thoroughly tested before leaving factory.

Each Range is fitted with

Jewel Adjustable Needle Valve

which gives perfect control of gas supply. For accurate mechanical construction and satisfactory working, no other valve equals it.

Our "Canadian Howard" Double Radiator

FURNACE

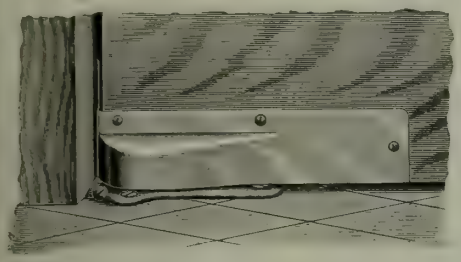
is an excellent example of a perfectly constructed warm air furnace.

Our guarantee safeguards the purchaser.

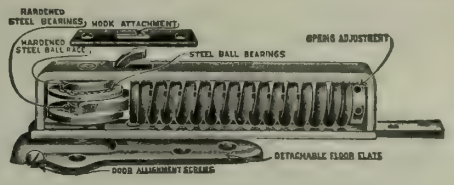
The "Howard" furnace is absolutely the most reliable and most efficient furnace of the day.

The enormous Radiating Surface is one of its greatest features.

It means economy in fuel as the heat and gases have to pass through two radiators, thereby greatly reducing the heat by the time it reaches the smoke pipe, giving extra heat that would otherwise go up the chimney.



We employ only skilled mechanics and the highest possible grade of materials.



It will pay you to investigate this guaranteed economizer. Write at once.

The C. NORSWORTHY CO., Ltd., St. Thomas, Ont.

ASK US WHY

If you want to know more about "STANDARD" DOUBLE ACTING SPRING FLOOR HINGES, let us tell you a few dealers, the LARGEST and BEST, who believe in keeping UP-TO-DATE and are pushing the "STANDARD" line.

THE STANDARD MFG. CO., Shelby, Ohio, U.S.A.

"GOOD CHEER" Sidewall Registers

A line in four sizes, of uniform design throughout. Neat and tasteful pattern, and supplied in black japan, ordinary oxidized or full oxidized finish, with enamelled green fan. Our ordinary oxidized will about equal the more expensive full oxidized finish of other makes.

Positive acting fan—stays exactly where set, and when closed locks tight. No springs, etc., to weaken or loosen.

The price? It will pay you to inquire.

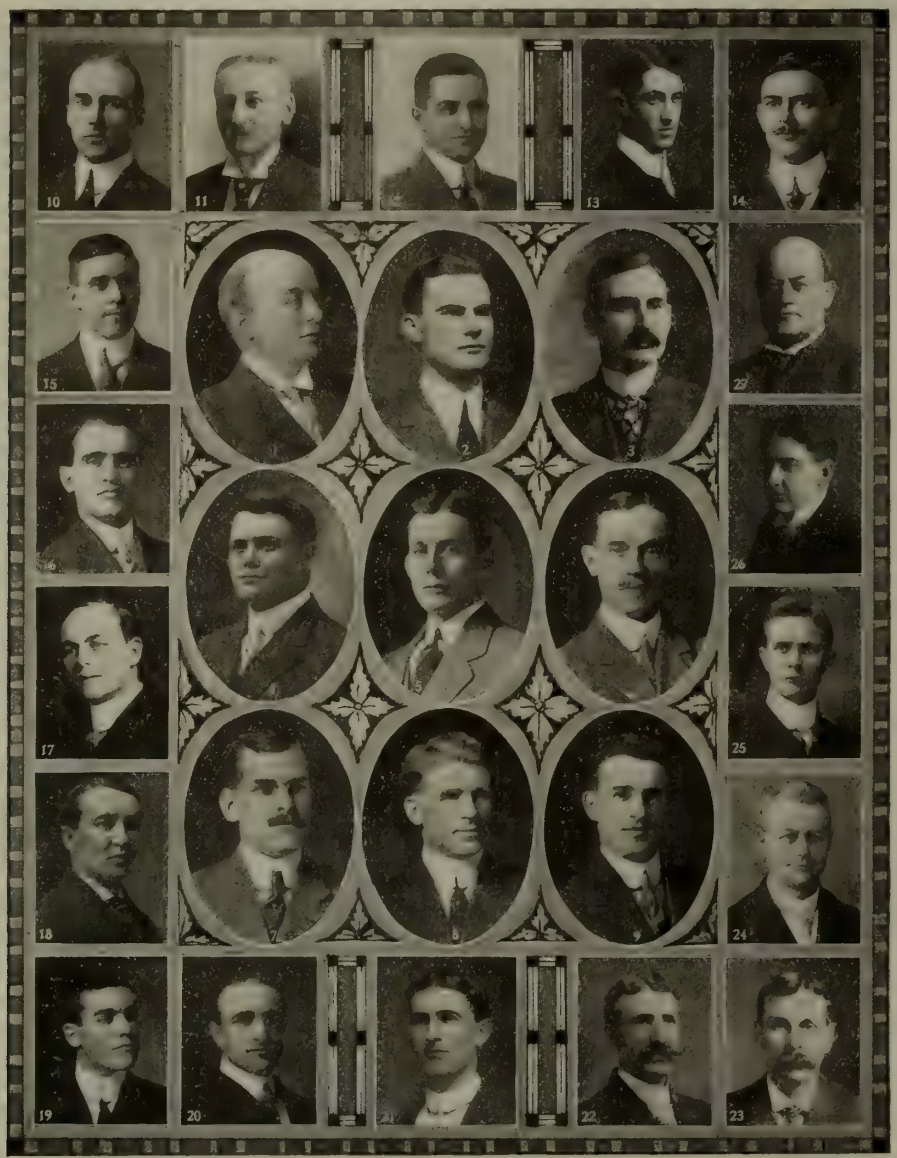
Mr. Dealer: Get Out After The Ventilator Trade

Look around and see just where Ventilators could be used advantageously in your town. Get the agency for Acorn Exhaust Ventilators, and you'll be surprised at the results.

With fresh pure air in the factory, employees will be able to do better work and more of it. The Acorn Exhaust Ventilator will take care of that. Then, too, pure air is more easily heated than foul air.

Acorn Exhaust Ventilators are designed on the most improved methods of ventilation. Highly recommended by builders and contractors, Acorn Exhaust Ventilators are newest and best. For factories, churches, etc., they are unequalled.



Give this suggestion a trial. When you decide to do so, just write us and we will furnish you with full details.

FORD AUGER BITS
are years ahead of competitors

It has always been our aim to manufacture a bit that would be better than other BESTS. We've succeeded. Tests have proved it. Tests made by men who used the same bit for years—thought there was none like it—wouldn't use any other, but heard so much of the FORD and its wonderful Patented Concave Twist that they tried it—working it alongside of their favorite bit. Lo, and behold, the FORD did BETTER WORK at almost DOUBLE the SPEED. This meant money to them—money in both time and quality of work. They used the FORD again and were further convinced of its superiority. Today these men and thousands of other discriminating workmen use the FORD in preference to all others.

Easy and Profitable to Sell

Our terms allow you a generous profit and our advertising will create a demand and make sales easy for you. Each FORD Bit is backed up with our solid guarantee, and any dissatisfaction will be speedily made right.

Ford users are profitable customers, for once you sell a man a FORD you've secured a steady buyer. We want you—we'll help you. Will you write us? We'll send you a handsome illustrated catalog, descriptive circulars, our terms to you and name of your nearest jobber.

LOT NO. 5.—Wagons and Parts, as per List		7,191.00
Total.....		$308,386.95

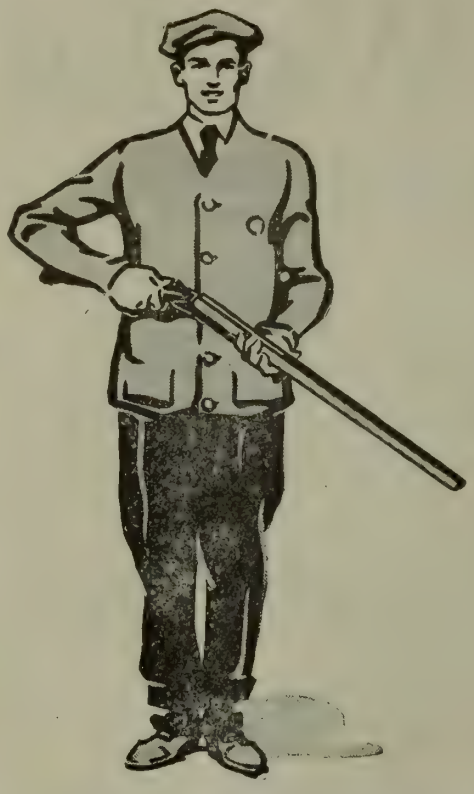
Tenders will be received for the five lots together, in which event Tenderers must state the amounts tendered for each lot separately. Tenders will also be received for each lot separately.

The highest or any tender not necessarily accepted.

Lot No. 1 is offered subject to conditions of sale which may be inspected at the offices of the undersigned.

The Purchaser of Lot No. 1 must assume the mortgage and interest thereon. The Purchaser of the five lots will be given the benefit of all sales and manufacturing since April 22nd, 1911, and must pay all outlays for labor, expenses, and for supplies and materials purchased since such date.

TERMS OF SALE.—One quarter cash (10 per cent at time of sale) balance in 3, 6 and 9 months with interest at 7 per cent. per annum, secured to the satisfaction of the Assignee.



A certified cheque for 10 per cent. of the amount of tender must accompany each tender, which cheque will be returned if tender is not accepted.

Other conditions of sale may be seen upon application to the undersigned.

Toronto Stove Firm Enlarge Store

Sixty Stoves are Shown on the Main Floor—Basement is Used as Showroom for Second-hand Stock—Extensive Adverti ing Campaign Followed Out—Two Outside Canvassers Now at

A. Welch & Son, Queen Street West, Toronto, have just completed their new store and have now one of the largest and best-appointed retail stove stores in the country. Some months ago they decided that it would be necessary to enlarge, and, with that object in view, they purchased the block in which they were located. The store next to their own was then absorbed, the partition being removed and a new front of most imposing appearance put in. Other improvements were made and to-day Welch & Son have an establishment of which they may well be proud.

Altogether they have a floor space of 27,000 square feet, but this includes the plumbing, tinning and manufacturing departments. The store itself is 40 by 98 feet. The large space thus provided is given over almost entirely to the display of stoves, as will be seen by the accompanying illustration. Some plumbing goods are shown and a handsomely assorted stock of lighting fixtures is carried.

The interior arrangements have been carried out with an eye to appearance as well as convenience. The ceilings are of metal and the walls are handsomely finished with green burlap and red wall paper. The floor is of hardwood and, as the ceiling is 14 feet high, the store is always light and wholesomely airy.

At the rear is the office, 44 feet by 15, on a slightly higher level than the store. In the basement a showroom has been fitted up for second-hand stoves. It is kept well lighted and a large business is done in that line. The basement is 40 feet by 60, and it is kept full of second-hand stoves at all seasons.

Store Well Arranged.

The main floor at present holds sixty stoves, in addition to furnaces and plumbing fixtures. It could, without undue crowding, hold more. It is not likely, however, that any effort will be made to enlarge the stock now shown, as Messrs. Welch & Son believe in giving plenty of space for adequate display to each stove. At present there is room to turn the stoves around so that customers can inspect them from every angle. To facilitate inspection of this nature, all the stoves are on castors. Chairs are placed at intervals for the comfort of customers and the appearance of the showroom is materially heightened by occasional palms, ferns and rubber plants.

Large Window Space.

The front of the store has been thrown into one large window, with entrances on both sides. In the unusually large space thus afforded, the firm show an assortment of their best stoves and plumbing wares.

The front of the store presents a highly attractive appearance. Large signs serve to catch the eye of the passerby

Interior View of the New Store of A. Welch & Son, Toronto.

Exterior View of the Large Stove Store of A. Welch & Son. The Picture was Taken the Day Before the Coronation as the Decorations Attest.

and to proclaim the various lines which Welch & Son handle.

The Plumbing Shop.

The plumbing shop is to the rear of the offices, with an entrance on a side street. It is large and well stocked.

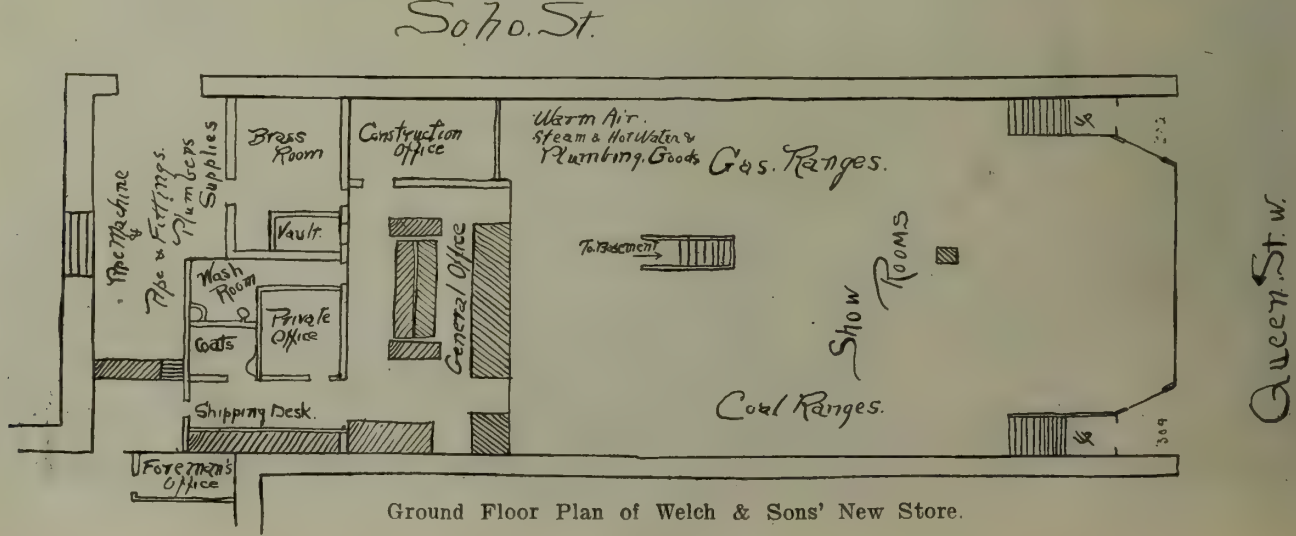
Altogether, Welch & Son employ 64 men at the present time. In the fall, when they will be at their busiest, the staff will number nearer the hundred mark.

Aggressive Methods.

As might be expected, from the wide scope and the rapid growth of the business, this firm follow aggressive methods to secure custom. In the first place, they believe in advertising, and apply their belief in a very thorough way. In addition to advertising in the local papers—and they use liberal space—they have taken up billboard advertising as well. The name Welch & Son stares at passersby from every conspicuous corner in Toronto, and is in turn stared at by many thousands every day.

"Our idea is," explains T. A. Welch, "that we want to impress one name on the public so strongly that, when they think of stoves, they will think of A. Welch & Son. That is more important than getting up copy calculated to make people laugh. To impress the name so that people will not forget it—that's the main essential in store advertising."

Welch & Son are succeeding most completely in this object. Their poster ads. are all strongly worded and attractively designed.



Canvassing Started.

During the past fortnight they have inaugurated an outside sanvass system, which bids fair to bring splendid results. Two competent men have been added to the staff for this purpose. They will devote their time wholly to outside work, following up prospects and "digging" for new business. Both men have had experience as outside salesmen in kindred lines.

This is the first time that Welch & Son have taken up outside canvassing and they are confident that they will get satisfactory results.

Checking up Material.

In the plumbing and tinsmithing departments, a system of checking material is used which obviates all possibility of loss through carelessness. In a large shop serious losses are bound to occur if some method is not devised to check up and charge all the material that goes out. Furthermore, it is not an uncommon experience to have material left on the ground when jobs are completed through the forgetfulness or carelessness of employes.

Ground Floor Plan of Welch & Sons' New Store.

The firm have now adopted the policy of issuing material through one man, who is detailed to look after that department. Before starting out to work, each employe secures what he requires and enters it all up on a slip with his signature. If at any other time during the day he finds that he requires more material, he either telephones or calls at the shop for it. These supplies are in turn entered up. At night, everything left over is taken back to the shop and credited.

By following out this system it is possible to account for every foot of pipe and every joint that goes out of the shop. Each job is thus charged fairly and accurately with the material used.

Getting Best Results.

As a result of the progressive methods they have adopted, Welch & Son are getting wonderful returns. They sell stoves all the year round. At the present time they are selling a certain number every day, despite the fact that in the opinion of most stove dealers it is impossible to dispose of stoves during the summer months.

Hardwaremen Should Handle Electrical Goods

"Flashlights" and Electric Fans Have Much to Recommend Them—How Some Dealers Have Gone About Selling Novelties—Department Requires Attention.

The handy "flashlight" has gained a tremendous vogue in the United States. People carry pocket flashlights as readily now as a watch or a penknife. It is found to be quite as handy as either under some circumstances and consequently has become more than a fad. It is quite possible that some day it will be regarded as a necessity. All hardware stores carry goods of this description and find the demand heavy and consistent.

Electrical novelties are not nearly as well known in this country but they are gradually coming to the front. It is a reasonable assumption that the time is not far off when they will be quite as much in demand here as on the other side of the border line. In the first place, the usefulness of electrical articles is bound to bring them into favor sooner or later. Take the pocket flashlight, for instance. By pressing a spring, a light is secured sufficiently large to serve if the holder is visiting the cellar at night or has lost something on the road or in a hundred and one cases where it is necessary to look for some article in the dark. If a billiard ball bounces off the table and rolls to a secluded corner, it is not necessary to grope under the couch with matches or turn the furniture upside down in order to find it. The flashlight locates the lost articles without any delay. If a farmer goes to the barn at night, he does not need to light a lantern. By the light this little pocket instrument affords, he can do all his chores quite comfortably and with no danger of fire.

The flashlight has other advantages to offer aside from expediency. It does away with all danger of fire. In households where it is necessary to carry a lamp or to light a gas jet in order to visit the cellar at night, there is always some danger. The farmer knows the danger of carrying lights to a barn and should therefore be one of the first converts to the flashlight. At the same time, it sells at a price, which places it within the reach of all and it is of such convenient size that it can be carried conveniently in a coat pocket.

Other Electrical Novelties.

There are other electrical goods which have quite as much to recommend them to public favor. The electrical toaster is a handy article, which now retails at a popular price. In all places where it has been offered, it has proven one of the very "best sellers." Electrical irons are also coming in and at the present time a splendid opportunity is presented to handle small electric fans for household use.

A Good Sale.

In the Rice Lewis retail store on King West, Toronto, an especial effort has been made to sell electric fans during the past fortnight. A supply has been kept prominently to the fore and one window has been used to display them. Aided by unusually warm weather, the staff have succeeded in selling a large number of the fans.

There is, undoubtedly, a great opportunity for business in this one particular line. The retail price of the fan is sufficiently low to bring it into popular demand, if the dealer only realize the wisdom of pushing this line. The writer recalls a case where a hardwareman last year worked up a splendid business by sending out a circular to a number of his well-to.do customers. A picture of a family at the dinner table was shown, with an electric fan in the centre of the table, wafting a current of cool, refreshing air in all directions. Under the illustration had been printed: "Eat your meals in comfort." A bright talk followed, touching on the great comfort to be derived during the summer by using an electric fan. By computing the number of hours that it would run and comparing the time with the price, it was demonstrated that it cost in reality only a small fraction of a cent per hour.

A great many sales were made as a direct result.

A Help to Salesmanship.

By placing fans on the top of showcases in the stores, the efforts of the staff to make sales in that line will be assisted materially. Customers enter from the hot streets and find the cool current from the fans very comforting.

"Hot day," remarks the clerk, as he attends to the wants of the customer, "We don't feel it much in here. You see those little fans keep the place as cool as a refrigerator."

"By the way," he remarks, later, as the customer is preparing to depart, "we are selling a lot of these fans for use in private homes. The price is very reasonable. Wouldn't you like to buy one?"

The customer has had an opportunity to compare the coolness of the store with the stifling heat of the streets and the unpleasant stuffiness of his home and office; he knows, therefore, that the article is one worth having. If the clerk is sufficiently adept in handling the subject, he will make a sale nine times out of ten.

Finds Department Profitable.

"I have handled electrical goods now for some time," said a hardware dealer the other day, "and they are highly profitable."

"I realize," he added, "that it is necessary to pay considerable attention to such goods in order to make anything out of them. When I first put in a stock of fixtures and electrical novelties, it struck me that they would sell themselves the same as any hardware line. Acting on that supposition, I let things drag along and, as you may suppose, sales did not come very fast. People did not know I handled such goods, I suppose. At the time I did not realize that and pretty soon I became discouraged and nearly convinced that the hardware store was no place for electrical goods. Before giving it up, however, I decided to see what a little boosting would do and I started to feature the goods. Well I am in the business yet and intend to stay. I have a splendid trade now both in fixtures and novelties."

This would apply in practically all cases. In order to make a real success of selling electrical goods, it is necessary to do considerable "missionary" work. Being somewhat in the nature of innovations, they require expert exploitation. After they have been given a good introduction to the public and their usefulness has been demonstrated, the the goods will sell themselves.

ANOTHER RECORD IN BUILDING PERMITS.

That Canada is still experiencing her growing time is amply shown in the monthly reports of building permits issued by the principal cities.

The report for May is especially gratifying, showing as it does an aggregate from the different cities reporting, 84.2 per cent. in advance of last May's figures. Some of the cities report phenomenal increases, Guelph heading the list of percentages with an increase of 1215.9 per cent. Prince Albert stands second, with an increase of 740.2 per cent., and Calgary's record is 604.7 per cent. ahead of last May. Windsor scores an advance of 223.4 per cent.

In actual figures, Calgary has outstripped every other city in the Dominion, May's building permits in that city having reached the colossal total of $3,700.000. Toronto, with an aggregate of $2,643,755, stands second, and Vancouver third, with $2,488,050. Winnipeg reported permits amounting to $2,229,480, and Montreal $1,703,140.

Decreases are reported from only four important centres, and in one case the decline was infinitesimal. Port Arthur shows 67.7 per cent. less building permits than May, 1910. Fort William has a decrease of 55.1 per cent., and Stratford reports a decrease of 53.3 per cent. The other decrease is reported from Montreal, but is really negligible, as it amounts to only 0.3 per cent. All the other cities can show substantial increases.

A very satisfactory feature of the situation is that a good proportion of the smaller towns throughout the country also report brisk building operations, and there is no question about the prosperity of the building trades at the present time.

There is no line of business so deeply interested in building expansion as the retail hardwareman. Building means the consumption of countless articles which are handled by the hardware store, and readers of this paper will have special reason for congratulating themselves that Canada keeps on growing.

THE EARLY CLOSING MOVEMENT.

If reports from different sections of the country are to be accepted as indicating the general trend, hardware dealers are gradually breaking away from the custom of remaining open every evening, all the year around. The tendency to close down at a more reasonable hour is a sensible one, and it is hoped that the idea will meet with universal acceptance.

It has been and still is, the custom in many sections to keep open every evening until ten or eleven o'clock. This rule is not confined to the small towns and rural communities by any means. In some parts of Toronto, the hardware stores are open for business from early dawn to late at night. It is doubtful if the dealer who thus makes himself a slave to his business gets any farther ahead as a result of his long hours and steady application.

In a strictly factory section, it is possible that the evening trade is of such proportions that the hardware dealer cannot afford to close, but in a great majority of cases, it is possible to get customers into the habit of doing their shopping during the day. We have yet to hear of a case where business has been lost as a result of a store being closed at a reasonable hour.

It is very frequently the case that one merchant remains open because his competitors do. There is a marked tendency now for the dealers in each community to mutually arrange on an earlier hour of closing. This is very gratifying, as it evidences the better feeling between competitors which is becoming a feature of present trade conditions. The good work is only in an embryonic stage, however. A wider application of the early closing rule, particularly during the summer months, would prove a great benefit.

THE DEMONSTRATION IDEA.

Readers of Hardware and Metal cannot fail to have been impressed with the progress that has been made by the demonstration idea, during the past few months. This scheme, though an old one in the grocery and dry goods lines, is a comparatively new one in the hardware store, the hardware dealer having previously been of the opinion that there was little in his store to demonstrate.

Demonstrations seem to make a special appeal to the feminine mind, and, where they have been tried, it has been found that they were the means of getting unusual numbers of women, into the store.

Demonstrations of stoves have been very successful where they have been tried, possibly the greatest hit having been made with oil stoves. In nearly every case, sales have resulted on the spot, from the demonstration of these stoves in actual use. No amount of talk could have so fully convinced the cautious housewife that it was possible to manufacture oil stoves which were safe, free from odor, and good cookers.

Paint and varnish specialties have been introduced in many localities, in much the same way. People have been brought into the store by advertising the demonstration in advance, and have been shown what could be accomplished even by inexpert hands, in brightening up furniture, graining and varnishing floors, and improving the appearance of many articles around the house.

A MULTIPLICITY OF HOLIDAYS.

Retail merchants in general have been somewhat disorganized by the numerous holidays which have been proclaimed during May and June. Victoria Day and the King's Birthday came very close together, and, in the majority of towns, either one of them was celebrated in a more or less perfunctory style, without business being completely shut down. Similarly, Coronation Day and Dominion Day coming within ten days of each other may prove somewhat unpopular among business men, especially as Dominion Day happens to fall upon Saturday.

In connection with Dominion Day, there seems to be some little doubt as to whether it should be observed on Saturday or Monday. This is really a serious question with the average retailer, especially in towns which are

situated in rural districts and depend largely upon the farm trade. In such places, Saturday's business generally exceeds that of all the other days combined, and it is easy to understand that merchants would be loathe to lose a heavy day's trade. The situation is complicated by the fact that the merchants do not appear to have taken concerted action anywhere in deciding upon whether Saturday or Monday shall be observed as a holiday. Neither have any dealers advertised their intentions, at time of writing.

Of course, Saturday is the Bank Holiday, and, such being the case, it is unreasonable to expect that the usual number of customers would come to town, or that their purchases would be as heavy as under ordinary circumstances. Thus, dealers who close on Saturday, as the majority will probably do, should not consider that they are really losing the trade of the best day in the week. Rather let them join heartily in celebrating the natal day of the Dominion of Canada—the day from which the prosperity of British North America may be justly dated.

TIME FOR ACTION AT HAND.

Toronto jobbing houses report that they are still compelled to refuse orders for revolvers as a result of the uncertainty which exists as to interpretation of certain clauses of the new Offensive Weapons Act. Rather than risk infringing the terms of that rigorous measure, the wholesalers prefer to lose the business.

It is high time that this matter was straightened out. So far the provincial authorities have not given a ruling on the relation of the Act to the wholesaler and the latter is left in a quandary until such time as the legal aspects of the Act are interpreted. In a few weeks, the hunting season will arrive and the demand for the weapons, covered by the Act, will become heavy. If something is not done in the meantime, the trade will stand to lose heavily.

IMPROVING THE STOVE TRADE.

In the present issue, a description of the new stove store of A. Welch & Son, Toronto, is presented, together with some facts as to the methods pursued by this firm. The success of the firm presents in a strong light the truth that it is possible to keep the stove trade moving all the year around, in season and out. Welch & Son achieve this very desirable state of affairs by working just as steadily and aggressively during the slack seasons as they do during the busy spells. For instance, this spring they began a billboard advertising campaign and carried it on persistently through the summer months. Furthermore, they inaugurated in the month of June a canvassing system, placing two men on outside work. Is it any wonder that this firm have managed to make the retail stove trade an all-year-around business?

The hardwareman who handles stoves as a department of his business can achieve the same results in a lesser degree if he cares to display a portion of the same activity.

ROPE USED FOR FIRE ESCAPES.

A new law has been passed in New Brunswick, providing that, after August 1st, all hotels in New Brunswick must be provided with fire escapes, and that a coil of rope must be placed in each sleeping room.

As the new law will be rigidly enforced, it opens a field of which hardwaremen in the Province by the sea will not be slow to take advantage. It means that, in some towns, thousands of feet of rope will be required, as well as the regulation fire escapes, and there is no one better equipped than the hardwareman to secure orders for both these lines. A little personal work among the hotel keepers between now and August 1st should result in some good business being closed.

The mention of this law in New Brunswick, brings to mind the fact that there are many hotels in other parts of Canada which are inadequately provided with fire escapes, and which are not equipped with coils of rope in each sleeping room. It would be well for hardwaremen to make inquiries, and find out whether there are not some hostelries in their towns which offer opportunities for sales in this line.

POINTED EDITORIALS.

With record-breaking building operations in most sections of the country, the coming fall should witness an unusually heavy demand for stoves and furnaces.

* * *

Calgary must be awarded the palm for highest building permits in May. Nearly four millions in buildings for one month is a great record for Alberta's metropolis.

* * *

Announcements are heard every day of the establishment of new companies and the enlargement of old concerns. It is one of the surest signs of present prosperity.

* * *

That Canadian refrigerator manufacturers have not been able to fill the demand this year speaks highly for the country's prosperity, and the people's appreciation of comfortable living.

* * *

If the Gordon Nail Works were to establish a factory in each of the western cities which have laid claim to them, they would have more branch plants than any other manufacturing firm we know of.

* * *

That there is "nothing new under the sun" is demonstrated in the case of the new idea now interesting Old Country folks—paper-bag cookery. It has been shown that in many households food was cooked in bags as far back as fifty years ago.

* * *

"The time to advertise," says a business philosopher, "is when you want more business." As most hardwaremen could stand a great deal more business during the summer months than they usually get, this looks like a most opportune time to advertise.

* * *

For years Hardware and Metal's solicitors have endeavored to secure the advertisement of the Wilkinson Plough Co., Toronto. At last it has come—a full-page spread by the liquidator, advertising the assets of the business for sale. The moral should be quite obvious.

* * *

To sell stoves in summer time must sound on a par with the fabulous exploits of Sinbad the sailor or Baron Munchausen to some retail dealers, who shove their stove stock back into the warehouse as soon as the weather starts to show signs of humidity. But many progressive dealers are doing it right along.

* * *

Nearly every man is an inherent lover of fishing. The chances are that most of the managers, office assistants and clerks in your town will spend their vacation at some spot where they can enjoy their favorite sport. They are open to buy fishing tackle of the best variety. Why not make a dead set on their trade?

How Wall Paper Laid Foundation for Hardware Business

Montreal Firm Found Fancy Goods Unprofitable, But Retaining Wall Paper, Specialized on Household Utensils and Housecleaning Goods—This Concrete Example Contains a Suggestion of Value.

One of the bits of advice offered by J. E. Noiseux, of Montreal, on the subject of wall paper is to the effect "that paper well bought is half sold." And Mr. Noiseux ought to know having handled this line for many years. But before going into the subject of carrying wall paper, an interesting story may be told about the way this firm became dealers in hardware.

Handled Fancy Goods.

Mr. Noiseux at one time handled fancy goods in addition to wall paper, but the former line did not prove a success financially and it was abandoned. Retaining wall paper, it was decided to specialize, carrying anything and almost everything required in housecleaning and decorating. It is easy to understand just how this step was taken. Wall paper is the prominent article during the spring and fall housecleaning periods. It naturally suggests paint, whiting, coloring and all the other requisites.

Well, that was the beginning of the hardware business of L. N. and J. E. Noiseux and it has been most successful. As one of the proprietors stated to a representative of Hardware and Metal, their business is hardly that of hardware. Heavy goods or what is called heavy hardware is absent, but any article required in the household particularly of a "housecleaning" nature is carried and many other articles too, of a general character.

The Reason Behind It.

Mr. Noiseux possessed the idea that people wanting wall paper would also want whiting, or paint, varnish, brushes and any of the other articles that might be mentioned therewith. So beginning with a stock of this kind his business began to grow. Not only were his expectations being realized to the full, but customers began to enquire about stoves, washing machines, and irons, granitware kettles and many other articles that come under the heading of household utensils. Enter the store to-day and at the first glance, it looks the same as any other hardware store.

Built Up General Trade.

There are refrigerators, screen doors and wire, washing machines and wringers, and so on. On one wall there are the usual rows of drawers with one article securely fixed on the outside of each. Mr. Noiseux stated that in the miscellaneous small lines, the goods he carried were such as might be wanted in any household. Hinges, locks and bolts and many others, all comprise an extensive showing.

It will thus be seen that this firm specializes on one branch of hardware just as another might specialize in builders' hardware. This idea has been a success. It was the slow development of a fancy goods store into a hardware store. There could not be any more striking example of the value of wall paper as a special line and also of the need of close attention to the department in which it is so prominent.

It is surely apparent that in this district there was but little attention directed toward this feature of the hardware trade. Otherwise a fancy goods dealer could not have stepped in and achieved such success. And is it not just possible that in many places, particularly the larger cities, the same state of affairs is existing to-day, there being lacking only that foresight and business instinct that prompted Mr. Noiseux to venture into the hardware field. It is scarcely necessary to remark that he has only touched one department of the hardware business, and there is no doubt that even in his case there are opportunities of further improvement and advancement.

What This Teaches.

There are several lessons to be drawn from this experience. One is the fact that specializing in this way proved a success, and there are others, too, but the principal point is that carrying a line of wall paper was practically entirely responsible for the upbuilding of a successful hardware business. Mr. Noiseux dropped fancy goods. In this case at any rate fancy goods was not a live enough line to link with wall paper. He bethought himself of the idea of one department of hardware and acted upon this suggestion. He had a standing in the community as a dealer in wall paper. People came to his store just the same. They asked for the goods they wanted and enquired about others which were yet to be tried out. Thus did the firm take to handling stoves and such other lines that may be considered in the same category. In this way he built up a hardware trade with wall paper, paint and kindred lines, as the foundation or corner stone.

The average hardware man to-day has a paint department, but is it as progressive as he would like it? Is he satisfied with it? Would wall paper help him in any respect? Here is one business that it helped to build up.

There is something in the contention that the hardware store is the natural place for wall paper. The householder buys her paint, putty, brushes, varnishes, etc., in the hardware store and practically only one other article remains to complete her list—wall paper. Throughout the country some hardware men are making a real success of this business. Others are making but a fair business of it and others, again, are contented to let the fancy goods man or some other merchant look after it. This other merchant is getting the woman customer into his store during many a mid-week afternoon. On Saturday she tells her husband or the painter to go down to the hardware store for the paint and other requirements for some work about the house. Is this not the case? It is an exact statement of the conditions in more than one town between Halifax and Vancouver, and still the hardware trade recognizing the importance of women taking a greater interest in their stores. Wall paper is just another kind of bait that may help solve the problem for some member of the trade and at least demands a little attention from those who have thus far decided not to take it up.

NAIL WORKS FOR SASKATOON.

Saskatoon, June 29.—An agent of the Gordon Nail Works was in Saskatoon last week, negotiating for the purchase of a suitable site upon which to establish a branch of the firm he represents. It is understood, that prior to his leaving, a desirable corner in the down town section of the city had been obtained, and that there would be something materialize within the next few months.

PUSH CAMPING STOVES.

In connection with the camping and fishing season a good serviceable and handy stove is something that will be welcomed by many who spend some of their summer days back with nature. The hardware man with a good showing of fishing tackle, arms and ammunition and such articles for outdoor use has a particularly good opportunity to show to customers who enquire for these goods anything that will make the outing more pleasurable. A camping stove is only one article and it requires no feat of salesmanship to interest a man who is going on a fishing trip or merely out for a holiday in an article that he really needs. The hardware man surely recognizes the opportunity thus presented.

Twenty Years Ago
In the Canadian Hardware Trade

The following items are taken from Hardware & Metal, issue of July 4th, 1891:

"A lamp exploded in Harry Collins' hardware store, 10 Adelaide street, west, Toronto, on Friday afternoon, and did slight damage."

Editor's Note.—It is interesting to note that this same store, after having been a part of Ryrie Bros.' jewelery establishment for years, is again being fitted out as a hardware store by the new firm of Freek, Clark & Co. They will specialize on builders' hardware.

"A. C. Leslie & Co., Montreal and Toronto, whose advertisement appears for the first time in Hardware and Metal this week, are agents for several cutlery firms, chief of which are Joseph Rodgers & Co., and E. M. Dickinson, both of Sheffield. Mr. Leslie himself has charge of the head office, and his son looks after the Western business, with his headquarters at 18 Front street, West."

Editor's Note.—A. C. Leslie & Co., of which W. S. Leslie is now president, have been continuous advertisers with Hardware and Metal, ever since the first insertions referred to in the above extract. The firm are now metal merchants exclusively, the agency for Joseph Rodgers & Co., having been assumed by Jas. Hutton & Co., Montreal, and that of E. M. Dickinson by Dorken Bros., Montreal.

"The SS. Montevidian on its way from Liverpool to Montreal, caught fire and narrowly escaped destruction. She had 12 tons of Curtis & Harvey's sporting powder for Rice Lewis & Sons, Toronto. The powder, however, arrived safely and is now in their magazine near Toronto."

"The London plumbers want a nine-hour day and 25 cents per hour. Presidence Spence, Toronto Union, attended the journeymen's meeting, Tuesday night, and promised them the assistance of the United Association, in securing their demands. The union numbers 14 members and there are four employing plumbers in the city."

Editor's Note.—Master plumbers, today would consider their journeymen very modest indeed, if they were content with the above conditions. The growth of the plumbing trade in London has been very great since the time when the union numbered 14 members and the master plumbers 4.

Hardware Letter Box

Counter Check Books.

D. Tieman, Dashwood, Ont.—"I will want some counter check books shortly. Will you kindly tell me where I can get some ?"

Appleford Counter Check Book Co., Hamilton ; F. M. Burt & Co., Toronto. —Editor.

Acetylene Machines.

MacLeod Hardware Co., MacLeod, Alta.—"Would you be kind enough to let us know the names of some acetylene gas machine works ?"

Canada Producer & Gas Engine Co., Barrie, Ont. ; Keith & Fitzsimmons Co., Toronto ; Shawinigan Carbide Co., Montreal ; Siche Gas Co., Toronto ; Beach Foundry Co., Winchester, Ont.—Editor.

Hammers.

Stedman Bros., Brantford, Ont.—"Will you kindly supply us with the name of a hammer manufacturer, preferably in Canada."

Jas. Smart Mfg. Co., Brockville, Ont ; Whitman & Barnes Mfg. Co., St. Catharines, Ont.—Editor.

Barn Door Hangers.

J. T. Holmes, Whitchurch, Ont.—"I have been looking for the advertisement of Cannon Ball Barn Door Hangers lately, but cannot see it. Can you give me the address of the makers ?"

Hunt, Helm, Ferris & Co., Harvard, Ills.—Editor.

Punch for Marking Cattle.

Tedford Bros., Alvinston, Ont.—"Where can we procure a small hand lever punch for punching holes in the ears of cattle and sheep, to mark them ?"

Hamilton Stamp & Stencil Co., Hamilton ; F. G. James, Bowmanville, Ont.—Editor.

Corrugated Culverts.

T.H. & B. Ry. Co., Hamilton.—"Kindly advise us the names of the manufacturers of corrugated galvanized pipe manufactured for culvert work."

The Pedlar People, Oshawa ; Canada Ingot Iron Culvert Co., Guelph ; Corrugated Culvert Co., Stratford.

Buttercup Churns.

Brocklebanks, Limited, Arthur, Ont.—"Can you let us know where the buttercup churn is made, or any churn similar to it ?"

Could any of our subscribers give us this information ?—Editor.

Sash Pulleys.

Munroe & Zavitz, Wallaceburg, Ont.—"Will you please advise us through your paper, the name and address of the firm that manufacture 'Ottumwa' sash pull-up."

Johnston & Sharp Mfg. Co., Ottumwa, Iowa.—Editor.

SOME U. S. PLANTS OPERATING TO CAPACITY.

Cleveland, O., June 29.—The Iron Trade Review to-day says :—The first half of the year closes with new orders and specifications in some branches of the local iron and steel trade, notably structural steel, sheets and rails, coming in at a more satisfactory rate than at any time for several months. However, prices of billets, sheet bars, steel bars, bar iron, sheets, plates, structural steel and shafting are from $1 to $4 a ton lower than at the beginning of the year. The market as a whole has shown a steady improvement since early in June and at least one or two large steel companies are operating practically to capacity this week. One company reports that mill orders for rails and semi-finished steel this month will show a gain of from 40 to 50 per cent. over May and some sheet manufacturers report that bookings in June have been heavier than for any single month in more than a year. Sheet and tin plate manufacturers have renewed the 1910-1911 wage scale, and this is regarded as an indication that manufacturers of sheets look for a still further improvement and higher prices, as to-day's prices are from $4 to $5 a ton lower than a year ago, when the present scale was signed. A number of mills will close down for a brief period beginning June 30.

Contracts for furnace coke involving upward of 250,000 tons for last half shipment were closed by Pittsburg sellers during the week.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

LATHE DOGS AND CLAMPS.

Booklet No. 5, issued by Armstrong Bros. Tool Co., Chicago, describes their line of drop forged lathe dogs and clamps. The booklet contains only eight pages, but it has a lot of good information and cuts. Price lists are given for each article described

Features of Boards of Trade Convention

Illustrations That Will Interest Western Readers — Portraits of Prominent Officers.

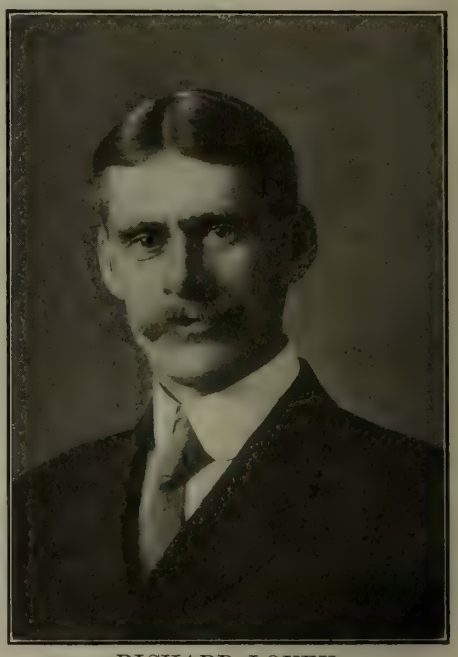
Owing to Coronation Day occurring last week, some of the cuts which were intended to illustrate the report of the Associated Boards of Trade convention, did not come to hand until Hardware and Metal had gone to press. They were, therefore omitted from the report but, as Western readers will find them very interesting, we are reproducing them on this and the following page.

Important business interests are each year represented at this convention and problems peculiar to Western Canada, are discussed in a most intelligent manner. The Associated Boards of Trade are undoubtedly gaining in prestige, as is evidenced by the fact that the Fort William Board of Trade sought and gained admission to membership this year, and the affiliation of British Columbia Boards is now anticipated.

Why Retailers Lose Trade to Mail Order Houses

Question Practically Discussed by Western Retailer Who Served Two Years in a Mail Order House—Fault Lies Largely With Retailer—Should Advertise Himself and Not Knock Mail Order Houses.

The fault lies, to a great extent, in the retailer himself, in this way: that he is continually knocking the mail order houses. If you walk into the average



Group of Delegates in Front of Y. M. C. A., Lethbridge.

he does not make enough use of printers' ink, and also in the very fact that retail store to buy an article and quote a price you have seen in a mail order catalog, nine cases out of ten, this retailer starts to complain of this house, and no successful salesman, as a rule, ever cries down a competitor's line, as it only tends to create greater interest. On the other hand, the retailer

Wholesale Section of Lethbridge.

RICHARD LOVEY,
Moose Jaw, Elected 3rd Vice-President Associated Boards of Trade.

should not even pay the slightest attention to his competitor, but sell his goods, keeping the following points in view:

1st. Quality, as a rule, is always better in any line sold through the legitimate channel of a jobber or dealer from that sold by a mail order house. To prove this, you do not see the mail order

G. E. CARPENTER,
Winnipeg, Expert on Freight Cars and Telegraph Tolls at Lethbridge Convention.

house advertising or making a leader of well known brands of hammers, saws, shirts or soaps, because as a rule mail order houses aim to advertise under their own name, so as to get a brand or

quality to suit them. For instance, if you purchase a shirt from a mail order house you will find that there is generally a great deal less material used than there is in standard brands. A strong advertising feature of the mail order house is to take one particular item in each department, sell it at cost, feature it up prominetly by the use of a large illustration, and putting the price in large type, which makes the consumer believe that all their prices in this dept. are correspondingly low. Then, on the other lines in the department prices are very little, if any, below what local dealers can sell them for. There are standard lines which the mail order handles because it helps

A. A. WILSON,

Elected Fourth Vice-President Associated Boards of Trade of Western Canada.

them get their trade on other lines, and on which they do not make enough profit to pay for the handling.

2nd. Do not start drilling patriotism into a man, and telling him he ought to deal locally and support his own town, instead:

3rd. Show him the many advantages gained by dealing locally, such as better service, standard goods, the trade-mark which means satisfaction, and, in case of complaint he can always call on you and get it adjusted without any difficulty. And on such lines where he is liable to need repairs, tell him that he can get them from you without any trouble, and have none of the worry and expense of express charges and troublesome waits.

4th. If your customer wants a special article, get it for him, do not tell him you do not stock it. This is one reason why the mail order house gets a lot of trade you should have. It prompts the man to send a large order to get this very item, because he needs it and you won't get it for him.

5th. Get a list of names of all the farmers and householders in your vicinity (same as a mail order house does) and when a manufacturer sends you printed material on a certain line, make use of it, and on seasonable goods circularize these people with a printed list. Be sure to put your prices in plainly, telling them what you have for sale.

6th. Use your local newspaper. Remember, it is the publicity that creates a demand for your goods, and, if necessary, take certain lines and make the prices attractive enough to induce the mail order buyer to enter your store. And when he does call, make a friend of him and treat him in the same manner as a catalog house treats him. That is, to sell him what he wants, and make him believe that you have an interest in him.

7th. Get the manufacturer to direct his advertising to the consumer.

8th. Remember that it does not pay to sell a cheap article, as it is the dearest in the long run, and tell your customers that the cheapest article for them to buy is the one that will last longest.

9th. By co-operation with your fellow merchant and jobber endeavor to induce the double dealing manufacturer to maintain a uniform resale price on his article. There are manufacturers who may be induced to desist selling to catalogue houses altogether.

"M. O."

CHROMIUM ALLOYS IN CUTLERY MAKING.

The recent successful production of cobalt-chromium alloys, and the value of these alloys for small cutting tools, is described in the annual report of Arthur D. Little, Inc., of Boston, as official chemist to the American Brass Founders' Association.

The hardening effect of chromium when added to steel is well known, and it is only recently that it became known that it produced the same effect when added to metals other than iron. An alloy of 75% cobalt and 25% chromium is tough and malleable and can be hammered into thin sheets at bright red heat without cracking. Its most important property is its extreme resistance to corrosion. The importance of this alloy is best shown by the inventor's own words. He says: "I believe that the alloy of cobalt and chromium is the only non-ferrous alloy that combines the cutting qualities of steel with the non-tarnishing qualities of gold and platinum, that can be made in sufficient quantity and at a price that will permit of its general use for small cutlery, such as pocket knives, table knives, fruit knives, carvers and surgical instruments."

In this connection, however, it should be noted that an alloy of chromium and nickel has been patented which is claimed to possess similar properties to the cobalt-cromium alloy. Razors and table knives have been made from it with success, although its principal application appears to have been as a bearing metal.

The results so far obtained would strongly indicate that many new and valuable alloys can be made with chromium and justify considerably research along this line.

Western Provinces.

John Murchison is opening a hardware store at Conquest.

Calgary is the latest point to claim the Gordon Nail and Wire Works.

S. T. Kempthorne, Saskatoon, is increasing the capacity of his hardware store.

A change in ownership is reported in the Hill & Morey hardware business at Langdon.

W. Cheeseman has opened in the hardware and implement business at Vandura, Sask.

F. H. Joesting, of the Marshall Wells Hardware Co., St. Paul, is in Saskatoon, on business.

J. S. N. Dougall, of the Dougall Varnish Co., Montreal, is just completing a tour through the four western provinces.

W. P. Fowle, formerly of New Westminster, who is conducting a hardware store at Salem, Oregon, is reported to be seriously ill.

W. Powers has purchased the tinshop business of L. F. Heartwell, Roselawn, Sask., and is building a new shop next to J. Torry's livery barn.

On the occasion of the departure of Jas. W. Jamieson, superintendent of the R. C. Jamieson Co., Montreal, paint and varnish makers, he was presented with a handsome morris chair.

Clare & Brockest, representatives of Clare Bros., Preston and the Metal Shingle and Siding Co., also of Preston, will build a large warehouse on May Street, Point Douglas, Winnipeg.

G. T. Berry has started the Strathmore Hardware Co., having taken over the hardware department of the Strathmore Trading Co. Mr. Berry hails from Pincher Creek.

N. Molstad and S. Lomness have taken over the hardware stock formerly owned by J. A. Kirkpatrick & Co., Bawlf, Alta. M. Molstad is enlarging his store building and the stock will be moved thither as soon as possible.

Midsummer Hardware Advertising

Do Not Slacken Efforts to Create Business During Hot Weather—Possibilities in Peculiarly Hot Weather Goods—Dealer Must Overcome Lethargy of Public to Get Business.

It seems to be an accepted dogma in the world of retail merchandising that the mid-summer months are bound to be quiet ones for business. Just why this opinion should be so widely held, it is hard to say. This is a season of the year when everyone is well employed, and, indeed, the demand for labor generally exceeds the supply. Money should, therefore, be circulating as freely as at any other time of the year.

Not long ago the advertising manager of a large New York department store, approached the president and asked for a large appropriation to be spent during the summer months. The president stared aghast at the figures.

"Why," said he, "there's no use advertising heavily in the summer. Everybody is away."

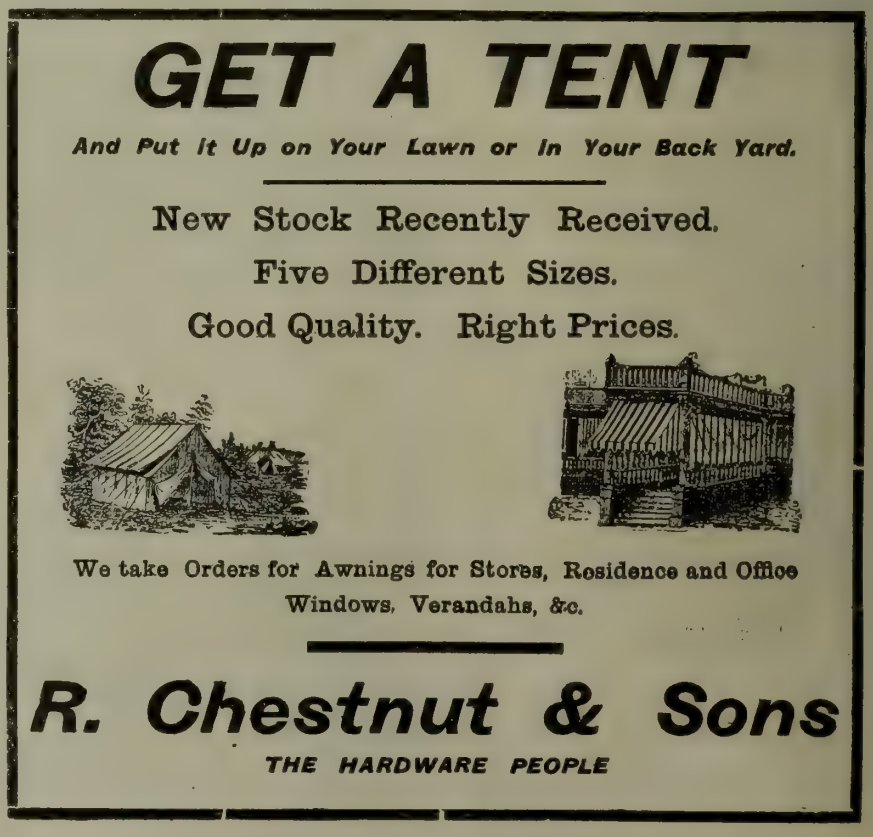
"Yes," replied the advertising manager, "everybody is away, except 98 per cent." And he proceeded to prove that only 2 per cent. of the city's population were continuously out of town during the mid-summer. The result was that the advertising manager got the appropriation.

Summer Provokes Lethargy.

If an investigation is made, it will be found that the conditions mentioned above are true of practically every town and city on the map. A certain number of people undoubtedly leave town to spend their vacations, but their absence in the majority of cases, would not be for longer than two weeks, so that, at any given time during the summer, there should be 98 per cent. of the people at home, with money to spend.

Why is it, then, that there is, under normal circumstances, a falling off in the store's business in mid-summer? Simply because the hot weather induces a disinclination on the part of the public to do anything which is not necessary or is not strongly advisable.

It naturally follows that, as a remedy for mid-summer slackness, the dealer should adopt strong measures to overcome the lethargy of the public, and induce them to purchase the articles which would add to their comfort or convenience. Along this line, the most promising policy is to put even more than the accustomed amount of energy into the store's advertising. The best advertised stores are those which suffer the least from mid-summer slackness.



In order to make the extremely hot weather more endurable, many articles have been invented which find their best avenue of distribution through the hardware store. They are not necessities, and, without being energetically pushed, only a small proportion of the output would be sold. They are not the kind of goods that most people come into the store and ask for. They are not bought until the public are educated to the belief that they are needed, and the best way to educate the public along this line is by aggressive advertising.

Tents and awnings are decidedly in this class. A tent in the yard adds to the appearance of the grounds, makes a fine play-house during the day and the best of sleeping accommodation at night. Awnings on the house give it a cosy and comfortable appearance and make even the sunniest rooms and verandas quite comfortable throughout the summer. Yet there are few people who would think of buying tents and awnings without being stirred up to do so, from some outside source.

Recognizing this fact, R. Chestnut & Sons, Fredericton, N.B., are using good space in the newspapers to call attention to the tents and awnings which they handle. One of their advertisements is reproduced with this article. It has much to recommend it. The headline is forcible, the cuts decidedly inviting, and the text matter is brief and to the point. It may be just a little too brief and too indefinite. It could have been made very effective by selecting some particular tent suitable for use in city lawns, and describing fully its essential details, taking special care to quote a price. This idea, we think, would have had the effect of turning mild interest into a desire for possession. We believe strongly that retail advertisements should always put forward some definite proposition.

Goods That Need Advertising.

Any article which may be classed as a luxury is in special need of advertising, for the public need to be made fully aware of its advantages, before they consider it worth purchasing. This is particularly the case in the summer when there is a natural disinclination to even go to the trouble of visiting the shopping district. Therefore, sum-

Sample of a Forcible Head-line.

mer specialties should have the cleverest possible advertising to boost their sales. The fact that the people are right on hand to buy what they want, is an added incentive.

Many articles of this class are handled in practically all hardware stores. Refrigerators, ice cream freezers, coal oil stoves and window screens can scarcely be termed, absolute necessities, yet they are wonderful aids to comfort in hot weather. Lots of people who do not use any of these articles could no doubt be induced to purchase them by calling their attention either personally, or through the newspapers, to the advantages they possess in summer, and their real economy, considering the results they accomplish. No dealer can get the best out of his seasonable summer lines without advertising them.

Advertising Garden Hose.

Stanley Mills & Co., of Hamilton, are good and consistent advertisers. Their ads. are always well illustrated and convincingly worded, but the garden hose ad. reproduced on this page, is one of the best they have yet accomplished. This is part of a full page spread used in a recent issue of the Hamilton dailies.

Readers are immediately attracted to this paragraph, not only because of the neat cut of hose and hose reel, but also because of the headline which promises a suitable premium with each fair-sized purchase of hose. The paragraph is most entertainingly written, and is such as would convince many readers that they should buy their hose at the Stanley Mills store. Another paragraph of this same ad. gave a good talk about a certain lawn mower on which the firm were making a special run. The offer was made of a grass clipper free, with each lawn mower purchased. The whole ad. was attractively laid out, and should have been a good result bringer.

A Good Point to Make.

The discomfort of shopping is probably what keeps a good many people from buying during the mid-summer months. This is just where the hardwareman can make a good point in his advertising. Most hardware stores are large and airy—much more so, for instance, than the average ice cream parlor. Let the people know this through your advertisements. If the store isn't roomy and well ventilated, see if this defect cannot be remedied without much expense, and then tell the public how comfortably cool they will find your place of business. "Buy Hot Weather Needs In Our Cool and Airy Store" would be a good slogan to adopt.

Enough has been said to show the wide-awake hardwareman that the summer months when most retailers let up in their advertising, offer a splendid opportunity for pushing his business. If there is as much money on hand as at other seasons, and other lines of

A Good Hose Reel FREE With 50 ft. Length of Hose Monday

Our Guaranteed 4-ply Hose Is By Far the Best Kind to Buy

We threw out the three-ply hose some time ago and do not sell it at all now—because it was not a satisfactory article for anyone to buy, and therefore, not a satisfactory line for this store to sell. It would not be a good investment, at even less than the price it was sold at.

For only two cents a foot more, we sell the 4-ply Hose with an extra heavy inner tube, and GUARANTEE it against any imperfections.

The price is 12c a foot—in 12½, 25, 37½ and 50-foot lengths. On Monday, with every 50-foot length of this hose, we will give FREE, a first-class revolving hose reel, with castors—a necessity for keeping your hose from getting kinked or rotted; this is our 85c reel. Be sure to get one Monday.

Couplings are given FREE with any of the above lengths.

Corrugated Hose sells at fifteen cents foot.

This Kind of Talk Should Sell Garden Hose.

business are not reaching out for it in the same way, there is ample room for the hardwareman to boost his hot weather goods.

WHAT CLERKS ARE DOING.

W. Hagar and Albert Taylor, of the Geo. Taylor Hardware Co., New Liskeard, have been in camp at Niagara.

The staff of James & Reid, Perth, recently met in the rest room and presented one of their number, William Howie, with a complete set of kitchen utensils. Harry Warren, on behalf of the firm, presented Mr. Howie with a set of silver knives and forks. An address was read and most of those present had something to say. It is hardly necessary to explain the reason for the presentation.

DEFINITION FOR SUCCESS.

Success is not measured by measurement or weight, nor is it always one size. It is as applicable and profitable to the small merchant as to the larger one. It is a fixed thing, yet it is elastic enough for all who have earned the right to its title.

Hardly no greater honor could be bestowed upon a man born of parents whom he never knew, and as a boy, taken in charge of by a man with a God-fearing heart, who bestowed his honorable name upon him. The future, however, was before the boy, but he at once began to dig for success, showing his appreciation to his benefactor by close application to the opportunities given and hard work. This young man is now the governor-elect of the commonwealth of Tennessee, and demonstrates the highest kind of success which is also possible in commercial lines.

Get the public into your confidence, so it will be unnecessary to hang up a big guarantee sign. If you have its confidence such a sign is unnecessary, because they know your goods are right before they buy, but if any mistake has been made it will be rectified promptly.

THE SALESMAN'S CREED.

I believe in the goods I am selling, in the firm I am working for and in my ability to get results.

I believe that honest goods can be sold to honest men by honest methods.

I believe in working, not waiting; in laughing, not weeping; in boosting not knocking; and in the pleasure of selling goods.

I believe that a man gets what he goes after; that one order to-day is worth two orders to-morrow; and that no man is down and out until he has lost faith in himself.

I believe in to-day and the work I am doing; in to-morrow when it comes and the work I am to do; and in the sure reward which the future holds.

I believe in courtesy, in generosity, in good cheer, in kindness, in friendship, and in honest competition.

MODERATE IMPROVEMENT IN U. S.

Cleveland, O., June 22.—The Iron Trade Review to-day says:—There has been a moderate improvement in the iron and steel market during the week. Specifications against contracts previously made are considerably heavier and there has been a fair gain in strictly new business, particularly in rails, sheets and steel bars. While some of the orders now coming out were held back on account of the uncertainty regarding the price situation early in the month, the new business is coming from a greater number of sources and the character of buying, as well as the nature of fresh inquiries for pig iron and finished steel, apparently has restored confidence on the part of both buyers and sellers. The price situation is causing little comment as it is now generally believed that the bottom has been reached. Improvement from now on is expected.

Beaubier Bros., of Brandon and Saskatoon, have purchased the corner of High Street and Eighth Avenue, Moose Jaw, Sask., as a building site for the 5-storey hotel which they intend to erect at once.

News and Methods of Canadian Hardwaremen

Scheme for Increasing Sale of Fishing Tackle—Meeting Mail Order Competition Squarely—Taking Advantage of Local Enthusiasm to Sell Baseball Goods.

UNIQUE LAWN GOODS DISPLAY.

Montreal, June 29.—A neat arrangement of seasonable goods is being shown in the window of Omer de Serres, St. Catherine street. The whole display is divided into several sections but this one in particular, an arrangement of lawn goods, gives evidence of more than ordinary care. It might be described as follows: At the rear is a hose reel with sufficient hose unwound to form a fairly large circle on the floor of the window. Within this boundary of hose is the representation of a lawn. It is a covering of moss and is decidedly real. A watering can is suspended five or six feet above the window floor with the spout pointing downward, just over the little green plot. From each opening in the spout of the can extends a wire to the patch of supposed lawn where it is looped around a tack. Thus the combination is a good representation of a water can in action. The wires are drawn rather taut and the impression is capably made. In the back ground are several lawn mowers and a few other articles of lawn service are noticed.

The window was prepared by C. J. Lepage. To Hardware and Metal he stated that he had taken particular pains with the arrangement of the tacks to which the wires are attached. The idea thus conveyed is the manner in which the spout distributes the water. The whole arrangement is neat and attractive, besides it is out of the ordinary. The tacks in the floor of the window are of course hidden beneath the moss. Mr. Lepage has secured as much effect as possible out of the idea.

This subdivision of the window has alone brought good results during the past three weeks since its preparation, and it is still attracting the attention of the public.

A CLEARANCE SALE.

Rouleau, Sask.—Big sales are being held by J. B. Wilson, who bought out Moore Bros.' store. He is offering 25 per cent. off the regular price on all hardware and intends to clear out the old stock entirely. Crowds continue to throng the store and the staff has been enlarged to meet the demand.

ON A CASH BASIS.

Courtright.—J. T. Locke has opened a hardware store here, having purchased the stock of J. W. James. He is opening in the Bedard block and intends to run his business on a strictly cash basis. This he has announced in his ads. in the local papers, in which he asserts that he will allow no credit under any circumstances.

Mr. Locke is proprietor of the Ark at Corunna.

WAREHOUSE BURNED.

Qu'Appelle, Sask.—A fire occurred here which totally destroyed the warehouse of Donald Brown, hardwareman on Main street. The cause of the blaze has not been ascertained. The warehouse burst into flames without warning. The whole population turned out to help fight the fire, and ultimately succeeded in preventing the flames from spreading to the store and adjoining buildings.

TO BUILD NEW STORE.

Victoria, B.C.—The Hickman Tye Hardware Company, have found their present store on Yates Street is too small for the business being carried on. The company have therefore decided to spend $100,000 on a new two-storey block. The building permit has been issued and it is expected that construction work will be started almost at once.

DISTRIBUTING WAREHOUSE IN MIDDLE WEST.

Mr. E. F. Martin, the Winnipeg manager for the Gurney Stove and Foundry Co., was in Saskatoon last week, and it is understood, was looking out for a new site for a distributing point from which to handle the trade for the middle West. It was his first trip to Saskatoon; but it is just possible that from his pleased expression of what he saw during an afternoon's drive around the city, something may materialize out of his visit.

FEATURING EVENING SALES.

Palmerston, Ont.—J. B. Skelton is making a feature of Wednesday evening sales. Special bargains are offered and advertised. For instance, on Wednesday evening of this week, a special effort was made to sell screen doors and windows. Price reductions were offered. As an extra inducement to get people to attend a sample can of a new varnish was offered free to all who attended. There were a large number of callers and big sales resulted.

Mr. Skelton is advertising in the local papers, taking large space and illustrating his advertisements freely.

FINE STORE AT SASKATOON.

Saskatoon, June 29.—In keeping with the rapid advancement in the hardware trade of this city, owing largely to the immense amount of building that is being carried on since the season opened, S. T. Kempthorne has found it necessary to make considerable additions to his present well-equipped store. On completion of the changes, which have already been commenced this wide awake merchant will have a store 129 feet long and fifty feet wide.

The new addition gives the floor 67 feet more length than it now possesses. The present building which faces on the main street is three storeys high; but the new part of the building will be only two. The additional space will be taken up with a stock and shipping room, and accommodation will also be made for a stove room and large and commodious offices.

Mr. Kempthorne is installing a cash carrier system, which he considers should facilitate the work of his clerks, and save considerable time and unnecessary confusion in the store.

Another feature of the remodelled store will be the installation of a fine wall case 62 feet long, and running up to the ceiling which is 15 feet high, and fitted throughout with the patent Bennet steel hardware shelf boxes. Arrangements have also been made in this case which is finished in polished oak style, for the displaying of saw and other builders' tools. On the opposite side of the front portion of the store there will be a display of enamelware on open shelves to match the case opposite, and back of this a complete stock of paints. Altogether the new store should be one of the finest in the west.

AFTER THE "NEWLY-WEDS."

Guelph, Ont.—The Bond Hardware Co. are featuring the goods in their tinware and granitware departments at the present time. The fact that many young couples are starting up in housekeeping is seized upon by the Bond Co., as offering a splendid opportunity to sell household articles. In their ad. in the local papers, the Bond Co. say:

"Young housekeepers would do well to remember that the Bond store carries a full line of tinware and enamelled ware, boilers, kettles, dish pans, flour and bread boxes, pails, pie plates, roast pans, etc. No second quality. The Bond store is noted for good goods only. The recollection of quality remains long after the price is forgotten."

The department has been unusually busy and a great amount of tinware has been sold.

Developing Business in Decorative Burlaps

Use of Burlaps is in Line With Modern Architectural Tendency—Hardwaremen Should Work Up This Business—Selling Burlaps Opens Field for Selling Paints.

The modern tendency in house architecture has been in the direction of comfort. The stilted and formal ideas of other days have been discarded, and the appearance of our recently built homes, both interior and exterior, gives the impression of their having been constructed to live in and to enjoy life.

With this change in architectural style, there has also come a change in interior decoration to still further carry out the idea of comfort and livableness in the home. The old style wall coverings have been revised in many ways. Wall paper designs are on entirely different lines from what they formerly were; kalsomines and flat oil paints have come into great vogue, and improved methods of manufacturing burlaps have brought that article into a prominent position among decorative coverings.

Unusual and original effects in interior decoration are now striven for, and it is the adaptability of burlap for this purpose that has made it a popular material with architect and householder.

While burlap may be satisfactorily used in many kinds of buildings, and rooms of different sorts, it is now most usually found in dining rooms, living rooms and dens, so far as homes are concerned. It is also very extensively used in club houses, hotels, churches and other public buildings.

Wide Field to be Developed.

It will, therefore, be seen that there is a very considerable field for the sale of decorative burlaps. The hardware store is the logical place to handle burlap, as they are closely allied to several other lines which are recognized as hardware staples. But, like so many other goods which progressive dealers sell in large quantities, burlaps will not find a large market in any locality, until trade is stirred up by the dealer, and the public is notified that he is selling burlaps.

Nor will it be enough for him to simply advertise that he is carrying burlap in stock, or is agent for a manufacturing firm. This is a comparatively new line, outside of the large cities, and the people must be shown where and how it is used, and its special advantages for certain purposes. In other words, the line must be pushed.

A List of Prospects.

The dealer who enters upon a campaign for the sale of decorative burlaps, should in addition to his newspaper advertising, compile a list of good prospects, and make a special effort to sell them. It would be the work of only a few moments to write down the names of prosperous and progressive citizens who could readily be interested in an article which would help to make their homes attractive and distinctive. Lawyers, doctors, manufacturers, bankers and merchants, would be the most likely people to approach in the first instance.

A personal interview with the mistress of the house will often start the ball rolling. Once convince Mrs. Lawyer that her dining room and library would really reflect class, if decorated with burlap, and it is safe to say that Mr. Lawyer will have little rest until the place is redecorated with burlap as the leading feature of the scheme.

Let the burlap idea become introduced in a town, and a general demand will soon be created. People who see their neighbor's homes decorated with burlap, will want to treat their own walls in the same way. But, in the meantime, this demand could undoubtedly be hastened by some instructive advertising.

Helps to Sell Paint.

One feature of the burlap trade which makes it appeal with special force to the hardware dealer is that it helps to sell paints. Burlap appears to best advantage, when treated to a coat of flat oil paint, which is rapidly becoming an important specialty in the hardware store.

Burlaps may be repainted as often as desired, so that it is an easy matter to keep them always looking fresh. Moreover, this means that the sale of burlap for interior decoration opens the way for future sales of paint with which to redecorate.

ELLIS—RALSTON.

The marriage took place on Wednesday at the home of the bride's parents, 62 Churchill Ave., Toronto, of Miss Margaret Ralston to Fred Ellis, of A. Welch & Son. Mr. and Mrs. Ellis left on the steamer "Toronto" on Thursday afternoon for a trip to Montreal.

They were given a rousing send off at the wharf by a party of friends and business associates of the groom. Among those who helped to speed the departure of the happy couple were Thos. Alcock, Gurney Foundry Co., Angus Groff, Steel and Radiation, Stanley Alexander, of J. R. Seager & Co., C. E. Oldacre, Gurney Foundry Co., Tom Welch, of A. Welch & Son, Mr. and Mrs. J. R. Seager and trade press representatives.

HARDWARE TRADE GOSSIP.

Quebec.

The Gillette Safety Razor Co. have a a neat idea in a tie fastener that is serviceable and attractive.

Extensive improvements to the store of the Jas. Walker Hardware Co., Ltd., Montreal, are nearing completion.

J. H. Cameron of the Winchester Repeating Arms Co., New Haven, Conn., called on the Montreal wholesale trade this week.

The friends of G. A. Irwin, with Drummond, McCall & Company, Montreal, will regret to learn that he has been confined to his home for the past ten days.

The first sod of the bolt and nut factory which will form a part of the plant of the Canadian Tube and Iron Co. was turned on Thursday, 22nd inst. The plans call for a large building which is expected to be completed by Sept. 15th.

George R. Nimmo and W. D. Hamilton, travelers for the Canada Paint Co. Ltd. in the lower provinces and Quebec respectively are at head office, Montreal, for a few days going over samples and beginning their preparations for the fall campaign.

The Smith Hardware Co. have removed to more spacious premises on the ground flour of 240 Lemoine St., Montreal. This firm have obtained the agency for two further lines, namely, Peter Ludwig Schmidt, tools and cutlery; and The Utica Drop Forge Co.

F. H. Malone, of the Jas. Walker Hardware Company, Ltd., Montreal, will spend his holidays in an extensive motor boat trip up the Ottawa river thence by the Rideau to Kingston and down the St. Lawrence to Montreal. Mr. Malone left this week accompanied by his wife and several friends.

Ontario.

A demonstration of natural gas ranges was held on Friday at Glover's hardware store, Aylmer.

An addition, 80 feet by 30 feet, is in course of construction at the plant of the Galt Malleable Iron Co.

The National Hardware Co., Orillia, are calling for tenders for their new factory. It will be a substantial brick building, 45 by 100 feet.

Geo. Baxter, for many years a traveler for the McClary Manufacturing Co., is going into the hardware business at Little Current, Manitoulin Island.

Vance & Brown, Inwood, have added to their line of house-cleaning necessities a new furniture and floor polish, which they are featuring in a window display. They advertise that their store will close at 6 p.m., on Mondays, Wednesdays and Fridays.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 60.

MARKETS IN BRIEF.

Tin.—Down to 48.
Turpentine.—Drop of 4 cents.
Copper.—Very strong.

MONTREAL.

Montreal, June 30.—There has been some activity in the metal markets of late and the movements referred to are rather interesting. Antimony is down to 8.25 after resting at a figure at which it was expected to hold firmly. Those who had managed to boom the price even to that mark were unable to support it even though it was thought that they had securely cornered it. But antimony is a metal the demand for which is rather limited and as one metal authority expressed it this week, it looks as if it would not be easy to secure absolute control of it in the same manner that tin was captured. The consumption is not heavy enough and even at that antimony is not largely produced. It is not a commonly used metal outside of several instances.

Copper has been growing stronger and lead also occupies a better position. Tin on the other hand has been erratic and is weaker in its tendency. Locally the price is down to 48. On the whole there is a little more life to the market of late and interest seems to be directed more toward them.

Pig Iron.—There is not much new in regard to pig iron. The Canadian market is much the same as last week. Across the border there appears to be a little healthier feeling, but as yet it has not been very pronounced. Prices are still much lower than Canadian furnaces like to see and there is not much hope of any immediate relief. Prices are unchanged as follows: Prices on dock Montreal, are:—No. 1 Summerlee, $20; Select Summerlee, $19.50; Soft Summerlee, $19.00; No. 3 Cleveland and Clarence, $16.50 to $17.00.

Tin.—The coronation holiday had a quieting effect on trade in tin. Since then the market has been steady to a certain extent, fluctuating on the London market, but as far as the local situation is concerned the price has dropped to 48, and is regarded as weak.

Copper.—The copper market has been somewhat irregular, but on the whole its general sentiment has been much firmer. It is now regarded as being under speculative influence, and in the primary market reports indicate increased interest in this metal.

Lead.—Lead is firming up considerably but there is not a great deal of interest. The demand for lead is steady.

Spelter.—This metal is steady with considerable of it in demand. The general tone is healthy but there is no special feature.

Old Metals.—The demand for old metals is maintained, interest being particularly noticeable in several lines. Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 21½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $12.50; malleable, No. 1, $9; miscellaneous steel, $5; stove plate, $12.50.

TORONTO.

Toronto, June 30.—That the tin syndicate are still in complete control of the situation as shown by the remarkable movements of tin on the London Metal Exchange this week. On Tuesday, the price there was £197 10s., while on Wednesday the market opened at £195 10s. weak, and closed at £194 10s. easy. Thursday morning, the opening price was £192 10s. easy, but in the afternoon, cables were received on this side that the price had again jumped to £197 10s.

These facts show that the syndicate are simply toying with the situation, and they are being assisted by the speculation in tin in which the English public are indulging. The present syndicate has proven to be one of the strongest who have ever manipulated the metal markets.

It is the common belief that low prices on tin are decidedly not a thing of the near future. This opinion has its strongest adherents in New York, where metal experts refuse to believe that there is any danger of an early break. As a matter of fact New York prices to-day are above the London parity.

Copper is in about the same position as last week and, in spite of the fact that the improvement of U.S. consumption had probably been over-estimated, the continued large exports of the metal to Europe maintain the tone of the market.

One feature of the copper situation is that the heavy export from U.S. movement, amounting to probably 25,000 tons a month, or about $7,500,000 in money, is already having a reflex action upon the general business of the country, and American trade reports are becoming more hopeful every day.

Some improvement is noted in the iron and steel market in the U.S., and if buying increases sufficiently to put an end to unloading surplus stocks on Canadian consumers, domestic producers here will be more than pleased.

Tin.—Prices continue so high that some of the large American consumers are reported to have closed down. This, however, will not likely have any effect upon the market. Stocks held locally are exceedingly small, and the same situation exists practically all over the world, in the chief consuming centres. Prices here are unchanged, and it is considered very unlikely that there will be any serious break for some little time.

Antimony.— There is at last some little activity in this metal, but prices remain stationary.

Copper.—There is still a heavy demand from Europe which keeps prices at the same level as at our last report. Although trade is not yet very brisk in the United States, an awakening of business may be expected at any time, and any considerable buying movement across the border would undoubtedly send prices up. Orders received by Toronto metal houses are very satisfactory. It looks as if copper, at present prices, were a good buy.

Aluminum.—Business is going along as usual with no change to record.

Plates and Sheets.—The situation is improving, some of the large U.S. mills being reported as quite busy and working almost to capacity.

Pig Iron.—Conditions as mentioned last week still rule, although the slight improvement in the U.S. iron situation leads to the expectation that there will not be much more cheap iron sold to Canadian foundries by furnaces across the line. Prices remain as follows: Canadian Foundry No. 1, $19 and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro' No. 3; and $20.25 for Clarence No. 3; Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

Lead.—Prices are creeping up in the primary markets, but local quotations are unchanged.

Spelter. — This metal is gaining strength and, while Toronto jobbers are quoting the same price as last week, they are firmer.

Old Materials.—We are still quoting: Heavy copper and wire, 10½c to 11c; heavy red brass, 7½c; heavy lead, $2.90; light copper and bottoms, 9¾c; tea lead $2.40; machinery cast iron, No. 1, $14; No. 1 wrought, $10; malleable No. 1, $8 to $10; miscellaneous steel, $6 to $7; stove plate, $12.50.

W. B. Halfpenny, with H. T. Kirk, New Westminster, was united in marriage to Miss E. E. Bawden, Calgary.

HARDWARE MARKETS

MONTREAL.

Montreal, June 30.—Business is reported good this week with sorting orders coming in especially favorably. From one of the large retail houses it was learned that trade has never been better and that since the first of the year each month has made a record as far as the amount of business transacted compared with the trade during the same months last year. This retailer likewise commented upon the fact that there has been no perceptible falling off yet in the demand although as a general rule it is about this season that things begin to assume a quieter tone. All of which is certainly gratifying. Wholesalers report a continuance of demand for some seasonable lines and a general good sorting of orders.

Harvest Tools.—There is a steady enquiry for harvest tools, orders coming quite freely. Section rivets are also generally included. Some quotations and discounts are: Hay forks, manure forks, straw forks, barley forks, spading forks, potato forks, field, garden hoes, Dutch weeding hoes, garden rakes, 50 and 5 p.c.; hay rakes, $1.15 to $2.75 a doz.; scythes, $6 to $8 a doz.; sickles, $1.85 to $2.25 a doz.; grass hooks, $1.65 to $2.10 a doz.; scythe snaths, 40 p.c. discount.

Seasonable Lines.—Demand for seasonable goods is well maintained although it is now reduced to sorting orders. Lawn mowers are still asked for, ice cream freezers, hammocks, and such articles are also included.

Lawn and Garden Tools.—There is considerable business passing in this department. Hose remains quite a figure in the trade and enquiry for lawn articles suggests the idea that this branch of the trade has yet to fire its parting shot. Discounts in garden hose range from 50 per cent. off to 70 and 10 and 10, according to quality. We quote: Hose clamp, ½ to ¾-in., 25c a doz; hose couplings, ½ to ¾-in., $1 a doz.; hose sprinklers, ring pattern, $5.75 a doz; revolving pattern, 12-in., $13 a doz.; 24-in., $34 a doz.; and 36-in., at $39 a doz., hose nozzles, Gem, $3.50 a doz.; reels, 75c each and upwards. The discount offered is 50 and 50 per cent.

Contractors and Builders' Supplies.—The steady enquiry is the only feature of this department. Demand is good and is general from all parts of the country. For the best quality of shovels and spades, the discount off is 60 and 2½ per cent.; for second quality the same discount is allowed, and for third quality the discount is 50 and 2½ per cent.; picks are quoted at from $3.85 to $5 a doz.; crowbars are listed at $3.25 a cwt.; wheelbarrows, navvy common, $21 and up; navvy full-bolted, $22.50; drag scrapers, $5.75 and upward.

Sporting Goods.—Rugby goods are beginning to receive attention as part of the fall trade. There is a fair sorting demand for the other general lines.

TORONTO.

Toronto, June 29.—Local jobbing houses have been quite busy during the past week. The business has been of a widely assorted nature and the volume has been in every respect satisfactory. The past month has just about held its own with last June, but, for the first six months of the year, business showed a neat increase over 1910. Unless something unexpected happens, the year should peove one of the best in the history of the trade.

For the past three months it has been found difficult to secure a large enough supply of wire netting for window screens and doors, so heavy has the demand been. The manufacturers have not been able to cope with the demand. "We have sold a great number of window screens," said a local jobber, to-say, "but not nearly as many as we could have disposed of, if it had been possible to secure the necessary supplies. Many orders we received were only partially filled."

The demand for refrigerators is still heavy and the supply houses have not been able to quite catch up with their orders.

Seasonable Goods.—Summer goods are not moving as steadily now as for the past two months. Screens for windows and doors are selling in smaller quantity and garden tools, hose, etc., are only in moderate demand. Ice cream freezers are still moving and hammocks are particularly in demand now that the vacation season is in full swing. As stated before, refrigerators are moving briskly. The demand this year has centred largely in the smaller varieties. A great number have been ordered, it is believed, for use in summer cottages. There is now a consistent call for harvesting tools and repairs. The demand for these lines constitutes, perhaps, the feature of the present market.

Household Goods.—Although there is a steady, all-around volume of business being done, the bulk of the demand in this department is for preserving supplies. Preserving kettles, sauce pans, etc., have been moving in large bulk.

Builders' Hardware.—The demand from the city is unusually good. Conditions throughout the province are normal but quite satisfactory. It is practically assured that building returns in all sections will outstrip records of past years and it is, therefore, practically assured that the call for hardware in the fall will be heavy.

Heavy Hardware.—There is a good movement in all branches and firmness prevails with reference to price. Nails, screws, nuts, bolts, barb wire and chain are selling briskly. No price changes are noted. Present quotations are: Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Stoves and Heating Goods. — While there are some gas stoves being ordered still, the demand now centres largely in gasoline and oil stoves. They are used for summer cottages and by campers, and it is, therefore, quite probable that the demand will continue brisk through the next month.

Sporting Goods.—Sorting up orders are coming in briskly, indicating that the retail dealers have experienced a brisk demand for all lines of sporting goods. Some advance orders are being received for rifles and ammunition.

WIRES AND CABLES.

The Canadian General Electric Co., have issue a ninety page supply catalogue dealing particularly with wires and cables. The catalogue is printed on coated paper and is handsomely illustrated. A fund of information regarding wires and cables is given.

NEW COMPANIES.

It is announced that Charles E. Huestis, St. Stephen; James H. Mann, Lewiston, Me.; George E. Clarke, F. M. Murchie, F. E. Rose, Peter E. McKenna, J. William Smith and James E. McAllister, St. Stephen; George D. Spicer, Parrsboro, and S. Huestis, Truro, are seeking incorporation as the Mann Axe and Tool Company, to take over the Charles E. Huestis tool business at St. Stephen. Capital $49,000.

Incorporation is authorized of the Canada Nail and Wire Company, Ltd., capital $800,000, to operate the Maritime Nail Works in St. John.

ERECTING LARGE PLANT.

The Canada Cement Co. will erect a plant on the western limits of Winnipeg, in the vicinity of Tuxedo Park. The plant will be the largest of its kind in the West.

NEW WESTERN CONCERNS.

The current number of the Saskatchewan Gazette announces the registration of the Canadian Cordage Co., capital $40,000 and the Saskatoon Gas and Oil Co., both with headquarters at Saskatoon.

The Western Hardware Market Situation

Summer Rush in Full Swing—Growing Trade in Gas Stoves—Heavy Demand for Harvesting Tools—Prices are Unchanged.

Winnipeg, June 79.—In spite of the heavy rains which continue to fall throughout the West, farmers are beginning to get away from home to town now that the seeding is over, and consequently the summer rush may be said to be in full swing. Some consternation is being felt at the continued wet weather, which appears to be fairly general in the three provinces, and more in the south than in the northern sections. The growth that is being made this year by the crops is simply marvelous. In southern Manitoba and other low sections grave fears are being expressed that the crop will not head out soon enough, but that it will be lodged before the heads are far developed. Samples of fall wheat from the Swan River district in Northern Manitoba measuring four feet in height, with well developed heads ranging from two to three inches long, have been received in the city. Hay and pasture are abundant and the farmer who is carrying live stock will not run the same chances as the one who depends on grain alone.

Referring to business conditions during the week, there is just the same briskness as has been prevailing for the last two weeks. All hardware retail merchants in the city prepared special decorations for Coronation day which was marred somewhat by wet weather. In spite of the holiday break in the middle of the week orders came in just as freely, as many of the travelers stayed in the nearest town in preference to coming back to the city for the day. Contractors' and builders' supplies, harvest goods, and in fact all metallic lines are exceptionally strong. Solder and ignot tin are still "sky high," but lower prices are looked for in the near future.

Seasonable Lines.—Orders for seasonable lines such as screen doors, hammocks and other camping necessaries are still arriving in great number. Material of all description for building purposes are also in great demand, and along with them come the orders for oil stoves and general household necessaries. Gas stoves are finding their way into many of the larger towns, and should the movement become general there will be a a heavy run on this line.

Harvesting Tools.—Harvesting lines are all moving pretty freely now, and from the demand it would appear as if the farmers in the country expected an exceptionally large crop. Binder twine is reported to be amongst the heaviest, while hay forks are running a close second.

The market is exceptionally firm and no changes whatever are reported this week. Quotations are as follows:—

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.00; 3, $1.60; p.g. oak, $2.75.

Auger Bits—"Irwin" bits, 47½; other lines 75 per cent.

Bolts—Carriage, ½ and smaller, 65; 7-16 and larger, 55; machine, ½ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3; small lots, 2½; stove bolts 77½.

Bar Iron—Bar Iron, $2.50; Swedish iron, $4.75; sleight shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs. $8.50; Jessop, $15

Blocks—Steel, 45; wood 60 per cent.

Cut Nails.—$3.15 per keg base.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron.—Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24 $4; 26, $4.20; 28, $4.60; 30 gauge or 10¾ oz., $4.80; Queen's Head, 20, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Iron Pipe.—⅜ in., $3.50; ½ in., $4; ¾ in., $5.20; 1 in., $7.00; 1¼ in., $10.25; 1½ in., $12.45; 2 in., $16.25.

Galvanized Ware—Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2, and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel, No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process—No. 3, $4.30; 4, $3.80; 5, $2.75; 6 $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $7.75; grass, $1.70.

Iron Washers—Full box, 40 p.c.; smaller lots, 35 p.c.

Iron Pipe, Black—⅛ in., $3; ¼ in., $2.45; ⅜ in., $2.50; ½ in., $3.25; ¾ in., $4; 1 in., $5.65; 1¼ in., $7.75; 1½ in., $9.25; 2 in., $12; 2½ in., $19.60; 3 in., $25.75; 3½ in., $33.50; 4 in., $38.35; 4½ in., $44.10; 5 in., $50.40; 6 in., $65.10; 7 in., $95.50; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.75.

Poultry netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.25.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8c; pure manila, 10½c; British manila, 8½c; lath yarn, 9½c.

Sheet Zinc — Casks, $8.75; broken lots, $9.50.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 65 per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate—1. C., $9.75; I. X., $11.75.

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25; ½ box, $5.50; I. X., full box, $12.25; ½ box, $6.50; I. X. X., full box, $14.25; ½ box, $7.50; 20 x 39, I. C., full box, $15.50; ½ box, $8.25; I. X., full box, $17.50; ½ box, $9.25.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 35.

Wire.—Barbed wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3; annealed wire, base, $3; oiled, 10c extra; bright iron $3.20 base; brass spring wire, base 29c; plain galvanized wire, Nos. 6, 7 and 8, $3.40; No. 9, $2.90; 10, $3.50; No. 11, $3.55; No. 12, $3.10; No. 13, $3.25; No. 14, $3.95.

Wire Nails—$2.90 Winnipeg, and $2.45 Fort William.

Wringers—Royal Canadian, $39.25; New Easy, $42.50.

Paints and Oils.

Steadiness also prevails in paints and oils of all descriptions. Linseed oil and turpentine remains unchanged at last week's decline. The low price of 85 cents per gallon in barrels, and 95 cents in small lots for the latter has become established all over the city. Linseed oil is quoted at $1.20 for raw and $1.23 for boiled.

Mixed paints and Paris green are still as active as ever, the arrival of rain preventing the use of the articles by the public somewhat, but not preventing the call of the retailers to the wholesalers. Paris green is still quoted at 23 cents in one pound cartons.

Petroleum and Gasolene.—Silver Star, in bbls., per gal., 15c; Sunlight, 18c; Family Safety, 22½c.; Searchlight, 20½c; Red Rose, 23½c; Keystone Special, 18c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c.; White Rock, in bulk, 22½c; National Light, in bulk, 21c.; Engine Gasolene, 24c.; White Lily, 26c.; Royal, 24c.

Special Efforts Necessary to Stimulate Interest

Paint Dealers Finds That Demonstrations are a Valuable Feature—A Great Many Have Been Conducted This Year—An Ingenious Telephone Card Device.

It is acknowledged by all paint dealers that the average person is sadly ignorant on the score of the use, and the abuse of paint. Customers will ask the most ridiculous questions and display the most complete ignorance in making purchases. It is frequently necessary to instruct a customer fully before it is safe to let him depart with a supply of paint; otherwise he might blame the dealer for the negative results.

The holding of paint demonstrations may in time spread a certain amount of practical knowledge on the use of paints and varnish. Demonstrations have come into vogue rapidly of late, an unusually large number having been held during the past spring. Dealers, who have not conducted one, would do well to arrange for a demonstration before the season is over.

The writer attended on the last afternoon of a three-day demonstration in a Western Ontario hardware store recently. Interest had grown each day and there was quite a crowd in the store when the demonstrator commenced operations on the afternoon in question. He was a traveler with the firm manufacturing the line that the store handled, and he knew the goods thoroughly. He was, in addition, a smooth talker and he possessed the knack of lucid explanation. His methods of demonstration made everything singularly clear and the results he obtained from the use of a few of the best selling lines opened the eyes of those present. Quite a number of questions were asked, which he answered in each case at some length.

Every person in the store carried home a sample tin of some of the company's makes. A great many made good sized purchases with the intention of putting into immediate effect the pointers they had received.

The dealer explained afterwards that he had found business a little dull prior to that time. The traveler had advised that he make an effort to arouse interest, suggesting a demonstration and proferring his services. The dealer had decided to avail himself of the offer and, in order to make it as useful as possible, had sent out cards of invitation to all householders and painters in the neighborhood, who might reasonably be expected to feel an interest. This, no doubt, had considerable to do with the success of the demonstration.

Many people dropped in out of pure curiosity and became interested sufficiently to remain throughout. A great many others were men who had wanted to find out how to go about the painting of their floors and the other knotty problems of home decoration. Altogether, the demonstrations drew large and interested crowds, particularly in the evenings.

"I have sold more paint during the past three days than for three weeks—I was almost going to say three months—previous," declared the dealer." At the same time, we did not anticipate such direct results. What we were aiming at was to start an educational movement which would bring results in the future."

Although the foundation work, on which to build a successful paint business is made up of two essentials, quality and service, it is necessary at times to adopt some special measures to stimulate public interest. A demonstration serves this purpose admirably.

A Telephone Card.

Another method, which has been adopted in other lines and which could be used equally well by the hardware and paint dealer, is to supply customers with telephone number cards. The card is intended to hang on the wall alongside the telephone and to contain the numbers of tradesmen and such persons as the household would have occasion to call regularly. For instance, the word "Grocer" is printed with a space opposite for the name of the particular grocer patronized by the family and another blank for his telephone number. Included on the list are the druggist, the doctor, the butcher and at the bottom a lot of blank spaces to be filled in with the telephone addresses of friends and acquaintances. At the head of the list is printed in bold type the name:

Hardware and Paints, Blank & Co., 146 Main Street, Tel. No. 087.

This idea is said to bring splendid results. One thing is certain; all telephone orders for paints and hardware from houses where these cards had been sent, would go to Blank & Co., for the average person has an antipathy to rummaging through a well-thumbed telephone directory for a number.

This is but one of many schemes that the enterprising dealer has at his disposal, if he desires to make a special effort to attract custom. The adoption of measures of this nature is a sign of aggressiveness, which will be appreciated, and rewarded, by the public. It may truly be said that the public admires aggressiveness in a business firm. "Good fellow that and right out for business," remarks the average man, when some evidence comes to his notice of the enterprising methods of a certain merchant. "I'll deal with him." And he always does until, perhaps, some other merchant, more enterprising still, wins his notice.

This applies to paint as well as to all other branches of the hardware business. There is, of course, a certain demand for paint which can be described as inevitable. Over and above that sure amount of business, there is a margin, which can be obtained by the dealer who cares to go after it. Very frequently that margin of trade represents the difference between profit and loss.

ADVENT OF LOWE BROS. CO.

As exclusively announced in Hardware and Metal issue of June 10, another United States firm of paint manufacturers is about to enter the Canadian field, this firm being the Lowe Bros. Company whose headquarters are in Dayton, Ohio. It was stated in our previous report that Lowe Bros. Company were associating themselves with the paint department of the James Robertson Co., Toronto, but it was not stated nor was it the intention to imply that the James Robertson Co. were to retire from the paint manufacturing business.

Official announcement of the new connection is made in a circular letter which the James Robertson Co. have this week issued to their customers. This letter reads as follows:

An unauthorized report has been circulated to the effect that we are to retire from the paint manufacturing business.

This report we deny emphatically.

On the contrary, we have made arrangements whereby our paint business will be largely extended and will be promoted upon more progressive and aggressive lines than heretofore.

We are connecting our paint interests with those of the Lowe Brothers Company, whose main plant is located at Dayton, Ohio, with branches in New York, Boston, Chicago and Kansas City. The new organization will be unique, in that it will unite the prestige, strength and experience of both firms, and will insure such satisfactory service to our customers as to merit their full interests and confidence.

As a result of constant study, experiment and research, the application of scientific principles, and exacting care as to details, the Lowe Brothers Company has attained such a high degree of quality and efficiency in its paints and varnishes that its products are universally recognized as High Standard in fact as well as in name.

The sales and advertising methods which have contributed so largely to the successful developing of the Lowe Brothers Company's business in the United

States will be duplicated in Canada, and the proposition as a whole cannot fail to appeal to you favorably.

When the details of our plans have been completed another announcement will be issued, and in the meantime, upon our assurance that your interests will not only be safeguarded but advanced under the new arrangement, we trust that we may count upon your loyalty and faithfulness to us and our products.

Yours sincerely,

THE JAMES ROBERTSON CO., LTD.,
H. S. Harwood,
Manager.

Develop the Telephone Ear

Taking Orders on the Phone is an Art—Make it Easy for Customers to Use Your Phone—Patience and Courtesy are Essentials.

"Send up three pounds of white lead right away," commanded the customer.

"What's that ?" bellowed the clerk, at the top of his voice.

"Three pounds of white lead." The customer fairly roared the order.

"White—what ?"

"Lead ! L-e-a-d—lead."

"Oh—white lead. Three pounds. Anything else ?"

"And a pound of wire nails—about an inch and a half long."

"Pound of wire nails—yes—and what else did you say ?"

"I didn't say anything else—except, that I want the nails about an inch and a half long."

"Oh. And who's speaking ?"

"John Graves."

"John Bray. Thank you, Mr. Bray."

"Graves. Graves, I say."

"Oh, Gray. Thank you—"

"I said Graves—G-r-a-v-e-s."

"Oh. We'll have the stuff up right away, Mr. Graves."

Such an incident as the foregoing between clerk and customer is impossible, you say ? No conversation just like that, or anywhere near that, ever volleyed across a counter.

No—but conversations like that go hurling over the telephone between clerk and customer every day. And there's no fundamental difference between an order taken across the counter and an order taken over the telephone.

Telephone service is probably bad, you protest ? Don't—please don't. Before you kick against the service ask yourself this one question : "Have I done my utmost to understand, and to make myself understood ?"

For the taking of phone orders is an art. As in all arts, natural aptitude counts for a powerful lot. Here and there a store clerk develops what you might call the telephone ear, and over the rottenest phone service in America will take order after order and never mistake an item or ask a customer to repeat. And other clerks can't go to the telephone without working themselves and their customers into a fine frenzy and chirping the transmitter so full of cuss words that the girls at Central pray on bended knees for earmuffs.

Telephone order-taking—telephone salesmanship—isn't all a matter of the goodness or badness of the telephone service. Mental concentration looms up big in the count. Half the kicks about bad 'phone service would just kick themselves out were the clerk (and likewise the customer) to concentrate his entire mind on the business in hand. The successful phone salesman the minute he hears the jingling bell gives himself a sort of " 'Tention ! Eyes front !" command, and takes down the receiver with his mind already attuned to catch the greeting from the other end of the wire. And, while talking, he thinks of nothing else but that one order, and shuts out of his mind all other persons save the man at the other end of the wire.

Oh, yes, I know the customer makes all sorts of allowance. A chap who would throw a fit if you acted that way with just the counter intervening thinks nothing of the stunts you pull off over the wires. He forgives you, and cusses the telephone service.

But that doesn't let you out. The fact that you're sure to be forgiven isn't any excuse for a fault. The fact that most telephone order-takers tangle themselves up only prods you the harder when you go and do likewise. For, were you to perform the miracle of taking an order down right off the reel and getting it correctly—don't you think the novel and delightful experience would charm the lucky cuss at the other end of the wire into "coming again ?"

TESTING BABBITT METALS.

Any experienced babbitt man knows that mere hardness in a babbitt metal expresses only a comparatively unimportant phase of the conditions to be met and that are requisite in practical use. In fact, the very ingredients that harden a metal if used beyond a certain quantity, impair its anti-frictional qualities and it is therefore more liable to heat and run out of the box. The average shaft is so designed that it rarely, if ever, imposes upon the bearing a greater weight than it can safely sustain; in fact there is usually a large factor of safety, as the ordinary babbitt under compression test will sustain a weight of four or five tons per square inch.

What is it then that ordinary mortals want to know or ought to know about babbitt metals ? Is not the whole story that is worth while told by a test that shows the comparative values of babbitt metals from the co-efficients ? It certainly ought to be, if the tests are made properly, for such tests will of necessity show the value and capacity of the metals under varying loads and speeds up to their maxium capacity. Such tests should also be made with lubricants of different viscosities and also with water as a lubricant. Will metals stand the water test—for it is well to know how a metal will perform in case the oil supply gives out or the oil holes become clogged.

Lubricants, particularly of high viscosity, interpose a thin film between the shaft and the bearing and will bolster up to a considerable extent a very ordinary babbitt, but when you come down to the water test, you get at the very heart of things and it will give you the true innate anti-frictional values of the metals tested. Probably 90 per cent. of babbitt troubles are due to frictional heat; sometimes supplemented by initial heat and if a metal lacks anti-frictional qualities, what availeth it to be hard, as hardness will not protect it from heating and squashing, in fact it will run out of box much quicker than will an anti-friction metal that might show considerably less sustaining powers under compression test. There is a great deal of misinformation on this subject of mere hardness in babbitt metals and there are engineers and mechanics who still form their opinion of a babbitt by whittling on it with a pocket knife.

It is axiomatic that if a metal heats readily it is due to frictional resistance and that frictional resistance is caused by the interlocking and tearing apart of the two surfaces in contact. This waste of power causes a greater consumption of coal, lubricants and metal ; it necessitates more frequent rebabbitting, and there is the liability of "shut downs" and over-loading the boilers.

The Dunnville hardware men have decided to close every night at 6 o'clock except on Saturday and before holidays.

Our selling plan will interest you if you want to do a bigger and more profitable paint business.

Wouldn't You Like to Know How We Help Our Dealers Sell

M (MAPLE LEAF) **L** **Pure Paints**

Two coats of M-L equal three coats of the best of other brands. Made in 47 different colors and tints for every use of paint, inside or out.

M (MAPLE LEAF) **L** **Floorglaze**

sells best of all wood-finishes because it has so many points of superiority. Best-advertised and easiest-selling brand in Canada.

M (MAPLE LEAF) **L** **Elastilite Varnish**

No varnish like it. Good for good jobs—not bad for the other kind. Flows free, brushes easily, dries well. Just what you want for people who want varnish in a hurry.

PAINT AND OIL MARKETS

MONTREAL.

Montreal, June 30.— Business during past week has been characterized by a good flow of orders and markets may be said to be in a healthy condition. Fluctuations have been few with the exception of turpentine which has declined rather sharply. A local retailer stated recently that his business in paints and oils this year had been greater than last and that he had had as much as he could attend to. The first purchases had proved too little and stocks had to be filled in here and there. One of the local manufacturers speaking about business since the first of January stated that each month's returns had shown a higher figure than the returns for the corresponding months last year, all of which is rather gratifying intelligence.

Linseed Oil.—The demand appears to be easing off a little now that the heavy rush for spring shipments is over. It is likely that for quantities buyers may obtain some concessions but for ordinary purchases quotations are stationary, i.e., $1.03 for raw, and $1.06 for boiled.

Turpentine.—Turpentine has undergone a sharp decline in price during the week owing to favorable weather conditions and abundant supplies. It has been felt for some time that if excessive high prices were maintained substitutes would be employed more than ever, and probably large holders saw the force of this argument and have put the selling price on a more moderate basis. The price is now 76c.

Arsenate of Lead.—Government journals issued in connection with the department of agriculture are again advocating the use of arsenate of lead and there has been a slight improvement in the sale of this article. It is thought, however, that the season is now almost finished for its distribution. Prices are: In bbls., about 800 lbs., 9c; in half-bbls., about 400 lbs., 9½c; in 25-lb. wooden kegs, 10c; 5-lb. bottles 12c; in 2-lb. bottles, 13c; in 1-lb. bottles, 14c.

Paris Green.—The demand for Paris green is rather erratic. Sluggishness is followed by extreme activity and in turn the virility seems to wane and shipments get down to the normal. However, the market is almost bare and any sustained demand is likely to send prices up with alarming rapidity. Prices are as follows:—In barrels, about 600 lbs., 17c per lb.; arsenic kegs, 250 lbs., 17¼c.; 50-lb. and 100-lb. drums, 18¼c; 25-lb. and 100-lb. drums, 18¾c; 1-lb. packets, 100 lbs. in case, 20¼c per lb.; 1-lb. packets, 50 lbs. in case, 20¾c per lb.; ½-lb. packets, 100 lbs. in case, 22¼c per lb.; 1-lb. tins, 100 lbs. in case, 21½c per lb.

Varnishes.—A most satisfactory trade is reported in house and carriage varnishes. Good, clear, bright gum is reported to be exceedingly scarce, denoting a good demand for high class varnishes. Japans are also feeling the good movement in the paint and oil trade and shellacs are in fair but steady demand.

Putty.—There is a steady demand for putty at former prices. Conditions are featureless. Existing prices of putty are:—Bulk, bbls., $2.20; bulk, cwts, $2.45; bladder, bbls., $2.70; bladder, cwts., $2.80; 25's, loose, $2.25; 25's, cased, $2.70; 12½'s, cased, $2.90.

White Lead.—There is still a fair trade in white lead. Orders are coming in steadily if they are not quite as bulky as those of some time ago. Prices are steady as follows: Lots of one ton, $5.85; contracts of five tons and over, $5.70; shipments less than one ton, $6 f.o.b. Montreal.

TORONTO.

Toronto, June 79.—There is an active tone to the paint and oil market, the demand being well distributed. In some lines, the orders are largely of the sorting up variety but they are sufficiently large to make up a satisfactory volume.

Turpentine and linseed oil have both fallen off a few cents. In the case of turpentine, local jobbers state that they are offering it at a decreased price in spite of higher prices on the other side. This is due largely to the fact that opposition from United States sources has developed recently. Turuentine is being sold in some parts of Canada by American concerns at a lower price then they are asking in the United States.

Linseed Oil.—Canadian crushers have reduced their price on linseed oil 1 cent per gallon, and the jobbers have made a cut of 2 cents per gallon for single barrel lots. This makes the local price $1.05 for raw and $1.08 for boiled oil. The Canadian crushers seem to be running short of stock, which is a frequent occurrence at this season of the year.

It is reported that the wheat raisers in the West are anticipating some difficulty in getting their crops harvested. this year owing to the scarcity of labor. If such proves to be the case, it is rather to be expected that the flaxseed will be neglected. It is, therefore, not impossible that it will be more than two months before the Canadian seed is ready for shipment.

Turpentine.—The price of turpentine is still on the downward path. Supplies have been coming forward to the primary shipping points in larger bulk during the past two months than for some years. This has brought the price down much lower than was anticipated during the early part of the season. Some speculators were prepared a few months ago to contract for turpentine at fully 10 cents per gallon higher than the selling price two weeks ago. The market now seems to be steady as the supplies that come forward from day to day are all taken up by the shippers and, while there is a larger supply stored at Jacksonville and Savannah now than at this time last year, the demand is keeping pace and it is not believed that the accumulation is sufficient to affect the price.

The local quotation at time of writing is 75 cents. It is unanimously felt that the price has now touched rock bottom and that lower quotations are not to be expected.

Rosin.—While the price has declined a little during the past two weeks, the figure is still very high. It is thought that speculators at Savannah are preparing to take all the stock coming forward and hold it to prevent further reductions. It is claimed by some that a further decline in the common grades of rosin may be looked for during the next two mooths.

Putty.—There is a steady demand with prices firm. Standard putty is quoted at: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the sgme; bulk in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

White Lead.— The consumption is quite satisfactory. Some jobbers report a larger volume of business now than at the corresponding period last year, or for some years past for that matter. This is due, in some degree, to the uncertainty which existed as to the price a few months ago.

Prepared Paints.— The supply houses and manufacturers are largely engaged in filling sorting up orders but it is an exceptionally good sorting up business. Stock orders in the spring were in many cases smaller than usual, some dealers having the idea apparently that prices would go down later. They are now shorter than usual at this season of the year and in consequence are ordering in larger bulk.

Varnishes and Japans. — The same condition prevails with reference to varnishes and Japans of all kinds. A good sorting-up business is being done.

Glass.—The advance of the building season sees a growth in the demand for glass and large orders are now being placed.

Petroleum.—There is a steady demand. Prices remain at: Canadian prime white, 12c; United States water white, 13½c; Pratt's Astral, 15½c.

"Suggestion Book"—A twenty-four page booklet of fine-colored prints of harmonious color schemes for interiors and exteriors.

¶ The mission of paint is to beautify and protect.

¶ The mission of the "Suggestion Book" is to meet the request made of us by customers all over the Dominion for suggestions for harmonious color combinations.

¶ This book enables agents for B.-H. "English" Paint to advise their customers regarding colors for home decorations and to show prospective customers how various color combinations would appear on buildings of different architectural designs.

¶ Any enterprising merchant anywhere will have a permanent profitable paint department with B.-H. "English" Paint and B.-H. selling helps.

¶ If there is no B.-H. "English" Paint agency in your town, write our nearest office.

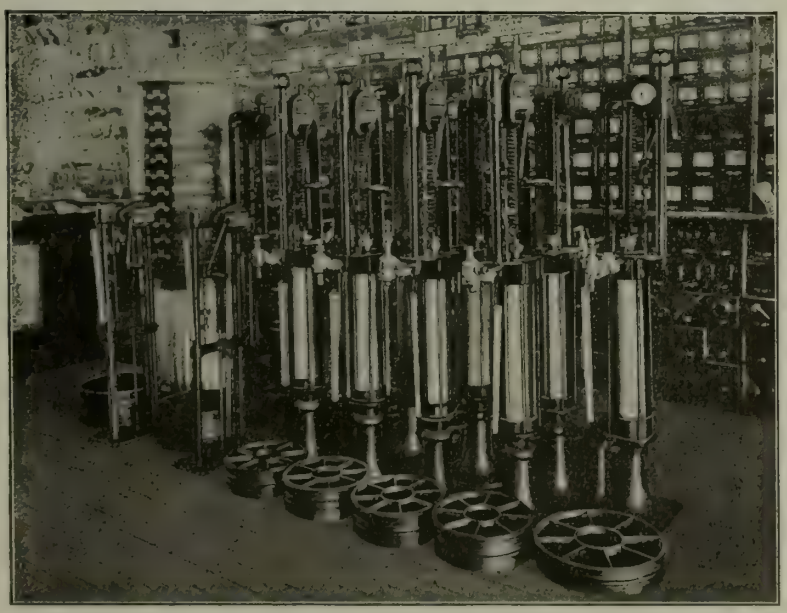
BOECKH'S BROOMS

ARE IN DEMAND

The demand all over Canada for them is a result—not an accident. It is the result of a persistent policy of high-class materials and expert workmanship. We use only selected corn in our Brooms. The Brooms are put together in a finished and workmanlike manner. Write for full particulars and prices.



THE BOECKH BROS. COMPANY, Ltd.

TORONTO, CANADA

FACTORIES, 158 TO 168 ADELAIDE ST. WEST — OFFICES, 80 YORK STREET

This cut is reproduced from a photograph of a Bowser System installed for Geo. W. Ecclestone, Bracebridge, Ontario.

We will reproduce another installation in the next issue of this magazine.

This system handles

Boiled Linseed
Raw Linseed
Turpentine
Machine
Engine
Castor
Cylinder
Separator
Gas Engine and
Fly Oil

No evaporation nor waste.

A Profitable Way to Handle Paint Oils

Do you know that paint oils can be handled without waste? The Bowser System does away with measures and funnels. They measure the oil, count the gallons pumped and show the money charged for it.

They put every cent of paint oil profit in your pocket. They are safe, space saving, clean and profitable. They buy themselves by their saving. Don't spend your money, **invest** it in a Bowser. Ask for catalogue No. 1 N, it's FREE.

A Real Surety Bond

CONGO ROOFING

THE owner of a building covered with Congo has the satisfaction of knowing that his roof is *guaranteed for ten years.*

In each roll of Congo 2 ply and 3 ply is a *genuine legally binding Surety Bond* issued by the National Surety Company of New York.

This year we will guarantee thousands of roofs to *last till 1921.*

Guaranteed Until 1921

Of course we are not going to lose—we are offering a sure thing. We know Congo will last *more* than ten years. One thing the guarantee forces upon us: it makes us extremely careful in manufacturing.

We provide, free of charge, *galvanized* iron caps which are rust proof and will last as long as the roofing.

Send for free copy of our Guarantee Bond, a sample of Congo Roofing and further information.

UNITED ROOFING AND MFG. CO., Philadelphia, Pa.

Stark, Seybold, Limited, Montreal; Mechanics' Supply Co., Quebec; S. Hayward & Co., St. John, N.B.; Miller-Morse Hardware Co., Winnipeg; E. G. Prior & Co., Limited, Victoria, B.C.; Hobbs Hardware Co., London, Ont.; Fife Hardware Co., Fort William, Ont.

They Stand The Weather Test!

Ability to withstand wide variations of temperature is a first consideration with the building papers and roofings you handle. In this respect our

"Ready" Roofing and "Black Diamond" Tarred Felt and "Cyclone" and "Joliette" Building Papers

are well worthy of your recommendation, and they are, moreover, profitable lines to handle. They can be laid by any ordinary workman, and never fail to give the fullest satisfaction to your customer. We also make a full line of Wrapping Papers.

Western Agent—F. J. COX, Winnipeg.

Ramsay's Varnishes

One of the greatest lines for profit in the business is the Varnish Line.

Study this line carefully.

You ought to have the profit.

Varnishes in tin provide the best profit, because it is quick and no waste.

The Ramsay lines of Varnishes are leading everywhere, because they have the greatest value for the smallest price. They are favorites. Here is one of them.

Ramsay's Universal Varnish is the big leader to-day. It has been out, tried and proved for years.

It is in general use for Counters, Doors, Carriages, Sleighs, Floors, Desks, Boats, Wainscots, Oil-cloths, Etc.

Have Ramsay's Universal, and you have a Varnish for all. Drop us a card and we will tell you more about it.

EPOCH

It is said that the Paint Trade of the Dominion of Canada is divided into two great epochs, viz.: before the advent of the Canada Paint Company and after.

BEFORE

The trade was in a crude and backward state and the hardware trade divided the limited business with the Chemists, Druggists, and the Corner Grocery;

AFTER

The Canada Paint Company was formed, by paying particular attention to the Hardware Trade and getting out specialties in advance of requirements the volume of painting purchases went up by leaps and bounds and the

PRESTIGE

of the Canada Paint Company was at once established and assured. Imitators are as thick as Autumn Leaves, but it is unanimously conceded that all experienced buyers still turn to the Canada Paint Company as their

MECCA

from which they obtain first-class, up-to-date colors, stains and varnishes. It is also as natural for anyone starting afresh in business to go to The Canada Paint Company with his opening order as for a painter to reach for an iron of Genuine "Elephant" White Lead when sallying forth to his labor.

WE LEAD THE WORLD

The ever-increasing demand for

BEAR BRAND LAMPS BLACK

has necessitated this increase in our manufacturing facilities, as shown in the figures below:

	CAPACITY
1902 - - -	3,000,000 pounds
1905 - - -	6,000,000 "
1911 - - -	10,000,000 "

Our growth is entirely due to the consistent high quality and absolute uniformity and purity of our products, together with the courteous treatment always extended to our customers.

If you are not using OUR BLACKS, write us and we will submit samples and prices which will save you money and secure your orders.

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer.

RATES—2c per word first insertion.
1c per word subsequent insertion.
5c additional each insertion when Box Number is required.

BUSINESS CHANCES

AN OLD-ESTABLISHED tinsmith, plumbing and heating business, or will sell only the workshop and contents, with that part of the business; a good chance for the right man. A. KEELE, Prescott, Ontario. (26)

FOR SALE—Hardware, heating and plumbing business in live town. Stock small. Owner wants to go West. Box 515, HARDWARE AND METAL, Toronto. (24tf)

FOR SALE—Fine new, clean, up-to-date stock of hardware, stoves, granite and tinware in an excellent farming country. Good live town of 4,000. Stock about $5,000. Last year's turnover nearly $18,000. Owner interested in the West. Box 1086, HARDWARE AND METAL, Toronto. (7tf)

FOR SALE — Old established hardware and coal business. Or, one of present proprietors would take partner with some capital. Box 204, Iroquois, Ontario. (27)

FOR SALE—Hardware, stove and granite business. Established thirty years, doing a splendid business, stock will run about seven thousand and in fine shape. Yearly turnover twenty thousand; good store, can be rented or bought; fine farming country. This business will stand closest inspection. At rate on the dollar. Wish to retire. D. FERGUSON, Teeswater. (16tf)

WANTED—Five to six thousand dollar hardware business in first-class Ontario town in exchange for first-class quarter wheat land in Saskatchewan. Box 522, HARDWARE AND METAL, Toronto. (28)

ARTICLES FOR SALE

FOR Sale, set of tin shop tools in good condition, at low price, McCAGUE & WATSON, Stayner, Ontario. (27)

PATTERN DRAWING

A CHEAP, PRACTICAL and Complete Home Study Course on Sheet Metal Pattern Drafting, Estimating and Construction. Send for particulars to THE SHEET METAL SCHOOL, Box 419, Galt, Ont. (21tf)

MISCELLANEOUS

ACCURATE COST KEEPING IS EASY if you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto.

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COPELAND-CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

COUNTER Check Books—Especially made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for Binders and Monthly Account Systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

BUSINESS GETTING Typewritten Letters and Real Printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms—real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Company, Ltd., 129 Bay Street, Toronto.

DOUBLE YOUR FLOOR SPACE — By installing an Otis-Fensom handpower elevator you can use upper floor as stock room or extra selling space and increase space on ground floor. Costs only $70. Write catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS are devised to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE. INSURE IN THE HARTFORD. Agencies everywhere in Canada.

HUNDREDS OF TYPEWRITERS of every make and condition are being traded in as part payment on the famous Monarch. Price and quality are the levers we use to prevent over stock. We believe we can give the best bargains in rebuilt typewriters in Canada. A postal will bring our catalogue and full information. The Monarch Typewriter Co., Limited, 46 Adelaide Street West, Toronto.

KAY'S FURNITURE CATALOGUE No. 306 contains 160 pages of fine half-tone engravings of newest designs in carpets, rugs, furniture, draperies, wall papers and pottery, with cash prices. Write for a copy—it's free. John Kay Co., Ltd., 36 King St. West, Toronto.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost. "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN PENS. If you have Fountain Pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. GAGE & CO., Limited, Toronto, sole agents for Canada.

PENS—The very best pens made are those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c assorted box of Mitchell's Pens and find the pen to suit you.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto (tf)

WAREHOUSE AND FACTORY HEATING SYSTEMS. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

YOU don't buy a National Cash Register—it pays for itself. Saves money. Prevents mistakes. We can prove it. National Cash Register Co., 285 Yonge Street, Toronto.

IN THIS PAPER.

NEU-TONE

An Artistic, Flat, Washable, Wall Finish.

Is a bonanza for the paint dealer; it opens an entirely new and highly profitable field for the paint store.

The out-of-date custom of finishing walls with Kalsomine or Wallpaper leaves little chance for profit to the dealer, in addition the non-permanent qualities of these finishes unjustly reflect discredit on the dealer who sells them.

When a man finishes his walls he expects them to last for sometime; naturally at the first appearance of spots or mars he will censure the dealer.

If you carry Neu-tone there will be satisfaction resulting from each sale when your customers see the ease with which their walls can be cleaned with soap and water. It's a big seller, and a sure repeater. The profits are steady.

We have a Neu-tone proposition open for you. Just advise us your name and address — we will tell you the rest.

The Martin-Senour Co., Limited

Pioneers of Pure Paint

MONTREAL CHICAGO

We Have the Goods

All the Varnishes that we make undergo the same careful treatment. We make every kind and every grade of Varnish and it's all made to give satisfaction.

The kind of goods which you should sell to your customer are those which will please him and which will prove to him that your recommendation is worth having. You will benefit by this reputation, and your business will grow.

DOUGALL VARNISHES will help to build this reputation for you. We know that our varnishes will give satisfaction. We take care of that in the making of them.

Think it over. It means money to you.

There is a Nicholson-made File for every filing purpose

Among the many other reasons why dealers should handle Nicholson-made files is their great range of shapes and grades. Each file for each purpose is made in the shape and of the grade of steel that our long specialized experience has shown to be the very best for the purpose.

In Canada, the favorite Nicholson-made files are:

"AMERICAN" "ARCADE" "GREAT WESTERN" "GLOBE"
"EAGLE" "McLELLAN" "KEARNEY & FOOT" "J. B. SMITH"

Sell these lines. You are backed by all the great prestige of the Nicholson File Company, and your file stock is the line acknowledged to be the standard of file quality. Your jobber can supply you.

Up-To-Date Package Carriers

Our package carriers are of simple construction and in case of disarrangement of any part do not require a mechanic to repair them.

They are well and strongly made throughout, and as the weight and strain are divided between two wires there is less liability to breakage of the wires than with any of the single wire systems.

The illustration shows the neatness and compactness of the device. It occupies a smaller space and obstructs the view less than any other system.

A SUPERIOR ADVANTAGE.

This carrier works more rapidly as well as more smoothly than any other.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

BUTTERMAKERS DEMAND

THE "FAVORITE" CHURN

because they know it is the best. A glance at its construction—that light, but rigid angle steel frame, the bolted trunnions, the tight and conveniently arranged cover, the combined hand and foot drive, the roller bearings—these very evident advantages convince one of its superiority, which is fully proven by actual churning tests. As a natural result, more "FAVORITES" are sold in Canada than all other churns combined. 8 sizes, to churn from ½ to 30 gallons.

David Maxwell & Sons, St. Mary's, Ont.

Pumps that Carry Good Will

Dealers that sell McDougall's "Aremacdee" Hand or Motor Metal Force or Lift Pumps give their customers lasting satisfaction.

THE CONNOR BALL-BEARING WASHER

With the hinged cover now used on this Washer it is no longer necessary for the operator to place the cover and rubbing board dripping wet onto the kitchen floor. With this hinged rubber and cover the water drips back into the machine. It is easily handled. And other features of this machine are a detachable tub; no iron running through the bottom of the tub; Cypress Tubs: nicely finished Ball - Bearings and Motor Springs do most of the work.

Have you the agency for this washer? If not, write at once for sample, prices, terms, etc. You will find it the most satisfactory machine you ever handled.

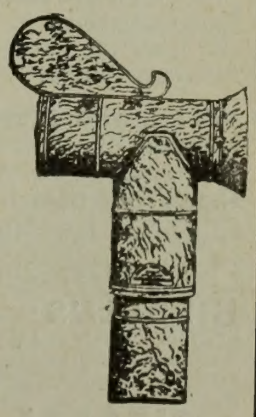
Merrick-Anderson Co., Winnipeg, Agents for Manitoba, Saskatchewan and Alberta. Geo. D. Horsman, 338 Granville St., Vancouver, Agent for British Columbia.



FIX UP YOUR CHIMNEYS

Even the best stove or furnace will be unsatisfactory if the chimney does not draw well. But the

"Zephyr Ventilator"

will give a good draft to any chimney. It will even allow the burning of soft coal in the stove, with good results.

We want you to sell the "Zephyr Ventilator" in your town. There is money in it, and the satisfaction that it gives will bring you new customers. **The "Zephyr"** cannot be excelled for ventilating the rooms of **Clubs, Steam Laundries,** etc. **The "Zephyr" makes high chimneys unnecessary.**

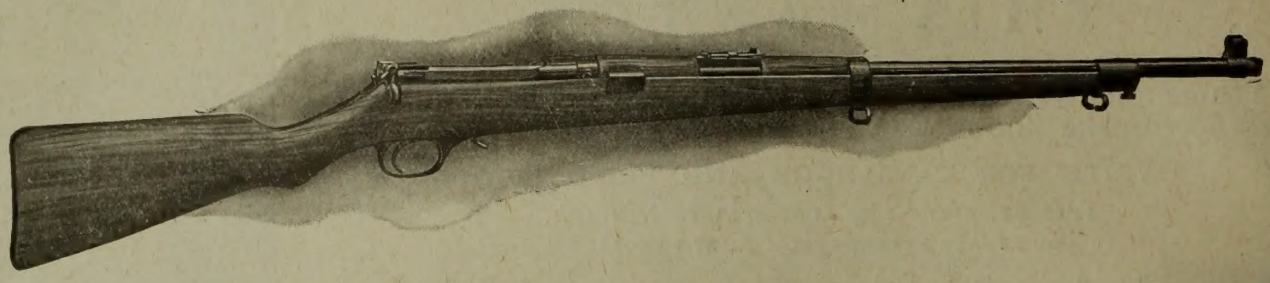
Montreal, Dec. 4th, 1905

J. W. Harris Mfg. Co., Ltd.
Montreal, Que.

Gentlemen:—

It pleases me to be in a position to state that the "Zephyr" Ventilator placed on my chimney is giving me the greatest satisfaction

The smoke which we used to have in the house has completely disappeared, owing to the good work of your "Zephyr" Ventilator.



I remain, gentlemen,
Yours truly,
T. A. GAUTHIER,
128 St. Elizabeth St.

Bissell's "Cyco" BALL BEARING Sweeper

Is not the "Just as good" kind, BUT THE BEST

When every manufacturer of a distinct article claims his product is the best, it is self-evident that the buying public is finally influenced in making a purchase by something more than the mere claims of the manufacturer. Here is where reputation counts, where long experience in the manufacture of an article means much, and where the public ask the question "are they exclusive manufacturers of a product or do they make several different things?"

We feel we are justified in emphasizing these facts, that we are the only exclusive manufacturers of carpet sweepers in the world, that we have had thirty-five years' continuous experience in the manufacture and sale of this product, that it follows logically that we should, and have produced the best carpet sweeper the world has ever known, and that the **BISSELL** commands the bulk of the sweeper trade in every country in both hemispheres were carpets and rugs are used.

BISSELL'S "Cyco" BALL BEARING Sweeper runs so easy, a mere touch propels it, and takes up the dust and dirt with despatch and thoroughness, brightens and preserves carpets and rugs, costs but a trifle and lasts for years.

LUTHER TOOL GRINDERS

Fitted with Carborundum sharpening wheels—25 times faster than grindstones—6 times faster than emery wheels.

Big labor-saver — Big sales — Good profits.

32 different types--Hand and foot power Tool Grinders

Every farmer, mechanic, carpenter, shop, factory and contractor has use for the Luther Grinder, with genuine Carborundum wheels. Built like a high grade lathe and covered by patents. 25 times faster than the grindstone—6 times faster than emery wheels, and more durable than either.

Needs no water cooling. Sharpens the hardest steel at lightest touch—*will not draw temper from steel.*

Special attachments for all kinds of difficult sharpening, polishing and grinding, such as gumming saws, sharpening twist drills, etc. Best steel and malleable construction, with bronze, dust-proof bearings in oil bath, machine cut spur gears.

Largest manufacturers of hand and foot power grinders in the world.

Everyone who has tools to sharpen can pay for the Luther Grinder many times by saving in time, consequently Luther Grinders are easy to sell. Write for illustrated booklet and liberal prices to dealers.

LUTHER GRINDER MFG. CO., 1296 Madison Street, Milwaukee, Wis.
